REPORT OF THE JOINT SUBCOMMITTEE STUDYING

Construction of a Superhighway Along Virginia's Southern Boundary

TO THE GOVERNOR AND THE GENERAL ASSEMBLY OF VIRGINIA

HOUSE DOCUMENT NO. 50

Summary

Even a superficial examination of the economics and demographics of South-central and Southwest Virginia (see, for example, data presented on p. 3 of this report) will suffice to show that these regions lag behind the remainder of the Commonwealth in economic development. A similarly cursory look at a map will also show that these areas lack the modern east-west highway infrastructure without which even the most carefully considered campaign to attract new industry, expand employment opportunities, and diversify the regional economy is bound to fail.

On the other hand, if adequate resources were made available to provide a safe, efficient, modern highway linking Southwest and South-central Virginia to Virginia's most potent economic resource — the port of Hampton Roads—along the Commonwealth's southern boundary (the existing US Route 58 Corridor), the potential business and manufacturing sites of Southern Virginia would not only be linked to the Virginia market, but also to the broader eastern United States market, and the whole world market as well. Similarly, such an additional access route would open all of Southern Virginia for tourism and recreational travel, literally, from the mountains to the sea, while vastly improving local transportation as well.

In approving House Joint Resolution No. 172 and requesting a joint subcommittee to consider these matters, the General Assembly specifically asked that consideration be given to the desirability and feasibility of financing construction of such a highway with nonhighway revenues. After considering the merits and difficulties inherent in this and other approaches, the Joint Subcommittee recommends that the project be undertaken, not with general fund revenues, but with Transportation Trust Fund revenues, by setting aside 8.4 percent of the revenues raised by the 1986 Special Session of the General Assembly as the US Route 58 Corridor Development Fund. This would make available to this project the same amount of state revenue presently dedicated to the support of mass transit in Virginia. The Joint Subcommittee is persuaded that the reductions this approach would cause in funding of other highway projects across the Commonwealth would be more than offset by the economic benefits which would accrue, not only along the Corridor, but ultimately to all Virginians.

Having recommended the broad outline of a US Route 58 Corridor development program, the Joint Subcommittee believes that matters of priorities, route, design, scheduling, and other details should be left to the Commonwealth Transportation Board and the Department of Transportation.

General Background

Transportation is a vital prerequisite for economic development. In the past two decades both the geographic and the economic landscape of Virginia has been transformed by the construction of six major interstate highways: I-64, I-66, I-77, I-81, I-85, and I-95. These highways have not only brought the various regions of the Commonwealth closer to one another, they have also provided seedbeds for economic growth and increased job opportunities along their routes. Northern Virginia, the Richmond metropolitan area, and Hampton Roads have been linked by I-95; Northern Virginia, the Roanoke metropolitan area, and Southwest Virginia have been joined by I-85; Northern Virginia has been bound to the Shenandoah Valley by I-66; and Central Virginia has been joined both to the Valley and to the Urban Crescent by I-64. Absent, however from this geometry of growth has been any comparable highway tie between Hampton Roads and Southwest Virginia along Virginia's southern boundary. US Route 58, the last portion of which (between Volney and Damascus) was even not paved until 1949-50, continues to provide the only direct highway connection between the Southwest and the Southeast.

Mindful of this simultaneous challenge and opportunity provided by the Route 58 Corridor, the 1988 General Assembly approved House Joint Resolution No. 172, creating a joint subcommittee "...to study construction of a superhighway along Virginia's southern boundary." In commissioning this study, the General Assembly felt the issue to be of sufficient importance specifically to charge the Subcommittee with considering the desirability and feasibility of financing construction of this project "...from nonhighway revenues, in order to provide a vital transportation link joining Virginia's port to her prime farming and mining areas." Both the General Assembly and the Subcommittee viewed the goal of the project, from the very beginning, as not merely the upgrading of a transportation resource, but the creation of a vital economic development tool.

Subcommittee Activities

The Joint Subcommittee began its work with extensive briefings by staff of the Department of Transportation on existing plans for improvements to Route 58 and other highways in the Route 58 Corridor, engineering difficulties presented by construction of a "superhighway" along the present alignment of Route 58, and the costs of various alternative strategies for providing the desired highway connection between the Southwest and the Southeast.

Following this orientation, the group met informally with concerned citizens and officials of local government within the Corridor, took testimony from all interested parties at a formal public hearing, and evaluated additional valuable comments provided through correspondence received by its staff. (See Appendix II: Selected Correspondence.)

Findings and Recommendations

MANY OF THE NEEDS AND MUCH OF THE POTENTIAL OF THE ROUTE 58 CORRIDOR CAN READILY BE SEEN BY EVEN A CURSORY LOOK AT A FEW STATISTICS.

Counties in US 5	8 Corridor

^{*}Served by no interstate highway.

[†]Served only by north-south interstate highway.

Taken from "Estimates of the Population of Virginia Counties and Cities, 1986-87," published by the Center for Public Service, University of Virginia. ²Taken from Virginia Statistical Abstract, 1987.

Only one locality in the Corridor (Virginia Beach) has a per capita income higher than the state average. Only three localities in the Corridor (Southampton County, Norfolk, and Virginia Beach) have unemployment rates lower than the state average, while five (Russell County, Washington County, Brunswick County, Norton, and Danville) have unemployment rates more than double the state average, with the highest Corridor unemployment (Russell County) being more than 3.2 times the state average. It is informative to note that while the Corridor contains 26.63 percent of Virginia's population, its people earn only 4.2 percent of Virginia's travel-generated income.

THERE IS NO DISPUTING THE LINK BETWEEN TRANSPORTATION AND ECONOMIC DEVELOPMENT. Without a way of bringing labor and resources together to make a product, and without a way of moving that product to markets, no economic development occurs. Today more than ever, businesses compete with one another not regionally or even nationally, but globally. For an enterprise to survive, it must not only produce a quality product, it must get that product to market at least as fast and as cheaply as its competition. An inadequate transportation system dooms businesses from the start by imposing on them excessive time and money costs.

INTERSTATE HIGHWAY ACCESS IS PARTICULARLY DESIRABLE FOR ATTRACTING NEW BUSINESS AND STIMULATING EXISTING BUSINESSES. The interstate highway system was conceived during World War II, when it became obvious that the country's military potential was being limited by the inability of America's highways to move supplies in the quantities and with the speed required by modern warfare. With the completion of the first significant portions of the interstate highway system in the late 'fifties and early 'sixties, manufacturers and shippers were quick to take advantage of the competitive "edge" which the new highways offered them. For two decades, Virginia's economic growth was most rapid along corridors served by interstate highways. Although interstate highways presently make up only 1.9 percent of Virginia's public highways, they carry 24 percent of the vehicle miles travelled in Virginia.

¹In the most recent year, 54.8 billion total vehicle miles were traveled on all Virginia public highways, while 13.0 billion vehicle miles were traveled on Virginia interstate highways during the same period. Source: Virginia Department of Transportation.

THE CORRIDOR'S TRANSPORTATION RESOURCES, ESPECIALLY INTERSTATE HIGHWAY ACCESS, ARE MEAGER. Of the 54,006 miles of public highways in Virginia, 1,052 miles are interstate highways. Few interstate highways serve the localities along the Route 58 Corridor, and those interstate highways which do serve these localities do not provide even a reasonably convenient route for persons or cargoes that need to move east or west through the Corridor. Of the thirty localities (seventeen counties and thirteen cities) along the US 58 Corridor, twelve counties (Lee, Scott, Wise, Russell, Grayson, Floyd, Patrick, Henry, Pittsylvania, Halifax, Southampton, and Isle of Wight) and seven cities (Norton, Galax, Martinsville, Danville, South Boston, Franklin, and Suffolk) have no interstate highway access at all, and of those localities which are served by interstate highways, only in Chesapeake, Portsmouth, Norfolk and Virginia Beach does the highway run east and west. One must bear in mind, though, that Interstate 64 connects these port cities with western Virginia via Richmond, Staunton, and Roanoke, and not directly. Out of 1,800 miles of arterial highways in the Commonwealth, only one, US Route 58, serves the entire Corridor, and even US Route 58 ceases to be an arterial route west of Interstate Route 77.

THE COMMONWEALTH CANNOT RELY ON THE FEDERAL INTERSTATE **POST-INTERSTATE** SYSTEM OR A FEDERAL SYSTEM TO SOUTH-CENTRAL VIRGINIA TO ECONOMIC DEVELOPMENT. Construction of the interstate highway system, both in Virginia and nation-wide, is now all but complete. In Virginia, only forty-five miles of the system remain to be constructed, and there is no chance that the Route 58 Corridor can be included in the system. While it is conceivable that Route 58 could be improved as part of a post-interstate federal highway system, not even a general outline of such a system has so far emerged form the federal Highway Administration, the federal Department of Transportation, or the Congress. Even while discussions are held on the form or purpose of a post-interstate highway program, speculation persists that the federal role in highway construction may be sharply curtailed, and that responsibility for highways will be returned, at least in large measure, to the states, while the Congress resorts to the highway trust fund as a source of revenue from which to help balance the federal budget. Unless the Commonwealth is willing to permit the economic stagnation -- if not degeneration -- of its south-central localities, it must look to its own resources in seeking to open these localities to economic development.

²"Virginia Facts and Figures, 1988"; James Ruehrmund, Jr., ed. (Commonwealth of Virginia, 1988), p. 16.

IMPROVEMENT OF THE ROUTE 58 CORRIDOR WOULD HAVE ECONOMIC BENEFITS FOR THE COMMONWEALTH AS A WHOLE. Fifteen percent of the "new money" made available for transportation purposes by the 1986 Special Session of the General Assembly is set aside for the development of ports, airports, and mass transportation. (See §§ 33.1-23.03:2, 58.1-638, and 58.1-2425, Code of Virginia.) In setting aside specific revenues for these purposes, the General Assembly recognized that addressing the peculiar transportation needs of specific regions of the Commonwealth, such as Northern Virginia or Hampton, Roads, could have statewide economic benefits. This same approach can be taken with the US 58 Corridor. While the localities along this highway derive, at best, modest direct benefits for the relief of highway congestion in Virginia's urban centers or from the promotion and development of the port of Hampton Roads, they could derive considerable benefits in many ways form dedication of state revenue to the improvement of Route 58. By contributing to the economic growth of Southside Virginia, the General Assembly would be contributing to the economic prosperity of the Commonwealth as a whole through the relief of the region's considerable unemployment and the improvement of its personal income level.

A KEY TO CORRIDOR DEVELOPMENT IS LINKING SOUTH-CENTRAL AND SOUTHWEST VIRGINIA TO THE PORT OF HAMPTON ROADS. The Port of Hampton Roads not only was second in the US in total foreign trade tonnage in 1986, but, more importantly from an economic development standpoint, has led all US ports year after year in total export tonnage. Chief among the exports moving through Hampton Roads has been a product vital to the economy of Southwest Virginia: coal. Hampton Roads boasts five coal loading facilities with a combined capacity of 90 million tons. Fully half of the US export coal tonnage passes through Hampton Roads. But coal is not the only factor. Whatever the product, Hampton Roads is served regularly by eighty steamship lines, linking it to 270 ports in 100 foreign countries. By upgrading the capacity of Route 58, which carries forty-five percent of the port's landside transportation, the 135 motor carriers which move seventy percent of Hampton Roads' cargo to or from the port, would effectively make world markets available to any Virginia producer or manufacturer. The port's 97,000 square feet of warehouse space on a twenty-two acre site can be used for storage, distribution, and even light assembly of nearly any kind of cargo. In this context, improvements to the Corridor highways become a critical link in the vital chain of economic growth and employment diversification for all of southern Virginia.

¹Truck traffic estimates supplied by the Virginia Department of Transportation; other data from "Virginia Facts and Figures, 1988"; James Ruehrmund, Jr., ed. (Commonwealth of Virginia, 1988), p. 16.

LOCALITIES ALONG ROUTE 58 COULD BENEFIT FROM HIGHWAY MODERNIZATION AND IMPROVEMENTS IN MANY WAYS. The way and degree in which these improvements might be experienced vary from one locality to another, but generally the greatest benefit would accrue to those localities west of Martinsville, where the terrain is the most difficult and the existing roadway least adequate. In this general area, construction of the "multilane, divided highway" contemplated in House Joint Resolution No. 172 (1988) might not be necessary in order to have a strongly positive impact on the transportation resources. Simply widening, straightening, and reducing the grade of existing Route 58, particularly between Damascus and Volney, could produce local impact which might result from construction of a "superhighway" in other places:

- •Improve tourist access (particularly for recreation vehicles, camping trailers, and motor homes) to Grayson Highlands State Park and the Mount Rogers National Recreation Area;
- •Provide a route usable by longer, wider trucks, particularly those of the region's growing Christmas tree and dairy industries, which cannot be accommodated by the area's existing roads;
- •Enable local school divisions more efficiently to transport their pupils and reduce the time pupils spend on buses each day;
- •Improve access to the region by law-enforcement vehicles and egress for ambulances and rescue vehicles from the area to regional medical centers;
- •Provide access for Washington, Grayson, and western Carroll Counties to the major farmers' market planned to be constructed at the junction of US Route 58 and Interstate 77; and
- •Provide a tool to assist in expansion and diversification of the region's economic base, reduce unemployment, and increase per capita income.

ADEQUATE FUNDING FOR OVERHAUL OF ROUTE 58 IS POSSIBLE. Estimates prepared by the Virginia Department of Transportation place the cost of providing a multilane, divided highway "from Cumberland Gap to the Sea" at between \$1.178 billion (following the existing Route 58 Corridor with bypasses around population concentrations) and \$637 million (following Interstate 81 from Bristol to Interstate 77, following Interstate 77 to existing Route 58, and following the US Route 58 Corridor to Hampton Roads). If one applies 8.4 percent (the same percentage as allocated by statute for the Commonwealth Mass Transit Fund) "off the top" of the "new money" this will generate \$36.9 million in fiscal year 1990, \$38.8 million in fiscal year 1991, \$41.1 million in fiscal year 1992, \$43.7 million in fiscal year 1993, and \$46.1 million in fiscal year 1994.¹ By adopting this approach, setting aside the same amount of funds for Corridor development as presently dedicated to mass transit needs, the Subcommittee finds it both desirable and feasible to meet the Corridor's urgent transportation needs without resorting to a general fund revenue source, as contemplated in HJR 172.

¹Source: Estimates prepared for the Subcommittee by the Virginia Department of Transportation. (See also Appendix III.)

IN THE COURSE OF ITS WORK, THE JOINT SUBCOMMITTEE HEARD MANY PROPOSALS FOR SPECIFIC ROUTES AND CONFIGURATIONS "SOUTHSIDE SUPERHIGHWAY." The suggestion which appeared to have the widest support recognized that difficult terrain and environmental sensitivity in the vicinity of Mount Rogers contributed greatly to the cost of a project whose route would follow existing Route 58, and favored construction of this portion of the highway (roughly between Damascus and Volney) as a "super two-lane" highway, while building the remainder as a multilane, divided highway. This concept has the merit of being a balanced approach, taking into account not only local needs and potential, but also competing needs and relative costs. Even recognizing the resources -- both economic and human -- which construction of a "superhighway" through the Route 58 Corridor could develop, the Joint Subcommittee is sensitive to the need to balance the transportation needs of the Route 58 Corridor with those of other parts of the Commonwealth. Route 58 has been variously described as the "main street" and the "windpipe" of Southside Virginia, and in view of the considerable need of the region for economic development and the considerable potential for assisting this development through improvements to this highway, the cost of upgrading Route 58 to a "superhighway" may be, as one speaker at a public hearing in Abingdon expressed it, a relatively small nonrecurring expense to pay for year after year of economic growth.

PRIORITIES, ROUTE, DESIGN, SCHEDULING, AND OTHER DETAILS WOULD BEST BE LEFT TO THE PROFESSIONALS. The Joint Subcommittee has no intention of "second guessing" the priorities of the Commonwealth Transportation Board or the professional judgment of the Virginia Department of Transportation, but the group wishes to ensure that the needs of the Route 58 Corridor and its potential for growth — given adequate transportation resources — are brought to the attention of the Board and the Department. The Joint Subcommittee is recommending, though, that a serious, long-term, multiyear program be undertaken by the Department, under the guidance of the Board, to augment the highway transportation resources in the US Route 58 Corridor, and that five percent of the revenues derived from the enactment of Chapters 11, 12, and 15 of the Acts of Assembly of 1986 be earmarked to finance this program.

Respectfully submitted,

```

- 1 General Assembly. (1986, Sp. Sess., c. 13.)
- § 58.1-638. Disposition of state sales and use tax revenue;
- 3 localities' share. -- A. The Comptroller shall designate a specific
- 4 revenue code number for all the state sales and use tax revenue
- 5 collected under the preceding sections of this chapter.
- 6 1. The sales and use tax revenue generated by the one-half
- 7 percent sales and use tax increase enacted by the 1986 Special Session
- 8 of the General Assembly shall be paid, in the manner hereinafter
- 9 provided in this section, to the Transportation Trust Fund as defined
- 10 in § 33.1-23.03:1. Of the funds paid to the Transportation Trust Fund,
- 11 an aggregate of 8.4 percent shall be set aside as the U.S. Route 58
- 12 Corridor Development Fund as hereinafter provided; an aggregate of 4.2
- 13 percent shall be set aside as the Commonwealth Port Fund as
- 14 hereinafter provided; an aggregate of 2.4 percent shall be set aside
- 15 as the Commonwealth Airport Fund as hereinafter provided; and an
- 16 aggregate of 8.4 percent shall be set aside as the Commonwealth Mass
- 17 Transit Fund as hereinafter provided. The Fund's share of such net
- 18 revenue shall be computed as an estimate of the net revenue to be
- 19 received into the state treasury each month, and such estimated
- 20 payment shall be adjusted for the actual net revenue received in the
- 21 preceding month. All payments shall be made to the Fund on the last
- 22 day of each month.
- 23 la. There is hereby created in the Department of the Treasury a
- 24 special nonreverting fund which shall be a part of the Transportation
- 25 Trust Fund and which shall be known as the U.S. Route 58 Corridor
- 26 Development Fund.
- 27 a. The U.S. Route-58 Corridor Development Fund shall be
- 28 established on the books of the Comptroller and the funds remaining in

1 such Fund at the end of a biennium shall not revert to the general

- 2 fund but shall remain in the Fund. Interest earned on such funds
- 3 shall remain in the Fund and be credited to it. Allocations from this
- 4 Fund may be paid to any authority, locality, or commission for the
- 5 purposes specified in this subsection.
- 6 b. Allocations from this Fund shall be made by the Commonwealth
- 7 Transportation Board for the creation and enhancement of a safe,
- 8 efficient highway connecting the communities, businesses, places of
- 9 employment, and residents of the south-westernmost portion of the
- 10 Commonwealth to the communities, businesses, places of employment, and
- 11 residents of the south-easternmost portion of the Commonwealth,
- 12 thereby enhancing the economic development potential, employment
- 13 opportunities, and quality of life in the region.
- 14 c. Allocations from the Fund shall not diminish or replace
- 15 allocations made or planned to be made from other sources or diminish
- 16 allocations to which any highway, project, facility, district, system,
- 17 or locality would be entitled under other provisions of this title,
- 18 but shall be supplemental to other allocations to the end that highway
- 19 resource improvements in the U.S. Route 58 Corridor may be accelerated
- 20 and augmented. Allocations from the Fund may be applied to highway
- 21 projects in the interstate, primary, secondary, or urban system,
- 22 contrary provisions of this title notwithstanding. Allocations under
- 23 this subsection shall not be limited to projects involving only
- 24 existing U.S. Route 58, but may be made to projects involving other
- 25 highways, provided that the broader goal of creation of an adequate
- 26 modern highway generally along Virginia's southern boundary is served
- 27 thereby.
- 28 2. There is hereby created in the Department of the Treasury a

1 special nonreverting fund which shall be a part of the Transportation

- 2 Trust Fund and which shall be known as the Commonwealth Port Fund.
- 3 a. The Commonwealth Port Fund shall be established on the books
- 4 of the Comptroller and the funds remaining in such Fund at the end of
- 5 a biennium shall not revert to the general fund but shall remain in
- 6 the Fund. Interest earned on such funds shall remain in the Fund and
- 7 be credited to it. Funds may be paid to any authority, locality or
- 8 commission for the purposes hereinafter specified.
- 9 b. The amounts allocated pursuant to this section shall be
- 10 allocated by the Commonwealth Transportation Board to the Board of
- 11 Commissioners of the Virginia Port Authority to be used to support
- 12 port capital needs and the preservation of existing capital needs of
- 13 all ocean, river, or tributary ports within the Commonwealth.
- 14 c. Commonwealth Port Fund revenue shall be allocated by the Board
- 15 of Commissioners to the Virginia Port Authority in order to foster and
- 16 stimulate the flow of maritime commerce through the ports of Virginia,
- 17 including but not limited to the ports of Richmond, Hopewell and
- 18 Alexandria.
- 19 3. There is hereby created in the Department of the Treasury a
- 20 special nonreverting fund which shall be part of the Transportation
- 21 Trust Fund and which shall be known as the Commonwealth Airport Fund.
- 22 The Commonwealth Airport Fund shall be established on the books of the
- 23 Comptroller and any funds remaining in such Fund at the end of a
- 24 biennium shall not revert to the general fund but shall remain in the
- 25 Fund. Interest earned on the funds shall be credited to the Fund. The
- 26 funds so allocated shall be allocated by the Commonwealth
- 27 Transportation Fund to the Virginia Aviation Board. The funds shall be
- 28 allocated by the Virginia Aviation Board to any Virginia airport which

1 is owned by the Commonwealth, a governmental subdivision thereof, a

- 2 governmental authority created by an interstate compact, or a private
- 3 entity to which the public has access for the purposes enumerated in §
- 4 5.1-2.16 as follows:
- 5 a. Forty percent of the funds shall be allocated to air carrier
- 6 airports based upon the percentage of enplanements for each airport to
- 7 total enplanements at air carrier airports. No air carrier airport,
- 8 however, shall receive less than \$50,000 nor more than two million
- 9 dollars per year from this provision.
- 10 b. Forty percent of the funds shall be allocated by the Aviation
- 11 Board for air carrier and reliever airports on a discretionary basis.
- c. Twenty percent of the funds shall be allocated by the Aviation
- 13 Board for general aviation airports on a discretionary basis.
- 4. There is hereby created in the Department of the Treasury a
- 15 special nonreverting fund which shall be a part of the Transportation
- 16 Trust Fund and which shall be known as the Commonwealth Mass Transit
- 17 Fund.
- a. The Commonwealth Mass Transit Fund shall be established on the
- 19 books of the Comptroller and any funds remaining in such Fund at the
- 20 end of the biennium shall not revert to the general fund but shall
- 21 remain in the Fund. Interest earned on such funds shall be credited to
- 22 the Fund. Funds may be paid to any local governing body,
- 23 transportation district commission or public service corporation for
- 24 the purposes hereinafter specified.
- 25 b. The amounts allocated pursuant to this section may be used to
- 26 support a maximum of fifty percent of the public transportation
- 27 administrative costs and up to eighty percent of the costs of
- 28 ridesharing programs borne by the locality. These amounts may be used

1 to support up to ninety-five percent of the local or nonfederal share

- 2 of capital project costs for public transportation and ridesharing
- 3 equipment, facilities, and associated costs. Capital costs may include
- 4 debt service payments on local or agency transit bonds. Further, these
- 5 amounts may be used to support a maximum of ninety-five percent of the
- 6 costs borne by the locality for the purchase of fuels, lubricants,
- 7 tires and maintenance parts and supplies for public transportation.
- 8 The term "borne by the locality" shall mean the local share eligible
- 9 for state assistance consisting of costs in excess of the sum of fares
- 10 and other operating revenues plus federal assistance received by the
- 11 locality.
- 12 c. Commonwealth Mass Transit Fund revenue shall be allocated by
- 13 the Commonwealth Transportation Board as follows:
- 14 (1) Funds for special programs, which shall include ridesharing,
- 15 experimental transit, and technical assistance, shall not exceed 1.5
- 16 percent of the Fund.
- 17 (2) The Board may allocate these funds to any locality or
- 18 planning district commission to finance up to eighty percent of the
- 19 local share of all costs associated with the development,
- 20 implementation, and continuation of ridesharing programs.
- 21 (3) Funds allocated for experimental transit projects may be paid
- 22 to any local governing body, transportation district commission, or
- 23 public corporation or may be used directly by the Department of
- 24 Transportation for the following purposes:
- 25 (a) To finance up to ninety-five percent of the capital costs
- 26 related to the development, implementation and promotion of
- 27 experimental public transportation and ridesharing projects approved
- 28 by the Board.

1 (b) To finance up to ninety-five percent of the operating costs

- 2 of experimental mass transportation and ridesharing projects approved
- 3 by the Board for a period of time not to exceed twelve months.
- 4 (c) To finance up to ninety-five percent of the cost of the
- 5 development and implementation of any other project designated by the
- 6 Board where the purpose of such project is to enhance the provision
- 7 and use of public transportation services.
- 8 d. Funds allocated for public transportation promotion and
- 9 operation studies may be paid to any local governing body, planning
- 10 district commission, transportation district commission, or public
- 11 transit corporation, or may be used directly by the Department of
- 12 Transportation for the following purposes and aid of public
- 13 transportation services:
- 14 (1) At the approval of the Board to finance a program
- 15 administered by the Department of Transportation designed to promote
- 16 the use of public transportation and ridesharing throughout Virginia.
- 17 (2) To finance up to fifty percent of the local share of public
- 18 transportation operations planning and technical study projects
- 19 approved by the Board.
- e. At least 73.5 percent of the Fund shall be distributed to each
- 21 transit property in the same proportion as its operating expenses bear
- 22 to the total statewide operating expenses and shall be spent for the
- 23 purposes specified above in subdivision 4 b.
- f. The remaining twenty-five percent shall be distributed for
- 25 capital purposes on the basis of ninety-five percent of the nonfederal
- 26 share for federal projects and ninety-five percent of the total costs
- 27 for nonfederal projects. In the event that total capital funds
- 28 available under this paragraph are insufficient to fund the complete

- 1 list of eligible projects, the funds shall be distributed to each
- 2 transit property in the same proportion that such capital expenditure
- 3 bears to the statewide total of capital projects.
- 5. Funds for Metro shall be paid by the Northern Virginia
- 5 Transportation Commission to the Washington Metropolitan Area Transit
- 6 Authority (WMATA) and be a credit to the Counties of Arlington and
- 7 Fairfax and the Cities of Alexandria, Falls Church and Fairfax in the
- 8 following manner:
- 9 a. Local payments of WMATA rail transit bonds shall be paid first
- 10 and apportioned to each locality using the WMATA capital formula.
- 11 b. The remaining funds shall be apportioned by calculating
- 12 twenty-five percent of the capital and operating costs and
- 13 seventy-five percent of the capital and operating subsidies applied to
- 14 each locality. Capital costs may include twenty percent of annual
- 15 local bus capital expenses.
- 16 Appropriations from the Commonwealth Mass Transit Fund are
- 17 intended to provide a stable and reliable source of revenue as defined
- 18 by Public Law 96-184.
- B. The sales and use tax revenue generated by a one percent sales
- 20 and use tax shall be distributed among the counties and cities of this
- 21 Commonwealth in the manner hereafter in this section provided.
- 22 C. The localities' share of the net revenue distributable under
- 23 this section among the counties and cities shall be apportioned by the
- 24 Comptroller and distributed among them by warrants of the Comptroller
- 25 drawn on the Treasurer of Virginia as soon as practicable after the
- 26 close of each month during which the net revenue was received into the
- 27 state treasury. The distribution of the localities' share of such net
- 28 revenue shall be computed with respect to the net revenue received

1 into the state treasury during each month, and such distribution shall

- 2 be made as soon as practicable after the close of each such month.
- 3 D. The net revenue so distributable among the counties and cities
- 4 shall be apportioned and distributed upon the basis as certified to
- 5 the Comptroller by the Department of Education, of the number of
- 6 children in each county and city according to the most recent
- 7 statewide census of school population taken by the Department of
- 8 Education pursuant to § 22.1-284 of the Code of Virginia, as adjusted
- 9 in the manner hereinafter provided. No special school population
- 10 census, other than a statewide census, shall be used as the basis of
- 11 apportionment and distribution except that in any calendar year in
- 12 which a statewide census is not reported, the Department of Education
- 13 shall adjust such school population figures by the same percent of
- 14 annual change in total population estimated for each locality by the
- 15 Tayloe Murphy Institute. The revenue so apportionable and
- 16 distributable is hereby appropriated to the several counties and
- 17 cities for maintenance, operation, capital outlays, debt and interest
- 18 payments, or other expenses incurred in the operation of the public
- 19 schools, which shall be considered as funds raised from local
- 20 resources. In any county, however, wherein is situated any
- 21 incorporated town constituting a school division, the county treasurer
- 22 shall pay into the town treasury for maintenance, operation, capital
- 23 outlays, debt and interest payments, or other expenses incurred in the
- 24 operation of the public schools, the proper proportionate amount
- 25 received by him in the ratio that the school population of such town
- 26 bears to the school population of the entire county. If the school
- 27 population of any city or of any town constituting a school division
- 28 is increased by the annexation of territory since the last preceding

1 school population census, such increase shall, for the purposes of

- 2 this section, be added to the school population of such city or town
- 3 as shown by the last such census and a proper reduction made in the
- 4 school population of the county or counties from which the annexed
- 5 territory was acquired.
- 6 E. If errors are made in any distribution, or adjustments are
- 7 otherwise necessary, the errors shall be corrected and adjustments
- 8 made in the distribution for the next quarter or for subsequent
- 9 quarters.
- 10 F. The term "net revenue," as used in this section, means the
- 11 gross revenue received into the general fund or the Transportation
- 12 Trust Fund of the state treasury under the preceding sections of this
- 13 chapter, less refunds to taxpayers.
- 14 § 58.1-2425. Disposition of revenues.--A. All funds collected
- 15 hereunder by the Commissioner shall be forthwith paid into the state
- 16 treasury. The revenue so derived, after refunds have been deducted, is
- 17 hereby allocated for the construction, reconstruction and maintenance
- 18 of highways and the regulation of traffic thereon and for no other
- 19 purpose. However, (i) all funds collected pursuant to the provisions
- 20 of this chapter from mobile homes, as defined in § 46.1-1, shall be
- 21 distributed to the city, town, for county wherein such mobile home is
- 22 to be situated as a dwelling, (ii) all funds collected from the
- 23 additional tax imposed by subdivision A 4 of § 58.1-2402 on the rental
- 24 of daily rental passenger cars shall be distributed quarterly to the
- 25 city, town, or county wherein such car was delivered to the rentee,
- 26 and (iii) effective January 1, 1987, an amount equivalent to the net
- 27 additional revenues generated by enactments of the 1986 Special '
- 28 Session of the Virginia General Assembly which amended §§ 46.1-149,

1 46.1-154, 58.1-2401, 58.1-2402 and this section shall be distributed

- 2 to and paid into the Transportation Trust Fund, and are hereby
- 3 appropriated to the Commonwealth Transportation Board for
- 4 transportation needs, and (iv) except as otherwise provided in
- 5 subdivision (iii) of this sentence, all moneys collected from the tax
- 6 on the gross proceeds from the rental in Virginia of any motor vehicle
- 7 pursuant to subdivision A 3 of § 58.1-2402 at the tax rate in effect
- 8 on December 31, 1986, shall be paid by the commissioner into the state
- 9 treasury and shall be set aside in a special fund to be used to meet
- 10 the expenses of the Department of Motor Vehicles.
- 11 B. Of the funds becoming part of the Transportation Trust Fund
- 12 pursuant to clause (iii) of subsection A of this section, an aggregate
- of 8.4 percent shall be set aside as the U.S. Route 58 Corridor
- 14 Development Fund to be used as provided in subdivisions 1 through 5 of
- 15 subsection A of § 58.1-638; an aggregate of 4.2 percent shall be set
- 16 aside as the Commonwealth Port Fund as hereinafter provided in
- 17 subdivisions 1 through 5 of subsection A of § 58.1-638; an aggregate
- 18 of 2.4 percent shall be set aside as the Commonwealth Airport Fund as
- 19 hereinafter provided in subdivisions 1 through 5 of subsection A of §
- 20 58.1-638; and an aggregate of 8.4 percent shall be set aside as the
- 21 Commonwealth Mass Transit Fund as hereinafter provided in subdivisions
- 22 1 through 5 of subsection A of § 58.1-638.
- 23 C. There is hereby created in the Department of the Treasury a
- 24 special nonreverting fund which shall be a part of the Transportation
- 25 Trust Fund and which shall be known as the Commonwealth Port Fund-
- 26 % 1. The Commonwealth Port Fund shall be established on the books
- 27 of Comptroller and any funds remaining in such fund at the end of a
- 28 biennium shall not revert to the general fund but shall remain in the

1 Fund: Interest earned on such funds shall remain in the Fund and be

- 2 eredited to it. Funds may be paid to any authority, locality or
- 3 commission for the purposes hereinafter specified-
- 4 2. The amounts allocated pursuant to this section shall be
- 5 allocated by the Commonwealth Transportation Board to the Board of
- 6 Commissioners of the Virginia Port Authority to be used to support
- 7 port capital needs and the preservation of existing capital of all
- 8 ocean, river or tributary ports within the Commonwealth.
- 9 3. Commonwealth Port Fund revenue shall be allocated by the Board
- 10 of Commissioners of the Virginia Port Authority in order to foster and
- 11 stimulate the flow of maritime commerce through the ports of Virginia,
- 12 including, but not limited to, the ports of Richmond, Hopewell and
- 13 Alexandria-
- 14 D. There is hereby created in the Department of the Treasury a
- 15 special nonreverting fund which shall be part of the Transportation
- 16 Trust Fund and which shall be known as the Commonwealth Airport Fund-
- 17 This Fund shall be established on the books of the Comptroller and any
- 18 funds remaining in such Fund at the end of a biennium shall not revert
- 19 to the general fund but shall remain in the Fund. Interest earned on
- 20 the fund shall be credited to the Fund. The funds so allocated shall
- 21 be so allocated by the Commonwealth Transportation Fund to the
- 22 Virginia Aviation Board. The funds allocated by the Virginia Aviation
- 23 Beard to any Virginia airport which is owned by the Commonwealth, a
- 24 governmental subdivision thereof, a governmental authority created by
- 25 an interstate compact or a private entity to which the public has
- 26 access for the purposes enumerated in § 5-1-2-16 are as follows-
- 27 1. Forty percent of the funds shall be allocated to the air
- 28 earrier airports based upon the percentage of emplanements for each

1 airport to total emplanements at air earrier airports. No air earrier

- 2 airport, however, shall receive less than \$50,000 nor more than \$2
- 3 million per year from this provision.
- 4 2. Forty percent shall be allocated by the Aviation Board for air
- 5 earrier and reliever airports on a discretionary basis-
- 6 3. Twenty percent of the funds shall be allocated by the Aviation
- 7 Board for general aviation airports on a discretionary basis-
- 8 E. There is hereby created in the Department of the Treasury a
- 9 special nonreverting fund which shall be a part of the Transportation
- 10 Trust Fund and which shall be known as the Commonwealth Mass Transit
- 11 Fund-
- 12 1- The Commonwealth Mass Transit Fund shall be established on the
- 13 books of the Comptroller and any funds remaining in such Fund at the
- 14 end of the biennium shall not revert to the general fund but shall
- 15 remain in the Fund. Interest earned on such funds shall be credited to
- 16 the fund. Funds may be paid to any local governing body,
- 17 transportation district commission or public service corporation for
- 18 the purposes hereinafter specified-
- 19 2. The amounts allocated pursuant to this section may be used to
- 20 support a maximum of fifty percent of the public transportation
- 21 administrative costs and up to eighty percent of the costs of the
- 22 ridesharing programs borne by the locality. These amounts may be used
- 23 to support up to ninety-five percent of the local or nonfederal share
- 24 of the capital project costs for public transportation and ridesharing
- 25 equipment, facilities, and associated costs. Capital costs may include
- 26 debt service payments on local or agency transit bonds. Further, these
- 27 amounts may be used to support a maximum of ninety-five percent of the
- 28 costs borne by the locality for the purchase of fucts, lubricants,

DF 0 / 0 2 4 U

1 tires and maintenance parts and supplies for public transportation.

- 2 The term "borne by the locality" shall mean the local share eligible
- 3 for state assistance consisting of costs in excess of the sum of fare
- 4 and other operating revenues plus federal assistance received by the
- 5 lecality:
- 6 3. Commonwealth Mass Transit Fund revenue shall be allocated by
- 7 the Commonwealth Transportation Board as follows:
- 8 a. Funds for special programs, which shall include ridesharing,
- 9 experimental transit and technical assistance, shall not exceed one
- 10 and one-half percent of the Fund-
- 11 (1) The board may allocate these funds to any locality or
- 12 planning district commission to finance up to eighty percent of the
- 13 local share of all costs associated with the development,
- 14 implementation and continuation of ridesharing programs-
- 15 (2) Funds allocated for experimental transit projects may be paid
- 16 to any local governing body, transportation district commission or
- 17 public corporation or may be used directly by the Department of
- 18 Transportation for the following purposes:
- 19 (a) To finance up to ninety-five percent of the capital costs
- 20 related to the development; implementation and promotion of
- 21 experimental public transportation and ridesharing projects approved
 - 22 by the Beard.
 - 23 (b) To finance up to ninety-five percent of the operating costs
 - 24 of experimental mass transportation and ridesharing projects approved
 - 25 by the Board for a period of time not to exceed twelve months-
 - 26 (e) To finance up to ninety-five percent of the cost of the
 - 27 development and implementation of any other project designated by the
 - 28 Board where the purpose of such project is to enhance the provision

- 1 and use of public transportation services.
- 2 (3) Funds allocated for public transportation promotion and
- 3 operation studies may be paid to any local governing body, planning
- 4 district commission, transportation district commission, or public
- 5 transit corporation, or may be used directly by the Department of
- 6 Transportation for the following purposes and aid of public
- 7 transportation services:
- 8 (a) At the approval of the Board to finance a program
- 9 administered by the Department of Transportation designed to promote
- 10 the use of public transportation and ridesharing throughout Virginia.
- 11 (b) To finance up to fifty percent of the local share of public
- 12 transportation operations planning and technical study projects
- 13 approved by the Board-
- b. At least 73.5 percent of the Fund shall be distributed to each
- 15 transit property in the same proportion as its operating expenses bear
- 16 to the total statewide operating expenses and shall be spent for the
- 17 purposes specified in subdivision E 2-
- 18 c. The remaining twenty-five percent shall be distributed for
- 19 capital purposes on the basis of ninety-five percent of the nonfederal
- 20 share for federal projects and ninety-five percent of the total costs
- 21 for nonfederal projects. In the event that total capital funds
- 22 available under this subdivision are insufficient to fund the complete
- 23 list of eligible projects, the funds shall be distributed to each
- 24 transit property in the same propertion that such capital expenditure
- 25 bears to the statewide total of capital projects-
- 26 d. Funds for Metro shall be paid by the Northern Virginia
- 27 Transportation Commission to the Washington Metropolitan Area Transit
- 28 Authority (WMATA) and be a credit to the Counties of Arlington and

1 Fairfax and the Cities of Alexandria, Falls Church and Fairfax in the

- 2 following manner:
- 3 (1) Local payments of WMATA rail transit bonds shall be paid
- 4 first and apportioned to each locality using the WMATA capital
- 5 fermula-
- 6 (2) The remaining funds shall be apportioned by calculating
- 7 twenty-five percent of the capital and operating costs and
- 8 seventy-five percent of the capital and operating subsidies applied to
- 9 each locality. Capital costs may include twenty percent of annual
- 10 local bus capital expenses:
- 11 Appropriations from the Commonwealth Mass Transit Fund are
- 12 intended to provide a stable and reliable source of revenue as defined
- 13 by Public Law 96-184-
- 14 2. That the third enactment of Chapter 15 of the Acts of Assembly of
- 15 the Special Session of 1986 is amended and reenacted as follows:
- 16 3. That the net additional revenues generated by this act shall be
- 17 distributed to and paid into the Transportation Trust Fund and are
- 18 hereby appropriated to the Commonwealth Transportation Board for
- 19 transportation purposes as provided in subdivisions 1 through 5 of
- 20 subsection A of § 58.1-638 .
- 21 A: Of the net additional revenues becoming part of the
- 22 Transportation Trust Fund pursuant to the provisions of this act, an
- 23 aggregate of 4-2% shall be set aside as the Commonwealth Port Fund as
- 24 hereinafter provided, an aggregate of 2-4% shall be set aside as the
- 25 Commonwealth Airport Fund as hereinafter provided; and an aggregate of
- 26 8-4% shall be set aside as the Commonwealth Mass Transit Fund as
- 27 hereafter provided.
- 28 B. There is hereby created in the Department of the Treasury a

1 special nenreverting fund which shall be a part of the Transportation

- 2 Trust Fund and which shall be known as the Commonwealth Port Fund.
- 3 1- The Commonwealth Port Fund shall be established on the books
- 4 of the Comptroller and the funds remaining in such fund at the end of
- 5 a biennium shall not revert to the general fund but shall remain in
- 6 the Fund: Interest earned may be paid to any authority, locality or
- 7 commission for the purposes hereinafter specified-
- 8 2- The amounts allocated pursuant to this section shall be
- 9 allocated by the Commonwealth Transportation Board to the Board of
- 10 Commissioners of the Virginia Port Authority to be used to support
- 11 port capital needs and the preservation of existing capital needs of
- 12 all ecean, river or tributary ports within the Commonwealth.
- 13 3- Commonwealth Port Fund revenue shall be allocated by the
- 14 Beard of Commissioners of the Virginia Port Authority in order to
- 15 fester and stimulate the flow of maritime commerce through the ports
- 16 of Virginia, including but not limited to, the ports of Richmond,
- 17 Hepewell and Alexandria-
- 18 E. There is hereby created in the Department of the Treasury a
- 19 special nonreverting fund which shall be part of the Transportation
- 20 Trust Fund and which shall be known as the Commonwealth Airport Fund-
- 21 This Fund shall be established on the books of the Comptroller and any
- 22 funds remaining in such Fund at the end of a biennium shall not revert
- 23 to the general fund but shall remain in the Fund. Interest earned on
- 24 the funds shall be credited to the Fund. The funds so allocated shall
- 25 be allocated by the Commonwealth Transportation Fund to the Virginia
- 26 Aviation Board. The funds allocated by the Virginia Aviation Board to
- 27 any Virginia airport which is owned by the Commonwealth, a
- 28 governmental subdivision thereof, a governmental authority created by

- 1 an interstate compact or a private enity to which the public has
- 2 access for the purposes enumerated in § 5-1-2-16 are as follows:
- 3 1- Forty percent of the funds shall be allocated to the Air
- 4 Carrier Airports based upon the percentage of emplanements for each
- 5 airport to total emplanements at air earrier airports. No air earrier
- 6 airport, however, shall receive less than \$50,000 nor more than \$2
- 7 million per year from this provision.
- 8 2. Forty percent of the funds shall be allocated by the Virginia
- 9 Aviation Board for air earrier and reliever airports on a
- 10 discretionary basis-
- 11 3- Twenty percent of the funds shall be allocated by the
- 12 Virginia Aviation Board for General Aviation Airports on a
- 13 discretionary basis-
- 14 D. There is hereby created in the Department of the Treasury a
- 15 special nonreverting fund which shall be a part of the Transportation
- 16 Trust Fund and which shall be known as the Commonwealth Mass Transit
- 17 Fund-
- 18 1- The Commonwealth Mass Transit Fund shall be established on
- 19 the books of the Comptroller and any funds remaining in such Fund at
- 20 the end of the biennium shall not revert to the general fund but shall
- 21 remain in the Fund. Interest earned on such fund shall be credited to
- 22 the Fund: Funds may be paid to any local governing body,
- 23 transportation district commission or public service corporation for
- 24 the purposes hereinafter specified-
- 25 2. The amounts allocated pursuant to this section may be used to
- 26 support a maximum of 50% of the public transportation administrative
- 27 costs and up to 80% of the costs of ridesharing programs borne by the
- 28 locality: These amounts may be used to support up to 95% of the local

1 or nonfederal share of capital project costs for public transportation

- 2 and ridesharing equipment, facilities, and associated costs. Capital
- 3 costs may include debt service payments on local or agency transit
- 4 bends. Further, these amounts may be used to support a maximum of 95%
- 5 of the costs borne by the locality for the purchase of fuels,
- 6 lubricants, tires and maintenance parts and supplies for public
- 7 transportation. The term "borne by the locality" shall mean the local
- 8 share eligible for state assistance consisting of costs in excess of
- 9 the sum of fares and other operating revenues plus federal assistance
- 10 received by the locality:
- 11 3- Commonwealth Mass Transit Fund revenue shall be allocted by
- 12 the Commonwealth Transportation Board as follows:
- 13 a- Funds for special programs, which shall include ridesharing,
- 14 experimental transit and technical assistance, shall not exceed 1-5%
- 15 of the Fund-
- 16 (1) The Board may allocate these funds to any locality or
- 17 planning district commission to finance up to 80% of the local share
- 18 of all costs associated with the development, implementation and
- 19 continuation of ridesharing programs.
- 20 (2) Funds allocated for experimental transit projects may be paid
- 21 to any local governing body, transportation district commission, or
- 22 public corporation or may be used directly by the Department of
- 23 Transportation for the following purposes:
- 24 (a) To finance up to 95% of the capital costs related to the
- 25 development, implementation and promotion of experimental public
- 26 transportation and ridesharing projects approved by the Board-
- 27 (b) To finance up to 95% of the operating costs of experimental
- 28 mass transportation and ridesharing projects approved by the Board for

- 1 a period of time not to exceed twelve months.
- 2 (e) To finance up to 95% of the cost of the development and
- 3 implementation of any other project designated by the Board where the
- 4 purpose of such project is to enhance the provision and use of public
- 5 transportation services.
- 6 (3) Funds allocated for public transportation promotion and
- 7 operation studies may be paid to any local governing body, planning
- 8 district commission, transportation district commission, or public
- 9 transit corporation, or may be used directly by the Department of
- 10 Transportation for the following purposes and aid of public
- 11 transportation services:
- 12 (a) At the approval of the Board to finance a program
- 13 administered by the Department of Transportation designed to promote
- 14 the use of public transportation and ridesharing throughout Virginia-
- 15 (b) To finance up to 50% of the local share of public
- 16 transportation operations planning and technical study projects
- 17 approved by the Board-
- 18 b. At least 73.5% of the local Fund shall be distributed to each
- 19 transit property in the same proportion as its operating expenses bear
- 20 to the total statewide operating expenses and shall be spent for the
- 21 purposes specified in subdivision D 2
- 22 c. The remaining 25% shall be distributed for capital purposes
- 23 on the basis of 95% of the nonfederal share for federal projects and
- 24 95% of the total costs for nonfederal projects. In the event that
- 25 total capital funds available under this paragraph are insufficient to
- 26 fund the complete list of eligible projects, the funds shall be
- 27 distributed to each transit property in the same proportion that such
- 28 capital expenditure bears to the statewide total of capital projects-

1 d. Funds for Metro shall be paid by the Northern Vire	1	71141	northern	e northe:	tne	27	para	ᄝ	DRAII	E	COL L	ranas	a -	_

APPENDIX II Selected Correspondence

RESOLUTION SUPPORTING IMPROVEMENTS TO U. S. 58 CORRIDOR FROM CUMBERLAND GAP TO VIRGINIA BEACH

WHEREAS, balanced urban/rural economic growth is a key to the quality of life in Virginia; and

WHEREAS, a vital stimulant to economic growth is a strong arterial highway system; and

WHEREAS, the completion of U. S. 58 to arterial standards will give Virginia a strong east-west arterial highway system; and

WHEREAS, a committee of the General Assembly has been appointed to study the matter and make recommendations for improvements; and

WHEREAS, the committee has requested public input into the process of study;

NOW, THEREFORE, BE IT RESOLVED that the Mount Rogers Planning District Commission consisting of the Counties of Bland, Carroll, Grayson, Smyth, Washington, and Wythe and the Cities of Bristol, Virginia, and Galax doth hereby endorse and applaud the work of this august committee; and

BE IT FURTHER RESOLVED that the Planning District Commission doth hereby support the construction of four lanes of this highway from eastern Virginia to Volney in Grayson County; and

BE IT FURTHER RESOLVED that the Planning District Commission supports the construction of Route 58 from Volney to Damascus as a two-lane road widened, straightened, and improved in deference to its scenic qualities as well as its use as a national bike trail; Daniel Boone Heritage Trail; access to the Appalachian Trail and designated Wilderness Areas, Grayson Highlands State Park and the Mount Rogers National Recreation Area; and

BE IT FURTHER RESOLVED that the Planning District Commission supports the four-laning of U. S. 58 from Damascus to Weber City and Duffield to Cumberland Gap.

BE IT FURTHER RESOLVED that the Planning District Commission doth also support the completion of the work approved for U. S. 58A from Abingdon to Jonesville.

Approved: September 1, 1988

Thomas G. Taylor
Executive Director

SPENCER'S INCORPORATED OF MOUNT AIRY, NORTH CAROLINA 27030 / TELEPHONE 919-789-9111

September 9, 1988

TO: HJR-172 Study Committee

FROM: Spencer's Incorporated

P.O. Box 988

Mt. Airy, N.C. 27030

Spencer's Inc., a manufacturer of infants and childrens apparel, recently located a plant in the Industrial Park, Stuart, Virginia. This park is located off U.S. Route 58 in the town of Stuart.

During 1988, Spencer's has employed approximately two hundred (200) persons, and plans to increase it's work force to five hundred (500) plus during the next three to five years.

Presently the plant is supported by daily round-trip truck transportation from Mt. Airy, N.C. to Stuart, VA., via routes 8 and 103. As the plant continues to expand, the need for additional traffic between North Carolina and Stuart utilizing these routes will also increase.

Currently both routes 8 and 103 are not approved for wide trailers, and without an alternate route, or major, and costly improvements to these existing routes, this company will be forced to utilize numerous small trucks daily to support this plant.

In view of the above, coupled with Spencer's committment to expansion in the Stuart, Virginia area, this company strongly supports the proposed four lane highway, connecting with I77 at Cana, VA., as indicated in the 58 Corridor study prepared for HJR study committee by the Virginia Department of Transportation dated July 1988.

SPENCER'S INC.

Vice President

BS:sh

P. O. DRAWER 96 CLAUDVILLE, VA 24076

September 8, 1988

TO: H.J.R. - 172 STUDY COMMITTEE

FROM: THE RED BANK RURITAN CLUB

SUBJECT: "SUPER HIGHWAY" ROUTE 58 STUDY

The Red Bank Ruritan Club is centered in the community of Claudville, VA located in the southwest part of Patrick County. The Claudville community consists of ~ 375 families, one manufacturing business, several retail businesses and medical center, as well as several service businesses. We have recently been blessed with positive signs of growing.

We are taking this opportunity to say "thank you" for bringing forward the idea/thought of a "Super Highway" that involves Rt. 58. We are very excited about the economic growth a highway of this kind would bring to Virginia as well as our county. For this reason we as a Club and community support 100% the idea of a "Super Highway" concept and would encourage you to keep the energy and drive, because we all will be winners should this highway become reality.

We do ask that you give considerable thought to location of this potential highway. Thought considering the lay of land that could be involved - both from grading and preparing, as well as land that would be potentially opened up for industry and economic growth. We ask that you consider cost that would be involved in a highway of this potential. What we are saying here is "let's spend the money to build the highway, but build it where we can literally get more "Bang for the Bucks". We also would ask that you consider the type of gateway you can potentially open up. Example: Interstate 77, Rt. 52, as well as Interstate 40 could have the potential of short swing into southside Virginia and surrounding area.

Therefore, we strongly feel that the road should be located "below the mountain" and connect with I-77 near the Cana, Virginia area.

We ask that logic and common sense be utilized in the decision making process on location of the highway.

The Club would now say "thank you" for the opportunity of letting our views be known and would now go on record as to offering you any help that we can in the future. Should there be anything an organization like ours could do to aid or assist you, please feel free to let us know.

Sincerely.

Harold E. Slate, Secretary

RED BANK RURITAN CLUB

The Grayson County School Board

DR. SIDNEY B. HARVEY
SUPERINTENDENT

P.G. Box 219 Independence, Birginia 24348

TELEPHON

I would like to express my appreciation to this panel for the privilege of testifying on the improvements of Highway 58, more specifically, a four-lane road. I know of no one thing that can contribute to the overall efficiency or improvement of our schools than good roads.

In a twenty year period, Grayson County Schools have lost over 1,000 students. Much discussion has taken place as to the reasons for this loss of enrollment. Factory shutdowns, smaller families, weather conditions, the abandonment of the hydro-electric dam project, and many other things have been mentioned as a possible cause. However, we maintain that one of the major reasons for this loss of enrollment is due to the poor road system that has prevailed in Grayson County for the past three decades.

I am sure you will agree that good roads do bring jobs, do improve the economy, do keep people in the County and maintain a predictable school enrollment. So, with this in mind, we feel that poor road conditions have contributed to our enrollment problem. It has prevented us from consolidating schools to increase efficiency and reduce school costs per child.

Our cost per mile for transporting students is very high and, again, the reason for this is the roads that our buses must travel. We feel that if improvements are made and a four-lane road is built from Galax to Volney and improvement on Highway 58 from Volney to Damascus, it would increase the efficiency of our school system. This would enable us to provide better services to our schools, which has been a tremendous problem in the past. It is almost impossible

to get a vendor to go to Mt. Rogers on Highway 58 to deliver food and milk for our lunch program, as well as Flat Ridge and other outlying schools.

Students have been involved in numerous accidents, some losing their lives, traveling over Highway 58 to attend a school function. From the standpoint of safety, safe four-lane highways would be of greater significance in mountainous terrain than flat country.

The Grayson County School Board asks for the recommendation of this Committee that Highway 58 be four-lane from Galax to Volney and improve this highway from Volney to Damascus.

Fred Adams, Jr.
Member, Board of Education

CCDF Volunteer Fire Department and Rescue Squad Route 3 - Stuart, Virginia 24171

Abingdon, Virginia September 9, 1988

Members, Nouse Joint Resolution 172 Study Committee

I appreciate this opportunity to address you on the matter of the U. S. Route 58 Corridor Study as it pertains to Patrick County.

I am James Love, a native of Patrick County, and am speaking today on behalf of the Board of Directors of the CCDF Volunteer Fire Department and Rescue Squad.

Our organization provides fire and rescue services to five communities in a 25-square mile area containing 1,500 families and more than 15 businesses and industries along the southern border of Patrick County. State Route 103 is the major highway through this section of the county.

My comments will be limited to the concerns and safety aspects of this study.

A study suggesting the possibility of a four-lane highway through the southern plateaus of Patrick County from Interstate 77 to the Spencer community is the greatest road news that we will hear in our lifetimes, and we urge this committee to move hastily toward its realization.

Pertinent to this study is that our volunteer organization and its internal subsidiary, the CCDF Red Bank Substation, is located adjacent to Virginia Highway 103 which runs from Stuart, Virginia, to Mt. Airy, North Carolina, and serves as a vital commercial link between these states as well as from Stuart to Interstate 77.

This road, Route 103, is mentioned in the Virginia Department Of Transportation Study, and I am here to say that the CCDF not only favors this southern route across Patrick County, but that the CCDF urges that this direction be taken as the straightest, best-graded, serving the most businesses and industries, and certainly as the most economical route suggested.

In the past few weeks we have responded to ten vehicular accidents along an eight-mile section of foute 103 between Fig Creek and Elk Creek. These accidents resulted in two fatalities and necessitated transporting nine persons to section facilities.

Eight school buses, carrying about 320 children travel along Route 103 twice each day. Additionally, many high school students drive private vehicles along this route. In a recent report to the county school board, the school transportation co-ordinator stated that Route 103 is most crooked, has the nost short-sight sections and carries the heaviest truck traffic of any school route in the county. In fact, school bus drivers along this route have been issued special instructions and precautions because heavily loaded trucks have trouble making quick stops.

Truck traffic through our communities have increased considerably in recent years, necessitated by the needs of local businesses and industries, lumber companies, orchardists and farmers. This traffic as well as much of the through traffic from North Carolina and from Interstate 77 will .not be diminished by placement of a superhighway "up the mountain." We have several trucking headquarters currently located in our southern area, namely: Hall's, Smith's, Beasley's, Shelton, Lawson, Corn, Hazlewood and B & J Trucking. Additionally, Stuart-based industries including Stevens, Spencers and Stuart. Flooring and lumber industries such as PRIM Lumber, Epperson and Hawks utilize Route 103 for transportation of their equipment and products.

About a year ago, attention was centered on the fact that our county road were "illegal" for truck traffic in that the width of trucks currently used in the industry exceeded that allowable for our roads. Yet, the trucks continue to come, further threatening school buses and other vehicles on the roads. Sometimes, these trucks proceed by twos and threes, presenting an omnious picture of potential danger to oncoming travelers on the road.

This traffic, which I am told has nearly doubled within the past two years, has effectively resulted in a proportionate increase in the number of safety hazards and in the number of vehicular emergencies our volunteers are required to attend.

In the interest of safe travel through Patrick County, the CCDF Volunteer Fire Department and Rescue Squad begs you to move forward with the development of a four-lane Route 58 through our county. And, in the interest of safety, economy and serving the greatest needs for economic development, we urge you to follow the suggested alternate southern route along Route 103.

Thank you for your concern and kind attention.

ROBERTSHAW CONTROLS COMPANY

INDEPENDENCE DIVISION

P. O. BOX 188 INDEPENDENCE, VA. 24348

(703) 773-2771

September 8, 1988

STATEMENT CONCERNING THE UPGRADING OF U.S. 58
TO VOLNEY WITH THE "SUPER PARKWAY" TO DAMASCUS

Robertshaw Controls/CompAir in Independence now has a 83,000 ft.² plus an additional 72,000 ft.² leased with a new facility under construction of 120,000 ft.² at a cost of \$4,000,000.

At Independence we assemble heating and refrigeration controls and in the new facility we will assemble air compressors from $\frac{1}{2}$ H.P. thru 350 H.P.

We presently have approximately 250 employees and our plans include hiring an additional 100 people before the year's end with the transfer of other products to the Independence plant.

We're very anxious to see that Route 58 West to I-81 be upgraded for the following reasons:

- A. For distribution of our assembled products to the Western market thru commercial trucking.
- B. 90% of our inbound and outbound Air Freight is thru the Tri Cities Airport.
- C. Easier access for our customers, Corporate and Sales Personnel from Tri-Cities Airport.
- D. A large portion of our fabricated components are transported from our sister Robertshaw Plant in Knoxville, Tennessee to Independence.
- E. A large portion of our employees live in the Mouth of Wilson-Volney area and travel U.S. 58 daily.

We think the U.S. 58 upgrading will be benefical not only to Robertshaw/ CompAir but to the whole Grayson County Area.

K. A. Compton
Plant Manager

STATEMENT PRESENTED AT THE SUPERHIGHWAY CONSTRUCTION HEARING ON FRIDAY, SEPTEMBER 9, 1988 IN ABINGDON, VIRGINIA BY LOWELL A. LAYMAN, CHAIRMAN, PATRICK COUNTY BOARD OF SUPERVISORS

Mr. Chairman, members of the committee ... my name is Lowell Layman, Chairman of the Patrick County Board of Supervisors. On Tuesday, August 30 of this year our board unanimously endorsed the concept of a four-lane super highway, running east-west across southside Virginia. We have known for years that if Southwestern Virginia is to ever join and enjoy the prosperity of Northern Virginia and the urban crescent that extends to the coast, then a bold revitalization of U. S. 58 would have to become a priority for the Commonwealth. Now is the time. We in Patrick County endorse and applaud this project wholeheartedly.

In making decisions concerning the proposed superhighway, we hope the committee will consider growth areas of Patrick County. While we realize cost must play an important part in the decision making process, we feel these expenditures will be a one shot deal and the value to the growth areas would go on forever.

We know well that the coming months, maybe years, will be difficult ones for you. The task ahead --- the stupendous task of turning a billion dollar dream into hard reality --- will be a tough one, but worth every ounce of exertion. We come here today to tell you straight forwardly that we in Patrick County will be there from beginning to end cheering you on every step of the way. We will bear every hardship, we will do whatever is necessary, to assist you in any way possible. In our minds, the stakes are too high for us in Southwest Virginia to do otherwise.

All of Virginia needs this project. We need it desperately.

Thank you very much.

JOINT RESOLUTION OF THE ROTARY CLUBS OF MARTINSVILLE, STUART AND HILLSVILLE

WHEREAS, Rotary is an organization of business and professional men united and dedicated to providing community service, encouraging high vocational standards and building goodwill, and

WHEREAS, the Rotary clubs for the City of Martinsville, the Town of Stuart, and the Town of Hillsville have each appointed a committee from its respective members for the purpose of studying and discussing the need for improving, upgrading and developing U. S. Route #58 between U. S. Route #220 at Martinsville and Interstate 77 at Hillsville and to communicate to our local governing bodies and to the Virginia General Assembly the dire need for a safer road and the substantial benefits to the economic growth and development of our communities and businesses which may be derived from such highway improvements and to encourage governmental support and implementation of a 6-year road plan for U. S. Route #58, and

WHEREAS, the U. S. Park Service has estimated that between 5,000 and 40,000 vehicles per month enter and exit the Blue Ridge Parkway at U. S. Route #58 and that Mabry's Mill is the most visited national park site in the United States, and

WHEREAS, the Virginia Department of Highways has reported the following average daily traffic count:

From	Martinsville to 220 bypass	9,420
From	220 bypass to Critz	6,075
From	Critz to Stuart	3,255
From	Stuart to Route #8	3,465
From	Route #8 to Blue Ridge Parkway	1,845
From	Parkway to Hillsville	1,930

WHEREAS, the Virginia Department of Transportation has reported a total of 650 collisions or motor vehicular accidents occurring on U. S. Route #58 between Martinsville and Hillsville in the past four (4) years, and

WHEREAS, said portion of U. S. Route #58 is frequently used by county school buses, rescue squad vehicles and fire department vehicles, and improvements and widing said route would lessen the risks, hazards, and dangers of travel and would afford our school children, fire and rescue personnel and volunteers and the public in general the safety and protection they need and deserve when travelling on our state highways, and

WHEREAS, the Virginia General Assembly has approved the formation and funding of a regional farmer's market in Carroll County at the intersection of U. S. Route #58 and Interstate 77, and

WHEREAS, common carriers and other interestate commerce traffic are presently restricted or prohibited from using portions of U. S. Route #58 between Martinsville and Hillsville because that route does not meet the minimum highway requirements established by 1982 STAA for the new over-dimensional trucks and "piggy-back" tractor-trailers using the federal interstate highways.

THEREFORE, BE IT RESOLVED by the undersigned Rotary clubs that their members, recognizing the intimate relation of highway improvement to motor vehicular safety, interstate commerce and economic development, unanimously and heartily promote and encourage the various County Boards of Supervisors, City or Town Councils, and the Virginia General Assembly to include U. S. Route #58, between Route #220 in Henry County and Interstate 77 in Carroll County, in the State Highway Department's next 6-Year Plan, and to upgrade U. S. Route #58 to such standards so as to safely accommodate all common-carriers and interstate traffic. We believe such road plan to be essential to promote economic growth and development in Southwest Virginia.

BE IT FURTHER RESOLVED that a copy of these resolutions be sent to all area Supervisors, school boards, legislatures, and other appropriate state offices.

COMMISSIONER
JANET M.G. HILL
DEPUTY COMMISSIONER

P.O. BOX 1128

103 EAST CENTER STREET GALAX, VIRGINIA 24333

-- C O P Y ----

September 6, 1988

Rep. G. C. Jennings P. O. Box 231 Marion, Virginia 24354

Dear Representative Jennings:

Due to the vacation of my Deputy, I will be unable to leave the office to attend the public hearing in Abingdon on Friday, September 9, regarding the upgrading of Highway 58.

I would like to voice my strong opposition to combining Route 58 with I-81, I-77 and register my support of upgrading the existing routes through Carroll and Grayson Counties. The delay and traffic congestion in the areas of Wytheville and Fort Chiswell is already a severe problem. The present areas served by Highway 58 in Southwest Virginia are areas that economically need the support that a upgraded, improved and adequate highway would bring to the area.

As a resident of Grayson County, City of Galax, I respectfully ask for the Committee's consideration.

Very truly yours,

Lona Mr. Cox

Lona M. Cox

cc: Subcommittee c/o Alan Wambold Division of Legislative Services

To: Virginia Department of Highways and Transportation Subject: Possible relocation of US 58

I am Errect M. Store of Grayson County
FarmBureau, representing more than 600 families.

Last spring, in a meeting in Grayson County, Messrs Madison
Marye, G.C. Jennings and Tom Jackson were told by Mr. Alvin
Cox, President of Grayson County Farm Bureau that our organization
supports the four laning of US 58 at it's present location.

Our position has not changed, except consideration should
possibly be given to four laning westward to Volney, then on
present 16 to Marion, making parkway type road from Volney
to Damascus.

Among our reasons for our position are:

- 1. A modern US 58 is very important for Carroll County Farmers Market, to be established within next two years.
- 2. The higher elevations of Grayson County make it among the largest Christmas tree producers in our nation. Therefore, it is imperative that the area be properly served with adequate roads to accomodate tractor trailers.
- 3. The four laneing from Lee County/Kentucky line to The Atlantic Ocean will allow ingress and egress from one end of US 58 to the other, thus allowing access to our beaches and mountains, including Grayson Highlands State Park.
- 4. Grayson has a very high rate of unemployment; therefore the four laneing through the area would provide additional employment.

November 28, 1988

Commissioner Ray D. Pethtel Commonwealth of Virginia Department of Highways & Transportation 1401 East Broad St. Richmond, VA 23219

Dear Commissioner Pethtel:

Enclosed you will find a resolution adopted by the Wise County Chamber of Commerce Board of Directors at the monthly board meeting on November 23, 1988. This resolution was unanimously approved by the board members present.

As you will note, the resolution addresses the study being done by the Joint Subcommittee on a Superhighway along Virginia's southern boundary.

OEEICE 1888

We trust by this resolution, you will be aware of the importance we place on the location of this Superhighway, as it will be a vital issue to the economic future of Wise County.

Respectfully,

WISE COUNTY CHAMBER OF COMMERCE

BETTY LVS MILLER,

President

BLM/jp

cc: Governor Gerald Baliles
Ray D. Pethtel, Commissioner

Transportation Board

WISE COUNTY CHAMBER OF COMMERCE

RESOLUTION ON HIGHWAY 58-A ROUTING

WHEREAS, the Virginia General Assembly has adopted House Joint Resolution Number 172, creating a joint subcommittee to study construction of a superhighway along Virginia's southern boundary: and

WHEREAS, the Joint Subcommittee has studied various alternatives to upgrade U. S. Highway 58 in order to provide a much needed four-lane superhighway linking the mining region of Southwest Virginia with the port activities in Hampton Roads in Eastern Virginia; and

WHEREAS, U. S. Highway 58-A traverses Wise County; and

WHEREAS, there is a definite link between transportation corridors and economic development.

NOW THEREFORE BE IT RESOLVED, that the Wise County Chamber of Commerce firmly supports the concept of a superhighway to be constructed from Cumberland Gap to the Hampton Roads Port area of Eastern Virginia so long as the routing and construction of this road runs along the Route of 58-A through Wise County from Big Stone Gap to St. Paul.

BE IT FURTHER RESOLVED, that this resolution be directed to the staff and members of the Joint Subcommittee studying U. S. 58; the members of the Commonwealth Transportation Board; the Secretary of Transportation; and the Honorable Gerald L. Baliles, Governor of the Commonwealth of Virginia.

October 23, 1988

Cong. L. F. Payne House of Representives Washington, D.C. 20516

RE: A Super Highway accross Virginia along the southern border.

Dear Sir:

My views can be stated very briefly. This road is badly needed.

My first concern is to get it funded regardless of how much or how little the route deviates from present U.S.58.

My second concern is that we do not waste money patching up what we have now existing. I hope to see it done right the first time.

I want to deviate from U.S.58 anywhere that it will save money or be a safer route. If or when the road is funded I would like to see the route bypass Lovers Leap Mountain.

I am not well enough acquainted with the legislative process to know/much you would be involved directly, but the influence you could have will be greatly appreciated.

I believe the enclosed material will be more in detail perhaps more informative than that which you will receive through official channels.

Sincerely,

From H. Bedre

COMMISSIONER'S OCT 26 1988 OFFICE

Dear Commissioner Pethtel:

In regular session on October 24, 1988 the Southampton County Board of Supervisors unanimously approved the attached resolution in support of the super highway following along the southern border of the State.

Your consideration of this resolution during your study processes and future funding actions is solicited.

Should questions arise, please contact me.

With kindest regards, I remain

Rowland L. Taylor County Administrator

RLT:mbb

Enclosure

RESOLUTION

WHEREAS, the 1988 Virginia General Assembly established a study committee to examine the feasibility of constructing a super highway along the Route 58 corridor; and

WHEREAS, the County of Southampton contains approximately 53 miles of the existing Route 58; and

WHEREAS, certain portions of Route 58 in Southampton County pose critical highway safety concerns; and

WHEREAS the portion of Route 58 in Southampton County serves as a vital link between the shipping ports of Hampton Roads and the major markets served by Interstates 95 and 85; and

WHEREAS, the expansion of the roadway width to four lanes the entire length of the Route 58 corridor through Southampton County could significantly increase opportunities for economic development within the County.

NOW, THEREFORE BE IT RESOLVED that the Board of Supervisors of the County of Southampton does hereby support the development of a super highway along the Route 58 corridor; and

FURTHER, that the Board of Supervisors of Southampton County does hereby establish the portion of Route 58 known as the Courtland Bypass, including the intersection of Route 58 and Route 35, as its highest priority for any future highway construction in the County.

BOARD OF SUPERVISORS

Washington County, Virginia 205 Academy Drive Abingdon, Virginia 24210

WHEREAS, the Virginia General Assembly has adopted House Joint Resolution Number 172, creating a joint subcommittee to study construction of a superhighway along Virginia's southern boundary; and

WHEREAS, the Joint Subcommittee has studied various alternatives to upgrade U. S. Highway 58 in order to provide a much needed four-lane superhighway linking the mining region of Southwest Virginia with the port activities in Hampton Roads in Eastern Virginia; and

WHEREAS, U. S. Highway 58 traverses Washington County; and

WHEREAS, there is a definite link between transportation corridors and economic development; and

WHEREAS, the Board of Supervisors of Washington County, Virginia desires to express its support for the concept of constructing a superhighway along Virginia's southern boundary in order to link Cumberland Gap with Hampton Roads along the existing route of U. S. Highway 58;

Now, therefore, be it

RESOLVED by the Board of Supervisors of Washington County, Virginia that this governing body firmly supports the concept of a superhighway to be constructed from Cumberland Gap along the existing route of U. S. Highway 58 through Washington County, Virginia to the Hampton Roads Port area of Eastern Virginia; and

IT IS FURTHER RESOLVED that the Board of Supervisors fully supports the alternative concept of a four-lane construction of U. S. Highway 58 between Abingdon and Damascus; a super two-lane or three-lane reconstruction of existing U. S. Highway 58 between Damascus and Volney; and a four-lane superhighway between Volney and Galax, which would provide for enhanced economic development opportunities for Washington County and Grayson County, while preserving the beauty of the Mount Rogers Recreation Area and the Jefferson National Forest; and

IT IS FURTHER RESOLVED that the Board of Supervisors of Washington County is adamantly opposed to any alternative which would turn U. S. Highway 58 up existing Interstate 77 at Hillsville to Wytheville and then down Interstate 81 from Wytheville to Bristol or

Abingdon, as such an alternative would fail to open up vital economic development areas in Washington County and Grayson County, and would also negate the purposes of economic development and enhanced communications capabilities between Southwest Virginia and the port areas of Virginia.

The Board of Supervisors urges the Joint Study Committee to favorably report this road construction project to the General Assembly and to use such innovative funding proposals as may be necessary to ensure that this important project may be completed.

Dear Ray:

I understand that the Virginia Department of Transportation is currently studying the feasibility of converting U.S. Route 58 into a four lane road from the Cumberland Gap in Lee County to Virginia Beach.

As you and I have discussed, I believe that such a plan would greatly enhance both industrial development and tourism in Southwest Virginia. I strongly endorse this proposal, and I will look forward to working with you to realize this goal.

I am greatly concerned, however, that one proposal under consideration by VDOT would relocate part of Route 58 by utilizing Interstates 81 and 77 to bypass Damascus and Grayson County. The implementation of this plan would be a grave error which would all but destroy the hope of economic development in communities such as Damascus, Taylors Valley, Konnarock, Green Cove, White Top, Rugby, Volney and Independence.

Such a plan would also inhibit the development of valuable tourist destinations such as the Virginia Creeper Trail, the Mount Rogers National Recreation Area, two of our National Wilderness Areas and the Grayson Highlands State Park.

Ray, I encourage you to concentrate your study on plans which will follow the existing route and enhance the development of all of Southwest Virginia. With kind personal regards and best wishes, I remain

Tax

rely,

Rick Boucher Member of Congress

Carroll County Board of Supervisors

OFFICE OF THE COUNTY ADMINISTRATOR

P.O. BOX 515 HILLSVILLE, VIRGINIA 24343

(703) 728-3331

September 20,1988

Mr. Alan B. Wambold, Ph. D. Legislative Research Associate 910 Capital Street P.O. Box 3-AG Richmond, VA 23208

Dear Mr. Wambold:

The Carroll County Board of Supervisors, at their meeting held September 14, 1988 went on record as supporting the construction of a "superhighway" along Virginia's Southern Boundary following as closely as possible the route of U.S. 58.

Our Board would be opposed to a highway that would not benefit areas currently served by U.S. 58, as this route currently providing us with the opportunities to encourage economic development, create jobs, and diversity our tax base.

Thank you for any consideration you are able to give our Board's position on this matter.

Sincerely.

Clinton D. Swain

County Administrator

06-Dec-88

Key Assumptions-

The FY 89 VDOT Budget and the current Six Year Improvement Program were utilized for the base financial information.

The impact of the change from 85% to 76.6% of net special session tax revenue was computed by reducing the total amount available for construction to reflect the 8.4% set aside for special projects, and rerunning the allocation model and the separate modules for the detailed secondary and urban distributions.

The Interstate allocation remains unchanged in either case since it is primarily a function of the availability of federal revenue. Therefore, the Interstate system has been omitted from the analysis.

All of the allocations to the Primary system are expressed net of the off the top match for Interestate projects as provided by the highway distribution formula.

All of the "Current" allocations agree with the FY 89 Budget and Six Year Improvement Program with the exception of the distribution of the Urban allocation. The individual budgeted allocations for the Urban system have been adjusted by the Urban Division to reflect the individual locality's ability to utilize the funds. The Urban allocations used here for both "Current" and "Revised" are derived directly from the population distribution and are comparable.

APPENDIX IV
