REPORT OF THE SPECIAL TASK FORCE STUDYING THE PRACTICE OF THERAPEUTIC INTERCHANGE

## A STUDY OF THE PRACTICE OF THERAPEUTIC INTERCHANGE OF CHEMICALLY DISSIMILAR DRUGS IN VIRGINIA

TO THE GOVERNOR AND THE GENERAL ASSEMBLY OF VIRGINIA

# **HOUSE DOCUMENT NO. 57**

COMMONWEALTH OF VIRGINIA RICHMOND 1998

COMMONWEALTH of VIRGINIA

Department of Medical Assistance Services

JOSEPH M. TEEFEY DIRECTOR

January 7, 1998

SUITE 1300 600 EAST BROAD STREET RICHMOND, VA 23219 804 786-7933 804 225-4512 (Fax) 800 343-0634 (TDD)

TO: The Honorable George Allen

and

The General Assembly of Virginia

This report contained herein is pursuant to House Joint Resolution 630, passed by the 1997 General Assembly.

I am submitting this report on behalf of the Special Task Force Studying the Practice of Therapeutic Interchange of Chemically Dissimilar Drug Products. The report contains the discussions and recommendations of the Task Force.

Respectfully submitted,

Joseph M. Teefey, Director Department of Medical Assistance Services

## Report of the Special Task Force Studying the Practice of Therapeutic Interchange of Chemically Dissimilar Drugs in the Commonwealth of Virginia Pursuant to HJR 630 (1997)

Submitted to the General Assembly of Virginia by Joseph M. Teefey, Task Force Chair on behalf of the Task Force

December 1997

#### AUTHORIZATION

The work of the Special Task Force Studying the Practice of Therapeutic Interchange was completed pursuant to House Joint Resolution 630 passed by the General Assembly of Virginia during its 1997 Session. The full text of HJR 630 can be found in Appendix A of this report. A summary of the provisions of HJR 630 is provided below.

#### **RESOLUTION SUMMARY**

HJR 630 established a special task force to study the practice of therapeutic interchange of chemically dissimilar drug products. The special task force was directed to:

- 1. State the practice of therapeutic interchange to reach consensus on its incidence and prevalence.
- 2. Determine the impact of the practice of therapeutic interchange on health care, the affected professions, the overall costs of health care products and services, and patients.
- 3. Identify the components of the cost of the practice.

The resolution defined the membership of the Task Force and directed that the Department of Medical Assistance Services provide staff support to the Task Force. The Department contracted with the Virginia Commonwealth University School of Pharmacy to facilitate the Task Force meetings and provide documentation.

<sup>&</sup>lt;sup>\*</sup> This report was written by Dr. Michael A. Pyles of the Virginia Commonwealth University School of Pharmacy, in his role of facilitator for the Task Force under contractual arrangements with the Department, and does not contain the personal views, opinions, positions or perspectives of Dr. Pyles or the School of Pharmacy.

#### **TASK FORCE MEMBERS**

Mr. Michael J. Ayotte Pharmacist (Richmond) Virginia Assn. Of Chain Drug Stores

**Dr. Lawrence E. Blanchard, III** Physician (Richmond) Medical Society of Virginia

**Dr. Randall E. Dalton** Physician (Richmond) Old Dominion Medical Society

Mr. Charles E. James, Sr. Director (Richmond) Virginia Dept. Personnel & Training

**Dr. Thomas L. Moffatt** Physician (Richmond) Medical Society of Virginia

Ms. Cynthia J. Pigg Pharmacist (Glen Allen) Academy of Managed Care Pharmacy

Mr. Mark A. Szalwinski Pharmacist (Norfolk) Virginia Society of Health Systems Pharmacists

**Mr. William A. Towler** Pharmacist (Highland Springs) Virginia Pharmacists Association The Honorable I. Vincent Behm, Jr. Democrat, District 91 (Hampton) Virginia House of Delegates

Mr. James G. Council Attorney (Glen Allen) Pharmaceutical Care Mgt. Assn.

**Dr. Douglas R. Hadley** Physician (Glen Allen) Virginia Association of HMOs

**Dr. Karen E. Knapp** Physician (Richmond) Virginia Board of Medicine

**The Honorable Stephen D. Newman** Republican, District 23 (Lynchburg) Senate of Virginia

Ms. Marjorie E. Powell Attorney (Washington, DC) Pharmaceutical & Research Mfrs. Of America

Mr. Joseph M. Teefey [Chair] Director (Richmond) Virginia Dept. Of Medical Assistance Services

**Mr. W. Tommy Walker** Pharmacist (Lawrenceville) Virginia Board of Pharmacy

#### **TASK FORCE MEETINGS**

The first meeting of the Special Task Force was held on June 19, 1997, in Richmond. Subsequent meetings were held on July 16, 1997, August 20, 1997, and September 17, 1997. All meetings were held in House Room D of the Virginia General Assembly Building except the September 17 meeting, which was held in House Room C. Mr. Joseph M. Teefey, Director of the Department of Medical Assistance Services, and a member of the Task Force, served as chair of the Task Force and presided over all of its meetings. Agendas and transcripts for each meeting can be found in Appendices B and C, respectively. Each meeting included a public comment period so that Task Force members could hear from interested parties concerning the practice of therapeutic interchange of chemically dissimilar drugs.

In an effort to ensure that Task Force members had access to as much pertinent information as possible, and to ensure that they would be able to make informed decisions concerning the practice of therapeutic interchange of chemically dissimilar drugs in the Commonwealth, several speakers were invited to make presentations and give comments on the topic.

#### **INVITED SPEAKERS**

#### Kenneth D. McArthur, Jr., Esq. Durrette, Irvin, Bradshaw, P.C. Richmond

Mr. McArthur's firm represents independent pharmacies throughout the Commonwealth of Virginia. In his remarks, Mr. McArthur noted that there are some very important issues that the Task Force needs to consider. He identified himself as one of the drafters of the failed Bill that was introduced last year to outlaw the practice of switching chemically dissimilar drugs where a monetary incentive is present. Mr. McArthur urged the Task Force to look at hard evidence produced by all interested parties and to make an informed decision on that basis.

#### Stephen Rosenthal, Esq. Mays and Valentine Richmond

According to Mr. Rosenthal, he was speaking on behalf of a large coalition that was involved in the previous legislation that generated this study and the Task Force. Mr. Rosenthal advised the Task Force to look closely at what is happening today in the health care market and warned them that anecdotal evidence was not sufficient to warrant any large scale, legislative action. Like Mr. McArthur, Mr. Rosenthal urged the Task Force to consider the facts and data presented by the staff and interested parties and identify whether there are any specific aspects of the practice that pose a risk to the public and, if so, to determine if the practice outweighs any associated benefits to the public.

#### Mr. David Shepherd, R.Ph. DMAS, Pharmacy Supervisor Richmond

Mr. Shepherd served as staff to the Task Force and was asked to give an overview of the Virginia Medicaid Pharmacy Program. Mr. Shepherd noted that prescribed drugs are among the 35 services available to eligible Medicaid recipients and one of 19 optional services provided by the program. According to Mr. Shepherd, prescribed drugs have been a part of Virginia's Medicaid Program since its inception. In his overview Mr. Shepherd advised the Task Force that the operation of Virginia's Medicaid Program, and the prescription drug benefit, are under the oversight of the federal Health Care Financing Administration. Mr. Shepherd provided a great deal of information about the program and how it operates in the Commonwealth of Virginia.

#### Carol Pugh, Pharm.D. Virginia Commonwealth University, School of Pharmacy Richmond

Dr. Pugh was invited to share information about drug utilization review within DMAS. In her remarks Dr. Pugh informed the Task Force that she was a DUR consultant working under an Inter-agency Agreement between DMAS and Virginia Commonwealth University from January 1992 through January 1995. According to Dr. Pugh, DMAS is currently performing DUR using the program that she developed and implemented. Virginia's DUR program has both retrospective and prospective components and allows DMAS to monitor service utilization under its prescription drug program. Dr. Pugh noted that DUR is required by the federal government and that Virginia actually implemented its program before the required date.

#### Mr. Michael Worthington Agency Management Lead Analyst, DMAS Richmond

Mr. Worthington served as staff to the Task Force and provided a summary of the literature pertaining to therapeutic substitution and therapeutic interchange. Mr. Worthington acknowledged the assistance of Ms. Julie Sisler, who was a summer research fellow in the School of Pharmacy at VCU, in conducting the review of the literature. In his remarks, Mr. Worthington defined two key terms that are relevant to the work of the Task Force: Therapeutic Substitution and Therapeutic Interchange. In the case of the former, no physician approval is sought as opposed to the latter where the physician's approval is sought.

#### Norman V. Carroll, Ph.D. Virginia Commonwealth University, School of Pharmacy Richmond

Dr. Carroll was asked to share some of his insight regarding the practice of therapeutic interchange. Dr. Carroll is a professor of Pharmacy Administration in the School of Pharmacy at VCU and has conducted research in this area. In his opening remarks Dr. Carroll advised the Task Force that he was speaking as a researcher and individual and not as an official representative of VCU's School of Pharmacy. Dr. Carroll stated that there is a lack of empirical research on therapeutic interchange, specifically on drug switching. He cited three reasons for the situation: 1) a pharmacy regulation preventing pharmacists from sharing patient data with any one other than the physician or the pharmacist, 2) the common practice of PBMs and managed care organizations of making pharmacists sign confidentiality statements, and 3) a reluctance on the part of a lot of pharmacists and physicians to do anything which they think might antagonize or might criticize managed care organizations.

Howard Casway, Esq. Asst. Attorney General Richmond

#### Ms. Scotti Russell, R.Ph. Virginia Board of Pharmacy Richmond

Mr. Casway and Ms. Russell were invited to answer specific questions related to the practice of pharmacy in the Commonwealth raised by Task Force members. They provided answers and responses to questions such as "What are other states doing with regard to therapeutic interchange?", "Does state law prohibit the practice of therapeutic interchange/substitution?", "Does state law say anything about switching drugs based on rebates?", and "Does the Virginia Board of Pharmacy have the statutory or regulatory authority to regulate the practice of therapeutic interchange/substitution?"; among others. Mr. Casway and Ms. Russell assisted the Task Force in understanding the scope of practice of pharmacists in the Commonwealth and the extent to which the Board of Pharmacy has oversight for pharmacists and pharmacies. Ms. Russell, in a later presentation, also shared with the Task Force some of the legislative actions that the Board of Pharmacy will be pursuing during the 1998 session of the General Assembly.

#### DISCUSSION

The Task Force believed that it was very important to clearly define the term "therapeutic interchange of chemically dissimilar drugs." The following definition was unanimously adopted by the Task Force on August 20, 1997.

Therapeutic interchange is the dispensing of a drug, by any person authorized by law to dispense drugs, that is a chemically dissimilar alternative for the drug initially prescribed. The alternative drug is expected to have the same clinical results and similar safety profile, when administered to patients in therapeutically equivalent doses, as the drug initially prescribed, and is dispensed with the approval of the person who prescribed the initial drug, or their lawful designee.

The adoption of this definition was crucial to the work of the Task Force as it attempted to describe the practice of therapeutic interchange of chemically dissimilar drugs and identify the impact of the practice in the Commonwealth. Prior to the adoption of this definition, the Task Force had an in depth discussion centering around this issue.

Two important questions emerged from Task Force deliberations.

- 1) Is the practice of therapeutic interchange harmful to Virginia residents?
- 2) How many Virginians are affected by this practice?

#### Is therapeutic interchange harmful?

The first question was addressed by interested parties representing two points of view. Interested parties who expressed concern that the practice is harmful and dangerous articulated the first point of view. Many of the comments made by speakers holding this point of view called attention to a piece of legislation that failed during the 1997 session of the Virginia General Assembly (SB 1114, see Appendix A) which sought to outlaw the practice of Drug Switching in the Commonwealth. The consensus of those persons holding this point of view is that the practice of therapeutic interchange is indeed harmful and dangerous and that we do not have sufficient empirical data to suggest otherwise

The other point of view contends that accounts of the harmful and dangerous nature of the practice are inaccurate and rely solely on anecdotal evidence. The consensus of persons holding this point of view is that the practice must be allowed to continue because it makes good economic sense and any attempt to make the practice unlawful in Virginia, or otherwise restrict it, would result in substantial increases in health care costs for the residents of the Commonwealth as well as employers whose health care benefits include prescription drug coverage.

#### How many Virginians are affected by therapeutic interchange?

In an attempt to understand the potential impact of this practice in the Commonwealth, a Task Force member raised the question on the number of Virginians affected by the practice. The Task Force staff concluded that there is no exact answer to this question. At best, the number of Virginians covered by prescription benefit programs could only be estimated, since such data are not routinely or uniformly collected and reported. The staff estimates that over 5,000,000 Virginians are covered by such plans. Current population data indicate that 87% of Virginia's population is covered by health insurance. National health insurance data indicate that between 42% and 94% of persons who are covered by a health plan have coverage for their prescription drugs under those plans.

One issue that engendered a lengthy discussion by the Task Force was the statutory and regulatory authority of the Board of Pharmacy to oversee out-of-state pharmacies. Members of the Task Force raised questions about the dispensing of prescription drugs to Virginia residents by pharmacies operating in other states, especially by means of mail order. According to information that it received, the Task Force acknowledges that the Virginia Board of Pharmacy has limited regulatory authority over these out-of-state pharmacies and their dispensing operations.

#### CONCLUSIONS

The chair of the Task Force solicited policy options and recommendations from Task Force members and interested parties regarding the practice of therapeutic interchange of chemically dissimilar drugs in the Commonwealth. During the last meeting of the Task Force, members heard from the Executive Director of the Board of Pharmacy and considered policy options from a Task Force member and interested parties. In the course of its deliberations, the Task Force came to the conclusion that additional information is needed before any specific recommendations regarding the practice of therapeutic interchange can be made. Although an abundance of information was disseminated to Task Force members, and despite the impassioned testimony of invited speakers and interested parties on both sides, it is the collective opinion of the Task Force that final recommendations about the practice of therapeutic interchange of chemically dissimilar drugs in the Commonwealth of Virginia be deferred.

#### RECOMMENDATIONS

After a lengthy discussion, and in light of its deliberations, the Special Task Force Studying the Practice of Therapeutic Interchange of Chemically Dissimilar Drugs made the following recommendations.

1. The addition of the following to the *Code of Virginia*, §54.1-3434.4, as subsection B thereof.

#### It is unlawful for any nonresident pharmacy to dispense a drug that is chemically dissimilar from the drug initially prescribed without the approval of the prescriber or his lawful designee.

This is a part of a policy option submitted by Matthew Jenkins in a letter to Mr. Joseph M. Teefey dated September 12, 1997.

2. The introduction of a joint resolution during the 1998 session of the General Assembly to continue the Task Force for another year so that the Task Force will have the opportunity to consider the findings of a study to be performed by the Virginia Commonwealth University School of Pharmacy pursuant to House Joint Resolution 574 from the 1997 session of the General Assembly.

These recommendations were adopted by a unanimous vote of the Task Force.

### **APPENDIX A**

BILLS AND RESOLUTIONS (1997)

House Joint Resolution 630 House Joint Resolution 574 Senate Bill 1114 House Bill 2714

#### **HOUSE JOINT RESOLUTION NO. 630**

Establishing a special task force to study the practice of therapeutic interchange of chemically dissimilar drug products.

Agreed to by the House of Delegates, February 22, 1997 Agreed to by the Senate, February 22, 1997

WHEREAS, issues have arisen regarding the practice of therapeutic interchange of chemically dissimilar drug products; and

WHEREAS, legislation has been proposed addressing this practice; and

WHEREAS, whether or not the legislation is enacted, further study of this practice is desirable, now, therefore, be it

RESOLVED by the House of Delegates, the Senate concurring, That a special task force be established to study the practice of therapeutic interchange of chemically dissimilar drug products. During the course of this study, the special task force shall examine all aspects and effects of the practice of therapeutic interchange of chemically dissimilar drug products throughout the health care delivery system, including, but not limited to, its impact on health care, the affected professions, the overall costs of health care products and services, and patients.

The special task force shall be composed of 16 members, as follows: 1 member of the House of Delegates; 1 physician, upon the recommendation of the Old Dominion Medical Society; 1 practicing pharmacist, upon the recommendation of the Virginia Association of Chain Drug Stores; 1 representati of a manufacturer of brand name prescription drug products, which does not own a Pharmacy Benefits Manager (PBM) or have a strategic alliance with a PBM, upon the recommendation of the Pharmaceutical Research and Manufacturers Association; 1 pharmacist, upon the recommendation of the Virginia Society of Health System Pharmacists; and 1 representative of a health maintenance organization, upon the recommendation of the Virginia Association of Health Maintenance Organizations, all to be appointed by the Speaker of the House; 1 member of the Senate; 2 licensed physicians, upon the recommendation of the Medical Society of Virginia; 1 practicing independent pharmacist, upon the recommendation of the Virginia Pharmacists Association; 1 pharmacist, upon the recommendation of the Academy of Managed Care Pharmacy; and 1 representative of a PBM, upon the recommendation of the Pharmaceutical Care Management Association, all to be appointed by the Senate Committee on Privileges and Elections; the Director of the Department of Medical Assistance Services; the Director of the Department of Personnel and Training; and 1 representative of the Board of Pharmacy, upon the recommendation of the Executive Director of the Board of Pharmacy, to be appointed by the Speaker of the House; and 1 representative of the Board of Medicine, upon the recommendation of the Executive Director of the Board of Medicine, to be appointed by the Senate Committee on Privileges and Elections, both to serve ex officio without voting privileges. Nonlegislative members shall serve in a voluntary capacity and shall not be entitled to compensation or reimbursement for their expenses for participation in this study.

The Department of Medical Assistance Services shall provide staff support for the study. Technical assistance shall be provided to the special task force by the Board of Medicine and the Board of Pharmacy.

All agencies of the Commonwealth shall provide assistance to the special task force for this study, upon request.

The special task force shall complete its work in time to submit its findings and recommendations to the Governor and the 1998 Session of the General Assembly as provided in the procedures of the Division of Legislative Automated Systems for the processing of legislative documents.

#### **HOUSE JOINT RESOLUTION NO. 574**

Requesting the Department of Medical Assistance Services to examine the impact of the practices of pharmacy benefits manager firms on the Commonwealth's citizens and upon the health care market.

Agreed to by the House of Delegates, February 20, 1997 Agreed to by the Senate, February 19, 1997

WHEREAS, as the health insurance industry reconfigures and managed care programs become pervasive, the effects on patient care and small businesses delivering health services are far-reaching; and

WHEREAS, a recent development in managed care approaches is the implementation of or contracting for pharmacy benefits management; and

WHEREAS, pharmacy services are essential to the well-being of many elderly and disabled persons for the maintenance of their health; and

WHEREAS, appropriate pharmacy services can prevent hospital admissions and the need for emergency care -- expensive services placing greater demands on society's resources; and

WHEREAS, the present management techniques practiced by some pharmacy benefits managers may interfere in the statutorily required physician-patient-pharmacist relationship; and

WHEREAS, personal consultation and direct knowledge of the patient's conditions and medications are an important part of handling many chronic conditions; and

WHEREAS, so-called "desk audits" are allegedly being conducted many months after the dispensing of prescriptions; now, therefore, be it

RESOLVED by the House of Delegates, the Senate concurring, That the Department of Medical Assistance Services be requested to examine the practices of pharmacy benefits manager firms on the Commonwealth's citizens and upon the health care market. In conducting its study, the Department shall coordinate its efforts with any similar studies undertaken during the interim by the Department or by other state entities. In addition, the Department shall solicit input from such experts and interested parties as may be appointed to a special task force established pursuant to House Joint Resolution No. 630 (1997), relating to the practice of therapeutic interchange.

Technical assistance shall be provided by the Bureau of Insurance within the Virginia State Corporation Commission. All agencies of the Commonwealth shall provide assistance to the Department for this study, upon request.

The Department of Medical Assistance Services shall complete its work in time to submit its findings and recommendations to the Governor and the 1999 Session of the General Assembly as provided in the procedures of the Division of Legislative Automated Systems for the processing of legislative documents.

Go to (General Assembly Home)

#### HOUSE BILL NO. 2714

Offered January 20, 1997

A BILL to amend the Code of Virginia by adding in Title 54.1 a chapter numbered 34.1, consisting of sections numbered 54.1-3480 through 54.1-3487, relating to the Virginia Anti-Drug Switching Patient Protection Act; penalties.

\_\_\_\_\_

Patrons-- Davies, Baker, Bloxom, Cooper, Councill, Cranwell, Crouch, Dickinson, Hall, Hargrove, Jackson, Johnson, Keating, McEachin, Melvin, Moran, Morgan, Nelms, Orrock, Plum, Spruill, Stump, Tate, Van Yahres, Wagner and Woodrum; Senators: Couric, Edwards, Gartlan, Hawkins and Trumbo

Referred to Committee on Health, Welfare and Institutions

Be it enacted by the General Assembly of Virginia:

1. That the Code of Virginia is amended by adding in Title 54.1 a chapter numbered 34.1, consisting of sections numbered 54.1-3480 through 54.1-3487, as follows:

CHAPTER 34.1. VIRGINIA ANTI-DRUG SWITCHING PATIENT PROTECTION ACT.

§<u>54.1-3480</u>. Definitions.

As used in this chapter, unless the context requires a different meaning:

"Advertisement" means a representation disseminated in any manner or means, for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase of a prescription drug. The term does not include any act prohibited by the chapter.

"Attorney" means the Attorney General of Virginia, and the attorney for any city, county or town.

"Caregiver" means (i) a parent or guardian of a minor patient, (ii) a relative, close friend or employee of a patient who provides in-person physical assistance to the patient, or (iii) a person employed by another to care for a patient who provides in-person physical assistance to the patient.

"Chemically dissimilar" means a prescription drug which possesses one or more active ingredients that are different from those of another prescription drug.

"Deliver" means the actual, constructive, or attempted transfer of any item regulated by this chapter, whether or not there exists an agency relationship.

"Dispense" or "dispensing" means to deliver a prescription drug to a patient by or pursuant to the lawful order of a prescribing practitioner.

"Drug" means (i) articles or substances recognized in the official United States Pharmacopoeia National Formulary or official Homeopathic Pharmacopoeia of the United States, or any supplement to any of them; (ii) articles or substances intended for use in the diagnosis, cure, mitigation, treatment or prevention of disease in an individual; (iii) articles or substances, other than food, intended to affect the structure or any function of the body of an individual; or (iv) articles or substances intended for use as a component of any article specified in (i), (ii), or (iii). "Drug" does not include devices or their components, parts or accessories.

"Employer" means a person who provides monetary or other compensation to another person for goods or services, whether the one receiving monetary or other compensation is an employee, agent, partner, independent contractor or other.

"Manufacture" means the production, preparation, propagation, conversion or processing of any item regulated by this chapter, either directly or indirectly by extraction from substances of natural origin, or independently by means or chemical synthesis, or by a combination of extraction and chemical synthesis, and includes any packaging or repackaging of the substance or labeling or relabeling of its container.

"Manufacturer" means any person who manufactures and all agents of that person.

"Monetary incentive" means any rebate, discount, kick-back, fee, special charge or other financial incentive received directly or indirectly from a manufacturer.

"Patient" means an ultimate consumer of a prescription drug who obtains the prescription drug from a licensed pharmacist or practitioner who is authorized by law to prescribe or dispense prescription drugs.

"Pharmacists" means a person duly licensed by the Virginia Board of Pharmacy to practice pharmacy or a person duly licensed by any other state or U.S. territory to practice pharmacy.

"Practitioner" means a person duly licensed by the Commonwealth or by any other state or U.S. territory as a physician, dentist, osteopath, podiatrist, nurse practitioner, TPA-certified optometrist, or physician's assistant.

"Prescribing practitioner" means a practitioner who (i) prescribes a prescription drug for a patient and (ii) is authorized by applicable law to prescribe or administer such drugs.

"Prescription drug" or "prescribed drug" means any drug required by federal law of regulation to be dispensed only pursuant to a prescription, including finished dosage forms and active ingredients subject to § 503 (b) of the Federal Food, Drug, and Cosmetic Act.

"Sells" or "selling" includes barter, exchange, transfer, or gift, or offer therefor.

§54.1-3481. Exceptions to applicability of chapter; no exemption from other provisions of title.

A. The provisions of this chapter shall not apply to any prescription drug prescribed by a scientific investigator for purposes of research or prescribed by a veterinarian. Where the solicitation or encouragement prohibited herein is directed to a practitioner, this chapter shall only apply to a solicitation or encouragement where the practitioner has a bona fide practitioner-patient relationship with a specific patient for whom a specific drug has been prescribed from which a substitution is sought.

B. This chapter shall not be construed as exempting any person from the requirements of Chapter 33

(§54.1-3300 et seq.) or Chapter 34 (§54.1-3400 et seq.) of this title.

#### §54.1-3482. Unlawful actions.

A. No person shall solicit or encourage the prescribing practitioner of a patient residing in the Commonwealth, while that patient is physically located in the Commonwealth, to substitute a prescription drug which the prescribing practitioner originally prescribed for the patient with any chemically dissimilar prescription drug, unless the person is the patient, another practitioner, or a caregiver of the patient. The foregoing shall in no way limit the ability of any person to contact a patient's prescribing practitioner to warn of a contraindication, precaution or adverse reaction

B. No practitioner shall solicit or encourage the prescribing practitioner of a patient residing in the Commonwealth, while that patient is physically located in the Commonwealth, to substitute a prescription drug the prescribing practitioner originally prescribed for the patient with any chemically dissimilar prescription drug where a purpose of the substitution is to assist the practitioner, or an employer of the practitioner, in receiving a monetary incentive from the manufacturer of the chemically dissimilar prescription drug which is based upon the substitution of that prescription drug in the place of another prescription drug which is chemically dissimilar.

C. No pharmacist shall sell or dispense a prescription drug to a patient residing in the Commonwealth, while that patient is physically located in the Commonwealth, if the pharmacist possesses actual knowledge that (i) a person solicited or encouraged the patient's prescribing practitioner to substitute the originally prescribed drug with any chemically dissimilar prescription drug, and (ii) that a purpose of the substitution is to assist such person or any employer of that person in receiving a monetary incentive from the manufacturer of the chemically dissimilar prescription drug which is based upon the substitution of that prescription drug in the place of another prescription drug which is chemically dissimilar.

D. No person shall solicit or encourage (i) a patient residing in the Commonwealth, while that patient is physically located in the Commonwealth, (ii) a caregiver of the patient, or (iii) a practitioner of the patient to request the patient's prescribing practitioner to substitute a prescription drug the prescribing practitioner originally prescribed with a chemically dissimilar prescription drug where a purpose of the substitution is to assist such person or an employer of that person in receiving a monetary incentive from the manufacturer of the chemically dissimilar prescription drug which is based upon the substitution of that prescription drug in the place of another prescription drug which is chemically dissimilar.

§54.1-3483. Presumption of violation.

For purposes of this chapter, where a person or a person's employer receives a monetary incentive from a manufacturer of a prescription drug based upon the substitution of that prescription drug in the place of another prescription drug which is chemically dissimilar, it shall be presumed to be a violation of this chapter.

§54.1-3484. Violators entitled to bring suit.

A. Any person entitled to bring an action pursuant to this chapter as set forth herein may do so regardless of whether that person has violated a provision of this chapter himself.

B. Any practitioner who violates any provision of this chapter shall pay for each violation a civil penalty of not more than ten dollars, plus attorney fees and costs. However, if a practitioner or his employer receives in violation of this chapter any monetary incentive from another person for his assistance in substituting a chemically dissimilar prescription drug for the prescription drug originally prescribed 1. violation of this chapter, each practitioner or employer shall pay a civil penalty of not more than \$100, plus attorney fees and costs. Any person other than a practitioner who violates any provision of this chapter shall, for each violation, pay a civil penalty of not more than \$5,000, plus attorney fees and costs. The civil penalty shall be in addition to any other causes of action or remedies that may exist against such person and shall be paid into the Literary Fund.

C. Notwithstanding any other provisions of law to the contrary, the attorney may cause an action to be brought in the appropriate circuit court in the name of the Commonwealth, the city, county, or town, the Virginia Board of Pharmacy, or the Virginia Board of Medicine, respectively, to enjoin any violation of this chapter, to impose civil penalties as prescribed herein and to recover reasonable attorney fees and costs. Any circuit court having jurisdiction is authorized to issue temporary and permanent injunctions to restrain and prevent violations of this chapter notwithstanding the existence of an adequate remedy at law. In any action under this chapter, it shall not be necessary that damages be proven.

#### §54.1-3485. Investigative orders.

A. Whenever the attorney has reasonable cause to believe that any person has engaged in, or is engaging in, or is about to engage in any violation of this chapter, the attorney, if after making a good faith effort to obtain such information, is unable to obtain the data and information necessary to determine whether such violation has occurred, or believes that it is impractical for him to do so, he may apply to the circuit court within whose jurisdiction the person having the information resides, the person has a principal place of business in the Commonwealth, or where any part of the alleged violation occurred in the Commonwealth, which includes without limitation, the jurisdiction of the practitioner's place of business, the jurisdiction in which the patient resides, and the jurisdiction in which the patient's caregiver resides, for an investigative order requiring such person to furnish to the attorney such data and information as is relevant to the subject matter of the investigation.

B. The circuit courts are empowered to issue investigative orders, authorizing discovery by the same methods and procedures as set forth for civil actions in the Rules of the Supreme Court of Virginia, in connection with investigations of violations of this chapter by the attorney. An application for an investigative order shall identify:

1. The specific act or practice alleged to be in violation of this chapter;

2. The grounds which shall demonstrate reasonable cause to believe that a violation of this chapter may have occurred, may be occurring, or may be about to occur;

3. The category or class of data or information requested in the investigative order; and

4. The reasons why the attorney is unable to obtain such data and information, or the reason why it is impractical to do so, without a court order.

C. Within twenty-one days after the service upon a person of an investigative order, or at any time before the return date specified in such order, whichever is later, such person may file a motion to modify or set aside such investigative order or to seek a protective order as provided by the Rules of th.

Supreme Court of Virginia. Such motion shall specify the grounds for modifying or setting aside the order, and may be based upon the failure of the application or the order to comply with the requirements of this chapter, or upon any constitutional or other legal basis or privilege of such person.

D. Where the information requested by an investigative order may be derived or ascertained from the business records of the person upon whom the order is served, or from an examination, audit or inspection of such business records, or from a compilation, abstract or summary thereof, and the burden of deriving or ascertaining the information is substantially the same for the attorney as for the person from whom such information is requested, it shall be sufficient for that person to specify the records from which the requested information may be derived or ascertained, and to afford the attorney reasonable opportunity to examine, audit or inspect such records and to make copies, compilations, abstracts or summaries thereof.

E. It shall be the duty of the attorney, his assistants, employees and agents, to maintain the secrecy of all evidence, documents, data and information obtained through the use of investigative orders or obtained as a result of the voluntary act of the person under investigations and it shall be unlawful for any person participating in such investigations to disclose to any other person not participating in such investigations to disclose to any other person not participating in such investigation any information so obtained. Any person violating this subsection shall be subject to a civil penalty not to exceed \$25,000 and contempt of court. Notwithstanding the foregoing, this section shall not preclude the presentation and disclosure of any information obtained pursuant to this section in any suit or action in any court of this Commonwealth wherein it is alleged that a violation of this chapter has occurred, is occurring or may occur, nor shall this section prevent the disclosure of any such information by the attorney to any federal or state law-enforcement authority that has restrictions governing confidentiality and the use of such information similar to those contained in this subsection.

F. Upon the failure of a person without lawful excuse to obey an investigative order under this section, the attorney may initiate contempt proceedings in the circuit court that issued the order to hold such person in contempt.

G. No information, facts or data obtained through an investigative order shall be admissible in any civil or criminal proceedings other than for the enforcement of this chapter and the remedies provided herein.

§54.1-3486. Tolling of limitation.

When any of the authorized government agencies file suit under this chapter, the time during which such governmental suit and all appeals therefrom are pending shall not be counted as any part of the period within which a private cause of action under this chapter shall be brought.

§54.1-3487. Individual action for damages or penalty; statute of limitations.

A. If a person who is not a practitioner solicits or encourages a patient, a caregiver of the patient or a practitioner of the patient in violation of any provision of this chapter or if a person who is not a practitioner violates any other provision of this chapter, the patient shall be entitled to initiate an action against such person to recover actual damages, if any, or liquidated damages of \$5,000 per violation, whichever is greater, to enjoin the person from continuing such activities in the Commonwealth, and to recover reasonable attorney fees and costs expended in pursuit of the matter.

B. If any practitioner solicits or encourages a patient in violation of any provision of this chapter or if

any practitioner violates any other provision of this chapter, the patient shall be entitled to initiate an action against such practitioner to recover actual damages, if any, or liquidated damages of ten dollars per violation whichever is greater, to enjoin the person from continuing such activities in the Commonwealth, and to recover reasonable attorney fees and costs expended in pursuit of the matter; however, if the practitioner or his employer receives any monetary incentive from another person for his assistance in committing an act that is in violation of this chapter, the patient may recover actual damages or liquidated damages of \$100 per violation, in lieu of the ten dollars liquidated damages provision, whichever is greater, in addition to injunctive relief, reasonable attorney fees and costs.

C. Any caregiver or practitioner who is solicited or encouraged in violation of any provision of this chapter by a person who is not a practitioner shall be entitled to initiate an action against such person to recover actual damages, if any, or liquidated damages of \$5,000 per violation, whichever is greater, to enjoin the person from continuing such activities in the Commonwealth, and to recover reasonable attorney fees and costs.

D. Any caregiver or practitioner who is solicited or encouraged in violation of any provision of this chapter by a practitioner shall be entitled to initiate an action against such practitioner to recover actual damages, if any, or liquidated damages of ten dollars per violation, whichever is greater, to enjoin the person from continuing such activities in the Commonwealth, and to recover reasonable attorney fees and costs; however, if the practitioner or his employer receives any monetary incentive from another person for his assistance in committing an act that is in violation of this chapter, the caregiver or practitioner may recover actual damages or liquidated damages of \$100 per violation, in lieu of the ten dollars liquidated damages provision, whichever is greater, in addition to injunctive relief, reasonable attorney fees and costs.

E. Except as provided in §54.1-3486, any claim arising under this chapter shall be brought within two years of the wrongful act or discovery of the act, whichever is later.

#### SENATE BILL NO. 1114 AMENDMENT IN THE NATURE OF A SUBSTITUTE (Proposed by the Senate Committee on Education and Health on January 30, 1997) (Patron Prior to Substitute--Senator Hawkins)

A BILL to amend the Code of Virginia by adding in Title 54.1 a chapter numbered 34.1, consisting of sections numbered 54.1-3480 through 54.1-3487, relating to the Virginia Anti-Drug Switching Patient Protection Act; penalties.

Be it enacted by the General Assembly of Virginia:

1. That the Code of Virginia is amended by adding in Title 54.1 a chapter numbered 34.1, consisting of sections numbered 54.1-3480 through 54.1-3487, as follows:

#### CHAPTER 34.1. VIRGINIA ANTI-DRUG SWITCHING PATIENT PROTECTION ACT.

#### §54.1-3480. Definitions.

As used in this chapter, unless the context requires a different meaning:

"Advertisement" means a representation disseminated in any manner or means, for the purpose of inducing, or which is likely to induce, directly or indirectly, the purchase of a prescription drug. The term does not include any act prohibited by the chapter.

Caregiver" means (i) a parent or guardian of a minor patient, (ii) a relative, close friend or employee of a patient who provides in-person physical assistance to the patient, or (iii) a person employed by another to care for a patient who provides in-person physical assistance to the patient.

"Chemically dissimilar" means a prescription drug which possesses one or more active ingredients that are different from those of another prescription drug.

"Deliver" means the actual, constructive, or attempted transfer of any item regulated by Chapter 34 of this title, whether or not there exists an agency relationship.

"Dispense" or "dispensing" means to deliver a prescription drug to a patient by or pursuant to the lawful order of a prescribing practitioner.

"Drug" means (i) articles or substances recognized in the official United States Pharmacopoeia National Formulary or official Homeopathic Pharmacopoeia of the United States, or any supplement to any of them; (ii) articles or substances intended for use in the diagnosis, cure, mitigation, treatment or prevention of disease in an individual; (iii) articles or substances, other than food, intended to affect the structure or any function of the body of an individual; or (iv) articles or substances intended for use as a component of any article specified in (i), (ii), or (iii). "Drug" does not include devices or their components, parts or accessories.

"Employer" means a person who provides monetary or other compensation to another person for goods services, whether the one receiving monetary or other compensation is an employee, agent, partner, independent contractor or other.

"Manufacture" means the production, preparation, propagation, conversion or processing of any item regulated by Chapter 34 of this title, either directly or indirectly by extraction from substances of natural origin, or independently by means or chemical synthesis, or by a combination of extraction and chemical synthesis, and includes any packaging or repackaging of the substance or labeling or relabeling of its container.

"Manufacturer" means any person who manufactures and all agents of that person.

"Monetary incentive" means any rebate, discount, kick-back, fee, special charge or other financial incentive.

"Patient" means an ultimate consumer of a prescription drug who obtains the prescription drug from a licensed pharmacist or practitioner who is authorized by law to prescribe or dispense prescription drugs.

"Person" means any individual, corporation, partnership, association, company, business, trust, joint venture, governmental agency, or other institution or legal entity.

"Pharmacist" means a person duly licensed by the Virginia Board of Pharmacy to practice pharmacy or a person duly licensed by any other state or U.S. territory to practice pharmacy.

"Practitioner" means a person duly licensed by the Commonwealth or by any other state or U.S. territory as a physician, dentist, osteopath, podiatrist, nurse practitioner, TPA-certified optometrist, or physician's assistant.

"Prescribing practitioner" means a practitioner who (i) prescribes a prescription drug for a patient and (ii) is authorized by applicable law to prescribe or administer such drugs.

"Prescription drug" means any drug required by federal law of regulation to be dispensed only pursuant to a prescription, including finished dosage forms and active ingredients subject to § 503 (b) of the Federal Food, Drug, and Cosmetic Act.

"Sells" or "selling" includes barter, exchange, transfer, or gift, or offer therefor.

§<u>54.1-3481</u>. Exceptions to applicability of chapter; no exemption from other provisions of title; advertisements.

A. The provisions of this chapter shall not apply to any prescription drug prescribed by a scientific investigator for purposes of research or prescribed by a veterinarian. Where the solicitation or encouragement prohibited herein is directed to a practitioner or pharmacist, this chapter shall only apply to a solicitation or encouragement where the practitioner or pharmacist has a bona fide practitioner-patient or pharmacist-patient relationship with a specific patient for whom a specific drug has been prescribed from which a substitution is sought.

B. This chapter shall not be construed as exempting any person from the requirements of Chapter 33 (54.1-3300 et seq.) or Chapter 34 (54.1-3400 et seq.) of this title.

C. The provisions of this chapter shall have no application to advertisements for prescription drugs.

D. The provisions of this chapter shall also not apply to: (i) the Department of Medical Assistance Services, (ii) any health care provider while rendering services pursuant to a provider agreement with the Department of Medical Assistance Services, and (iii) any program implemented by the Department of Medical Assistance Services through a contract with an insurer proposing to issue individual or group accident and sickness insurance policies providing hospital, medical, and surgical or major medical coverage on an expense-incurred basis, any corporation providing individual or group accident and sickness subscription contracts, and any health maintenance organization providing a health care plan for health care services.

#### §54.1-3482. Unlawful actions.

A. No person shall solicit or encourage the prescribing practitioner of a patient residing in the Commonwealth, while that patient is physically located in the Commonwealth, to substitute a prescription drug which the prescribing practitioner originally prescribed for the patient with any chemically dissimilar prescription drug, unless the person is the patient, another practitioner or pharmacist, or a caregiver of the patient. The foregoing shall in no way limit the ability of any person to contact a patient's prescribing practitioner to warn of a contraindication, precaution or adverse reaction.

B. No practitioner or pharmacist shall solicit or encourage the prescribing practitioner of a patient residing in the Commonwealth, while that patient is physically located in the Commonwealth, to substitute a prescription drug the prescribing practitioner originally prescribed for the patient with any chemically dissimilar prescription drug where a purpose of the substitution is to assist the practitioner or pharmacist, or an employer of the practitioner or pharmacist, in receiving a monetary incentive directly or indirectly from the manufacturer of the chemically dissimilar prescription drug which is based upon the substitution of that prescription drug in the place of another prescription drug which is chemically dissimilar.

C. No pharmacist shall sell or dispense a prescription drug to a patient residing in the Commonwealth, while that patient is physically located in the Commonwealth, if the pharmacist possesses actual knowledge that (i) a person solicited or encouraged the patient's prescribing practitioner to substitute the originally prescribed drug with any chemically dissimilar prescription drug, and (ii) that a purpose of the substitution is to assist such person or any employer of that person in receiving a monetary incentive directly or indirectly from the manufacturer of the chemically dissimilar prescription drug which is based upon the substitution of that prescription drug in the place of another prescription drug which is chemically dissimilar.

D. No person shall solicit or encourage (i) a patient residing in the Commonwealth, while that patient is physically located in the Commonwealth, (ii) a caregiver of the patient, (iii) a pharmacist of the patient or (iv) a practitioner of the patient to request the patient's prescribing practitioner to substitute a prescription drug the prescribing practitioner originally prescribed with a chemically dissimilar prescription drug where a purpose of the substitution is to assist such person or an employer of that person in receiving a monetary incentive directly or indirectly from the manufacturer of the chemically dissimilar prescription drug which is based upon the substitution of that prescription drug in the place of another prescription drug which is chemically dissimilar.

§54.1-3483. Presumption of violation.

For purposes of this chapter, where a person or a person's employer receives a monetary incentive from a manufacturer of a prescription drug based upon the substitution of that prescription drug in the plac of another prescription drug which is chemically dissimilar, it shall be presumed to be a violation of this chapter.

§54.1-3484. Violators entitled to bring suit; civil penalties.

A. Any person entitled to bring an action pursuant to this chapter as set forth herein may do so regardless of whether that person has violated a provision of this chapter himself.

B. Any practitioner or pharmacist who violates any provision of this chapter shall pay for each violation a civil penalty of not more than ten dollars, plus attorney fees and costs. However, if a practitioner or his employer or pharmacist or his employer receives in violation of this chapter any monetary incentive from another person for his assistance in substituting a chemically dissimilar prescription drug for the prescription drug originally prescribed in violation of this chapter, the practitioner or pharmacist shall pay a civil penalty of not more than \$100, plus attorney fees and costs. Any person other than a practitioner or pharmacist who violates any provision of this chapter shall, for each violation, pay a civil penalty of not more than \$5,000, plus attorney fees and costs. The civil penalty shall be in addition to any other causes of action or remedies that may exist against such person and shall be paid into the Literary Fund.

C. Notwithstanding any other provisions of law to the contrary, the Attorney General or the attorney for any city, county or town may cause an action to be brought in the appropriate circuit court in the name of the Commonwealth, the city, county, or town, the Virginia Board of Pharmacy, or the Virginia Board – of Medicine, respectively, to enjoin any violation of this chapter, to impose civil penalties as prescribe. herein and to recover reasonable attorney fees and costs. Any circuit court having jurisdiction is authorized to issue temporary and permanent injunctions to restrain and prevent violations of this chapter notwithstanding the existence of an adequate remedy at law. In any action under this chapter, it shall not be necessary that damages be proven.

#### §54.1-3485. Investigative orders.

A. Whenever the Attorney General or the attorney for any city, county or town has reasonable cause to believe that any person has engaged in, or is engaging in, or is about to engage in any violation of this chapter, the attorney, if after making a good faith effort to obtain such information, is unable to obtain the data and information necessary to determine whether such violation has occurred, or believes that it is impractical for him to do so, he may apply to the circuit court within whose jurisdiction the person having the information resides, the person has a principal place of business in the Commonwealth, or where any part of the alleged violation occurred in the Commonwealth, which includes without limitation, the jurisdiction of the practitioner's or pharmcist's place of business, the jurisdiction in which the patient resides, and the jurisdiction in which the patient's caregiver resides, for an investigative order requiring such person to furnish to the attorney such data and information as is relevant to the subject matter of the investigation.

B. The circuit courts are empowered to issue investigative orders, authorizing discovery by the same methods and procedures as set forth for civil actions in the Rules of the Supreme Court of Virginia, in connection with investigations of violations of this chapter by the Attorney General or the attorney for any city, county or town. An application for an investigative order shall identify:

1. The specific act or practice alleged to be in violation of this chapter;

2. The grounds which shall demonstrate reasonable cause to believe that a violation of this chapter may have occurred, may be occurring, or may be about to occur;

3. The category or class of data or information requested in the investigative order; and

4. The reasons why the Attorney General or the attorney for any city, county or town is unable to obtain such data and information, or the reason why it is impractical to do so, without a court order.

C. Within twenty-one days after the service upon a person of an investigative order, or at any time before the return date specified in such order, whichever is later, such person may file a motion to modify or set aside such investigative order or to seek a protective order as provided by the Rules of the Supreme Court of Virginia. Such motion shall specify the grounds for modifying or setting aside the order, and may be based upon the failure of the application or the order to comply with the requirements of this chapter, or upon any constitutional or other legal basis or privilege of such person.

D. Where the information requested by an investigative order may be derived or ascertained from the business records of the person upon whom the order is served, or from an examination, audit or inspection of such business records, or from a compilation, abstract or summary thereof, and the burden of deriving or ascertaining the information is substantially the same for the Attorney General or the attorney for any city, county, or town as for the person from whom such information is requested, it shall be sufficient for that person to specify the records from which the requested information may be derived or ascertained, and to afford the Attorney General or the attorney for any city, county, or town as for inspect such records and to make copies, compilations, abstracts or summaries thereof.

E. It shall be the duty of the Attorney General or the attorney for any city, county or town, his assistants, employees and agents, to maintain the secrecy of all evidence, documents, data and information obtained through the use of investigative orders or obtained as a result of the voluntary act of the person under investigations and it shall be unlawful for any person participating in such investigations to disclose to any other person not participating in such investigation any information so obtained. Any person violating this subsection shall be subject to a civil penalty not to exceed \$25,000 and contempt of court. Notwithstanding the foregoing, this section shall not preclude the presentation and disclosure of any information obtained pursuant to this section in any suit or action in any court of this Commonwealth wherein it is alleged that a violation of this chapter has occurred, is occurring or may occur, nor shall this section prevent the disclosure of any such information by the Attorney General or the attorney for any city, county or town to any federal or state law-enforcement authority that has restrictions governing confidentiality and the use of such information similar to those contained in this subsection.

F. Upon the failure of a person without lawful excuse to obey an investigative order under this section, the Attorney General or the attorney for any city, county or town may initiate contempt proceedings in the circuit court that issued the order to hold such person in contempt.

G. No information, facts or data obtained through an investigative order shall be admissible in any civil or criminal proceedings other than for the enforcement of this chapter and the remedies provided herein.

#### §54.1-3486. Tolling of limitation.

When any of the authorized government agencies file suit under this chapter, the time during which such governmental suit and all appeals therefrom are pending shall not be counted as any part of the period within which a private cause of action under this chapter shall be brought.

#### §54.1-3487. Individual action for damages or penalty; statute of limitations.

A. If a person who is not a practitioner or pharmacist solicits or encourages a patient, a caregiver of the patient, a practitioner of the patient, or pharmacist of the patient, in violation of any provision of this chapter or if a person who is not a practitioner or pharmacist violates any other provision of this chapter, the patient shall be entitled to initiate an action against such person to recover actual damages, if any, or liquidated damages of \$5,000 per violation, whichever is greater, to enjoin the person from continuing such activities in the Commonwealth, and to recover reasonable attorney fees and costs expended in pursuit of the matter.

B. If any practitioner or pharmacist solicits or encourages a patient in violation of any provision of this chapter or if any practitioner or pharmacist violates any other provision of this chapter, the patient shall be entitled to initiate an action against such practitioner or pharmacist to recover actual damages, if any, or liquidated damages of ten dollars per violation whichever is greater, to enjoin the person from continuing such activities in the Commonwealth, and to recover reasonable attorney fees and costs expended in pursuit of the matter; however, if the practitioner or his employer or the pharmacist or his employer receives any monetary incentive from another person for his assistance in committing an act that is in violation of this chapter, the patient may recover actual damages of \$100 per violation, in lieu of the ten dollars liquidated damages provision, whichever is greater, in addition to injunctive relief, reasonable attorney fees and costs.

C. Any caregiver, practitioner or pharmacist who is solicited or encouraged in violation of any provision of this chapter by a person who is not a practitioner or pharmacist shall be entitled to initiate an action against such person to recover actual damages, if any, or liquidated damages of \$5,000 per violation, whichever is greater, to enjoin the person from continuing such activities in the Commonwealth, and to recover reasonable attorney fees and costs.

D. Any caregiver, practitioner or pharmacist who is solicited or encouraged in violation of any provision of this chapter by a practitioner or pharmacist shall be entitled to initiate an action against such practitioner or pharmacist to recover actual damages, if any, or liquidated damages of ten dollars per violation, whichever is greater, to enjoin the person from continuing such activities in the Commonwealth, and to recover reasonable attorney fees and costs; however, if the practitioner or his employer or the pharmacist or his employer receives any monetary incentive from another person for his assistance in committing an act that is in violation of this chapter, the caregiver, practitioner or pharmacist may recover actual damages or liquidated damages of \$100 per violation, in lieu of the ten dollars liquidated damages provision, whichever is greater, in addition to injunctive relief, reasonable attorney fees and costs.

E. Except as provided in  $\S54.1-3486$ , any claim arising under this chapter shall be brought within two years of the wrongful act or discovery of the act, whichever is later.

**APPENDIX B** 

TASK FORCE MEETING AGENDAS

#### **Initial Meeting**

Thursday, June 19, 1997 House Room D

9:30 - 11:30 a.m.

#### AGENDA

Call to Order	Mr. Joseph M. Teefey Task Force Chair
Introductions and Statement of Purpose	Mr. Joseph M. Teefey
Task Force Operations	Dr. Michael A. Pyles Task Force Facilitator
Membership Roster	
Meeting Schedule	

Presentations on Therapeutic Substitution (30 minutes each)

Mr. Kenneth D. McArthur, Jr. Associate Durrette, Irvin, Bradshaw, PC Richmond, Virginia

Mr. Stephen D. Rosenthal Partner Mays & Valentine Richmond, Virginia

Adjournment

#### **Second Meeting**

#### Wednesday, July 16, 1997 House Room D

8:30 a.m. - 12:30 p.m.

#### AGENDA

Call to Order Mr. Joseph M. Teefey Task Force Chair
Public Comments Mr. Joseph M. Teefey
Overview of Virginia Medicaid Pharmacy Program Mr. David Shepherd, R.Ph. DMAS Pharmacy Supervisor
Overview of Drug Utilization Carol Pugh, Pharm.D. Assoc. Prof., VCU School of Pharmacy
BREAK
Summary of Literature
Comments on Availability of Empirical Data on Drug Switching Professor, VCU School of Pharmacy
Review of Materials Sent to Task Force Mr. Kenneth McArthur, Esq. Durrette, Irvin, Bradshaw, PC
Mr. Stephen Rosenthal, Esq. Mays & Valentine
Discussion of Drug Switching
Development of Task Force Consensus Statement on Drug Switching Dr. Michael A. Pyles Task Force Facilitator

Adjournment

#### Third Meeting

#### Wednesday, August 20, 1997 House Room D

8:30 a.m. - 12:30 p.m.

#### AGENDA

Call to Order	Mr. Joseph M. Teefey Task Force Chair
Review of Materials & Update	Dr. Michael A. Pyles Task Force Facilitator
Public Comments	Mr. Joseph M. Teefey
Responses to Questions Raised in July 16th Meeting	Mr. Michael Worthington Lead Agency Management Analyst Department of Medical Assistance Services Mr. Howard Casway Assistant Attorney General Commonwealth of Virginia Ms. Scotti Russell Executive Director Virginia Board of Pharmacy
Discussion and Adoption of Consensus Statement	Dr. Michael A. Pyles
Initial Discussion of Outline for Task Force Report and Recommendations	Mr. Joseph M. Teefey

Adjournment

.

#### **Fourth Meeting**

#### Wednesday, September 17, 1997 House Room C

8:30 a.m. - 12:30 p.m.

#### AGENDA

Call to Order Mr. Joseph M. Teefey Task Force Chair
Public Comments Mr. Joseph M. Teefey
Policy Options from the Virginia Board of Pharmacy Ms. Scotti Russell Executive Director Virginia Board of Pharmacy
Discussion to Reach Consensus on Recommendations and Report to General Assembly Lead Agency Management Analyst Department of Medical Assistance Services Dr. Michael A. Pyles Task Force Facilitator
Further Business Before Task Force Mr. Joseph M. Teefey

Adjournment

## APPENDIX C

## TRANSCRIPTS OF MEETINGS

ч.

VIRGINIA: DEPARTMENT OF MEDICAL ASSISTANCE IN RE: HJR 630 SPECIAL TASK FORCE Meeting of the Special Task Force held on June 19, 1997, General Assembly Building, House Room D, at 9:30 a.m. . CRANE-SNEAD & ASSOCIATES, INC. 4914 Fitzhugh Avenue Richmond, Virginia 23230 (804) 355-4335 ORIGINAL 

> CRANE-SNEAD & ASSOCIATES, INC. (804) 355-4335

1	DR. PYLES: We're going to go
2	ahead and get started. It's 9:30 and we have a
3	business agenda. To start off with I would like
4	for the people on the Task Force to introduce
5	themselves.
б	SPEAKER: I'm Dr. Karen Knapp
7	from the Board of Medicine.
8	SPEAKER: I'm Dr. Doug Hadley.
9	I am the Medical Director for Signa Health Care
10	of Virginia.
11	SPEAKER: Marjorie Powell from
12	the Pharmaceutical Research and Manufacturers of
13	America.
14	SPEAKER: I'm Joe Teefey and I
15	am the Director of the Medicaid program.
16	SPEAKER: I'm Mark Swenski.
17	I'm President of Virginia Society of Health
18	Systems.
19	SPEAKER: Cindy Pigg and I
20	work for Signa Health Care, but I'm here
21	representing the Academy of Managed Care
22	Pharmaceuticals.
23	SPEAKER: I'm Larry Blanchard.
24	I'm a practicing dermatologist. I'm here
25	representing providers.

CRANE-SNEAD & ASSOCIATES, INC. (804) 355-4335

1	SPEAKER: Jim Counsel. I'm
2	the general counsel for First Health Services in
3	Richmond. I'm here on behalf of Pharmaceutical
4	Care Management Association.
5	MR. TEEFEY: I have three
6	people that will help staff this: David
7	Sheppard, who is the pharmacist for the
8	Department will be one the staff members. I have
9	Mike Worthington, who is in the policy division
10	at Medicaid will be working with us, and Dr. Mike
11	Pyles.
12	We've contacted with the
13	Pharmacy School. We have 29 studies to do this
14	summer. We don't have quite enough people to do
15	them. So I contracted some of the studies out.
16	And the four studies dealing with pharmacy, we
17	will use the Pharmacy School at MCV. Mike will
18	be facilitator for the group here. And you'll
19	hear from all those people a little bit later.
20	I just want to make some
21	general remarks before we get started. The
2 <b>2</b>	reason we're here is because there were two
23	billsHouse Bill 2714 and Senate Bill 1114that
24	were introduced during the Session. They were
25	talking about the Virginia Anti-Drug Switching

1

Patient Protection Act.

2 During the arguments--and I 3 know it was a rather discussed subject during the 4 General Assembly--there were three main things 5 that came out of it. 6 The first one, I think I'll 7 refer to Dr. Blanchard and one of the arguments 8 he used about physicians' concerned about being away and being in another environment, being in 9 10 another place when you have a call for anti-switching. And I think he expressed himself 11 12 extremely well. So that's one of the concerns we 13 had. 14 The other concern was the 15 discounts and rebates to the pharmacies. There 16 was some discussion how that would be handled. Ι think there was a lot of confusion on that. 17 18 The last thing was basically 19 the effect of the formulary. I tried to sit 20 through as many of the meetings and discussions 21 as possible. I think it got to be such a 22 discussed area that the House and the Senate both felt a need to study it further. 23 That's why HJR-630 came about and that's the reason we're 24 25 here today.

> CRANE-SNEAD & ASSOCIATES, INC. (804) 355-4335

.\_.

1	We've got to define what the
2	similar therapeutic class drugs are, the affects
3	and the effect it will have on the deliberate
4	health care. We have to find out the impact it
5	will have on D-Mass with our rebate, probe and
6	retro-DUR programs and the limited
7	pre-authorization we do.
8	We have a big task in front of
9	us. I'm going to get Mike to review the
10	Legislation with you and talk about coming up to
11	some type of statement as far as the Committee is
12	concerned.
13	DR. PYLES: Good morning.
14	First of all, I'd like to just go through a few
15	quick housekeeping things if I could. Many of
16	you I did fax or Federal Express to you about two
17	days ago to you a form. I didn't have some
18	information that I think we'll be needing from
19	you. Before the end of day if you did not get
20	the form to me or never received it, please see
21	me before you leave so I can compile the official
22	roster of members for this Task Force.
23	Next, you should see a blue
24	page up there that has our meeting schedule. Let
25	me say that we're working with a very short

1 period of time as you know. We have basically 2 only about three months of work here. 3 We initially scheduled these 4 meetings for two hours. I've spoken to 5 Mr. Teefey and at this time we need to talk a 6 little bit about the future meetings. The 7 Thursday, August 14th meeting, if you would note, 8 we're going to change that to the following 9 Wednesday, which will be August 20th, instead of 10 August 14th. The other meetings I think are okay 11 as they are. 12 The future meetings at this 13. point are going to be in the Library of Virginia. 14 This one was originally put in the Register to be there but it was confirmed at this room. 15 We will 16 give you the exact locations of those future 17 meetings. Mr. Teefey, I think at this 18 time it might be wise for us to talk about with 19 20 the work had ahead of us-- Maybe before we do 21 that, let me give you an outline of some of the things that we have to accomplish. 22 What the Legislation has asked 23 24 this Task Force to do is to study is the practice of therapeutic substitution and come up with a 25

1 statement about the extent to which it is going 2 on presently and also to assess it's impact on 3 various interested parties including the pharmacists, prescribers as well as the patient, 4 5 to look at the cost associated with the practice 6 So the work ahead of the Task Force is itself. guite ambitious for the time that we have. 7 And T 8 really don't think that two-hour meetings will 9 suffice.

What I'm proposing is that we think about longer meetings on the days that have been indicated there. Perhaps maybe at least three--at least four- to five-hour meetings depending on what the Task Force wishes to accomplish in each meeting.

16 Today's meeting is going to be 17 relatively straightforward. Following this brief introductory period, we will hear from two 18 19 persons today. We will hear from Mr. Kenneth 20 McArthur, who is with Durrette, Irvin, Bradshaw. 21 We will also hear from Mr. Steven Rosenthal, who 22 is with Mays & Valentine. What we will do is 23 hear from them and plan our future meetings and 24 come up with an agenda for the next meeting. 25 I thought it would be

1 important for us to at least begin by getting a 2 grip on what we mean my therapeutic substitution. 3 It is used in various ways in the literature and 4 everyday language. I think that one of the 5 things we need to do is at least establish what 6 we mean by it, particularly the part dealing with 7 chemically dissimilar drug products and changing 8 classes. That's what we need to accomplish. 9 My proposal is that, for instance, looking at the July 16th meeting, I 10 think a 9:30 start time is good, but I think we 11 need to go beyond 11:30, which will give us 12 13 enough time to discuss the issues more 14 thoroughly. 15 If we decide to bring in other speakers or whatever, it will give us a chance to 16 17 hear them and have a chance to discuss among 18 ourselves what it is we would like to go on 19 record. 20 Our products at the end of this whole process--what the Legislation asks for 21 is actually a document that will talk about, one, 22 23 the impact of the practice. And that is a 24 statement or what have you--whatever the Task Force deems would be an appropriate way to do 25

1 that.

2 Then also we need to identify 3 what the components of the cost of the practice To do that I suspect it means we would need 4 are. 5 to have some idea, for instance, what it costs 6 the pharmacists, who often in terms of time is 7 the one there making phone calls, what have you. 8 They've also asked us to draft 9 legislation or what have you related to this 10 practice that could come before the General 11 Assembly in the next session for review. 12 As we get further along in the 13 process that will also be up to us with the help 14 of Division of Legislative Services to come up 15 with some draft legislation. That pretty much is 16 what we have before us. 17 My proposal, Mr. Teefey, is 18 that we might look at meeting from about 9:30 to 19 1:30 for the next meeting at least. MR. TEEFEY: Okay. 20 21 MS. KNAPP: Is it 22 inappropriate to ask if we start earlier. 23 MR. TEEFEY: Is anybody coming 24 in from out of town? I think Ms. Powell is. 25 MS. POWELL: But I can be here

1 earlier. 2 MR. TEEFEY: That would be 3 great. We could start earlier. 4 DR. PYLES: What's a good time? 5 6 MR. TEEFEY: 8:30. 7 DR. PYLES: At least for a meeting, we can get in there any time. 8 9 SPEAKER: This room is 10 available and so is House Room 4. DR. PYLES: I don't have any 11 12 preference. Do you, Mr. Teefey? 13 MR. TEEFEY: Either one would . be okay. Let's see which one would be the 14 15 easiest to get. DR. PYLES: Was this building 16 17 pretty accessible to everyone? TASK FORCE MEMBERS: Yes. 18 19 DR. PYLES: So we could look at the future meetings being held in House Room 20 21 D. MR. TEEFEY: Then we could 22 change the starting time to 8:30 in the morning. 23 DR. PYLES: The starting time 24 will be 8:30 at future meetings and continue to 25

1 meet in House Room D unless there is a problem 2 with availability. If that is the case, I will 3 let you know. 8:30 until what time? 4 5 MR. TEEFEY: Let's say 12:00, 6 12:30. 7 DR. PYLES: All right. Let's 8 go ahead then and say for the future meetings; 9 July 16th, August 20th and September 17th we will 10 begin at 8:30 in this room and go until 12:30. And if something changes, I'll get back with you. 11 12 One last little piece: What 13 I'm going to try to do to expedite our meetings 14 is get information to you in a timely manner so 15 that if there are documents you've asked for, et 16 cetera-- The reason I Federal Expressed you that 17 form is so that I can get things to you either 18 E-mail-- We will use E-mail but also use 19 overnight delivery when that's necessary to 20 expedite things. That's why I need that 21 information from you. I think that's all in 2.2 terms of housekeeping details. 23 At this time, Mr. Teefey, if 24 it's okay with you, the first speaker we have for 25 this morning is Mr. Kenneth McArthur from

1 Durrette, Irvin and Bradshaw.

2 MR. TEEFEY: Before Kenneth 3 gets started-- This is a real important subject 4 and we have people in the audience-- After we 5 have the two presentations if anybody wants to give--to be fair to the Task Force, if anybody 6 wants to give any type of two-minute statement, 7 8 we'll let you do that. 9 We just feel that this is an 10 important subject, and I want the Task Force to 11 have the benefit of any opinions that come out of 12 the audience. 13 MR. MCARTHUR: Good morning. 14 As Dr. Pyles said I'm Ken McArthur and I'm with 15 the Richmond based law firm of Durrette, Irvin 16 and Bradshaw. 17 The reason I'm here today, I 18 think, is because I was one of the drafters of 19 the Bill which was introduce dollars last year which sought to outlaw the practice of switching 20 21 chemically dissimilar drugs where a monetary 22 incentive is present. That is a gross oversimplification of the Bill but because of 23 time and that bill is not currently in front of 24 us I'm got not going to waste your time and waste 25

1 the limited amount of time I have here to present 2 our perspective on this issue to you by going 3 through the Bill from last year line by line. Let me say at the outset that 4 5 I am not going to try to make every single argument that I think could be made to criticize 6 7 the practice of switching chemically dissimilar drugs for money. I don't think I have time in 30 8 9 minutes to do that, nor do I think that I need to 10 do that because I think most of the people who are present here today already know them. 11 I'm also not going to try to 12 set forth specific terms of any Bill for next 13 14 year and suggest any language of any Bill that 15 would outlaw such practices. Again, because of 16 concerns with time and because I think that the 17 purpose of this Task Force is to work through this issue and come up with language of such a 18 19 Bill and that's not my job. 20 So what I am going to do is raise, what I hope, are some issues which I think 21are critical for this Task Force to address. 2.2 And 23 if they are not addressed, in my opinion and in 24 my humble opinion, this Task Force will not have 25 done its job.

Before I get into those issues what I would like to do-- And I apologize to those of you who are more knowledgeable perhaps of some of the terms used in the health careen industry even than I am. I have to modestly say I have spent approximately 7,000 hours of my life now over the past three years studying the pharmaceutical industry. In fact, spending a substantial majority of that time focussing on this very issue which is before this Task Force. Even though many of you already know what many of these terms mean, just to clarify for my purposes of raising this issue, I would like to good ahead and define these terms as I'm going to use them. I'm not going to try to convince everybody that we should reach a consensus on the definition of these terms. Ι just want to define them so everybody knows what I'm talking about when I raise these issues. The first definition that I

The first definition that I would like to give is one of generic substitution. My definition of generic substitution is switching from a chemically similar drug--from one drug to a chemically similar drug. When I use the term chemically

similar, I'm using the language that I believe is used by the Food and Drug Administration and is reflected in its annual publication, which is supplemented from time to time throughout the year, which is known throughout the industry as the Orange Book.

7 When the active ingredients in 8 a prescription drug are the same--there may be 9 one or more active ingredients--then the switch 10 from one drug to that other drug where the active 11 ingredients are the same is, in my definition, a 12 generic substitution.

13 It doesn't necessarily have to be from a brand name drug to a generic drug. 14 It 15 could be from a generic drug to a branded generic 16 by another manufacturer. It could be from a 17 branded generic to another branded generic from another manufacturer. 18 There are several 19 permitations but the thought is the same. 20 Generic substitution for purposes of my issues 21 that I'm going to raise today is switching among 22 chemically similar drugs. 23 In the industry there is some

24 confusion, I think, at last there appears to be 25 among people, of what the definition of

1 therapeutic substitution is. My definition of 2 that for purposes of raising issues today is 3 switching from one drug to another drug and for purposes of my discussion today, will be a 4 chemically dissimilar drug, which simply means 5 that one are or more active ingredient are 6 different in the switched to drug from the 7 8 original drug.

The switching, however, is 9 10 done without consulting the prescriber on each 11 individual switch. There may be some protocol 12 whereby the prescriber, group of prescribers has 13 given advance permission, if you will, are or 14 authorization to certain individuals, usually 15 pharmacists, to make switches from one drug to a chemically dissimilar drug. 16

Therapeutic interchange, 17 18 however, is something a little different. 19 Therapeutic interchange is switching among 20 chemically dissimilar drugs. So its like therapeutic substitution in that sense. However, 21 22 in therapeutic interchange the prescriber is There is a telephone call or some 23 consulted. other contact with the prescriber and the person 24 25 who is seeking the switch--seeking the solicitor

to encourage the switch asks the prescriber to
rewrite a brand new prescription for a chemically
dissimilar drug.

4 It is my understanding that in 5 the hospital in-patient setting the kind of drug switching that goes on when there is drug 6 switching is therapeutic substitution. 7 In the 8 ambulatory setting, which is virtually everywhere 9 else, if not everywhere else outside the 10 in-patient hospital setting, we're talking about 11 therapeutic interchange. Because it is unlawful 12 in those ambulatory settings to switch a 13 patient's drug to a chemically dissimilar drug 14 without consulting with the prescriber and having 15 a brand new prescription written for the drug. 16 Now, having clarified that, 17 let me say when I talk about the drug switching, when I raise some issues with the Task Force over 18 19 the next couple of minutes, what I'm talking 20 about is therapeutic interchange. The first point that I would 21 22 like to make -- it really is not just a point. 23 It's eight points and a request of the Task

25 have never seen any studies published anywhere

24

Force.

CRANE-SNEAD & ASSOCIATES, INC. (804) 355-4335

The point is that I am concerned that I

that show me that someone has conducted clinical 1 2 scientifically-based peer-reviewed research on 3 what risks are involved in switching from one 4 drug to a chemically dissimilar drug. I just haven't seen any published studies. 5 Now, I have made an effort and 6 I have a network of co-counsel, and clients 7 8 around the country, and we have all made an effort to seek out this information. 9 So far, I 10 haven't found any studies that have been published that fit that description that assess 11 the risk of switching from any drug to any 12 chemically dissimilar drug. 13 14However, what I have seen and what I think every member of this Task Force 15 16 would agree to is that health care providers seem 17 to me at least to agree throughout the industry that there is a risk involved when you switch 18 from one drug to another drug. 19 2.0 There is a risk involved to the patient's health. By the way, that risk 21 includes even when you are making a generic 22 substitution. Yo: are switching among chemically 23 And I think certain state similar products. 24 legislatures have had the wisdom to recognize 25

> CRANE-SNEAD & ASSOCIATES, INC. (804) 355-4335

Page 18

that even chemically similar switching can be 1 dangerous and involves a risk, particularly when 2 it involves a class of drugs that is commonly 3 called the narrow therapeutic index drugs. 4 Despite the existence of this 5 6 risk and agreement among all health care providers with whom I've ever spoken or 7 8 publications that I have ever read that there is 9 a risk involved, I have seen no risk assessment 10 That's my point. studies. My question is: 11 The Task 12 Force needs to ask whether such studies exist. 13 If they exist, they need to be produced so that 14 the Task Force can critique these and analyze 15 them and determine whether they're scientifically 16 based and whether they're valid and should be considered in whatever the initiative the Task 17 18 Force may want to adopt. 19 The second point I would like 20 to make is that I have heard asserted by a lot 21 of--and I'm not going to pick on any particular 22 company or any particular individual, but I have 23 heard asserted and read in statements which have 24 been created by a lot of different people and 25 entities that there is a public policy reason

1 underlying switching chemically dissimilar drugs. 2 That public policy reason is that it is a managed 3 care cost containment tool. It is a way to 4 erforce a restricted drug formulary. It is a way 5 to affect cost savings for a plant and that is 6 desirable to third party plan sponsors, whether 7 they be government entities or private entities 8 or individuals.

9 I would like to make the point 10 and again make a request that I'd like to make 11 the point that I have never seen a published 12 scientifically peer-reviewed study anywhere in 13 the United States that shows that there is any 14 cost savings to any plan resulting from 15 chemically dissimilar switching of prescription 16 druas. I have heard a lot of claims. I have 17 heard a lot of statements, but I have never seen 18 any evidence.

So my request is that if there is such evidence, the Task Force should request it and whoever has it should bring it forward and it should be properly considered as part of putting together any kind of initiative the Task Force may choose to put together.

25 My third point, which is

somewhat related to the second point--I quess all 1 three points are related--is that I have also 2 seen in the marketplace a lot of studies and a 3 lot of articles published in scientific 4 publications that conclude that switching 5 chemically dissimilar drugs on patients, in fact, 6 increases overall health care costs. 7 Just to explain, although I 8

9 don't think it's necessary among this group, but 10 just for record to explain what I mean by that: 11 Health care costs are typically looked at in 12 There's a cost component analysis components. 13 approach to looking at the cost of health care. 14 There would be a drug component, how much you 15 spend on prescription drugs. There might be an 16 emergency room visit component. There might be a 17 doctor's visit component, a hospital stay component. It doesn't matter how you cut it up. 18 19 There are different types of components of costs 20 within any given health care plan.

The Overwhelming majority--in fact, not just the overwhelming majority, but all of the studies published in scientific literature that have read indicates that when you engage in the switching of chemically dissimilar drugs, you

1 increase the cost in other components of the 2 health care plan. 3 To illustrate: A patient is 4 titrated on a particular blood pressure medication. It's working well for the patient. 5 The patient is in a private health care plan. 6 7 The patient goes to the patient's physician and 8 sees the physician. The physician writes a 9 refill or an original prescription for a blood 10 pressure medication for this patient. The 11 patient goes into the patient's pharmacy. 12 The patient discovers from the 13 pharmacist that the pharmacist has received when 14 the pharmacist has submitted a claim across his 15 on-line claims adjudication system he or she 16 received a message from that plan--from that 17 insurance plan that this particular drug is not 18 going to be covered by that plan or that that drug is not preferred by that plan. 19 And 2.0 therefore, that pharmacist should talk to the 21 patient perhaps, talk to the doctor perhaps and 22 persuade the physician or original prescriber to 23 rewrite a new prescription for a chemically 24 dissimilar drug.

When that happens, the patient

CRANE-SNEAD & ASSOCIATES, INC. (804) 355-4335

25

1 may have to be retitrated on the new drug, which 2 may require additional visits to the doctor that 3 otherwise would not have been required had the 4 patient's drug not been switched.

In such a case, the five or 5 6 six additional doctor's visits that may go along 7 with retitrating that patient will cost enough money that even if there were a cost savings 8 9 produced by switching the drug in the drug 10 component, it would be more than offset by the 11 additional cost of going to see the physician that many times. That is a simple what I 12 13 consider relatively benign example.

14 There is a risk to the 15There is an additional increase in cost patient. 16 to other health care components, but it may or 17 may not be life threatening. One of the reasons 18 we are so concerned about this issue is because 19 this is not the only kind of example that we have 20 seen in the Commonwealth of Virginia. There are 21 many, many examples that we have seen that are 2.2 life-threatening examples.

I would like to point out that any statements that I make today I'm going to produce--and I'm going to state this on the

record, I'm going to produce all the evidence that I have alluded to to support the statements that I make. I didn't bring it with me today but I will be happy to submit it to the Task Force

• •;

1

2

3

4

5

6 We would urge the Task Force to demand accountability from those entities 7 8 which are engaged in the practice of switching 9 chemically dissimilar drugs. We would ask the 10 Task Force to ask those engaged in this practice 11 or wish to be engaged in this practice, and 12 therefore oppose any legislative initiative which 13 would outlaw it to produce the evidence to support their position. 14

before its next meeting.

15 We believe that the burden of proof falls squarely on those who wish to engage 16 There is a consensus among the 17 in the practice. health care--among the people in the health care 18 community that this practice is risky. We don't 19 know how risky it is and don't have any evidence 20 that it is saving anybody any money, so there's - . 21 22 not even any public policy reason for it.

Therefore, we ask that those
would seek to engage in the practice the burden
of proof be placed on them to justify why they

should be allowed to engage that the practice. 1 2 And should they fail to meet their burden of 3 proof or should those who oppose the practice sufficiently rebut the evidence they put forward 4 that this practice be outlaw until such time as 5 6 someone, if ever, can figure out a way to engage 7 in this practice that is safe and has some 8 benefit to society. 9 Before I end I want to address

10 a couple of points that I think need to be 11 addressed here in the outset while we're framing 12 this issue. I heard a lot of criticism of the 13 Bill that was introduced last year. I would like 14 to just very quickly go through and address some 15 of those criticisms.

16 One of the criticisms that I 17 heard was that we don't need to legislate this 18 problem because the private market place will 19 take care of it. I would like to address that 20 argument.

First of all, I'm not sure that the private market place can address this problem. What we have found is that third-party plan sponsors are largely uninformed about this issue. We actually went around and talked to

some employee benefits managers and some of the Fortune 500 hundred companies here in Richmond. When we started talking about the switching of chemically dissimilar drugs and entities like PBMs and that sort of thing, we were met with glazed eyes and responses and questions like what's a PBM.

8 In a study that was performed a little over a year ago, six of the nation's 9 largest HMOs on condition of anonymity gave a 10 team of research scientists access to their 11 confidential proprietary competitively sensitive 12 documents and allowed them to have at it and 13 14 attempt to lay to rest criticisms of restrictive drug formularies and any practice associated with 15 16 those including prescription drug switching. 17 I have talked to the person 18 who led that team, Dr. Susan Horn. She informed 19 me that when she began that study she was a big believer in things like prescription drug 2.0 21 switching programs. But that after conducting 2.2 that study she became a convert and decided that

23 prescription drug switching was not a good idea.
24 And she informed the six HMOs of this after she
25 produced to them results from that study which

1 indicated that the more these kind of programs 2 were used, the higher the overall health care 3 cost in their health care plans. She has informed me that as a 4 5 result of that study those 6 HMOs at least have 6 actually taken steps toward stopping some of 7 these practices. 8 The second criticism that I 9 heard most often was that this Bill was going to 10 negatively impact pharmaceutical care. Now I 11 find that very interesting because I think what we have is a problem here again on definitions. 12 13 I think that most managed care 14 organizations define pharmaceutical care as 15 pharmacists engaging in prescription drug 16 switching programs. The managed care 17 organization enters into contracts with drug 18 manufacturers pursuant to which they get paid 19 money to attempt to affect what prescriptions get 20 prescribed for their plan participants. And to 21 the extent that a pharmacist is valued as a tool 22 in for in that process they might be paid to do 23 it. 24 That's my understanding of 25 many managed care entities definition of

pharmaceutical care, cognitive services, disease
 state management and the like.

My clients, who are mostly 3 community pharmacists, define pharmaceutical care 4 in a very different way. They define 5 pharmaceutical care as an educated, trained, 6 experienced, licensed pharmacist making decisions 7 which in his or her professional judgment on a 8 patient-by-patient basis, that are in best 9 overall short and long term interest of that 10 patient. And hopefully when the information is 11 available to them in the market place, decisions 12 which will be cost effective for the plan. 13 14 I think that the dispute over how to define pharmaceutical care is one that 15 should be addressed by this Task Force, as well 16 as the other points I've already mentioned. 17 A third criticism that I heard 18 about this Bill was that if this Bill were 19 enacted in law, it would cause health care costs 20 to rise. Together with that was the statement 21 that it would do away with drug formularies and 2.2 that those were supposed to somehow be linked to 23 each other. 24

Now, I've already made the

CRANE-SNEAD & ASSOCIATES, INC. (804) 355-4335

25

1 statement earlier so I won't repeat myself that I 2 have not seen any evidence that any cost results, 3 either in the drug component or in the overall health care plan from drug switching practices. 4 5 So I'm not sure exactly what the statement that 6 this is going to increase costs means. 7 In fact, I've seen ample 8 evidence that it will decrease cost in the 9 overall health care plan. So in my view, passing 10 the Bill would decrease costs, not increase 11 costs. 12 Again, if there are those that 13 have information that is contrary to my belief, I 14 would encourage them to present it to the Task Force and as Jerry McGuire says, "Show us the 15 16 money." Let's see it. Because I think it's 17 important that the Task Force members understand 18 that there is a flow of money from drug 19 manufacturers to managed care organizations of 20 all kinds. 21 But that flow of money needs 22 to be differentiated. It needs to be broken out 23 so that everyone understands that some of that 24money has to do with generic substitution. Some 25 of that money has to do with certain educational

1 things that the managed care organization might 2 do. Some of that money has to do with other 3 things the managed care organization might do. 4 I think if anybody is going to make a claim that this Bill is going to increase 5 6 the health care cost, they need to show to what 7 extent and how much. The last point I would like to 8 make is that I hope that the Task Force members 9 10 will keep in mind as they go through this process 11 that the most important consideration that should 12 be made here is what kind of impact do these 13 practices have on patients in the Commonwealth of Virginia. What does this do to Virginians? 14 Are 15 we being penny wise and pound foolish? In this process let's not forget that the patients are 16 17 the most important. 18 I hope also that as the Task 19 Force goes forward that the Task Force will be sure to remember to look at hard evidence in 20 21 making its decisions. I don't expect to make any more statements in front of the Task Force unless 22 23 I'm called upon to do so. I hope that the Task Force 24 will not waste its time by listening to a lot of 25

1 statements from a lot of different people who 2 have opinions on the subject. 3 I hope instead what they will 4 do is look at the hard evidence that is produced 5 by all interested parties and make an informed 6 decision on that basis. Thank you very much for 7 this opportunity. 8 MR. TEEFEY: Thank you, Ken. 9 Can you make sure as soon as possible that you 10 get us all that information so we can get it to 11 the Task Force because I'm sure it will be a lot 12 of reading? 13 MR. MCARTHUR: Yes, sir, I 14 will. 15 MR. TEEFEY: If we could get 16 it as soon as possible. 17 MR. MCARTHUR: I would be 18 happy to. Thank you. 19 MR. TEEFEY: Mr. Rosenthal. 20 MR. ROSENTHAL: Members of the 21 special Task Force, thank you for the opportunity 22 to be here. I listened to Ken's comments with 23 interest because I think you're going to find a 24 lot of what I have to say is the same thing. We 25 may define terms different ways but in terms of

how this Task Force moves forward and the types of things it looks at. Ken and I seem to be on the same wavelength although we have not discussed what our comments would be before today.

6 Let me tell you who I am. I'm 7 Steve Rosenthal. I'm an attorney with Mays & 8 Valentine here in Richmond. I represent a large 9 coalition that was involved in the previous 10 legislation that generated this study and special 11 Task Force.

12 I don't know how many of you 13 saw last month's Money magazine. Did any of you 14 see that? I hope so because I may be showing you 15 something I shouldn't be. I want to read an 16 article. Those of you who were not in the 17 General Assembly last year will not recognize 18 this piece out of the article. Those who were, 19 like Dr. Blanchard and a few others, will 20 remember a woman who testified at a number of committees about "drug switching." And I use 21 22 that term in quotes.

The lead article-- I just want to read a couple of paragraphs. The lead article says that Marie Williams, a 56-year-old

school bus driver and resident of Richmond. 1 For five years she had been using Zestril to control 2 3 her high blood pressure. But when she went to her local 4 5 pharmacy on January 4th to get a refill, her 6 pharmacist had disturbing news. He would give her Zestril, which successfully lowered her blood 7 pressure with no side effects only if she paid 8 9 the full cost of the drug because her health insurance did not cover it any more. 10 11 On New Year's Day, Williams' 12 employer had switched health plans. And its new 13 insurer, Signa, preferred that certain blood pressure patients take a different version of the 14 15 drug called Prinivil. 16 Without consulting Williams' physician, who was Dr. Annette Reed, the 17 18 pharmacist switched her to Prinivil. 19 The article goes onto say that 20 a few days after taking the new drug, Ms. 21 Williams knew something was wrong. She was 22 She had headaches and her ears were lightheaded. 23 popping as though she were high up in the 24 mountains. She was a school bus driver for 25 children and this rightly concerned her.

1 This same testimony was given 2 to at least two committees that I know of on the 3 issue of drug switching, on the component side of 4 legislation. 5 If you look in the Physicians' Desk Reference in fact what you find is that 6 7 Zestril and Prinivil are identical drugs. Thev are both Lisinopril. There is no difference. 8 9 One is produced by Merck and the other is 10 produced by Zeneca. 11 Merck is the only company that 12 has the patent on Lisinopril and it has licensed 13 Zeneca to also produce it. I have copies if you 14 want them--and I'll pass them out later after the 15 meeting--to show you that the chemical make-up is 16 identical. It's not just similar, it's 17 identical. 18 Where am I going with this? There was no drug switching. 19 There was no 20 therapeutic interchange of chemically dissimilar. There was no chemical dissimilarity. 21 There was literally no chemical change at all. 22 23 Yet, during the General 24 Assembly this poor woman, Marie Williams, who 25 apparently did have a problem and her husband,

1 were paraded through the Assembly, through the committees as prime examples of the evils of 2 switching chemically dissimilar drugs. 3 Now why do I go through this? 4 It's for the same reason that Ken said to you 5 what he said earlier. It is this kind of 6 7 misinformation and this kind of hyperbole that has generated this Task Force and this study. 8 You're not here to watch a 9 10 propaganda war. I can tell you from the coalition that I represent that we're not here to 11 wage one. The whole problem with legislative 12 13 session was a total lack of reason, debate that 14 was grounded in fact. Antidotal evidence won't 15 16 suffice. And we encourage this Task Force to demand nothing short of objective data to support 17 18 any particular course of action. 19 As you can see from the Money 20 magazine article, and as we found during the General Assembly, there has to be a careful use 2122 of terminology as we discuss these issues. А 23 broadside condemnation of so-called drug 24 switching is not helpful, and it doesn't advance 25 any particularized understanding of the issues

that this body needs consider. 2 You as a Task Force were 3 constituted to bring to a complex issue diverse

1

expertise, background, training and experience 4 and to have the time to apply those qualities in 5 an environment free from the severe constraints 6 of a General Assembly session that tries to look 7 at thousands of Bills within a few week's time. 8 You are tasked to use that 9

10 expertise and the time to find out what those 11 facts are and how those facts impact a large 12 number of state holders. Not just independent pharmacies and not just a large employer and not 13 just large coalitions, but also the Commonwealth, 14 Medicaid, HMO, managed care organizations, the 15 mental health community and most importantly the 16 17 Commonwealth citizens.

There has been talk--18 Τn fact, I even mentioned about the previous 19 20 legislation. Let me say very clearly that our 21 understanding is that -- and we encourage you to start with a clean slate, that failed legislation 22 is not the starting point. There are no 23 presumptions. Either the legislation is needed 24 25 or the legislation is not needed. Either way,

you should demand that the need or lack of need 1 2 be proven from the ground up before you. 3 You should not simply accept antidotal evidence. It's not fair to you and 4 it's not fair to all those that will be impacted 5 by your decision. Any such antidotes, like the 6 7 one I mentioned earlier, must be carefully 8 examined and investigated by the State and this 9 Task Force. Without that kind of scrutiny, you 10 will fall victim to the same emotional appeal as 11 Money magazine. 12 The starting point is facts 13 and data. Facts and data to be gathered by your 14 staff and presented to you. Facts and data so that you can make an informed and meaningful 15 16 policy recommendations. 17 We, too, like Ken, have 18 requests and ask that you look at certain things. 19 As you are studying this issue look and 20 see--identify what is going on in the market 21 today and why is it happening. Are there 22 specific practices that pose risks to the public that outweigh any associated benefit to the 23 24 public? Who is doing what and why? Does the 25 identity or interest of the party engaged in a

2 This study raises important 3 questions about the physician, patient, pharmacist relationship. As you work through 4 this complex area, before you decide on any 5 course of action, I encourage you to consider 6 7 these types of questions. Will it harm the overall quality of care that is provided to 8 9 Virginians? Will it prevent pharmacists from 10 informing physicians of significant price 11 differences among alternative drug sources, such 12 as the two identical drugs I mentioned in the 13 beginning? 14 Will it cause the Commonwealth 15 to spend more on drugs for Medicaid beneficiaries 16 than necessary? Would it disadvantage the 17 competitive posture of Virginia businesses? 18 Would it eliminate practices Virginia would want to encourage? Would it force employers to 19 20 restructure benefit plans to the detriment of our 21 citizens? What is the overall financial impact 22 to Virginia? 23 On this issue there's been almost no consideration of a factor as important 24 as this. We say to you if there is something 25

particular practice matter?

1

Page 39

1 wrong and a need to fix it by legislation, then you have an obligation to identify the problem 2 and an obligation to suggest appropriate 3 solutions and report that to the General 4 5 Assembly. But by the same token, if 6 7 there are no problems or none that call for a 8 legislative fix, then you need tell the General 9 Assembly that also. 10 All of these things: The need 11 to avoid allegations not grounded in fact, starting with a clean slate, making sure that all 12 13 points of view are heard and considered, all of 14 those are really just another way of saying what your enabling resolution says. 15 16 That resolution is that 17 special Task Force be established to study the 18 practice of therapeutic interchange of chemically dissimilar drug products. The special Task Force 19 20 shall examine all aspects and effects of the 21 practice of therapeutic interchange of chemically 22 dissimilar products throughout the health care system, including, but not limited to its impact 23 24 on health care, the affected professions, the 25 overall cost of health care products and services

1 and patients. 2 The coalition that I 3 represent, we are here honestly to assist in any way we can. Our goal is to provide you and your 4 5 staff any information that's not confidential and can't be released, any information otherwise that 6 will be helpful in attacking these issues. 7 8 We appreciate the time and I 9 know a lot of effort will be put into this. ₩e 10 stand ready to help. 11 MR. TEEFEY: Again, Steve, we 12 have to sort through a lot of information. Whatever information you have, if you could get 13 . 14 it to us as soon as possible. 15 MR. ROSENTHAL: Thank you. 16 MR. TEEFEY: Before we get 17 into the statements, would anybody in the audience like to make a statement? 18 19 DR. PYLES: I would just ask a 20 identified yourself. 21 SPEAKER: My name is Cindy 22 I just wanted to make a statement just Warner. 23 to clarify one point so there would be no misunderstanding. One of the things that Ken 24 25 McArthur stated was trying to differentiate

between different versions of what pharmaceutical
 care is.

3 I think it's very important and clarify that pharmaceutical care from the 4 5 pharmacist's perspective is meant to a 6 collaborative practice. They are there to aid 7 and assist, to provide information, to optimize 8 the drug therapy for that patient and that's done 9 in conjunction with the physicians. 10 The other point is--and I 11 don't think anybody really hit this on the head 12 and this is something that the Task Force I hope 13 they would really seriously consider would be who 14 is initiating the change or the request for the 15change for that patient. I think the bottom line 16 for that is it coming from a business decision or is it coming from a patient-oriented decision 17 18 from the health care provider that best knows

19 that patient.

Thank you very much.
DR. PYLES: If have those
written, could I have a copy?
SPEAKER: Sure.
MR. TEEFEY: Would anyone else

25 like to make a statement?

Page 42

1 From the statements that we 2 have now to look at, we have a pretty good job in 3 front of us. 4 DR. PYLES: Mr. Teefey, that is pretty much what we had on the agenda for 5 If the Task Force members would like to 6 todav. make comments at this point or requests of us, 7 8 you can do so at this time in terms of our next meeting and what you would like to see for the 9 next meeting. If you could identify yourself for 10 11 me. 12 SPEAKER: My name is Cindy 13 Pigg. I'm just curious as to what our framework 14 will be so I can be prepared at our next meeting 15 on how do we begin to tackle this issue. 16 DR. PYLES: One of the first 17 things we would like to do is have the Task Force 18 on record with the statement of the practice of 19 therapeutic interchange and what it means in 20 terms of the Task Force's view. That is a 21 statement -- a cogent statement that says this and it involves this. So that's something that we 22 will probably be drafting and putting out to each 23 of you for your input so we can come to a 24 consensus of what we mean by that, and any other 25

issue or any other thing that needs to be defined 1 2 that the Task Force deems necessary to define. 3 MR. TEEFEY: Cindy, I had kind 4 of the same feeling you had. I go back to Ken;s 5 comment. Ken has really laid out a pretty good 6 sequence in here. He's got the definitions of the two. And I think we've got to decide on a 7 8 definition. 9 I think the second thing is he 10 talks about particular studies. One of the studies is there are no studies anywhere that 11 12 shows that this is a cost savings. I think we 13 have to look at the risks that he stated there. He's laid out quite a few things. 14I think what we've got to do 15 16 when we get in between the next two is to come up with an agenda. Take Ken's and Steve's two talks 17 18 and lay out some of those things that they 19 brought out and get supportive information from 20 both of them so that we can start deciphering it 21 and coming up--22 I think its real important we 23 come up with some statement. We know what the 24 legislation says but I think the statement is the 25 next thing.

Page 44

1 With all due respect SPEAKER: 2 to Mr. Rosenthal and Mr. McArthur, both of whom I had the opportunity to meet before, when they 3 4 give us their information, I'm not going to assume that's all the information that is out 5 6 there. Do we have somebody that has the time to 7 dig through the literature for us? 8 DR. PYLES: Some of that is 9 going on Mr. Worthington who is the other staff member of D-Mass and has done some of that. 10 We 11 have identified I think an Inspector General 12 report that addressed this issue, looking at a 13 study I think of several states. So we do have 14some things. Between now and the next meeting 15 perhaps we'll put together what we do have 16 already and get it to you. 17 SPEAKER: The other thing I would ask is are there any other states that have 18 19 addressed this from a statutory--20 DR. PYLES: Not to my 21 knowledge but we can check. 22 Ken, during the MR. TEEFEY: 23 General Assembly, I think you said a couple of other states were looking at it and that --24 SPEAKER: Could we see that 25

1 legislation? 2 MR. MCARTHUR: Yes. I'll be 3 happy to provide that for you. There are at 4 least three other states that I know of that have 5 either introduced legislation or planning to 6 introduce legislation. 7 MR. TEEFEY: I know Missouri 8 was one of them. What we can do is call those 9 states and get the legislation and whatever Ken 10 has. We'll look at the federal study that was 11 done and pull out study pieces out of that also. SPEAKER: 12 One other request: 13 Mr. McArthur, does that study where the HMO 14 formularies were examined, is that published 15 anywhere? 16 MR. MCARTHUR: It is. 17 SPEAKER: So you'll provide us 18 with that? 19 MR. MCARTHUR: Absolutely. 20 MR. ROSENTHAL: There are a 21 number of responses to that study that criticize 22 that. I assume you want those. 23 SPEAKER: Absolutely. 2.4 SPEAKER: I'm Doug Hadley. Ι 25 would just like to also comment on the article

1 that Mr. Rosenthal quoted from Money magazine. 2 Obviously, we're sensitive about that issue. Т 3 think that's a good example of how we've got to begin to, again, be objective and look at what is 4 5 the actual published evidence out there and not 6 be swayed by an antidote that comes up, which was obviously used for purposes which really weren't 7 8 for what it was intended. 9 As you rightly pointed out, 10 that particular substitution was a generic 11 substitution and had nothing to do with 12 therapeutically dissimilar drugs and was 13 portrayed both in that article and I think when she testified before the Assembly as if it were a 14 15 therapeutically dissimilar drug. 16 I have spoken with the 17 physician about this particular episode, 18 Dr. Annette Reed. In fact, she had been consulted about the whole situation. She was 19 20 also interviewed by Money magazine and tried to 21 convince them that this was, in fact, a particular kind of reaction that made no sense, 22 that it was probably some type of placebo or 23 psychological reaction. Despite telling them 24 25 that on several occasions, they proceeded to

1

publish it in that manner.

I agree that we can't accept 2 If there are such things, 3 antidotal evidence. they have to be presented in writing and 4 thoroughly let us evaluate them so we can 5 separate some of these things. Because there is 6 a lot of hysteria and hyperbole that is going on 7 in the media. I think if we're not careful we 8 can be dissuade. We know patients will, on 9 10 occasions individual patients will have very 11 unusual things that can be can't be explained by 12 normal means of science. 13 I agree with the statement to 14 not use antidotal evidence and that type of 15 testimony. 16 All right. MR. TEEFEY: 17 Dr. Blanchard. 18 One additional piece SPEAKER: 19 of information I think might be useful is make 20 sure we are armed with the current state 21 regulations that apply to bona fide patient 22 pharmacy relationship, ones dealing with 23 kickbacks. There's been some talk--1 24 25 don't understand it--about Jane Woods recent

1 legislation of last year and how that may impact 2 this discussion.

3 The bottom line of what I've 4 been hearing up here is that the responsibility taken on by the members of this Committee is to 5 6 be willing to take the time, the effort to sift through a fairly voluminous set of data facts and 7 try to sort out antidote from factual 8 9 statistically significant and insignificant and 10 come up with a responsible recommendation to the Commonwealth of Virginia. 11

I appreciate being given a 30-minute presentation as opposed to what seems to me like a legislative process or two-minute soundbite which do oversimplify things. So I hope these lengthier meetings will produce the kind of the results we want.

18 DR. PYLES: Dr. Blanchard, are 19 you asking for the particulars of the scope of practice of the prescribers and pharmacists? 20 21 SPEAKER: Yes, that's correct. I have some Virginia State title things that I've 22 been made aware that affects this, as well. 23 24 MR. TEEFEY: I think truthfully and I've always held that our 25

legislature has a lot of good sense. I think after we have seen what's happened here today, I think having this Task Force put together assures me that our legislature is using its good sense. Because just getting the definitions I'm confused.

7 SPEAKER: I would like us to 8 make sure we talk about these definitions. The one definition Ken started talking about but was 9 10 not alluded to specifically was the difference 11 between switching a patient who is already on a 12 medication--is titrated on that medication, what 13 do they cost in (inaudible) of forcing or 14 encouraging that patient to switch to another 15 drug as opposed to the doctor switching before 16 the patient ever starts taking it. SPEAKER: Mark Swenski. 17 18 Perhaps just enlarging the scope a tad, I think there are some valid points about therapeutic 19 switching. But there was a time when I started 20 21 in pharmacy practice not too long ago that 20 percent or less of the business was managed care 22 23 business. When a patient came to the pharmacy to 24 pick up a \$50 or \$60 prescription, that they

25 could not afford, there was no coverage at all.

1 Many times the patient went without medication because they could not afford that medicine. 2 3 In looking at this, I would 4 suggest that we try and understand what the role 5 of insurance is in financing the delivery of pharmaceutical care and how throwing that piece 6 7 in has allowed more people access to drugs. It's 8 not quite as simple as: If I have insurance, I ought to be able to pick the drug I want. 9 It 10 seems like it should be that way, but it's not 11 that simple. The insurance vehicle has 12 13 provided a lot of people coverage to prescription 14 medicines that they didn't used to have. I think 15 that there's a piece that we shouldn't neglect. 16 SPEAKER: Marjorie Powell. As 17 perhaps the only non-Virginian on this Task Force it would be helpful to me to have an 18 understanding of what the Medicaid DUR program 19 20 is. Because I understand that Virginia has a very effective DUR program. And I know there are 21 instances when a pharmacist would, under a DUR 22 program, call a physician to switch a patient for 23 what would be medically appropriate reasons. 24 I think because that's an 25

important distinction that Ken did point out, we 1 2 need to keep that in mind and it would help me to 3 have a sense of the kinds of things that pharmacists look at within the DUR program. 4 5 MR. TEEFEY: For the next 6 meeting we'll have somebody come and go over our 7 DUR program. As a matter of fact, we'll go over 8 our whole pharmacy program. 9 DR. PYLES: Any other comments 10 from the Task Force members? 11 If not, Mr. Teefey, it appears 12 that what we will do between now and the next 13 meeting is to put together some information and get it to you for your review. I encourage you 14 15 to be thinking very seriously about the 16 statement--the definition. I think that is the most pressing thing at the moment in terms of 17 18 getting started and moving on with the rest of 19 our work. 20 Again, what we're looking for--what was called for in the legislation was 21 22 that this Task Force come up with a statement of 23 the extent to which this practice occurs. But it 24 seems to me before we can make a statement about

the extent to which something occurs, we need to

1 agree that we're talking about the same thing. 2 So the definition and the description of what 3 we're talking about is perhaps one of the most 4 pressing things before us. 5 At the next meeting we should 6 be prepared to have some discussion on that and 7 reach consensus on that, among other things. Ι 8 will make sure that we get with the staff at 9 Medicaid and make available to you some of the 10 things you ask for today. 11 MR. TEEFEY: Ken and Steve, 12 can you all make sure you have some 13 representatives at each one of these meetings 14 because you're giving us supportive information. 15 We are probably going to have some questions, if 16 that's all okay. 17 MR. ROSENTHAL: Yes, sir. 18 SPEAKER: I think The Board of 19 Pharmacy and Board of Medicine is supposed to 20 offer assistance, too. 21 MR. TEEFEY: That would be 22 great. 23 I thank everybody for coming. The main thing we wanted to do was surface both 24 25 sides of the argument and make sure that you

. . . . .

1	understand where we are. And we will have a lot
2	of information and we'll try to summarize some of
3	the information that we have to get to you so
4	that you don't have to labor through.
5	DR. PYLES: Before you all
6	leave, I did not have phone numbers for most of
7	you. Please make sure that if you did not get
8	the form that I sent to you, make sure that you
9	circle your name on the tentative roster and fill
10	in that information for me and give it back to
11	me. Thank you.

1 APPEARANCES:	1 July 16, 1997
2 Mr. Joseph M. Teefey, Chairman;	2
3 Mr. Michael J. Ayotte;	3 NOTE: The following hearing was called to be
4 Dr. Lawrence E. Blanchard, III;	4 heard at 8:44 a.m., viz:
5 Dr. Randall E. Dalton;	5
6 Mr. James G. Council;	6 CHAIRMAN TEEFEY: We're going to go ahead and
7 Dr. Karen E. Knapp;	7 get started. It's a little past 8:30.
8 Dr. Thomas L. Moffatt;	8 I'd like to thank everybody for coming. I'd
9 Ms. Cynthia J. Pigg;	9 like to welcome everybody in the audience for coming.
10 Mr. Mark A. Szalwinski;	10 I passed out some things when I came in.
11 Mr. William Alan Towler;	11 Somebody asked for a little bit of information about
12 The Honorable Senator Stephen D. Newman;	12 the Department of Medical Assistance Services, so I
13 Ms. Marjorie E. Powell;	13 passed out a little bit of information. That's in
14 Mr. W. Tommy Walker.	14 your information and that's about our eligibility,
15	15 about our budget, some of the initiatives that we're
16	16 working on.
17	17 Mike Pyles will cover the notebook. He's put
18	18 together a notebook, and he wants to cover what's in
19	19 the notebook and the information that you'll be
20	20 getting.
21	21 We had a little bit of a mix-up last time.
22	22 We're going to have another whole big batch of
23	23 information coming to you today. Mr. Durrette was kind
24	24 enough to give us all of the backup information he had
25	25 when you made your presentation, and we're sending it
CPANE SNEAD & ACCOULTES DIG	, ,

	Page 5		Page 7	
1	out to the Task Force. We didn't get it from the other	1	Tab Number 2, and I will try to direct you, as we mail	
2	side, and they brought it in today and we will FAX it	2	things out or what have you, where things go. If you	
3	out to everybody, or we will get it out to you tonight	3	don't like my particular order of things, of course,	
4	as soon as we copy it.	4	you are welcome to make adjustments.	
5	So, have you got copies?	5	Behind Tab Number 3, this is where I thought	
6	DR. PYLES: We have copies for them.	6	you could keep up with E-mail correspondence and other	
7	CHAIRMAN TEEFEY: Oh, good. We've got copies	7	internal documents. What you should have there right	
8	for everyone.	8	now is a Revised Meeting Schedule. You will note that	
9	DR. PYLES: We'll pass them out in a moment.	9	the times for the August 20th and the September 17th	
10	CHAIRMAN TEEFEY: I wouldn't want you to read	10	meetings we left at 8:30, and, at this point, unless	
In	it now, because I think it would take most of the day	11	we change, we will continue to have them from 8:30 to	
12	to do that.	12	12:30 in this room, House Room D. So that's an updated	
13	We tried to put on the agenda today the	13	meeting schedule.	
14	information - Some of the Task Force members asked	14	Behind Tab Number 4, you should find, today	
15	for specific information, and we're going to start off	15	you should find two Agendas, today's Agenda and the	
	today with that specific information that you asked	16	Agenda for the initial meeting and the transcript from	
17	for, and then we're going to start expanding into what	17	the first meeting. As we get the transcripts	
18	we are here for.	18	following a meeting, they will go behind Tab Number	
19	But, to start off with, Mike, do you want to	19	4. What I had hoped is that we would have the	
20	go over the notebook first?	20	agenda/transcript, agenda/transcript, in that order,	
21	DR. PYLES: Yes, if you don't mind.	21	from the most recent meeting to the earlier meetings.	
22	Good morning to everyone. What I would like	22	That will be behind Tab Number 4.	
23	to do is just walk you through the notebooks. What I	23	The Agenda, I think, is pretty	
24	have tried to do was to put together a notebook and	24	straightforward today, as you can see there. And, if	
25	put some order to it so that, as we go along in our	25	you would like, you can take it out, if you would like	
	Page 6		Page	
1	deliberations and meetings, as things come, you can	1	to reference it as we go through the meeting today.	
2	add it to specific sections, and I will walk through	2	Behind Tab Number 5, you will find letters	
3	those with you real quickly.	3	that the Task Force Chair may receive from other	
4	The very first page there should be a Table	4	parties or even from among yourselves and copies of	
5	of Contents which roughly corresponds to each of the	5	that will be there. I believe that you already may	
6	tabbed sections of the notebook, and I will walk you	6	have received some of that, but any letters that are	
7	through that.	7	addressed to the Chair and enclosures that come with	
8	Behind Tab Number 1, you should find a	8	those letters, you can place behind Tab Number 5.	
9	current listing, updated listing, of the Roster of	9	Behind Tab Number 6, you will find the	
10	Members. Again, I ask you to look over it and make	10	handouts from invited speakers, those persons that	
11	sure that that information is correct and let me know	11	addressed the Task Force during our meetings. And	
12	if it's not.	12	what I will be doing is, as you get, What I suggest	
13	I did send I put together a list server	13	is that as you get information, just add it on top	
14	for the Task Force, and I sent a message, oh, I guess	14	there. So that kind of keeps it current and you will	
15	about the 7th or so. I think I got seven responses.	15	know approximately the order in which you received it	
16	What I will do between now and the next meeting is to	16	by just doing it in reverse chronological order there.	
17	continue to send information. If you have reason to	17	And, for today, you should have in there already	
	believe that you're not getting E-mail from me and we	1	comments about the Virginia Medicaid Pharmacy Program,	
1	do have your address, of course, let me know. But, you	1	which we'll hear from David Shepherd of DMAS. Also, a	
20	will find that listing behind Tab Number 1.		literature review, we will hear from Michael	
21	And, then, behind Tab Number 2, what you will	1	Worthington of DMAS. Then, also, the information that	
	find is a copy or you should find a copy of House		you received in the mail prior to this meeting you can	
	Joint Resolution Number 630, as well as Senate Bill	1	place behind Tab Number 6, as well, and there was an	
1	Number 1114. And, in the future, if we need to add		enclosures list with that mailing, and that	
25	additional legislative documents, they will go behind	25	information should go behind Tab Number 6.

1 thing.		1	CHAIRMAN TEEFEY: The contract of rebate is
2 Yes	, ma'am.	2	between HCFA and the drug manufacturers.
3 MS.	PIGG: Can I ask you a question? The way	3	
the rebat	structure works in Medicaid, if a	4	problematic, because we actually administer the
5 manufac	urer elected to not give you a rebate, would	5	program. The states administer the program, collect
6 their dru	be covered?	6	the monies, do all the record gathering and send that
7 MR	SHEPHERD: NO.	7	to HCFA. But the agreement is with the Health Care
8 CH/	IRMAN TEEFEY: We have the option not to	8	Financing or through HHS.
9 cover it.	-	9	MS. PIGG: But because they're rebate
0 <b>M</b> R	SHEPHERD: Right.	10	contracts, even though they are with HCFA, that
I MS.	PIGG: Right.	11	ultimately determines what drugs the citizens of
2 So,	can you describe for me the clinical	12	Virginia can and cannot get, is that correct?
3 process a	round the whole rebate structure? I mean, you	13	MR. SHEPHERD: Not in totality. I mean, you
4 don't use	formularies, per se, but I think your goals	14	can make the exception, should it be necessary. We
5 were to r	take sure the quality of care was good for our	15	have means to do that.
	f Virginia, our eligibles, and also to	16	Does that answer your question?
7 contain t	e costs. So, what is the clinical process	17	MS. PIGG: Yes.
8 around th	e whole rebate structure? I don't quite	18	DR. HADLEY: I have a question. I have a
9 understat	d where the clinical piece comes into play.	19	question.
	ormation we have says that if they,	20	MR. SHEPHERD: Oh.
1 basically	agree to give you a rebate, you'll cover	21	DR. HADLEY: What happens if a Medicaid
2 their dru		22	patient presents a prescription from their physician
	SHEPHERD: Actually, there is no clinical		for Valium. You just said it's not covered.
	ated to the rebate portion of the statute.	24	
=	cal aspect would be a result of the DUR or	25	DR. HADLEY: Okay. So there is no process for
	Page	4	Page
1 Complia	ce Review. Should there be a problem in a	1	exception; that basically the patient would have to,
-	therapeutic class, we would not allow our		under that, whether it would be a therapeutic
	to be endangered. And, from the standpoint		substitution
	re Federal Government requires, they do make	1 1	
	s and you can make an exception with HHS	1	to Valium not being covered, since the inception of
-	re Secretary of HHS, should it be necessary.	1	OBRA '90. And those appeals actually were voted or we
	nay not rebate, but if it's an essential drug	1	did not cover it even with the appeal.
-	ded, then an exception could be made.	8	DR. HADLEY: So, in essence, in those cases,
	PIGG: How about if it's a class like a		the Medicaid patient either must find the means to pay
	SHEPHERD: A total therapeutic class? A		that out of pocket or agree upon its therapeutic
	peutic class could be excluded. I'm sorry,		
2 H2s?		12	MR. SHEPHERD: Correct.
	PIGG: Well, I am just using that as an	13	
	But, if Zantac came in and said, we will	13	DR. HADLEY:with their physician. MR. SHEPHERD: Correct.

1	-		connected with HCFA said you couldn't have a
2	DR. HADLEY: Okay.		formulary. But prior to OBRA '90 you we're going down
3	CHAIRMAN TEEFEY: Yes, Larry.	3	a path of a closed formulary in negotiating rebates
4	DR. BLANCHARD: Yes. This is Larry Blanchard.		with the manufacturers. What was with your though.
5	Is the mechanism for rebate just a strict	5	process there? Were you going to have a clinical
6	numerical rebate percentage that applies to	6	review
7	everybody? It's not based on the volume or market	7	MR. SHEPHERD: Yes.
8	share?	8	MS. PIGG: to restrict drugs in order to
9	MR. SHEPHERD: No. The differentiation is	9	get
10	between generics and brand name or sole-source drugs.	10	MR. SHEPHERD: Yes. There was a committee.
11	DR. BLANCHARD: Right.	11	There was a committee.
12	MR. SHEPHERD: It can go up as high as 50	12	CHAIRMAN TEEFEY: Yes, sir.
13	percent on the sole-source, based on the best price	13	SENATOR NEWMAN: I think you have calculated
14	that that particular manufacturer sells that product	14	what the lost impact would be to Medicaid that would
15	for.	15	affect you. Have you guys looked into the cost that
16	DR. BLANCHARD: But it's not a negotiated	16	that would affect you by?
17	amount. It's pretty much set, according to what	17	CHAIRMAN TEEFEY: It would be hard to do that
18	their	18	since a recipient can appeal to us, and they have to
19	MR. SHEPHERD: Correct.	19	have that drug filled. We don't have a formulary and
20	DR. BLANCHARD: basic price in the	20	that's why we have the presentation by Medicaid. The
21	marketplace is.	21	thing I want to emphasize is Medicaid does not have a
22	MR. SHEPHERD: Correct. And this has been	22	formulary, and, if a drug is switched or is forced to
23	audited by the OIG extensivelyextensively.	23	switch and the recipient appeals it, then they have to
24	DR. BLANCHARD: There's another comment in	24	get the drug that the physician prescribes for them.
25	your presentation that states, " may not restrict	25	SENATOR NEWMAN: Maybe I can ask you, then.
	Page 38	1	Pag
1	a newly-approved pharmaceutical product until six	1	When we start presenting information in the General
2	months after approval." That's still in incentives	2	Assembly, it seems to me one of the vital pieces is,
3	for OBRA '90, is that true?	3	one, how much is this going to cost the State,
4	MR. SHEPHERD: Initially, the six-month	4	CHAIRMAN TEEFEY: Right.
5	limitation under OBRA '90 did not allow us to restrict	5	SENATOR NEWMAN: - and I don't know how we're
6	any new product coming on the market, FDA approved,	6	going to calculate it, but I think we have to find
7	for six months. In 1993, that was changed as a result	7	some way to try to calculate that. And, then, the
8	of an amendment to OBRA '90.	8	other question is, what's the medical implication of
9	DR: BLANCHARD: So that restriction has been	9	what we're doing now and have there been ramifications
10	completely eliminated?	10	that have been detrimental to patients.
11	MR. SHEPHERD: Right, Correct.	11	CHAIRMAN TEEFEY: You're exactly right. It
12	DR. BLANCHARD: Is the practice of your drug	12	came on so fast during the General Assembly, we didn't
13	program to evaluate those drugs promptly or, in	13	know how the rebate portion would be affected and
	general, if the drug is released and you don't know	14	that's what our main argument was. If we discriminate
15	anything bad about it, it's approved until	15	against the manufacturer and say, you can't switch or
16	MR. SHEPHERD: Unless it meets one of the	16	you can switch to that drug, does it affect our
17	criteria of a drug that may be an abusable drug or	17	rebateability to get those rebates. And, since the
18	something of that nature.	18	General Assembly, we have given it a lot of thought
19	DR. BLANCHARD: Short of that	19	and that person can get that drug anyway. If that
20	MR. SHEPHERD: Right.	20	person appeals to Medicaid, then the pharmacy has to
21	DR. BLANCHARD: -it's available to the	21	fill the original drug that was prescribed for that
22	citizens once it's approved?	22	patient, because we don't have a formulary.
23	MR. SHEPHERD: Yes. As soon as we can get it	23	MR. COUNCIL: If it's not rebatable, it's not
24	in the file.	24	covered?
25	MS. PIGG: What preempted your, Well, anyone	25	CHAIRMAN TEEFEY: If it's not rebatable, we

H	R 630 Conde	elt™	
	Page 41		Page 43
1	have the option not to pay for it, that's right. But	1	anything that is covered under our State Plan has to
ำ			be covered by that HMO. So, even though HMOs have
ر	have a rebate agreement to protect them.		formularies, it doesn't take Medicaid is not ruled
4	SENATOR NEWMAN: So, on a de facto basis,	1	by that formulary, because we have an open formulary.
5	there is no drug switching program in Medicaid now,		And that's specified in the contract we have with the
	other than those few that are not covered?		HMOs.
7	CHAIRMAN TEEFEY: There might be drug	7	MR. COUNCIL: But, she said, excuse me,
8	switching, but the individual recipient can get that	8	
9	• • •	9	
10		10	State Plan. It's all of those pharmaceuticals that
III	MR. AYOTTE: Do you grant all of your appeals	III	· · · · · ·
12	for drugs? Your Department has the ultimate say	12	MR. COUNCIL: Okay.
	whether or not a drug will be covered?	13	MR. SZALWINSKI: Are there drugs that are not
14	CHAIRMAN TEEFEY: Yes, sir. Any appeal that	14	covered by the rebate program?
15	comes in from a recipient has to be heard by Medicaid,	15	CHAIRMAN TEEFEY: Valium.
	and it has to be ruled on within a 90-day period.	16	MR. SZALWINSKI: Are there other drugs?
17	MR. AYOTTE: My question was, do you grant all	17	MR. SHEPHERD: Yes.
18	drug appeals or you have the ultimate say? I'm just	18	MR. SZALWINSKI: Are there any
	remembering that thing that Cindy passed out earlier	19	MR. SHEPHERD: Primarily generic companies
20	that said the Company has the determination. That	20	that really aren'tthey don't have Nationwide
21	sounds very similar where there would be an appeal	21	distribution. There have been companies that have
22	process to be able to get the drug. But, you need to	22	been, and primarily the generics again, that have been
23	appeal.	23	dismissed from the rebate program for various
24	CHAIRMAN TEEFEY: Any appeal that is	24	reasons.
5	registered with Medicaid has to be heard by Appeals	25	MR. SZALWINSKI: So there is a formulary and
1	Page 42		Page 44
1	Division.	1	there is a prior authorization program for things such
2	MR. SHEPHERD: Right. Yes, and even to go to	2	as drugs for cosmetic purposes and other things that
3	an Administrative Law Judgment.	3	are exclusions that you do not cover?
4	SENATOR NEWMAN: Mr. Chairman?	4	CHAIRMAN TEEFEY: There are exclusions we
5	CHAIRMAN TEEFEY: yes, sir.	5	don't cover, right.
6	SENATOR NEWMAN: Maybe I'm not quite getting	6	MR. SHEPHERD: Right.
6	it. Can you help me? If someone comes in and has a	7	MR. SZALWINSKI: So,
ł	prescription for whatever it is, and they are told	8	CHAIRMAN TEEFEY: But it's not a formulary.
	that that is not covered, do they get that noncovered	9	They're exclusions that the State has decided not to
	drug immediately or are they rejected to get that	1	cover.
	noncovered drug? What is the process for appeals and	11	MR. SHEPHERD: If we get into a definition of
	how many of these people know about the appeals	1	formulary, it could be restrictive, open, closed, et
	process? Therefore, just take the other drug, and		cetera, et cetera. We really considered having an
	what is the effect of that in the 90 days? Do they	1	open formulary. That's what
1	then get the other drug and pay for it and be	15	DR. BLANCHARD: 99 percent.
1	reimbursed?	16	
17	CHAIRMAN TEEFEY: Let me go back to the first	17	5
4	thing. If they bring a script in and they want that	18	
	script, under our HMO contracts and all of our	19	3
	contracts, that pharmacist has to fill that script,		prescription for a drug that is not on the State Plan,
	because we don't have a formulary. Most HMOs and most		but there is a generic equivalent for it on the State
22 23	And if that draw is not on that formulary.		Plan, they will get the generic equivalent. But if
	And, if that drug is not on that formulary,		there is not a generic equivalent for it on the State
	that means that the insurance company is not going to pay for it. In our agreements we have with the HMOs,	24	Plan, they will not get the drug? MR. SHEPHERD: That is a possibility.
	ANE-SNEAD & ASSOCIATES DIC	25	Page 41 - Page 44

E	TR 630 Conde	ns	eIt™
	Page 45		Page 47
1	DR. KNAPP: Unless they pay for it.	1	to look at the entire contract.
2	MR. SHEPHERD: That is a possibility.	2	SENATOR NEWMAN: But that raises a question
3	DR. KNAPP: So there are medications that	3	about whether, Mr. Chairman, we could possibly pass
4	patients could come with a prescription forand	4	the law to make Virginia required to break the law to
5	excuse the grammar, but there is no generic equivalent	5	where you would be required to take a rebate; that we
6	for it, so they will not be able to get it, unless	6	would say, it would be unlawful for you to take.
7	they pay for it themselves or they appeal?	7	MR. SHEPHERD: To my knowledge, Federal
8	MR. SHEPHERD: Right.	8	statute would take precedence.
9	CHAIRMAN TEEFEY: Right. That, I can tell you	9	MS. PIGG: But do you want to treat your
10	that would probably happen once in a million times.	10	Medicaid eligibles differently than the other citizens
11	DR. KNAPP: Well, that was going to be my next	111	of the Commonwealth?
12	question, too.	12	MR. SHEPHERD: That was a primary reason that
13	MR. SHEPHERD: Yes.	13	we asked to be exempted from the legislation that was
14	CHAIRMAN TEEFEY: Because we have rebate		introduced last year.
15	agreements with all the major manufacturers. And, if	15	CHAIRMAN TEEFEY: Yes, ma'am?
	they rebate, if those manufacturers rebate, we have to	16	DR. KNAPP: I mean, after listening to this, I
	have their drug on our Plan.	17	think the Medicaid citizens of the Commonwealth are
18	MS. PIGG: But the bottom line is your list of	18	being treated differently. They have a bigger, more
19	things that are covered or the eligibles, call it a	19	open formulary. So, in that respect, it's
20	formulary, call it not a formulary, is totally	20	advantageous.
	economically driven by the rebate structure from the	21	CHAIRMAN TEEFEY: We have a bigger and we have
	manufacturers?	22	an open formulary because the General Assembly has
23	CHAIRMAN TEEFEY: Because HCFA says it has to	23	decided that's the way it is going to be. I mean,
24	be that way.	24	when we came over for a formulary a couple of years
25	SENATOR NEWMAN: Mr. Chairman?	25	ago, the General Assembly decided it was not in the
-	Page 46		Page 4
1	CHAIRMAN TEEFEY: Yes, sir.	1	best interests of the Medicaid recipients to do that.
2	SENATOR NEWMAN: Given that, if we did have a	2	MS. PIGG: But, did the General Assembly, I
3	Bill in Virginia that says that you cannot switch	3	mean, then you've got this HCFA, I mean, it's just too
4	drugs based on a rebate, would that do detriment to	4	many things that's going around. You have HCFA
5	your current agreements if all of them then started	5	saying, you pay us, you get covered; you don't pay us,
6	pulling back from the rebate saying, we don't have to	6	you don't get covered.
7	give the rebates? And what would be the effect of	7	CHAIRMAN TEEFEY: But there are so few drugs
8 1	that on the Commonwealth of Virginia, as far as	8	that are not covered by the rebate program. The
9	Medicaid goes? Or, can we calculate that?	9	example that we use would be once in a million that
0	CHAIRMAN TEEFEY: I think when you put rebates	10	somebody would come in with that drug. If it's in that
1	in there, I think you're asking for it. I would have	11	book, it has an NDC number on it and that company
12 1	to get an opinion on that, Senator. I think you're	12	rebates us, then that drug is covered.
3 8	asking me something that I really can't answer right	13	Just like David said, you have a few small
14 1	now. But I will get you an answer on it. But I think	14	generic companies that are not in the book, that they
15 1	when you tie rebates in there, I think you're really	15	don't have contracts with.
16 ]	you're really eliminating the program from anything.	16	MS. PIGG: But the issue is there is no
7	MR. SHEPHERD: May I say something?	17	clinical basis to what is covered or not covered? It
8	CHAIRMAN TEEFEY: Yes, ma'am?	18	is simply a monetary arrangement?
9	MS. POWELL: I think it's important to	19	CHAIRMAN TEEFEY. It's a monetary arrangement
0 1	emember, however, that the rebate contract is a	20	with HCFA and the drug manufacturers, you're exactly
1 1	national contract. So, if you decide not to offer, not	21	right.
	o pay the rebate in Virginia, as a manufacturer, your	22	DR. BLANCHARD: But, Mr. Chairman, the one
	lrugs would not be reimbursed in any Medicaid program		-
	round the country. So, that a manufacturer making a		FDA approval. So, there has been a clinical
5 C	lecision about whether to sign a rebate contract needs	25	assessment of safety and efficacy.

### $\textbf{Condenselt}^{^{\mathrm{TM}}}$

	Page 49		Page 51
1	But, the point is, at the end, and the other	1	DR. PUGH: Good morning. I'm a pharmacist in
่า	gentleman, I think, is well taken, that one of the	2	Virginia, and I am also on the faculty at the MCV
	reasons we're here is to see if any legislation that	3	School of Pharmacy, or, excuse me, the VCU School of
4	would be recommended uses the word "rebate"	4	Pharmacy. And, I think you'll tell from my handout
5	appropriately, so that we're not talking apples and	5	material that I'm used to talking to people and giving
6	oranges when we're prohibiting "rebates," and I think	6	lectures, and so forth.
7	that's a good point.	7	This morning I'm going to try to be very
8	MR. AYOTTE: Mr. Chairman, I also think it's	8	brief. I have prepared a fairly comprehensive handout
9	important that we talk about whether or not	9	for you so that I don't need to go through every
10	legislation is needed. You know, looking at the	10	little detail. You will have it for your reference.
	current Board of Pharmacy Regulations and things that	11	I didn't realize that you were going to have
	currently exist, it may not be a need for this, you		three-ring binders or else I would have brought it
	know, any other additional legislation that would		with three holes in it, but I apologize for that
	burden everybody.		oversight.
15	CHAIRMAN TEEFEY: Well, I think before the day	15	You have already heard about OBRA '90. David
16	is over, we're going to get a definition of exactly	16	has talked about it. What I'm here to talk to you
	what we're talking about. And I think that's what		about is the DUR portion of OBRA '90. And, it
	we're leading up to. Because, you know, we have done		basically, has three major components related to
	a lot of reading between the last meeting and this	1	DUR-type activities. One was that it mandated the
	meeting, and we have talked to hospitals, we have	1	creation of a retrospect and prospective DUR Program.
	talked to pharmacists, we have talked to physicians,	1	There were a number of items that had to be included
	and it's all different. And, when Mike gets up there		in this. There is a list of nine different types of
	he's going to point out some of these things.		drug-related problems that are supposed to be included
24	MR. SZALWINSKI: Mr. Shepherd?		in the program and they're listed for you on the
	MR. SHEPHERD: Yes.		handout. I know you all can read, so I won't read
		1	•

13 14 15 16 17 18 19 20	purpose and utility is in identifying patterns of prescribing, dispensing, and patient use of medications. It uses claims that have already been filed, and the Program in Virginia uses both pharmacy and medical claims. Now a number of the states use only pharmacy claims and there are some commercial DUR programs that only use pharmacy claims. I think one	13 14 15 16 17 18 19	order for every recipient in the Medicaid Program. Then, these profiles are checked against the entire DUR criteria catalogue. I lost track of how many criteria we had. It was up into the several thousands when I left the Program. I'm not sure how many are there now. I'm sure some have been added and
<ol> <li>13</li> <li>14</li> <li>15</li> <li>16</li> <li>17</li> <li>18</li> <li>19</li> <li>20</li> <li>21</li> </ol>	purpose and utility is in identifying patterns of prescribing, dispensing, and patient use of medications. It uses claims that have already been filed, and the Program in Virginia uses both pharmacy and medical claims. Now a number of the states use only pharmacy claims and there are some commercial DUR programs that only use pharmacy claims. I think one of the strengths of the Virginia program is that it	13 14 15 16 17 18 19 20 21	order for every recipient in the Medicaid Program. Then, these profiles are checked against the entire DUR criteria catalogue. I lost track of how many criteria we had. It was up into the several thousands when I left the Program. I'm not sure how many are there now. I'm sure some have been added and deleted and changed, and so forth, but it's a lot.
13 14 15 16 17 18 19 20 21 22	purpose and utility is in identifying patterns of prescribing, dispensing, and patient use of medications. It uses claims that have already been filed, and the Program in Virginia uses both pharmacy and medical claims. Now a number of the states use only pharmacy claims and there are some commercial DUR programs that only use pharmacy claims. I think one of the strengths of the Virginia program is that it also factors in inpatient and outpatient claims for	<ol> <li>13</li> <li>14</li> <li>15</li> <li>16</li> <li>17</li> <li>18</li> <li>19</li> <li>20</li> <li>21</li> <li>22</li> </ol>	order for every recipient in the Medicaid Program. Then, these profiles are checked against the entire DUR criteria catalogue. I lost track of how many criteria we had. It was up into the several thousands when I left the Program. I'm not sure how many are there now. I'm sure some have been added and deleted and changed, and so forth, but it's a lot. Any patient profile that has one or more, the
13 14 15 16 17 18 19 20 21 22 23 24	purpose and utility is in identifying patterns of prescribing, dispensing, and patient use of medications. It uses claims that have already been filed, and the Program in Virginia uses both pharmacy and medical claims. Now a number of the states use only pharmacy claims and there are some commercial DUR programs that only use pharmacy claims. I think one of the strengths of the Virginia program is that it also factors in inpatient and outpatient claims for hospitals, practitioner office visits, and laboratory	13 14 15 16 17 18 19 20 21 22 23	order for every recipient in the Medicaid Program. Then, these profiles are checked against the entire DUR criteria catalogue. I lost track of how many criteria we had. It was up into the several thousands when I left the Program. I'm not sure how many are there now. I'm sure some have been added and deleted and changed, and so forth, but it's a lot. Any patient profile that has one or more, the terminology is a criteria violation. In essence, a

	UR 630 Condenselt <sup><math>M</math></sup>				
Γ	Page 57	T	Page 59		
	the computer system and now, instead of just being		letters, that they're worth looking at. And, when the		
1	called a patient profile, we now call it an exception		Program first began, I received a lot of feedback from		
	profile, because it contains an exception to the		providers that said that we were, indeed, making that		
4	criteria.		happen because we were not getting a lot of letters		
5	Each month about a thousand exception		coming back or responses coming back saying, this is		
6	profiles for one or more therapeutic categories are		dumb, this is a waste of my time, and so forth. Most		
	randomly selected for review. The reason we used a		of them were very positive or at least neutral in		
18	random, or they used a random selection right now is		terms in their response.		
,	that there just would be too many profiles to be	9	Along with the letter is a response form, and		
	reviewed if we looked at all of them. The exception	10	the provider is asked to send back some feedback as to		
	profiles contain all of the exceptions that have been	11	whether or not this is really a problem, what's going		
	found. So, say the particular profile run was to look		to be done, then fix it, and so forth. When the		
	at antibiotics. Well, if there were some other	13	response form is received by Medicaid, it is then		
	problems that were noted with cardiovascular drugs or	14	posted onto the DUR data base. Then, six months later		
	pulmonary drugs or any other type of drug that was		a review profile is generated to check and make sure		
	noted for that patient, it will show up on the	16	that any of the other problems that were noted have		
	profile, as well.		been fixed. This is another one of the reasons why		
18	Over the course of the year, though, all the	18	not every category is looked at every month, because,		
19	therapeutic categories are covered through this DUR	19	if you did that, you'd be constantly dealing with the		
20	process. So once a whole year is over, we've gone	20	same people over and over and over again. You need to		
21	through the entire criteria catalogue, run profiles	21	allow a little bit of time for the process to work for		
22	for them, and, basically, evaluated everything that	22	changes to occur, and so forth. So, that's what's		
23	goes on.	23	involved in the retrospective DUR process.		
24	Now, these profiles, these exception	24	Now, this process is not perfect, like most		
	profiles, are then reviewed by a group of pharmacists	25	things in the world. It has some advantages and		
	Page 58		Page 60		
1	and physicians known as a DUR Committee, and it's		disadvantages. I have listed those for you on the top		
	their job to take this computer sifting process, which	1	of Page 3. The major advantage is that it allows for		
	is clumsy at best, and really look at what's going on	1	the determination of the trends of drug use across the

5 6 7 8 9	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem	3 4 5 6 7 8 9	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't		
5 6 7 8 9 10	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider	3 4 5 6 7 8 9 10	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have		
5 6 7 8 9 10	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a	3 4 5 6 7 8 9 10	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and		
5 6 7 8 9 10 11 12	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed.	3 4 5 6 7 8 9 10 11 12	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at.		
5 6 7 8 9 10 11 12 13	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether	3 4 5 6 7 8 9 10 11 12 13	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the		
5 6 7 8 9 10 11 12 13 14	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And,	3 4 5 6 7 8 9 10 11 12 13 14	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after		
5 6 7 8 9 10 11 12 13 14 15	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR	3 4 5 6 7 8 9 10 11 12 13 14 15	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and		
5 6 7 8 9 10 11 12 13 14 15	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of	3 4 5 6 7 8 9 10 11 12 13 14 15 16	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and now we're closing the door. The problem may have		
5 6 7 8 9 10 11 12 13 14 15 16 17	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of sorts.	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and now we're closing the door. The problem may have already been solved and an intervention letter may have gotten sent. Another problem is that the profiles are		
5 6 7 8 9 10 11 12 13 14 15 16 17 18	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of sorts. One of the problems I noted when I first	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and now we're closing the door. The problem may have already been solved and an intervention letter may have gotten sent.		
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of sorts. One of the problems I noted when I first worked with the Program is, we had some really zealous	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and now we're closing the door. The problem may have already been solved and an intervention letter may have gotten sent. Another problem is that the profiles are patient based rather than provider based. And, what this means is that you can have a physician or a		
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of sorts. One of the problems I noted when I first worked with the Program is, we had some really zealous reviewers and some more reasonable reviewers, and what	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and now we're closing the door. The problem may have already been solved and an intervention letter may have gotten sent. Another problem is that the profiles are patient based rather than provider based. And, what this means is that you can have a physician or a pharmacist that has a patient, one patient that has		
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of sorts. One of the problems I noted when I first worked with the Program is, we had some really zealous reviewers and some more reasonable reviewers, and what we tried to do, the QA check step is an attempt to	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and now we're closing the door. The problem may have already been solved and an intervention letter may have gotten sent. Another problem is that the profiles are patient based rather than provider based. And, what this means is that you can have a physician or a pharmacist that has a patient, one patient that has one problem and they will get a letter. A much more		
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of sorts. One of the problems I noted when I first worked with the Program is, we had some really zealous reviewers and some more reasonable reviewers, and what we tried to do, the QA check step is an attempt to nake sure that we're sending letters out to the same	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and now we're closing the door. The problem may have already been solved and an intervention letter may have gotten sent. Another problem is that the profiles are patient based rather than provider based. And, what this means is that you can have a physician or a pharmacist that has a patient, one patient that has one problem and they will get a letter. A much more efficient way of dealing with this would be to use a		
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of sorts. One of the problems I noted when I first worked with the Program is, we had some really zealous reviewers and some more reasonable reviewers, and what we tried to do, the QA check step is an attempt to nake sure that we're sending letters out to the same degree of problem. So, if somebody has a little bit	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. Its major disadvantage, and I will be the first one to admit it, is that it occurs well after the fact. The proverbial horse has left the barn and now we're closing the door. The problem may have already been solved and an intervention letter may have gotten sent. Another problem is that the profiles are patient based rather than provider based. And, what this means is that you can have a physician or a pharmacist that has a patient, one patient that has one problem and they will get a letter. A much more efficient way of dealing with this would be to use a		
5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20	with this particular patient. And, if, in their judgment, the problem looks like it's been solved, it may have been something that happened at the beginning of the six months and looking through all of the claims for the patient, you can tell that the problem has been resolved, then they will say, this provider does not need to receive a letter saying there is a problem. The problem has been fixed. The DUR Committee members then decide whether or not an intervention letter needs to be sent. And, they send the profiles back to Medicaid and the DUR pharmacist reviews it one more time as a QA check of sorts. One of the problems I noted when I first worked with the Program is, we had some really zealous reviewers and some more reasonable reviewers, and what we tried to do, the QA check step is an attempt to nake sure that we're sending letters out to the same degree of problem. So, if somebody has a little bit higher level or lower level or lower threshold of	3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	the determination of the trends of drug use across the whole patient population. So, you can look at the prescribing, the dispensing, utilization. It also allows and serves as a backup for the prospective DUR Program, which I'll talk about in just a minute. Because of the nature of prospective DUR, we can't always find everything right up front, and so we have to allow for things that fall through the cracks and that's what retrospective DUR is good at. 1	multiple problem patients, rather than sending one	1	Could you pick up drug switching in the retro DUR?
	e person one letter and then they don't hear from you	2	DR. PUGH: It would be difficult. You would
3	for another six months. Right now, because of this all	3	have to write I'm not sure the logic behind the DUR
4	being based on the mainframe, the technology is a		system has a pattern that would enable you to find
1	i little bit behind the times. Actually, when I asked		that. Would it work as a therapeutic duplication-type
1	Medicaid to write the RFP, I asked for this, and it's	6	problem?
	now just beginning to be offered by the vendor who is	7	MS. PIGG: I think it would have to do with
	providing the retrospective DUR services.	8	the logic
5	- •	9	DR. PUGH: It would be very difficult.
10	inefficient. Again, I'll admit this. The intervention	10	MS. PIGG: - but what we could sort out was,
	letters are generally sent out to only about ten	11	was it a switch, just a switch made because the first
	percent of the exception profiles. And part of this	12	drug wasn't working or was it a switch made due to the
	is due to the nature of the mainframe computer and the	13	intervention? We may have to figure that out.
14	way the criteria work, and part of it is just due to	14	DR. PUGH: Yes, that's one That's another
	the fact that you're looking at a big time period and	15	big drawback that I probably should have put on here
16	problems often get resolved and letters don't need to	16	is that you're dealing with the claims data, and those
17	be sent out.	17	of you that are practitioners know, the numbers don't
18	So that's sort of the quick view of what goes	18	tell you everything. The administrative data set we're
19	on with retrospective DUR. Before I move on to	19	using for clinical purposes, and it's putting a square
20	prospective, are there any questions?	20	peg in a round hole, and it somewhat fits but it's not
21	DR. BLANCHARD: Can you give me an idea of the	21	a perfect fit. So, that's another one of the reasons
22	number of prescriptions or the number of recipients	22	for having a DUR Committee review the profiles.
	that receive prescriptions, compared to the number of	23	Because, what the computer finds, once you have a
	exceptions you find that might deserve a letter? Do	24	practitioner look at it, they will say, well, this is
25	you know how many letters you sent out that's ten	25	nuts, this is not, you know, this is really not a
	Page 62		Page 6-
1	percent?	1	problem in this patient given the fact, for example,
2	DR. PUGH: Well, roughly a thousand profiles	1	if it was a drug interaction that could cause toxicity
	are generated each month, and roughly ten percent of	1	because of a decrease in the metabolism of another
	those result in letters, so that would be about a		drug, and you see evidence from the lab claims that
	hundred. I know the enrollment numbers have changed		that drug level is being monitored, then you can
6	since I was at Medicaid two and a half years ago. I'm	1	assume that the practitioner is aware that this is a
	not sure what the number of recipients that receive	1	problem. They're taking care of it, and so you
8	the drug benefits are.	8	wouldn't send a letter.
9	CHAIRMAN TEEFEY: Do you know? We just, we	9	So that is, one of the problems is, is that
1	have a DUR report that we've done, and I can get you a		you don't know what's going on. It could have been an
111	copy of that.	1	honest switch because, for therapeutic reasons. It
12	DR. PUGH: Yes, because the annual report to	1	could have been a switch because of, you know, other
1	HCFA is due June 30th each year.	1	reasons. But you can't tell, you can't assign it
14	CHAIRMAN TEEFEY: As a matter of fact, we just		that, as such.
	signed off on it. I will get you a copy of it.	15	DR. PUGH: Okay. Any other questions?
16	DR. PUGH: And that would have all the	16	
	denominator numbers for the Program and what all is	17	NOTE: (No response.)
1	involved.	18	
19	Other questions?	19	DR. PUGH: Okay. On to prospective.
20			Obviously, from the name, this happens before the
21	NOTE: (No response.)	1	prescription is dispensed, and it can be used to
22			prevent problems from happening. And, just to make
23	DR. PUGH: Okay. The more exciting and		things complicated, there's not just one type of
1	interesting are the		prospective DUR, there's two types. The first type is
25	CHAIRMAN TEEFEY: Can I ask you a question?	25	what's known as on-site prospective DUR. This occurs

HJR 630	CondenseIt <sup>™</sup>
Pa	Page 65 Page 67
1 in the dispensing pharmacy before the claim is	1 for you to go way far back into the history of the
2 submitted. It involves the pharmacy's computer sy	vstem 2 patient.
and the patient profile that's on that system and any	
4 system DUR criteria. Now, depending upon what	4 occurs at the claims processor after the claim has
5 software the pharmacy is using, if they're using	5 been submitted, and it involves the claims processor's
6 Computer RX, I know that they use the First Data B	ank 6 computer, which is usually a large mainframe, and the
7 as their source of information for drug interactions	
8 and other types of criteria. Other programs use	8 DMAS/DUR Board has determined the prospective DUR
9 Medi-Span or the Red Book, as David referred to.	9 criteria that are to be used for Medicaid recipients
10 So, depending upon who the software vendor	10 and that's what's used. It's not somebody else's idea
11 is, it's kind of like whether you're talking about MS	
12 Office versus Corell, versus a MAC or whatever. W	-
13 PCs you have a lot of different variations of ways of	-
14 doing word processing. There's also a lot of	14 it allows for the detection of problems regardless of
15 different software programs available for pharmaci	
16 to process the prescription dispensing process. And	
17 what ends up happening is, depending upon the sys	
18 that's there, you may see slightly different types of	
19 messages come across. But any pharmacy that's	19 16 different pharmacies and one is a Ukrop's, one is a
20 computerized, I didn't want to state every one of th	- · ·
21 does have this, but they all should have it and it all	
22 should be turned on. And, one of the big problems	
23 that practicing pharmacists run into is that some of	-
24 these programs have every interaction known to ma	•
even the most insignificant ones. But, most of the	25 The only other problem or the other criteria
Pa	rge 66 Page 68
1 programs do allow for a switch to turn on or off	1 to remember with this type of DUR is that because of
2 different levels of significance.	2 the system requirements, and by that I mean the amount
3 The majority of pharmacies do end up keeping	g 3 of time that's available for this whole electronic
4 on with the major significant interactions and	4 transaction to occur, you can only use about two to
5 problems and turning off the minor ones. So,	5 three months' worth of prescription data in the
6 otherwise, almost every prescription would probabl	ly 6 screening process. Otherwise, it just takes too long
7 end up with some kind of alert and nothing would	ever 7 and the wholethe world, as we know it, will grind to
8 get done. So computers are nice, but they also kind	8 a halt, or maybe not quite that, but it's along those
9 of mess things up sometimes. One of the important	9 lines. It's a pretty bad mess. If you talk to any
10 things to remember about the on-site prospective D	UR 10 pharmacist who has ever had problems with a switch or
11 is that it is the only way to screen for drug allergy	11 has had the system go down on them, it's close to the
12 interactions. Because of the information that's	12 end of the world.
13 available in the claims file for the on-line	13 So, what I'm now going to do is give you a
14 perspective DUR, which we'll talk about in a minute	e, 14 generic overview of the prospective DUR process. And
15 allergy is not part of that information, because	15 the reason I'm calling it a generic overview is
16 remember, we're dealing with claims that are subm	itted 16 because I've added a few steps in there that aren't
17 to pay providers for the activities that they perform	17 necessarily things that Medicaid does, but I think
18 for a patient.	18 will help you with the overall picture and in getting
19 Local pharmacies have allergy information an	d 19 at some of the issues that you're dealing with as a

- 20 their software can actually check for drug allergy 20 Task Force. problems. The other nice thing about these systems is, 21 -2 because it's locally within the pharmacy, generally, 22 is presented to a pharmacist in a pharmacy and the 23 they can use several months to even years' worth of 23 prescription information, the patient information are 24 data so that you can look at a much longer period of 24 entered into the computer. At this point, screening
- **CRANE-SNEAD & ASSOCIATES, INC.**

25 time to look for potential problems. So that it allows

So, the first step is, is that a prescription

25 goes on to look for potential DUR problems, and this

H	EJR 630 Condenseit <sup>™</sup>				
	Page 69		Page 71		
	is the on-site prospective DUR that we've just	1	message will be sent and, depending upon what the		
	recently talked about. Now, if problems are found, the		health plan has decided it may be overridable; it may		
	s issues are clarified with the patient and/or	3	not be overridable. It may require a phone call in		
	prescriber, depending upon the nature of the problem.	1	order to be overridable. There's all kinds of		
	5 Often the physician needs to be called and there may	5	variations out there as to what can be done.		
1	5 need to be a correction to the prescription or it may	6	Hopefully, the edits are passed, and we can proceed to		
	be that a replacement prescription is needed, and this	7	Step E. This is where the actual on-line prospective		
1	is entered into the system.	8	DUR occurs. And, as is the case, we can have, either		
5	If a new prescription is put in, it's again	9	you pass the edits or you don't. If the edits aren't		
10	screened. So, you can just keep doing this several	10	passed, the pharmacy is sent what's known as a DUR		
11	times. Usually, it doesn't take more than one go	11	alert message, and, depending upon the setup that the		
12	around in that loop before you can move on.	12	plan has, it may or may not include a claim denial.		
13	If you're lucky and there are no problems	13	And, again, depending upon what the plan has decided,		
14	found, you can go to Step B, which is at the bottom of	14	this may or may not be overridable. And, if there is a		
15	Page 3. This is where the claim is submitted	15	problem, then the pharmacist will have to deal with it		
16	electronically. Now, those of you that are familiar	16	on the other end.		
17	with using the Internet know you have to dial up and	17	But, hopefully, we see Situation 2, which is		
18	then wait and all of this kind of stuff goes on. The	18	that the edits are passed and the pharmacy gets the		
19	same kind of thing happens, more or less, when an	19	message that the claim has been approved, there are no		
20	electronic pharmacy claim is sent. The pharmacy needs	20	problems. So, basically, there are two major outcomes		
21	to use their modem to dial into a switch, which then	21	from this process: One, is thatthe one that we all		
22	converts their information electronically to something	22	like to seeis that the claim passes all the edits		
23	that the computer that's processing the claims can	23	without any denials and the pharmacist may dispense		
24	understand. Now, the whole process for submitting a	24	prescription. The other one is that you may have a		
25	claim and receiving a reply back from the processor	25	denial message or a DUR alert message, and then the -		
	Page 70		Page		
1	can take more than about 30 seconds. It just won't	1	pharmacist has to work to either override it and		
2	work. The switch is time out. It just The whole	2	explain the rationale for why they overrode it; they		
3	process just takes too long, because it takes more	3	have to make a phone call to do it; they may have to		
4	than 30 seconds. And the vast majority of this 30	4	confer with the prescriber if it's a drug interaction		
5	seconds is involved in this transaction with the	5	problem, and if there's two different prescribers		
6	switch to the processor and then the processor back to	6	involved, they need to talk with two different people		
. 7	switch, back to the pharmacy.	7	sometimes, and so this can be a fairly time-consuming		
8	So, what I'm going to describe to you now, on	8	process.		
9	the top of Page 4, which are the various edits or	9	So, that's sort of the generic overview of		
10	checks, this all takes place in probably less than	10	what happens with that. I spoke with Mary Ann Rollins		
11	five seconds. The eligibility edits is first because,	11	on Friday to ask about what was being done now with		
12	obviously, if a patient is not eligible, there is no	12	on-line prospective DUR since things have changed		
13	sense going any further with trying to process the	13	since I was at Medicaid. Originally, DMAS was not		
14	claim. If the patient is not eligible, a denial	14	denying for any kind of on-line prospective DUR		
15	message is sent, and usually this is a denial that	15	alert. This is mainly because we were new at it. We		
16	can't be overridden, for obvious reasons. If the	16	didn't want to overburden people with messages, and so		
17	patient is eligible, we can proceed to Step D.	17	we decided to take a cautious route and kind of phase		
18	This is where things may differ from what	18	things in.		
19	Medicaid does. Is a number of programs now have some	19	My understanding is that now denials are		
20	other administrative edits, and these may be things	2	being issued for therapeutic duplications, which		
21	such as, is this drug on the formulary, is this a	21	generally means that's two or more drugs for the same-		
22	prior authorization drug, and so forth. So there are	22	pharmacologic class, so if two drugs can do the same		
23	things that administratively deal with other programs	23	thing, the patient really doesn't need to be on both		
24	that are being used.	24	of them. One of them should take care of their		
25	Again, if there is a problem, a denial	25	needs. Now, an important thing to remember about		

# CRANE-SNEAD & ASSOCIATES, INC.

H	HJR 630 Condenselt <sup>™</sup>				
Γ	Page 73	T	Page 75		
1	those denials that are being used by DMAS right now is		although you might think that, well, prospective DUR		
1	that they can be overridden by pharmacists, and the		gets things before they happen, it's great, it's		
	pharmacists are asked to send a DUR response		wonderful. The problem is, because of the volume		
14	indicating the rationale for their override. This is a		that's involved, you can't find or send back messages		
	very reasonable approach compared to some other	1	about every single problem or else the dispensing		
	private health plans. So, it's a very conservative	1	world would grind to a halt and nobody would get their		
1	but very safe approach.	•	prescriptions. So, because of the time requirements,		
8		1	we can only go for the tip of the iceberg. So in		
9	early refill. I don't know. Are you using 75		reality, you also need both the on-site and the		
	percent? David, is it 75 percent that you're using?	1	on-line DUR in order to catch most of the significant		
11		1	problems. So, just running it on the processor's		
12	-	1	machine isn't enough. It also has to be run at the		
13	prescription, for example, if it's before three weeks		local pharmacy.		
	of a one-month supply that should have been consumed	14	Now, are there any questions about the		
	by the patient, then you'll get an early refill	15	prospective DUR?		
	message. This doesn't mean that the patient can't get	16	CHAIRMAN TEEFEY: Yes.		
	the drug. There are obviously reasons why people	17	DR. PUGH: Yes.		
	would need it. You know, they may have lost it. They	18	CHAIRMAN TEEFEY: Under D up there, under the		
	be going out of town and need it. There's a number of	19	administrative edits,		
	very good reasons for early refills. The instructions	20	DR, PUGH: Yes.		
21	• • • • • • • • • • • •	21	CHAIRMAN TEEFEY: -this is where the		
22	originally planned. So, this is, again, overridable	22	formulary comes in?		
1	by the local pharmacist.	23	DR. PUGH: Exactly.		
24	Another initiative is the excessive dose or	24	CHAIRMAN TEEFEY: Is this, and I'm going back		
	duration of anti-ulcer medications. And this is mainly	25	to the General Assembly now, and let's say a druggist		
	Page 74		Page 76		
1	for clinical reasons, which also has a very big	1	has an agreement with the pharmacy or manufacturer		
	economic component to it, as well. If a patient's	4	where they get a rebate for a drug. I think that's		
	ulcer hasn't been cured within three months of using		one of the examples you-all used.		
	these medications, they require reevaluation and may	4	DR. PUGH: Okay.		
	require a totally different kind of therapy. So,	5	CHAIRMAN TEEFEY: This wouldn't pick up that,		
	there's monetary reasons, but the more overriding	6	would it, the administrative fees? It would just pick		
	reason is the therapeutic reason. So, in a nutshell,		up the formularies that come from the actual insurance		
	that's some of the specifics for Medicaid DUR, for the	1	entity?		
1	on-line.	9	DR. PUGH: Yes. But, this is going on, on the		
10	Now, like with the retrospective, there are	10	health plans or the Agency's processor's computer. So		
11	advantages and disadvantages. The major advantage is		it would only know what's going on, like what your		
1	that you can solve problems before they occur. It's a	1	rules are, or if this was for an HMO or for Key		
1	very proactive process. It can also be used as a		Advantage, one of the plans that State employees use.		
	· · · · · · · · · · · · · · · · · · ·	1	It would only know what they have said is on their		
	administrative criteria are written. And, that's		formulary or whatever. It is only It's specific		
1	something that requires a fair amount of criteria,		for that particular plan.		
	because there are so many different drugs that can be	17	CHAIRMAN TEEFEY: All right. Let's go down to		
1	used and some of them, it's not just you're looking at	18	E, and let's have the clinical edits.		
	one particular drug, you want to find, are people	19	DR. PUGH: Uh-huh.		
	getting a whole range of drugs, and so forth, but it	20	CHAIRMAN TEEFEY: Would the clinical edits		
	is possible to use this system by writing	21	pick up the chemical differences if they switched the		
1 <u>~</u> 2	administrative edits to do that sort of thing.	22	drug?		
23	The disadvantage is listed at the top of Page	23	DR. PUGH: You would have to write specific		
24	5. You can only address the tip of the iceberg	24	criteria for that and that is not a type of criteria		
25	because of the system's time requirements. So,	25	that's generally used in the clinical edits. It's		

## CRANE-SNEAD & ASSOCIATES, INC.

H	JR 630 Conde	ns	elt™
Γ	Page 77		Page 79
	similar to what you find with the retrospective DUR.	1	is you can look for certain types of
	•	•	hospitalizations. So, if somebody stops using their
		1	inhaler and all of a sudden needs to go to the
	· · · ·	1	emergency room because they're in status hypnoticus,
		1	then you end up with a situation where you can say,
1	since we're here about drug switching, do your		umm, they didn't use their drug. Then this may have
	computers, as strong as they are, can they determine	1	been the cause of the hospitalization. But you're
	whether or not there has been a clinical problem with		still kind of out on limb because there may be some
	a switch? And, if so, what is that evidence or are		other things going on. They may have received a
	your computers not doing that or able to do that?		sample from their physician and there's all sorts of
11	· •	1	other things that can explain that. So there is no
112	to do that, especially with prospective because		really good way to pin it, even with the computers
	problems usually develop after a patient has been	[	that we have.
	taking the drug. There have, in the hospital	14	Yes?
	environment, they have used some surrogate measures	15	MR. AYOTTE: I just want to make sure that the
	that show that there has been a problem with the		DUR Program which you're discussing and the people
	drug. For example, dispensing Benadryl, which would		that service DUR, and it does mirror your managed care
1	indicate that somebody may have had an allergic	1	process, do they have the same formulary in their data
	reaction, and they needed that to help quell the	1	banks when the claim bounces up against it?
	allergic reaction. And there's a few other things we	20	CHAIRMAN TEEFEY: The Ask that again.
	used in the hospital environment, but they're not	21	MR. AYOTTE: Earlier we talked about open
	perfect measures.	22	formularyno formulary or open formulary, whatever it
23	In the outpatient arena, which is what we're		was, that goes in against the First Health Data
24	talking about here, I just don't see how it can be	•	Banks. When a claim goes out in your capitated
	done, given the current state of technology, and, at	25	program, is that bouncing against that same formulary
	Page 78	1	Page
1	least, especially with the Medicaid program with what	1	or is that bouncing against
	is available to them, when maybe some other programs	2	CHAIRMAN TEEFEY: No, it's not.
	that have much better data bases that can do things	3	DR. PUGH: Because they're not submitted
	better, but I kind of doubt it at this stage of the	4	claims, are they?
5	game.	5	CHAIRMAN TEEFEY: No.
6	MS. PIGG: Would that get at thatI'm asking	6	DR. PUGH: So, that would be right. So the
7	Bill because it's been a whilewhere you can	7	ones that are in the managed care plans would not be
8	MR. TOWLER: On the claim.	1	subject to this same DUR system. One would hope they'd
9	MS. PIGG: Yes, on the claim.		be They'd be subject to another one, though.
10	MR. TOWLER: I don't believe that information	10	MR. AYOTTE: They would be subject to the DUR
11	can be transmitted.	11	system that is involved with the capitated process?
12	DR. PUGH: Yes. There's a whole series of	12	DR. PUGH: Whatever the plan is using.
13	codes that have been put together by the National	13	DR. BLANCHARD: If we use this discussion as
14	Council for Prescription Drug Plan, NCPDP, that allows	14	an attempt to educate us in the process, not just for
15	pharmacists to respond back to DUR messages with a	1	Medicaid, but how the computer systems work in
	coded message that would indicate different things	,	pharmacies with, under managed care hands, am 1
1	that could have happened; their reasons for things		correct in assuming under D, that would be sort of the
1	that have been changed, and so forth. But, unless the	1	point where a message might appear that, A, this drug
	pharmacist submits that stuff, which is a separate		is not under the formulary; you need to talk to the
	transaction, which costs them money to send it in,	20	patient, Doctor, and get another medication? Here are
	that's probably, that would be the closest thing you	21	some recommended substitutions. Or, this drug is on ~
	could do.	1	formulary but our plan prefers a cheaper or better
23	I was reminded by one of the observers here	í	drug.
	that one thing you can also do, especially in the	24	DR. PUGH: Exactly.
25	Medicaid program, since you do have integrated claims,	25	DR. BLANCHARD: This is the time to start

H	JR 630 Conde	ns.	eIt™
Γ	Page 81		Page 83
1	asking. This is where that would pop up?	1	industry.
1 2	DR. PUGH: That's exactly correct. That's one	2	DR. PUGH: Yes. And, we were very, very
3	of the reasons for doing it this way.	3	careful about that when we first started out, and,
4	MR. BLANCHARD: All sorts of messages could be	4	again, the feedback from the folks in the field was
5	written in there to the pharmacist, at that stage,		that we were doing a reasonably good job and that most
	depending on the incentives or whatever it might be.		messages we sent out were worth reading, so that was
7			encouraging.
8	plan was, yes.	8	MR. COUNCIL: Could there not be a lot of
9		9	I'm referring to your outline again, Page 4.
10	to remember it's depending on the system that you	10	
	have, the capability to take those messages back.	11	MR. COUNCIL: Are there a lot of clinical
- 4	Once again, in all these things, you have to have the	112	edits that the prescription may not pass that would
	capacity to review that whole message.		flip you back into D? Also, in which case it would be
14			necessary to call the prescriber?
	other problem can be, sometimes the messages are on	15	DR. PUGH: Well, if there are clinical edits
	more than one screen, and, you know, in a busy	1	that aren't passed, it would be under Item E, and it
	pharmacy, they don't always have time to read through	+	would be Number 1. They'll send a DUR Message alert,
	all that stuff	1	or alert message will be sent back to the pharmacy.
19		1	And, then, depending upon what needs to be done, if a
20		*	whole new drug needs to be prescribed, then you go all
	And, I can remember when I was a Pharm.D. student at	1	the way back to the beginning and start at Step A and
	MCV Hospital, that they have a physician order entry	4	go through all this again. And, you know, if it
	computer system and the P and T Committee thought it	1	happens to be a nonformulary drug this time, you will
	would be a great idea to educate House Staff about		hit up against those edits, and it would be a very
	formulary choices, and so forth. And they had all		time consuming.
-	Page 82		Page 84
1	these nice educational screens as to why you wanted to	1	But, by itself,
	do this and why you didn't want to do this. And, it	2	DR. BLANCHARD: But, it's not an
	didn't take most of the House very long to figure how	_	administrative edit, the results of clinical edits,
1	many clicks of that light pen it took to bypass all		which will throw you back into the loop.
	those screens and get to where they needed to go. So,	5	DR. PUGH: No. Clinical edits would result in
	is it five for this drug and two for this drug? And,	-	either, yes, this will be a paid claim, there are no
	so, the same thing happens with pharmacists, as well,	1	problems; or, there are some problems, here they are,
	when they get all these messages back. And, that's		and you decide what to do about it. And some plans,
	one of the important things to remember, especially	1	as an example, here with Medicaid, case are a few
	with these prospective DUR systems, the on-line ones,		therapeutic edits or clinical edits that are denied.
	is that you get message overload.		But, the vast majority of the marks, so, for example,
12	So while they're wonderful tools, they can		a drug interaction wouldn't be denied. The
	just absolutely snow pharmacists with, you know, just		pharmacists would have used their judgment as to
	information overload that can't be assimilated. And,		whether something needed to be fixed or, for example,
1	in a very fast-paced pharmacy, it can be very		it may be that the patient was taking two interacting
	difficult to keep up with all of that stuff.		drugs, and because the other drug had been filled
17	MR. AYOTTE: Mr. Chairman, you also, you		recently, the computer says, cops, there is a big drug
1	amended your earlier, you amended your number of		interaction here. But, it could be that their

1	could say, well, you know, the doctor said, don't take	1	health plan generally tries to get its best price, and
	this other drug while I'm taking this, because of the		that may or may not involve rebates. And, again,
	drug interaction. So, it just further enforces that		rebates have been discussed here, so I won't go into
	it's a situation that something may slip through the	4	them any further.
	cracks that can be taken care of. So it's an	5	One of the big problems with formularies is
6	educational kind of thing, rather than an	6	adherence to them. It's variable and it requires a
7	administrative kind of thing.	7	lot of effort on everybody's part but, most notably,
8	Other questions?	8	the practitioners in the field. One thing and one
9	•	ſ	reason why DUR gets mixed in with formularies and
10	NOTE: (No response.)	10	rebates is that you can use the administrative edits
11	,	ł	of an on-line system to monitor and police and
12	DR. PUGH: I'd like to finish up very briefly	12	maintain your system. So, some people think of that
13	with what DUR is not.	ι .	as DUR. It is not DUR. It is an administrative edit
14	This area is really confusing to people that	14	on the computer. DUR is really just the clinical
15	are in pharmacy practice, and I'm sure to physicians,	15	edit.
16	as well. It's, I'm sure, even more confusing to people	16	Then, we have the famous prior authorization,
	that don't deal with all these acronyms and all these	17	the thing that gets everybody all up in a tizzy every
1	different kinds of systems all the time. So, what I	18	time it's mentioned. Basically, this is a cost
19	have attempted to do is to list out three things that	19	controlling strategy. And, again, it varies from
20	are commonly confused or mixed in with DUR programs	20	program to program. An amount of kneecap breaking is
21	and talk about them very briefly. They have already	21	involved in the process. Some programs are very
22	been touched upon by some other folks, so I will be	22	reasonable. Others make you jump through all kinds of
23	brief. But these are not the same thing as a DUR	23	hoops and it just makes it not even worth even wanting
24	Program.	24	to try. So, again, if you have seen one prior
25	The first thing is a formulary or rebate	25	authorization program, you have seen one prior
	Page 86		Page 81
1	system. And you all know what a formulary is by now, I	1	authorization program.
	think, based on the definitions and I have my version	2	Generally, cost is a major concern. And,
3	of the definition down there for you. Basically, it's	3	again, one of the reasons why we end up getting into
4	a list of drugs that are going to be covered by the	4	problems with people thinking that this is the same
	health plan. And, depending upon the health plan, it	5	thing as DUR is, in the on-line system you can use the
	may be, in the best of all worlds, there's a formal	6	administrative edit to make this system run as well.
7	Pharmacy and Therapeutics Committee, also known as the	7	Then, finally, Disease State Management
,	P and T Committee that's composed of practitioners.	8	Programs, and since this is a newer term and the
	They're involved in the drug selection process. And,	9	definitions really haven't settled down quite as
1	in the idle situation, the drugs that are selected are	10	nicely as they have for rebates, excuse me, for
11	selected because of therapeutic concerns, comparative	11	formularies and prior authorization, I decided to use
1	efficacy and safety and then cost comes in third.	12	a recent reference that I have found that provides
(	That's the ideal situation. You have the whole	13	very nice, clear definitions of what exactly, at
14	extreme there. There are some people that put the	14	least, one author's idea of the Disease State
	cost stuff first. There's some people that definitely	15	Management Program, and this comes from the Annals of
16	do put the therapeutic stuff first.	16	Internal Medicine from last year. The basic premise
17	So, it's important to find out how that plan	17	is that "there is a more optimal way to manage
18	is operated, because you just can't say that because	18	patients, which results in lower costs and improved
19	it's being run by a PBM that automatically cost is no	19	health outcomes." I have listed for you the
20	one's concern. There are some PBMs in the health	20	assumptions and really what's going on here is this is
21	plans that that is true for. There are also some	21	beyond DUR. It's a population-based approach and it
22	plans that that is not true for. Somebody once said,	22	intervenes, as does DUR, but it measures outcomes and
23 (	once you've seen one formulary, you've seen one	23	it sort of involvesit's involved in a continuous
24 1	formulary.	24	quality improvement cycle. So that DUR does have some
25	Once a formulary has been determined, the	25	continuous quality improvement to it, but Disease

HJR 630 Condenselt <sup>™</sup>			
	Page 89		Page 91
1	State Management goes much further beyond this and is	1	to check when the doctor wrote the order so that he
' -	a much, in my opinion, to be a preferred way of doing	2	could check off his preference that the closed
	things. As I mentioned, there's a lot of different	3	formulary preferred drug not be used, and that the
14	definitions out there and a lot of different	1	drug actually written for be used?
5	variations on programs. So, it's still kind of being	5	DR. PUGH: No, because the physicians entered
	figured out right now.	6	all the orders by computer, and if the drug wasn't on
7		7	the computer, they knew it wasn't on the formulary.
8	State Management might possibly be confused with DUR	8	MR. BLANCHARD: But, then, if it wasn't on the
	is that the use of identifying a patient and looking	9	formulary, what did they to do?
	at their utilization can sort of be confused with	10	DR. PUGH: They had to fill in a nonformulary
11	retrospective DUR and, indeed, you can use a	11	request.
	retrospective DUR system to kind of begin to build	12	DR. BLANCHARD: And, what percentage of the
	profiles for what you're working with, but it's not	13	time was that, was that allowed, assuming it was
	the same thing.	14	available in the formulary?
15	So, if you have any other questions?	15	DR. PUGH: I wasn't involved in fulfillment of
16	• •	16	those requirements, so I don't know. You know, I do
17	the past or currently, serve on any P and T		know that when there were reasonable requests, they
18	committees?	18	were accommodated. When there were things that were
19	DR. PUGH: I served as Staff for P and T	19	A person wanted a particular brand name, and it
20	committees in the hospital setting.	20	was generically available, that wasn't necessarily
21	MR. TOWLER: Was that, basically, a closed or	21	accommodated.
22	an open system?	22	DR. BLANCHARD: Sure.
23	DR. PUGH: Well, in one hospital it was very	23	DR. PUGH: So I can't tell you, you know, what
24	much a closed system. And, in another hospital, we	24	was done in all cases. But, there was a procedure for
	used to joke and say that our formulary was the PDR.	25	determining whether or not this was something that was
	Page 90		Page 92
1	So, I've been involved in the more rigorous	1	necessary, to the patient's care and that was overseen
2	ones, and I have also been involved in ones that are	1	by the Pharmacy and Therapeutics Committee.
3	just P and T committees by name.	3	DR. BLANCHARD: Presumably, that appeal
4	MR. TOWLER: Are those predominantly in the	4	process and decision was usually made on the basis of
5	hospital setting?	5	hours or a day?
6	DR. PUGH: And predominantly in a hospital	6	DR. PUGH: Oh, it's made, yeah, withinvery
7	setting.	7	shortly after the request is made.
8	MR. TOWLER: Would you say in a closed	8	DR. BLANCHARD: It's a period of a 90-day
9	formulary environment, are there any problems that you	9	appeals process?
10	think came out from that in a hospital setting?	10	DR. PUGH: Well, no, because it was the
11	DR. PUGH: Well, there's problems with	11	Hospital.
12	everything. One of the issues that, when I think of	12	DR. BLANCHARD: I understand that.
13	the most rigorously closed formulary that I worked	13	DR. PUGH: Yeah, it's just a little bit
	with, would be an issue of when a nonformulary drug	14	different situation.
15	was wanted and didn't happen to be readily available	15	DR. BLANCHARD: But not necessarily to a sick
1	and it might take as long as 24 hours in order to get	16	person who is standing at the counter of a drugstore.
	it. But rarely was there not another therapeutic	17	DR. PUGH: Well, I guess it depends on When
	alternative that could be used in the interim or maybe	1	I think of the situations I've had being enrolled in a
	in place of, totally, that particular agent that was	4	health plan that has a formulary, there have been
20	wanted. So, in terms of harm to patients, I don't		times when a prescription was written and that drug
	hink I ever saw that occur. In terms of people not	1	
	getting what they wanted, that occurred fairly	22	very rarely do formularies, that I'm familiar with
	frequently.	23	anyway, there may be some out there, but the vast
24	DR. BLANCHARD: I have a question. In that	1	majority of formularies that I'm familiar with,
<u> </u>	same hospital, closed formulary, was there also a box	25	usually have enough variety of different types of
an	ANE-SNEAD & ASSOCIATES INC		Page 89 - Page 97

Γ	Page 93		Page 95		
1	therapeutic classes of drugs so that pretty much every		some green eyeshade accountant deciding what's going		
	situation can be covered. And, if something is not		to be done. So, unless you really snow what the		
	covered and it is absolutely necessary, it's usually		process is involved in, you can't really tell.		
	done for the patient.	4	MR. AYOTTE: Is there a quality assurance for		
5	Now, with Medicaid, my guess is that the	5	P and T Committees anywhere nationally? Is there a		
6	patient-the pharmacist and the physician that are	•	national P and T Board?		
	taking care of that patient, aren't going to say,	7	DR. PUGH: Well, let's see. For health plans,		
	well, go home, you can wait 90 days to get a drug.	8	would it be NCQA? For hospitals, I guess the Joint		
	They're going to come up with some other alternative	1	Commission on Accreditation of Healthcare		
	) that can be used by that patient in the interim. Or,	10	Organizations.		
	else, I have known of situations where pharmacists	11	MR. AYOTTE: So, there is a body that		
	have "eaten" it. They have given a drug to the	12	semi-regulates or monitors the qualify of the P and T		
1	patient and they have paid for it out of their packet,		Committees?		
	because, maybe in their opinion and the opinion of the	14	DR. PUGH: Oh, yeah, from the hospital		
	prescriber, the alternatives were not acceptable.	15	setting, man, JCAHO has reams and reams and reams of		
16	-		things that you have to comply with. I'm not quite as		
17	there, too. These days it's a lot less common. But,	1	familiar with what the NCQA standards are. But,		
	when I was first starting in practice 15 years ago, I	18	MS. PIGG: NCQA is as rigorous as the Joint		
	know I did it a number of times. Because, when I was	19	Commission is. Thank you.		
20	Pharm.D. School, I worked retail relief.	20	MR. TOWLER: One other question. Just in your		
21	DR. BLANCHARD: And, in the hospital setting,	21	experience with formularies and drug selection in the		
22	you talked about that a formulary was decided upon and	22	hospital setting, are they, basically, similar in the		
23	agreed upon by the	23	drugs that are included, or do you find a lot of		
24	DR. PUGH: Pharmacy and Therapeutics	24	differences from settings?		
25	Committee.	25	DR. PUGH: I think it depends on the nature of		
	Page 94		Page 4		
1	DR. BLANCHARD:who reported back to the	1	the setting. The needs of an academic teaching		
2	Health Staff? Was this an academic center or	2	hospital are going to be very different from those of		
3	DR. PUGH: Yes, academic center.	3	a community hospital. And then you can't even call		
4	DR. BLANCHARD: That would be a little	4	community hospitals community hospitals any more,		
5	different from a private hospital.	5	because we have places like Henrico Doctors that do		
6	DR. PUGH: Yes. I have worked with a Pharmacy	6	transplants. So, you know, it depends upon the nature		
1.5.	and Therapeutics Committee in a private hospital and	7	of the type of patients that are being cared for in		
	it was a committee of the medical staff, and they	8	that facility.		
	reported back toI'm not sure who the Chairman of the	9	Back in the good old days when we had		
	P and T Committee reported to.		university teaching hospitals and everybody else,		
11	DR. BLANCHARD: Generally, there's a pretty		there were very different types of formularies. And,		
	good consensus, among the practicing physicians there,		quite frequently, in the community setting, they were		
1	that if a formulary is developed by the P and T		a lot less loosely defined than they were in the		
	Committee themselves, and would buy into that and				
	they'd prove formulary, that's something that they	15	MR. TOWLER: Could you tell, from the		
	should feel comfortable practicing?	4	formulary that you worked with, whether there was		
17	DR. PUGH: Right. And then with some of the		maybe more preponderance of a cost factor in the		
	plans they also have, for example, looking at some	1	decision-making?		
	ofKaiser-Permanente and some of those plans, they	19	DR. PUGH: The only way one would be able to		
	have P and T Committees that are made of	1	determine that would be to look at the minutes of the		
	practitioners, and so forth. It's just when you end up	(	Pharmacy and Therapeutics Committee and see what kind		
	contracting out that sometimes you don't know what	1	of discussions went on, what kind of materials were		
	you're getting. They may have a nationally renowned P		prepared. When I served as Staff to the two P and T		
	and T Committee. But, if you down line, don't know		Committees that I have worked withactually, I have		
25	who is involved, it's the same thing as, you know,	25	worked with three of them nowmy job was to write		

H	IR 630 Conde	ns	eIt <sup>™</sup>
	Page 97	Γ	Page 99
1	reviews, monographs, of the drugs that were being		groups, and it's virtually impossible to keep track in
, K	considered for addition to the formulary and to look	1	your mind what's going on with whom. That's why we
	for all the articles that talked about the safety and	1	use these computers.
	efficacy of the drug, and also to look into the cost	4	CHAIRMAN TEEFEY: So you might have to call
1	issues. But, it was always, here's is the drug and if	5	twice?
	it doesn't work, then you don't want to have it and	6	DR. PUGH: Oh, for sure. I mean, that's not
	who cares what it costs.	7	unusual. So, and then, often you can't get through or
8	So you deal with those issues first and then	8	you talk to the nurse, and they won't let you talk to
9	you deal with cost.	9	the doctor.
10	MR. TOWLER: Was rebate information furnished	10	MR. COUNCIL: But you could have had a
11	to you in those instances?	11	clinical switch, presumably, from a nonrebatable to a
12	DR. PUGH: Back then, no. I know hospitals	12	rebatable drug.
13	used to get a lot better break than they do now. I	13	DR. PUGH: No. Yes, that is possible. But it
14	would work with whoever was responsible for pricing in	14	wouldn't necessarily That might not have been the
15	a hospital to find out what our price would be for	15	intent, but that may be the outcome.
- 1	that drug if we put it on the formulary. So, I wasn't	16	÷ ,
	familiar with all the behind-the-scenes of that.	1	know.
18	Other questions?	18	
19	MR. COUNCIL: Yes, follow-up for you.	19	
20	DR. PUGH: Okay.	1	hospital formularies, have you ever seen a system
21	MR. COUNCIL: Back to my clinical edits		where the hospital pharmacist was aware of and
	question, if a prescription failed a clinical edit	1	incentivized by a rebate or a kickback system to try
	because of contraindications with another dosage,		to shift market share from one drug company's drugs to
124	DR. PUGH: Right.	1	another drug company's drugs so that part of that
5	MR. COUNCIL: -what would Would the	25	decision was
	Page 98		Page 100
	pharmacist recommend an alternative there?	1	DR. PUGH: Only in the sense of I can think
2	DR. PUGH: It would depend upon the nature of	1	of one very clear example from, when I was working at
	the conflict. Again, if it's a situation where an		a community teaching hospital outside of Philadelphia
	adjustment has already been made, no problem. If it's		where we would get a much better price if we used the
	something where the drug needs to be changed, the		IV form of Pepcid as opposed to Zantac. And, so we
	pharmacist would have to confer with the prescriber		initiated a campaign and said, basically, you know,
	and ask, you know, let them know what was going on,		the drugs are the same kind of thing. They really
	and they might recommend that a particular drug be used, but it would be prescriber's decision as to what		don't have any advantages one over the other, and it
	would be prescribed in place of the conflicting drug.	1	costs the hospital less if we use Pepcid. So, please, use Pepcid.
11	MR. COUNCIL: So the pharmacist may well have	11	DR. BLANCHARD: But, to your knowledge,
1	to go back to the prescriber?	12	DR. PUGH: The pharmacist didn't benefit from
13	DR. PUGH: Oh, always. Even if you want to	i .	it.
14	change dosage form, you have to go back to the	14	DR. BLANCHARD: The price had been proven by a
	prescriber. You cannot A pharmacist cannot change	1	market share percentage? It was just that the price,
	anything about a prescription without conferring with		to start with, was a lot cheaper.
	the prescriber.	17	DR. PUGH: It was, yes. And, it may be
18	MR. COUNCIL: And, if they agreed upon a		different now, although I've been out of hospital
19	change neither one of them would necessarily know if		practice for about five years, now. So, I don't know
	the first prescription were rebatable or not or the	•	what the current state of things is, but my guess is
	second prescription, the substitute were rebatable,		the individual pharmacist that's working with that, is
	would they?	1	not usually privy to that kind of information and does
23	DR. PUGH: Probably not, given the fact that	23	not receive any kind of incentives from that.
•	most pharmacies cover 30 different health plans and	24	MS. PIGG: From my hospital days, the pricing
25	those physicians work with equally as many different	25	there was not explicit, but it was definitely implicit
CP	ANE-SNEAD & ASSOCIATES INC	-	Page 97 - Page 100

Page 101         Page 103           1 in that when they knew, in your hospial setting, you         1 them. And, in many situations where it's well-run, 2 well done, that process functions very effectively to           3 stock IV Zantac. So there wasn't an explicit market         2 well done, that process functions very effectively to           4 share component to the price, but they knew that they         3 were going to get the market with very little.         3 were going to get from it.           6 DR.PCRI: And they kind of knew how muchyou         3 used on average, so they kind of knew how muchyou         3 were is another component.         4 best derrapy that's on the           1 groups in hospitals right now and different levels of         1 market.         5 MS. PIOG. Where does the comparison to           1 groups in hospitals right now and different levels of         1 market.         5 were reasonable component.           2 group. And, in the committed buying         10 more are made svalable at Pharmacy and         1 know, we go to the clinical literature, do literature           13 advoter are made svalable at Pharmacy and         1 souther are acomparisons, we use         11 there ta south were. You           14 specifically, there are made svalable at Pharmacy and         1 souther are acomparisons, we use         11 these committem meetings generally, that           16 Terrapeutics         2 mopering and there are Pharmacy and Therapeutics         1 souther are acomparisons, we use           17 have been involved	H	HJR 630 Condenselt <sup>™</sup>				
1       in that when they knew, in your hospital setting, you         2       were going to use IV Pepcid, you weren't going to         3       stock IV Zantac. So there wasn't an explicit market         4       share component to the price, but they knew that they         5       Were going to get the market with very little.         6       DR. PUGH: And they kind of knew how much you         7       used on average, so they kind of knew how much you         7       used on average, so they kind of knew how much you         8       going to get from it.         9       MR. SZALWINSKI: Maybe, if I can add a little         10       bit to that there are different levels of buying         11       gorop. And, in the committed buying group.         14       specifically, there are market-share-driven discounts,         16       Thare been involved with, in order to heje pervyoen         18       uderstand the economice incentives secondary to the         9       clinical facts surrounding the drugs. It's total         12       decision. And so there are those kinds of situations         12       decision. And so there are those kinds of situations         12       decision. And so there are those kinds of situations         12       decision. And so there are those kinds of situations         14<	Γ	Page 101	T	Page 103		
2         were going to use tv keptid, you weren't going to 3 stock IV Zantac. So there wasn't an explicit market         2         were going to get the market with very little.           5         merket.         3         Market.           5         merket.         3         Market.           6         DR. PCOR: and they kind of knew how muchyou.         3         Market.           7         used on average, so they kind of knew how muchyou.         3         Market.           8         going to get the market with very little.         3         Market.           9         MS. SZALWNNSKI. Maybe, if I can add a little         10         Market.           10         to that, there are different levels of buying         11         Market.         5           12         stock IV, they are available at Planmary and         16         Therapeutics         10           13         group. And, in the commitse metrys, generally, thit I         1         Market.         5           14         Thave been involved with, in order to help everyone         15         Sindwith were are market-share-fiven discounts,           15         addiction that needs to be made, not a singular         2         Sudorstand the coononic incentives secondary to the           16         Tharkewethe anaware of, and I particinpate in         2		-	1	them. And, in many situations where it's well-run,		
3 stock IV Zantac. So there wasn't an explicit market share component to the price, but they knew that they knew set on awareg, so they kind of Knew how much you sub constraints of the price of the stock						
4 share component to the price, but they know that they         4 market.           5 were going to get the market with very little.         5 market.           6 DR PUGH: And they kind of know how much you         4 market.           7 used on average, so they kind of know how much you         6 alternative agents that treat the same conditions come           9 going to get from it.         6 alternative agents that treat the same conditions come           9 market.         5 were stative agents that treat the same conditions come           11 groups in how and different levels of         1 market.           12 whether you are a voluntary or committed buying proup,         14 market.           13 group. And, in the committed buying proup,         14 market.           14 specifically, there are marker-share-driven discounts         1 market.           15 mark been involved with, in order to help everyone         1 market.           16 met needs the coonding.         1 market.           17 have been involved with, in order to help everyone         1 market.           18 decision. And so there are tharmacy and Therapeutics         1 market.           21 Committees that 1 an aware of, and 1 participate in the decision that cannot be made affectively in a vacuud.         1 market.           21 facts about the drugs, as well as the economise.         2 you. However, have you received any information in your Pei and 1 sin your heighther you make a decision in your Pei an				· •		
5         WE global to get the market with very link.         5         MS FIGG: Where does the comparison to           6         DR. PUGH: And they kind of knew how much you         6         alternative agents that treat the same conditions come           7         used on average, so they kind of knew how much you         6         alternative agents that treat the same conditions come           7         used on average, so they kind of knew how much you         6         alternative agents that treat the same conditions come           7         in? Because the FDA says this drug is safe and this         8         due to that treat the same conditions come           10         those are made available at Pharmacy and         1         Treviewed clinical literature, 40         1           14         specifically, there are markers-share-drive discourts,         1         Inverses, have pharmacista and physicians who review           15         and those are made available at Pharmacy and         1         treviews, have pharmacista and physicians who review           16         therase sumoning and there are those kinds of situations         1         the committee seconomics           16         decision that needs to be made, not a singular         2         decision that needs to be made, not a singular           21         decision that needs to be market, you need to aboth of         1         mare that an aware of, and 1 par		-	1			
6       DR. PUGH: And they kind of knew how much your       6       alternative agents that the same conditions come         7       used on average, so they kind of knew how that they were       7       in? Because the FDA says this drug is safe and this         8       going to get from it.       6       alternative agents that the same conditions come         9       MR. SZALWINSK: Maybe, if I can add a little       6       alternative agents that meat the same conditions come         9       MR. SZALWINSK: Were it gets on the market. So       9       there is another component, I believe, to your         10       Dit to that, there are different levels of buying       11       MR. SZALWINSK: Well, if's there. You         13       group. And, in the committed buying group,       14       is how, we go to the clinical literature, do literature         14       preprintig and there are marker-share-driven discounts       15       there are offerature, and         16       Therapeutics       16       there comparisons that are good comparisons, we use         17       have been involved with, in order to help everyone       16       16         18       that meeds to be made, not a singular       16       16       16         20       cleasion that needs to be ranged, not a singular       2       2       10       11         21			5	MS. 1	DR. PUGH: Chemically-similar drugs are	1	······································
,	ronsidered to be distinct chemical entities and so	2	SENATOR NEWMAN: If I could, I want to play
	ney are not considered to be the same. I think You	3	off that point, because I suspect that the
4	were talking about the samedifferent formulations of	4	neurotherapeutic drugs are possibly what is being
5	the same medication, perhaps?	5	discussed here. However, the FDA has made it very
6	SENATOR NEWMAN: If you have a generic to a	6	clear, especially in letters that have come to us
7	brand, the generic manufacturer has to comply with	7	recently that I'll provide the committee that they go
8	bioequivalency data?	8	to extraordinary lengths on their therapeutic drugs to
9	DR. PUGH: Yes.	9	make sure that the percent is only five percent, plus
10	SENATOR NEWMAN: And they all comply to	10	or minus, which is the very same, that one tablet
ш	different degrees.	11	that's made right in front of the other can be of the
12	DR. PUGH: Yes.	12	same manufacture.
13	SENATOR NEWMAN: And there's a 20 percent	13	So, if we're talking about neurotherapeutic,
14	tolerance, I understand?	14	which may be the most sensitive of all of these, the
15	DR. PUGH: Yes.	15	FDA requires a much higher hurdle because of the
16	SENATOR NEWMAN: So, if it's not or is more	16	sensitivity of those drugs.
17	available than the brand's standard, you can see some	17	DR. PUGH: But, even so, I think most
18	toxicities, can you not?	18	practitioners, just because of the potential for
19	DR. PUGH: Or some lack of efficacy. And,	19	problems, usually shy away from it.
20	there are certain drug classes that most pharmacists,	20	It's better to be safe than sorry, speaking
21	any good pharmacist and any good physician would agree	21	of torts.
22	that you don't want to go switching around willy-nilly	22	MR. TEEFEY: Yes, sir.
23	on.	23	MR. WALKER: Mr. Chairman, I have a question
24	There are a lot of other drug classes,	24	on the hospital formulary. If a patient comes in to
	uretics, where it doesn't matter. You know, it's	25	the hospital, and they are controlled hypertensive on
	Page 106		Page 108
1	just not that big a deal. So, I think it's If you	1	Drug X. Drug X is not covered by the hospital
	talk about it as putting all drugs into one big box	1	formulary. Is that patient switched to the formulary
	and saying, we're going to allow willy-nilly	1	drug or is he put on the drug that he's been
	substitution, then that is problematic, but it's	1	controlled on.
	problematic because there is a small subset of drugs	5	DR. PUGH: It depend on the hospital. Some
	that have a very narrow index that, you know, if you	6	hospitals will allow patients to bring in their own
	have a little bit less, patients start having problems	1	medication and let it be administered. Some hospitals
	because of a lack of efficacy. If you have a little	1	will not, and they will assist on another formulary
	bit more, then they develop toxicity problems. Those		alternative to be dispensed. So, it really depends.
	are the drugs that you need to be careful about and do		It varies from institution to institution.
	not use generic substitution on or make sure that, if	11	CHAIRMAN TEEFEY: Carol, we want to thank you.
	you're going to switch, that you're not switching back	12	DR. PUGH: You're welcome.
	· · · · · · · · · · · · · · · · · · ·		CHAIRMAN TEEFEY: The reason we got Carol up
	different brands every month: that you make the switch	13

	Page 125		Page 127			
1	interestingly, but also it could possibly include the	1	physicians, administrators, and payers are looking to			
2	formulary committee and/or the hospital, if the	2	apply the positive lessons of the formulary system to			
3	hospital is solely controlling the pharmacy.	3	the ambulatory sector. Efforts to duplicate hospital			
4	The next section of the literature review is	4	outcomes in the ambulatory sector will be misguided			
5	what I call "Commentaries and Positions." The	5	because they will substitute the decisions of facility			
6	literature, at least what I have looked at, is rife	6	managers for those of pharmacist-physician teams.			
7	with both hard data, soft dataI think you all may	7	There was some discussion of that, also, this morning.			
8	have referred to it as anecdotes before, and what I	8	Then, one more bullet. To summarize, I found			
5	call commentaries and positions.	9	and I am not an advocate one way or the other. I'm			
10	Let's look at the first one. The American	10	staffing the group. But, I found no position that			
11	College of Rheumatology opposes legislation or	11	categorically supports the policy decision, if you			
12	regulation that would permit prescription therapeutic	12	will, to therapeutically substitute or to			
	substitution by a pharmacist as an action which is not	13	therapeutically interchange. However, I found and			
14	consistent with quality patient care and which will	14	reported to you specific instances where specific			
15	pose unnecessary risks to patients' well-being.	15	drugs were determined to be substitutable-if that's a			
16	The next one applies to generic	16	wordand cost savings could result. But, I think,			
17	substitution. Let me go over that one. The practice	17	based upon my analysis and synthesis of all this,			
18	of therapeutic substitution represents an important	18	critical to doing that, is the approach to how you do			
19	therapeutic modification with potential clinical	19	it. You know, involving pharmacists, involving the			
20	significance far beyond that of generic substitution.	20	P and T Committee, having a strong formulary,			
21	Some political remarks. I guess this was	21	communication, training, all of that. That's,			
22	during health care reform. I wasn't clear of the date	22	basically, the literature in a nutshell, as I see it.			
23	of that particular piece of research.	23	Any comments or questions?			
24	The next to the last bullet on Page 8, is	24	DR. DALTON: I'd like to comment. That was a			
25	very strongly worded. The term "therapeutic	25	good summary, and I think that coming into this, I			
	Page 126		Page			
	substitution" should be expunged from the pharmacists'		think we've recognized that we, as physicians, are			
1	professional vocabulary. The term "substitution"	1	able to compromise and be flexible, as appropriate,			
	evokes deep, negative feelings, especially among	3	when it doesn't compromise patient care.			
	physicians. It means to them that a pharmacist	4	I think criticism of some of the drug			
	intends to change their orders, without their consent	1	switching that was done was that the primary incentive			
1	and without their knowledge.		was economic, and I think we've focused on individuals			
7	The next bullet. Active participation of		who were paid a specific bounty for switching drugs			
1	pharmacists with physicians in the drug therapy		and that was the reason for switching. And I think			
	decision-making process results in fewer drug-drug		that this next to the last bullet does summarize			
	interactions and adverse drug reactions, better	10				
	control of disease conditions, shorter lengths of	ł				
	stay, lower costs, and so forth, than when that does	1	and drug switching is fraught with a lot of potential			
1	not occur. The key here is not to give all the credit	13	disaster, because of the controls not being in place. I think there are instances of harm being			
	to pharmacy. It's not pharmacists alone who are	14				
	responsible for these positive outcomes. It's the pharmacist-physician team that is responsible. It	1 .	asked for cases. I know that, in one particular class			
	transcends the individual pharmacist himself or	17				
1	herself.		enzyme inhibitors, there's a specific side effect that			
19	One author kind of waxed polemic on us. He		is present in all of those specific medications, to			
<b>1</b>	said a therapeutic interchange has been practiced	1	some extent, but it ranges from one percent, maybe,			
•	successfully in hospitals for so long as part of		for one to up to eight or ten percent for others. And			
	formulary systems, why now is it becoming such a hot		that is a reaction where there is airway swelling and			
	topic? Well, the answer is that as the health care		compromise of breathing. Patients I am called in to Surger			
	system continues to change, and as more care is being		see on occasion and sometimes patients have been on			
	provided in nonhospital environments, pharmacists,	1	the medication for a while, it's hard to say why they

	Page 129		Page 131
	have the reaction at a particular time after they were	1	CHAIRMAN TEEFEY: Yes.
2	started on it. And I think some of it is because they	2	
	vere probably switched to another medication in the	3	point, Mike.
ı.	class or other interactions may be involved. But I	4	MR. WORTHINGTON: Okay, Mike.
5	think that we need to limit the reasons why we allow	5	What problem do you have with that
6	substitutions, to the extent that's acceptable, and I	6	definition, if we try to buy off
7	think that we need to carve out that part where the	7	MR. AYOTTE: Well, my problem is very simply
8	primary reason to switch is for financial gain.	8	this. And, again, representing the community setting,
9	SENATOR NEWMAN: Mr. Chairman?	9	it's illegal to make a switch, therapeutically, on a
10	CHAIRMAN TEEFEY: Senator Newman.	10	chemically-dissimilar drug, without a physician's
11	SENATOR NEWMAN: This was hard work for you	11	consent. Now, this definition of therapeutic
12	guys, and I know, going out there and gleaning this	12	substitution may exist in a closed environment or in a
13	information is not easy. However, it appears from a	13	closed hospital setting where that can occur.
14	cursory view that it could have been called, because	14	Inferring into a definition that it can happen in the
15	of what you have to work with, the entire thing could	15	retail setting, I think, is wrong. And I think in the
	have been commentaried positions. And the reason is	16	testimony that we got in the first meeting, if you
	because you're going out there and getting	17	review it, someone had asked for a Board of Pharmacy
	commentaried positions of both sides. And, if I were	18	regulation to look at what really is there in writing
19	to think anecdotally about which example I would use	19	and in regulations now that would do this. And I
	as a bad example, it would be with aspirin. We all	20	think you're saying that, yes, a therapeutic
	understand that aspirin can have negative effects, and	1	interchange can occur with a physician; that's
	it's the perfect anecdotal reason. And that's what	1	perfect. But, also, I think a therapeutic substitution
	I'm hoping that, while the document is maybe what's	1	in a nonclosed environment, okay, a nonhospital, which
	out there, maybe what we're saying is there is not	1	a lot of these examples are hospital environments, I
	much out there.		think we need to clarify that so that we're all clear,
	Page 130		Page 132
1	MR. WORTHINGTON: Exactly.	1	because you don't have pharmacists out there
2	SENATOR NEWMAN: Now, the other problem is	1	substituting without physicians' consent.
3	proving the negative on cost is almost as impossible.	3	MR. WORTHINGTON: So there is no therapeutic
	Proving that it didn't save money in some cases is		substitution then in an ambulatory care setting in
	almost impossible. So, I know this is the best that's	1	Virginia?
	probably out there, but I'm worried about putting too	6	MR. AYOTTE: The only thing you can substitute
	much stock in something like this, because it is	-	for ambulatory setting is if it's voluntary formulary
	somewhat anecdotal and commentaried positions of		and it shows on the Virginia formulary, which is,
	others.	1	realistically, a list of drugs that are chemically
10	MR WORTHINGTON: Well, there is a good deal		similar to each other.
1	I concur with most of what you said, Senator Newman.	11	MR. WORTHINGTON: And generic substitutions.
	But I think in the specific drug illustrations that	11	MR. AYOTTE: Right. But, the generic drugs are
	are provided in the literature, there are some hard	E	listed in the Virginia voluntary formulary.
	data indicating that some drugs may be substituted for	14	DR. KNAPP: And from the DHP perspective, I
	other drugs, at least in an acute care hospital	1	can speak to that. I didn't bring my code book with
	setting. It may be different. I think we'll get into		me. I apologize. But, I think the interpretation of
	some of this, in any event. Dr. Carroll will probably		• • •
	be addressing access to data, too. But, yeah, when		the scope of the practice of pharmacy would make that
			a true statement that, without, in an ambulatory
	you start thinking about who funded the research and		setting, it would not be legal. Your definition of
	for what purpose, and so forth and so on, you have to		therapeutic substitution would not be legal. It would
	-		be outside of the scope of practice of a pharmacist in the Commonwealth of Vincinia, and they would be bauled
	undiced eye, but with a cautious eye, anyway. And I think that the committee is using to take that		the Commonwealth of Virginia, and they would be hauled
	think that the committee is wise to take that		up in front of the DHP.
	approach.	24	MR. WORTHINGTON: Has that ever happened, by
5	MR. AYOTTE: Mr. Chairman?	25	the way? Has it ever occurred, that someone has been

H	JR 630 Conde	ens	clt™
	Page 133	T	Page 135
1	punished?	1	contacting the prescriber, it does fall within the
	•		practice of pharmacy. ?
3	can think of.	3	
4	MR. WORTHINGTON: Okay.	1	licensed by the Board, then we have no authority, and
			currently they are not.
16	definitively. And that was going to be my question,	6	
17	actually, assuming there is a pharmacist Code of	7	
8	B Ethics, are any of these assumptions about these	1	to a pharmacy out-of-state or someone, you know,
	hypothetical situations, would this be considered	1	whatever.
	unethical?	10	
111			from within the State, you've got jurisdiction.
112	would think that most of them would be considered	12	· - ·
	either illegal or unethical, from a pharmacist's	1	that, yes. But if the switch, like I say, it was
4	perspective.	+	mentioned today that we had authority over all the
15			parties that are involved, and we do not. Only the
	Mike Ayotte's statement as far as what was occurring	1	pharmacists who are licensed by the State do. So,
	in an ambulatory setting. The only exception I would	17	MR. SZALWINSKI: Well, a remedy to that might
	take is to believe there is some nonresident		be that all prescriptions dispensed for residents of
	mail-order pharmacies that are out-of-state that may	1	Virginia must be dispensed by pharmacists licensed in
	not necessarily comply with all of those statutes that		Virginia.
1	those practicing within the State would have to comply	21	DR. KNAPP: We have visited this issue on the
	with, and whether or not they adhere to the Virginia	1	Board of Medicine lots of times and, actually, there
	voluntary formulary. I think that remains to be	1	is wording to that effect running around out at the
	seen. So, at least, with the ones that have their		DHP; that if you're going to practice, operate,
	buildings in Virginia, I think Mike's statement is	1	prescribe, or otherwise on a patient or on a resident
	Page 134	+	Page 1.
1	accurate. So,	,	of the Commonwealth of Virginia, that you need to be
2	-	1	licensed by the Board of Medicine in the
	you. But you would then look towards amending current	1	Commonwealth. And, obviously, that is a hugely
1	Board regulations, because I believe Wyatt sent a		controversial perspective that I'm a sure a lot of
1	letter to the Board of Pharmacy last year indicating	4	people don't agree with.
	the laws that exist and how they would be able to be	6	But, you know, I think to tell a pharmacy is
÷	applicable for this situation. So, I mean, the Board,	-	probably even a bigger problem or a mail order
	I believe is also looking at telepharmacists and		pharmacy might even be a bigger problem than
	having them registered within the State, I believe.		telemedicine is for the moment, but not for the long
10	CHAIRMAN TEEFEY: Yes, sir?	1	run. You know, I would question whether or not that
11	MR. WALKER: Mr. Chairman, it's been alluded	1	is a topic that we really want to tackle, but we may
	to earlier today that the Board of Pharmacy does have	1	have to.
	purview over the drug switching people. I'm Chairman	13	DR. BLANCHARD: It is my opinion, based on
	of the Board of Pharmacy, currently, and we've been		some of the comments last meeting, that it was at
	advised by Counsel that we currently do not have the	1	least fairly clear to me that there was a distinct
	statutory or the regulatory authority to regulate	1	difference between the apeutic substitution, as you
	these now.	1	define it here, and therapeutic interchange. And
18	I believe, when the Durrette Group had their	<b>j</b>	that, in fact, what we were looking for in this
	Bill proposed, there was some alternative regulation		committee, unless people are talking about legalizing
	changes that would have given us that authority. But,	20	therapeutic substitution in Virginia, was a discussion
	I think it was opted to proceed with the Durrette Bill	21	of the pros cons and risk benefits of therapeutic
	at that time. So, currently, the advice that our		interchange.
	Counsel gives us is that we do not have the ability	23	I think it would be very helpful if, as we
	to, and I see that as a problema big problem. But		receive data from other people, and as we discuss it
	you do have the ability, if they do it without	,	among ourselves, that we are very clear on how we use
	ANE-SNEAD & ASSOCIATES INC		Page 133 - Page 136

H	LJR 630 CondenseIt <sup>™</sup>				
[ _	Page 137		Page 139		
1	those two terms. There is a huge difference between	1	not at the first meeting. I was under the impression		
	whether a physician is consulted or whether the	1	that you-all may have discussed some of that at the		
1	physician is not consulted. I would make one point,,	1	first meeting. But, maybe that's erroneous		
	to clarify that, though, is that if a formulary is	4	DR. BLANCHARD: No. I think many of us have		
5	sufficiently restrictive, that therapeutic interchange	5	not seen or read the entire		
•	with a consultation back to the physician, it de facto	6	MR. WORTHINGTON: I'll get that for the		
	becomes therapeutic substitution, because there is no	7	Committee.		
	other drug. And, in deference to the patient's	8	DR. BLANCHARD:study. I certainly		
	wallet, the physician, generally, is going to have to	9	appreciate the input from pharmacists and academicians		
1	defer and acquiesce to that substitution, if you will,		on how much faith to put into conclusions of that		
	that interchange. But, I think we do need to keep in	11	particular study.		
	mind that we're talking about therapeutic interchange,	12	SENATOR NEWMAN: Mr. Chairman?		
13	and I would have liked to have seen this report or	13	CHAIRMAN TEEFEY: Yes, sir.		
	would like to see in the future, more information on	14	SENATOR NEWMAN: Just one other comment. I		
	pros and cons of therapeutic interchange, if they	15	think that the comment that was just made is awfully		
1	exist.	1	important, because the effects and risks associated		
17	MR. WORTHINGTON: It's not there. It's not	1	with substitution, if it is beyond our purview of our		
18	there.	18	discussion, then we're bringing in information that		
19	DR. BLANCHARD: I'm particularly interested	19	really won't have an effect on our indecision if our		
20	that you chose not to review the paper that's been	20	indecision is going to be something about interchange.		
21	bandied about right and left by Susan Horn with	21	So, if the committee, I don't know Mr. Chairman, if it		
	respect to the cost to the total system and systems	22	is, but if we are, mostly on this particular subject,		
	that had what I understand were therapeutic	23	going do be dealing with interchange, then we need to		
	interchange and restrictive formularies and the effect	24	be dealing mostly with risks as other things		
25	that had on total cost. And, members of this	25	associated with interchange and understand that there		
	Page 138		Page 140		
1 -	committee, I think, are interested in how they should	1	is something else out there called substitution, but		
2	evaluate that particular study since it's	2	that's not what we are going to be discussing.		
3	MR. WORTHINGTON: Well, I guess it's, with all	3	MR. WORTHINGTON: Well, I concur, then. I		
4	due respect, Dr. Blanchard, it's like everything else	4	think this afternoon, in this afternoon's session,		
5	that I get involved in, anyway. I know that I'm	5	when Mike and I get together and work you through		
6	involved with the Liaison Committee, the Pharmacy	6	that, that we may be able to come up with some		
7	Liaison Committee, and language is thrown around, with	7	consensus on, not just definitions, but the purview of		
8	all due respect to the Legislature, language is thrown	8	the Committee, if you will.		
9	around that's not always accurate. We had some,	9	To illustrate and, Michael, maybe you can		
	referring to DUR that Dr. Pugh gave a presentation	10	help me out a second. I won't take but one more		
11	about. There's some language on, DUR shall do this	11	minute. But, I'm a subscriber or beneficiary,		
	and DUR- when, in fact, it was prior authorization is	12	whatever, with HealthKeepers, Blue Cross. I take, in		
13	what they were talking about. So, I'm not so sure	13	the fall, I get all sorts of sinus infections. I'm an		
	that restricting ourselves to therapeutic interchange,	14	outdoor kind of guy, you know, work in the yard and		
	if that's what you're saying is necessarily our sole	15	all that. And, I foundI've tried, everything. I		
16	charge. I think that, perhaps, the language	16	have switched, I guess, and Hismanal is the drug that		
	"therapeutic interchange" encompasses substitution,	17	I found that does me the best to treat this sinus		
	and so forth and so on. I think we would be remiss if		infection stuff. I got a letter from HealthKeepers		
	we didn't at least address all of them.	1	back in February saying that this is no longer paid		
20	DR. BLANCHARD: But Dr. Horn's study was		for by HealthKeepers. We suggest you use Claritin.		
71	MR. WORTHINGTON: Right.	21			
	DR. BLANCHARD: -not reviewed by you for a	22	Now, is that a substitute? What is that? Is		
ر م	particular reason or	1	that therapeutic substitution? What is the basis of		
24	DR. PUGH: I didn't get it. It was just not		that decision? I'm not addressing it just to you,		
25	given to me. It was certainly not purposeful. I was	25	Mike, but illustrative of what I have been through. I		

B	UR 630 Conde	<b>cnseIt</b> ™			
Γ	Page 141		Page 143		
	1 don't know anything about Claritin. I know that	1	across several data bases using the same key words in		
	2 Hismanal works for me.	4	each of the data bases.		
	3 DR. BLANCHARD: Your doctor also received a	3	MR. SZALWINSKI: About how many citations did		
•	4 letter, as I did, saying that Mr. So and So is taking	4	you come up with?		
	5 Hismanal and Hismanal will no longer be covered	5	MR. WORTHINGTON: Julie, you gave me a		
	6 starting January 1. You need to make another	6	printout. Probably ten or twelve pages with maybe		
	7 decision. We suggest, and they list whatever their	7	four or five cites per page. Does that sound about		
	<sup>8</sup> suggestion is. I would suggest that that is a request	8	right? Maybe 60, I guess.		
9	9 for you to make a request	9	MR. SZALWINSKI: And the rationale for getting		
10	MR. WORTHINGTON: To my physician.	10	from 60 pages to 20 studies was?		
1	DR. BLANCHARD: -for an interchange.	11	MR. WORTHINGTON: I read them all. Well, I		
1:		12	read everything that was given to me, and I pulled out		
13		13	what I determined to be I mean, I could have cited		
	pharmacist cannot fill Claritin in place of your	14	seven or eight of the same thing, that said the same		
11	5 Hismanal without the physician's consent.	15	thing. However, I did some synthesis, if you will,		
110			some analysis and said, well, I can't bring them all		
17			here. Let's just use these as representative. And, as		
18		•	I said in the beginning, this is not an exhaustive		
15	<b>_</b> ,		list, although there is not much more out there that's		
20		1	going to say anything different. But it is		
21			representative of what the literature says that's out		
	Prevalence in the United States documented here, did	22	there. I want to make that very clear.		
	you find anything about prevalence in Virginia?	23	But, what literature there is out there, I		
24	ind myang,		believe these remarks reflect, to the best of my		
25	Julie?	25	ability, very accurately, the sentiments of the		
	Page 142		Page 1		
	MS. SISLER: NO.	េ	literature. Sentiments isn't the right word. The		
2			positions, if you will, of the literature.		
3	MR. SZALWINSKI: So, we don't know what the	3	DR. PYLES: And I can also say that one of the		
	prevalence is in Virginia?		things that we did was, we looked, since the situation		
5	MR. WORTHINGTON: At least, not based on our	ſ	in hospitals is different from the ambulatory setting,		
1	search.		and that's really where we are today, we have a lot of		
7	DR. PYLES: Not at the present time.	1	older literature from institutional settings, so we		
8	MR. SZALWINSKI: So, there is no literature to	1	chose not to include a lot of that here, because we		
	substantiate any kind of a rate of this going on?		felt that that would pretty much have been put to		
10	MR. WORTHINGTON: It's just not there. It's		rest. So, what we were trying to do is to look at		
	just not there.		this situation from the ambulatory setting, and it's		
12	MR. SZALWINSKI: Were there criteria that you		just not there. It's not a lot of empirical. It's		
E	used for pulling these studies? Were there specific	1	just not there.		
1	key words that you may have used or was there a	14	MR. WORTHINGTON: Mike, Dr. Pyles, is		
	clinical review of the studies for how you chose to include or not include them?		correct. There were several cites, Mr. Szalwinski,		
17			that go back to the early 1970s. And I thought those		
	DR. PYLES: Yes. I directed Julie, based on		were, perhaps, too dated for the group. I think I did		
	our discussions, and so she used key words, drug		use one from 1975, making all the positions, but I		
	switching, drug interchange, anything that was related		tried to stay as current as I could.		
	or came up in any of our previous discussions, are	20 21	MS. PIGG: When you were reading the studies,		
•	pretty broad-based, across all the literature. We not		in the ones that you elected to report, did you read		
	only looked at clinical journals, but we also looked at economic literature, because you have to look		randomized, passed the wrong pole.		
•	across the broad spectrum of literature to get at this	23 24	MR. WORTHINGTON: I looked at the methodology,		
<u></u>	issue. So, we did do a pretty broad-based search	25	sure. I didn't rate their methodologies, but I looked		

HJ	R 630 Conde	ns.	eIt <sup>™</sup>
	Page 145		Page 147
1	at the methodologies and, you know, these are	1	The second barrier is the common practice of
2	respectable journals. You know, I can't question the	2	PBNs and managed care organizations of making
	Annals of Pharmacotherapy, and so I would assume that	3	pharmacists sign confidentiality statements. Again,
. 4	their editorial Board selected research that was done	4	these statements say that the pharmacists can't reveal
5	very well.		patient information without the express written
6	MS. PIGG: But, in our literature search, we	6	consent of the PBM or the managed care organization.
7	really did not do a critical review as far as the	7	So, again, there is a barrier to my going into a
8	validity of the actual study.	8	community pharmacy and getting drug switch
9	MR. WORTHINGTON: I don't think that's my	9	information.
10	position to do that. No, I didn't do that, and I	10	The last barrier is a little less obvious.
11	wouldn't do that.	11	And, that is I think there is a reluctance on the part
12	DR. PYLES: And, we're probably really not put	12	of a lot of pharmacists and a lot of physicians to do
13	in a position to talk about clinical validity, except	13	anything which they think might antagonize or might
14	what was reported there, in most cases.	14	criticize managed care organizations. The feeling is
15	MS. PIGG: Only to the point of, if you put a	15	that if I, as a pharmacist, antagonize an insurance
16	conclusion down, it's nice to have a sense of whether	16	company, that company may then throw me out of its
17	or not the study designed was valid, whether or not	17	network or no longer allow me to participate. So if
18	you can put any weight on the conclusion.	18	you think drug switching is something that might
19	MR. WORTHINGTON: I can attest to the ones	19	antagonize a managed care organization, then you're
20	that are from the journals, the scientific journals.	20	not going to get involved in research on it.
21	They meet their standards. If our standards are	21	Now, these three restrictions substantially
	different, that's another issue. But they meet their	22	increase the difficulty and the expense of doing
23	standards, and I think we have to go on that.	23	empirical research on drug switching. So, as a result,
24	Okay. Anything else?	24	I think if there is going to be any large scale
125		25	research efforts, they're going to have to be
	Page 146		Page 148
1	NOTE: (No response.)	1	supported by the PBMs and the managed care
2	,	2	organizations which are doing the drug switching,
3	MR. WORTHINGTON: Thank you.		because they have the data. And until these
4	CHAIRMAN TEEFEY: Dr. Carroll. Dr. Carroll is		organizations do the research or until they share
1	a Professor at the Pharmacy School at the Medical		their data with outside researchers, about all we're
6	College of Virginia.		going to know about drug switching and about all we're
7	DR. CARROLL: Thank you, Joe. My name is		going to know about the effect of drug switching on
1	Norman Carroll, and I'm a Professor of Pharmacy		patients is what we can glean from small-scale surveys
1	Administration at the School of Pharmacy at the	9	and anecdotal evidence.
\$	Medical College of Virginia. Due to the sensitivity	10	Any questions?
1	of this issue, I need to tell you that I'm here	11	
	speaking as a researcher and as an individual and not	12	NOTE: (No response.)
1	as an official representative of the School.	13	
14	What I would like to comment on is the lack	14	MR. SZALWINSKI: Just for the record, there is
1	of research information on therapeutic interchange,		legislation in Virginia which prevents managed care
1	specifically on drug switching. As someone who has		organizations from excluding pharmacies from their
1	ione research in this area or probably more precisely	17	,
•	who is trying to do research in this area, I have run	18	SENATOR NEWMAN: Yes. Unless it's an ERISA
1	nto three barriers to doing research. Okay. The		Plan.
	irst is, there is a pharmacy regulation which	20	MR. SZALWINSKI: Right, unless it's self
	prevents pharmacists from sharing patient data with		funded.
	iny one other than the physician or the pharmacist.	22	DR. KNAPP: Unless it's an ERISA plan, which
	Dkay. From the point of view of a researcher, that	23	MR. SZALWINSKI: Right. So commercial HMO
r	prevents you from going into community pharmacies and		populations have to have an open network.
23 g	tetting drug switch information.	25	SPECTATOR: That legislation is qualified by

	the fact that the pharmacists or physicians who wish	1	you sent us?	
	to be providers in that network must be willing to	2		
	comply with all terms and conditions that other	3		•
	providers are complying with. So, if one of those	4	next guy is the bad guy. He didn't send it in.	
	conditions is a provision in the contract that	5		
	prohibits you from disclosing information about		that I'm here against my will, but here to serve at	
	planned participants to third party sources, you must		the pleasure of the Chairman. Because I do think that	
	comply with that or you can breach your contract and		attorney and/or lobbyist grandstanding on these issues	
9	then the Freedom of Choice Law does not apply.	1	should be kept at an absolute minimum: preferably	
10	MR. SZALWINSKI: Maybe a reasoning behind	10	there should be none at all. But I will, having said	
1	that, if, and I hope that you never are in a position		that, very quickly go through and list for you,	
12	of having a terminal disease or one that you would not	12	without much commentary, because I don't think that	
13	like communicated to people that don't know you, you	13	I'm nearly as qualified as the members of this Task	
	would very much, as a consumer, want that information	1	force to assess the validity of or analyze the data	
15	to be kept confidential, I would imagine.	15	that we have submitted to the Task Force.	
16	DR. CARROLL: Absolutely.	16	Most of the lengthier documents that I have	
17	MS. PIGG: Norman, just for your information,	17	submitted have their own executive summaries already	/
18	since I'm here as a representative of the Academy of	18	prepared by the authors and attached those documents,	
19	Managed Care Pharmacy, the Foundation of Managed Care	19	so I won't try to substitute those authors' summaries,	
20	Pharmacy is actually trying to come up with a study	20	either. And, moving on, then, to the list of documents	
	designed to look at some of this, but it was very	21	that I have already provided to the Task Force through	
	involved. They anticipate it to take three years.	22	the facilitator, Dr. Pyles, and also in a letter to	
	They also anticipate a cost of well over a million	23	the Chairman of the Committee, Mr. Teefey, we have	
	dollars and not desiring to seek funding from,	24	provided, to begin with, two letters which Wyatt	
25	necessarily, pharmaceutical companies. I'm not sure	25	Durrette and I co-authored, which were sent to the	
	Page 150		Page 15	5.
1	where it's going to go either.		Virginia Board of Pharmacy last fall. And, in those	
2	DR. CARROLL: Yes. I agree with all of that.	1	letters, we tried to summarize, as best we could, the	
	But, when you come down to why is there no data, it's	3	problem that we were seeing with drug switching in	
4	just hard.		Virginia. In particular, with some of the new	
5	MR. COUNCIL: I'd just note, too, that		contracts that we saw emerging beginning last summer	
	HCFA-approved Medicaid contracts also have similar	6	By "contracts," what I mean are Provider Agreements	
7	confidentiality provisions. It's not just a matter of	7	that were being issued by certain managed care	
8	managed care organizations and PBMs that are imposing	8	organizations to pharmacists.	
9	confidentiality.	9	In those letters, we attempted not only to	
10	CHAIRMAN TEEFEY: I think the reason Norm is	10	bring what we saw clearly as a problem to the Virginia	3
11	here is because, when we were searching through all of		Board of Pharmacy, but to review for them the existing	g
12	this data trying to come up with something, Norm was	12	Virginia law that we thought would give them the	
13	aware of it, and he wanted to make it clear to the	13	jurisdiction or authority to actually take action	
14	Task force why we have only what we have here,	14	against some of these companies for engaging in the	
15	basically. I think it's real important that we heard	15	practices that we were seeing, which we believe were	
16	that.	16	harmful.	
17	Thank you, Norm.	17	The Virginia Board of Pharmacy, I believe,	
18	During the break we had a few questions about	18	did look closely at this issue. I believe that they	
	materials that were handed in and some materials that	19	publicly stated concern with the problem of drug	
20	weren't handed in. We had the two individuals that		switching in Virginia. I believe they held a hearing	
21	made presentations last time to really review the	21	in which at least one PBM was present and attempted to	) · `
22	materials they sent in so we make sure that the Task	22	describe its policies in a particular contract that it	
23	Force has all the materials we need and the complete	23	had issued to Virginia pharmacists. I don't know that	
24	materials we need.	24	the Virginia Board of Pharmacy has taken any action,	
25	Kenneth, do you want to review the materials	25	any affirmative steps since then. It's my	
	materials we need.	24	the Virginia Board of Pharmacy has taken any act

$ 1\rangle$	Just as a word of explanation, that is what		host of others. I won't try to summarize that report,
1	l led to the Virginia Anti-Drug Switching Patient		but I will just read very briefly for the Task Force
1	2 Protection Act last year. That was an attempt to get		Committee what the authors stated at the very
	3 that express authority. It would have provided that,		beginning of that report, which was that That
	that statute would have provided that authority not	1	report, by the way, was entitled, "Component
	5 only to the Virginia Board of Pharmacy, but to the	4	Management Fails To Save Health Care System Costs
- E	Virginia Board of Medicine, to the Attorney General's	4	The Case of Restrictive Formularies," and it was
	7 Office, who would have also created a private cause of		published in August of 1996. The statement at the
	action.		beginning of that report was, This report is a
119	Beyond those two letters, we provided, at		comprehensive overview of the published literature
20	Dr. Pyles' request, a copy of the final version of the	4	going back several decades on the impact of
- 1	Virginia Anti-Drug Switching Patient Protection Act		restrictive formularies. This body of literature
	which was considered, in its last forum, by the House	1	indicates that such formularies often have a negative
	Committee on Health, Welfare and Institutions, and	1	impact on overall cost and quality of care; that they
	that was Senate Bill Number 1114, as amended. We also		often fail to achieve their fundamental goals and may
	provided a copy of a statement which was prepared and	1	paradoxically exert adverse effects on budgets,
	Page 154	+	Page 156
ſ 1	presented by the New York Public Advocate, Mark Green,	1	patients, doctors and pharmacists. Taken together,
2	who, incidentally, had conducted, just prior to last	1	these studies show that although drug costs in the
3	year's legislative session, a six-month long	3	restrictive category were often decreased, the
	investigation in the State of New York on the practice	4	predominant effects of restriction were to shift costs
5	of drug switching. His Staff had gone out into	ł	by increasing utilization of either nonrestricted
1	pharmacies and into doctors' offices, and had looked	6	drugs or other health care services. None of the
1	at documents provided by managed care organizations.	7	
	Having conducted this six-month long study, prepared	8	restriction and reduced costs in other health service
4	an approximately 100-page report in which the New York	1	categories.
	Public Advocates Office denounced the practice of drug	10	In addition to that survey of the literature
	switching, and pointed out examples of, specific		which we've produced, which, by the way, included the
	examples of patients who had suffered harm from the		study which was conducted by Dr. Susan Horn that I
· ·	practice, pointed out concerns voiced by various	1	believe Dr. Blanchard referred to earlier, we produced
	health care provider and consumer groups, and also	14	
1	made recommendations for legislation, which were		an executive summary of that study. In addition to
	similar to what eventually became the language that		that, we produced a copy of a document which was some
117	· · · ·		50 or 60 pages in length. It was a document that was
	Patient Protection Act here in Virginia.		prepared by the California State Senate Committee on
19	Mr. Green, and by the way, we also included a		Insurance. That Committee is chaired by Senator
	copy of that six-month-long study, as well as an		Herschel Rosenthal. That Committee has had hearings
Γ,	executive summary of the study. Mr. Green's statement		and the Staffers from that Committee, I have talked
	was included. These were his comments that he		with them, have conducted an investigation, which I
123	presented to the House Committee on Health, Welfare		believe is ongoing, into the practice of drug
	and Institutions during last year's General Assembly		switching and the use of restrictive drug
	session.		formularies. That document contains a number of

;

	Page 157		Page 159		
1	statements by various health care provider	1	coalition of health care providers and consumer groups		
2	associations, consumer groups, and others concerned	2	in Maryland and D.C. are also currently considering,		
3	with the potential harm and actual harm caused by drug	3	and at least, at this point, favorably considering		
	switching practices. That has been provided to the	1	Bills which have wording which are identical to the		
	study committee, as well.	1	Virginia Anti-Drug Switching Patient Protection Act,		
6			which was introduced in Virginia last year.		
7		7	I belief that is everything that we have		
	These were simply statements which were prepared last	1	produced to the Task Force to date. We do have some		
1	General Assembly session in an effort to try to		other documents which we're accumulating, including		
	summarize some of the arguments on the side of those	1	the legislation, which we would like to continue to		
1	who supported the Virginia Anti-Drug Switching Patient		offer to the Task Force. And, as we discover other		
	Protection Act. I asked Dr. Pyles whether he was		items, we would also like to be able to supplement		
	interested in those, and he said he was interested in	1	that, from time to time, if we could. I believe that		
		1	that is it.		
	any information that we had on the subject, and so I				
1	gave him those. There were also some documents which	15	CHAIRMAN TEEFEY: Do you have any, Mike?		
	were used to attempt to dispel some of the myths and	16	MR. AYOTTE: I guess I want to piggyback on		
1	some of the confusion that I think surrounded the Bill		Senator Newman's comment earlier about where we stick		
	and what it did, what it did, in fact, do or would		on information concerning therapeutic interchange and		
- P	have, in fact, done had it been enacted into law.	1	not formulating utilization and not switching. I		
20			mean, I really want to stay focused on that one		
	be interested in various articles related to this	21	terminology.		
	subject which have appeared both in Virginia State,	22	The other thing is, can we, when I spoke the		
	local Richmond and even other state's publications and	23	last time and that's on Page 29 of the transcript, we		
	in national publications, both trade press articles	24	were talking about cost factors and how there were		
25	specific to the pharmaceutical industry, articles that	25	some statements made about increase in costs, and you		
	Page 158		Page 160		
1	are a little broader in the sense that they would be	1	stated that, in fact, I see ample evidence that will		
	classified, I think, as health care articles, in	1	decrease costs in the overall health care plan. So,		
	general, and not necessarily related, specifically, to	3	in my view, passing the Bill would decrease costs, not		
1	the pharmaceutical industry, and then articles that	1	increase costs. Is there any evidence that you can		
	appeared in the more popular press such as the Wall		show or any studies that you have that you would be		
1	Street Journal, the New York Times, transcripts of		able to provide us?		
	programs that appeared in the CBS evening news, CNN	7	MR. MCARTHUR: I may not have understood your		
	and the like. In these articles, there are quotes from	1	question. Did you say, are there studies to show that		
1	various interested parties in the issue of drug		there would be an increase in overall health care		
1	switching. And, more interesting to me, I think,		costs as a result of therapeutic interchange?		
	there are some accounts of consumers who have been	11	MR. AYOTTE: You stated on Page 29 that you		
	affected by the practice of drug switching. What we	1	had evidence that it would decrease costs by passing		
		1	that Bill.		
1	have not produced and which we intend to produce very				
	quickly, and I apologize that we haven't yet gotten this to the Tank Form is all of the legislation that	14	MR. McARTHUR: Oh, yes. Well, I think what		
1	this to the Task Force, is all of the legislation that		that is, is the corollary to the fact that there are		
1	we could find that we think is, either has been	1	studies that show that the practice increases costs.		
	considered, in some cases enacted, or is currently	ł	Logic would dictate that, if you end the practice,		
1	being considered in other states. I would say that we	1	then, that those costs would decrease.		
	have, in the California Senate Committee on Insurance,	19	MR. AYOTTE: There's no hard studies or facts		
1	1	t	that show that?		
		21	MR. MCARTHUR: Not to my personal knowledge,		
,	is a Bill being considered in New York, which is	ł	no.		
	5	23	CHAIRMAN TEEFEY: Yes.		
24	also understand, because I've called and checked on	24	DR. KNAPP: I think you brought up a point		
	this, and spoken with some folks last week, that a	j	that needs to be clarified. What pharmacy practices do

1	appropriate action.	1	article that dates back to 1975, some 22 years old
``	The questions, some of the questions that	2	now, and it applies to generic drug substitution. So,
	were asked at that Board meeting, as I recall, had to	3	and I say that, not at all to be critical, because I'm
4	do with the adequacy of disclosure, and whether the	4	not being critical. I say that in the sense that, as
	spirit that is embodied in the disclosure requirement	5	Senator Newman said, we need to look at all of this
6	in this regulation was being honored. And, so, I think	6	material carefully, look at the date of it, see if
	that it may be necessary for the Attorney General to		there's been any new material since then, and, if
8	state what its position is on the current regulations,	8	there are studies, who funded the studies, for
9	rather than all of us speculating as to whether the	9	example, and what the quality of those studies is.
	Board does or doesn't have power. Because, if the	10	
	Board has power to regulate appropriately, then, to		materials. Believe me, we have plenty if you want
	Ayotte's question, why are we here? I haven't figured		them, and they all relate to Senate Bill 1114. My
13	that one out yet.		understanding is, I would hope that this Task Force,
14	CHAIRMAN TEEFEY: Okay. We will get a I	1	as I suggested last time, starting from a clean slate,
	will get with you-all and we'll see if we can't		and that that piece of legislation, which did not pass
ŧ.	We'll get a clarification.	16	the General Assembly, is not going to be used as a
17		17	1 0
	clarify that, too, I think there was also some	1	why I have not included any lobbying materials in
	confusion about the dollars that we talked about, the		there, and I don't intend to, unless you ask me to.
	\$12 that you keep hearing, and whether or not that	20	Very briefly, since you have not had a chance
	was, in fact, payment for service provided to the		to review this material prior to the meeting, I will
	patient or whether or not, in fact, that was payment	22	just quickly go through and tell you what's here.
	for completing a drug switch. And I see those as two	23	I have divided it into, if you look at the
24	separate entities, too, and I think there was some	1	Table of Contents, into five different sections. The
	confusion as to whether or not those were two separate	25	first section is, are documents, basic definitions and
	Page 170		Page 172
1	entities.	1	explanations of drug formularies, the ways that they
2	CHAIRMAN TEEFEY: Okay. Mr. Rosenthal?	2	should be properly used, and therapeutic interchange.
3	Steve kind of misunderstood what we talked	3	Probably the most important section is the next
	about last time, and he's brought his information in	4	section which is Therapeutic Interchange/Clinical
5	today and we'll have it to all by tomorrow.	5	Research.
6	MR. ROSENTHAL: yes. I apologize. There was	6	Note importantly that none of this research
7	some conversation subsequent to the last meeting in	7	is older than a year. All of this is since, I believe,
8	which I thought there was a different plan of action	8	the summer of, Well, since September of 1996. So,
9	and so I apologize for not getting this material to	9	this is all current literature. What most of these
10	you earlier. However, I'm confident that the quality	10	are, are actual tests that were done on therapeutic
11	of material will more than offset my transgression.	11	substitutions and what the results were. And I ask you
12	I also apologize, having walked in and seeing	12	to look at those carefully, because, number one, you
13	that you have notebooks in front of you, I apologize	13	will see how seriously these tests are taken and the
14	for putting these in notebooks. I probably should have	14	depth with which the researchers go, to which the
15	just stapled them altogether with holes. But, be that	15	researchers go. And they are done by pharmacists,
16	as it may.	16	PhDs. Two of them are from universities, schools of
17	Let me, while he's passing those out, I would	17	pharmacy and schools of medicine. The last one is from
	like to pick up on a comment that Senator Newman made,	18	Creighton University, both the School of Pharmacy and
19	and I believe some others at the end of the desk over	19	the School of Medicine. I'm referring now to Tabs 5
20	here made about the literature review and combing	20	through 8.
	through carefully how much weight should be put on	21	What these show are two things. One is, the
	some of these things.	22	first question they always ask, and the overall
		1	
23	I notice, for example, I couldn't help, since	23	question of value, is, what is the value the patient,
23	I notice, for example, I couldn't help, since I'm a lawyer, I couldn't help noticing that under the	1	question of value, is, what is the value the patient, which I think we all agree is the most important

HJR 630 **CondenseIt**<sup>™</sup> Page 173 Page 175 1 drugs, that there were the same or better outcomes 1 comments were referenced and what they found. You 2 from switching, number one, and, number two, 2 will find at Tab 14 an exhaustive analysis and 3 significant cost savings, which is the second value 3 criticism of the study done by Mark Green, almost a 4 issue. In one study, the savings, without any overall 4 line by line analysis and the defects in that study. 5 adverse outcomes, savings of over a quarter of a 5 Everything from the monolene to the results. While I 6 million dollars over a two-year period. These numbers 6 discussed the inadequacies last time of the Money 7 take into account, by the way, something that Mr. 7 Magazine article, there is another article in the 8 McArthur mentioned to you at the last meeting, which I 8 fifth section of Tab 16 about how unfair that article 9 think is important, and that is the components of 9 was. 10 health care costs. 10 I would hope that my example to you last time 11 Mr. McArthur stated to you that while you may 11 showed how poorly done and how unfair and also the 12 reduce costs in one component area, you may increase 12 comments by Dr. Hadley, who had spoken with the 13 in cost in another component area or component areas. 13 physician involved in that case, how poorly and unfair 14 For example, if a person doesn't do well on a 14 that article was done. 15 medication, having been put on that after taking the 15 With that, we will continue to rummage the 16 first medication, the person may end up in the 16 record, see what we can find to try to be helpful, and 17 emergency room, which is ultimately going to cost more 17 I hope this material is helpful to you, and I will get 18 than if they had stayed on the first medication. And, 18 with the Chairman and find an appropriate time to have 19 therefore, the total health care costs rise because of 19 Dr. Curtis address you. 20 that switch. 20 CHAIRMAN TEEFEY: Are there any questions? 21 What you will find here is that these studies 21 22 do look at the component parts of health care costs, 22 NOTE: (No response.) 23 and they quantify those and they show, again, after 23 24 finding value to the patient, they find significant CHAIRMAN TEEFEY: There was some discussion at 24 25 cost savings. So I ask you to look at those with the 25 the break that we didn't have the complete Horn Page 174 Page 176 1 same critical eye that I mentioned earlier and the 1 study. Is this true? 2 same critical eye that Senator Newman suggested. Look DR. BLANCHARD: That's correct. At least, the 3 at who's doing the study, how it was funded, and the 3 packet of material that I received did not include 4 parameters within which the study was done. 4 much of the information that Ken McArthur suggested 5 The third section is responses to the Horn 5 was sent in. Obviously, that included that study. 6 study. At the risk of being redundant and picking up CHAIRMAN TEEFEY: Ken, did you get a copy of 6 7 on Dr. Blanchard's comment, how seriously you should 7 the complete study? 8 take that study, I think, is well reflected in Tabs 9 8 MR. MCARTHUR: Yes, sir. 9 through 13. I will not tell you what, I will not go 9 I think Dr. Pyles said he was going to 10 through in detail what those responses to that study 10 rectify whatever wasn't sent out. 11 say. But, what you will find is it has been roundly 11 DR. PYLES: It's a voluminous amount of 12 criticized as poorly modeled, extremely superficial, 12 material, so we'll do the best we can. 13 with absolutely no correlation between the results 13 Mr. Chairman? 14 that were purported and the basis for those. In other 14 CHAIRMAN TEEFEY: Yes, sir. 15 words, there is no causal connection between an 15 MR. AYOTTE: One of the things, and I know you 16 alleged switch and the results that they report. 16 will probably get to it, just to get the information, 17 That's what those responses are going to say. 17 if this is all that's out there now from both sides of 18 Now, two of those articles are by a PhD, 18 the issue, that's great. But, if there is sometime 19 Frederick Curtis. We will present to you, at the 19 where we could get it and have time to review it, and 20 appropriate time, at the appropriate meeting, Mr. 20 I know we have limited meetings left to make a 21 Curtis, who is from Texas. We will bring him up here 21 decision, it just seems to continue to gather 22 so that you will have the benefit of discussing this 22 information and getting this stuff the day of the 23 issue directly with him. 23 meeting, I find it very difficult to absorb it. So, 24 The fourth section and earlier Mr. Green's. 24 if we can get that in advance, it would be very 25 Mark Green, the New York City Public Advocate, his 25 helpful.

	Page 177		Page 1
1	CHAIRMAN TEEFEY: It's 12:30 right now, and I	1	statement; that's the starting point. We need to
?		1	circulate something that all of you would be
	this switching is bad, if I don't have them out of	1	comfortable having your names attached to as this is
4	here by 12:30, about the switching I'm going to get.		whatever it is. This is therapeutic substitution
5	So, we have a couple other things on the	5	therapeutic interchange. And, Mr. Chair, if it was
6	Agenda, and we might have to bypass those. But, I have	6	all right with you, I was going to suggest that, if we
7	one important question. I need to know what the Task	7	could get a couple of people, maybe a subcommittee,
8	Force needs, and what they want to do in our next	8	two or three, to work with me to develop that
9	meeting. I think that's very important that we come to	9	statement and circulate it, and then, from there, we
0	this point right now. If we could just go through and	10	could begin talking about how we can look at impact
1	if you have some suggestions, what you need in the	11	and also what other speakers we need to bring in to
2	next Task Force. One other thing, I would like to	12	help us.
	bring speakers in from the different associations:	13	CHAIRMAN TEEFEY: All right. That would be
4	Pharmaceutical Association, the Medical Society, et	14	fine. But, I think I have been hearing it from a
	cetera, to give some testimony and probably take up	15	couple of people that we are talking about therapeutic
	Mr. Rosenthal on his offer to bring that person in.	1	interchange.
7	DR. PYLES: Mr. Chair, if I could just	17	DR. PYLES: Okay.
B	interject one second before they tell us what their	18	CHAIRMAN TEEFEY: That we are not talking
	needs are. Could I just bring us up-to-date in terms	1	about switching.
	of what I foresee in terms of getting to the final	20	
	report, and then we can hear what their needs are. Is	21	CHAIRMAN TEEFEY: We are talking about
	that all right? It will just take about a second.	22	
)	CHAIRMAN TEEFEY: That's great.	23	DR. PYLES: Okay.
ļ	DR. PYLES: As you-all are aware, one of the	24	CHAIRMAN TEEFEY: And I think that's the
	things that we need to do in the report that we have	1	starting point.
	Page 178	+	Page 1
	to prepare is to make a statement about therapeutic	1	DR. PYLES: That's the starting point.
	substitution or therapeutic interchange, and I think	2	CHAIRMAN TEEFEY: What we'll do is maybe get
	we have pretty much, and, again, as you speak, you can	1	four people, five people, on the Committee here and
	address this. I believe that we pretty much have		we'll give you-all a call and set up a conference call
	decided that we're not, in that report, and consistent		with some of them.
	• • •	i	DR. PYLES: With a statement that
	with the resolution, that we're not talking about drug	6	
	switching here, but we're looking at the impact of	7	CHAIRMAN TEEFEY: with a statement
	therapeutic substitution and interchange. But,	8	DR. PYLES: Right.
	because of the fact that these terms are often used	9	CHAIRMAN TEEFEY: -within the next week, so
	interchangeably, I think that one of the things that	1	we can send it out before the next meeting and
	we need to do pretty quickly, if we're going to move		everybody will have it.
	along here, is we do need a statement, a consensus	12	Go ahead, Dr. Blanchard.
	statement at this point, from the Task Force in terms	13	DR. BLANCHARD: Mr. Chairman, I'm not sure
	of what it is we are talking about. Something that we		exactly where to start on suggestions on how we move
	can all live with, that summarizes the issue, and I		forward in the future. You made a comment at the first
	think that's absolutely essential, Mr. Chair, before		meeting, that I didn't hear anybody object to, that
	we can move on to addressing the issue of impact.		you have a lot of busy people on this committee that
	Because, if one group or a couple of people are		have voluntarily given up their time to come in and
	talking about one thing, apples, and another group is		try to make the right sort of decisions; that we
1	talking about oranges, we can't really talk about	1	already, that we agreed that we needed to do a lot of
	npact.		homework, and we were willing to do the reading
	So, I think that's one of the real key things	22	necessary to take care of these problems. And, without
	• -		
•	that we need to do. And, in the interest of time,	23	sounding disrespectful to people who make
	· -	1	presentations of written documents and knowing that

H	IR 630 Conde	ns:	eIt <sup>™</sup>
Ī	Page 181	1	Page 183
1	months to think about this process, I'm a little	1	DR. KNAPP: I think we do need to hear from
	concerned by the fact that we didn't have all the data	2	the AG's office one way or the other.
	available from both sides way in advance of this	3	CHAIRMAN TEEFEY: All right. I will get with
	meeting.	4	the Board and we'll hook up with you and get Casway
5			and find out what the situation is.
6	documents at home, had a chance to think about them	6	CHAIRMAN TEEFEY: Yes, sir.
	and come in and ask pointed questions of those people	7	MR. AYOTTE: I think if you're going to have
	so that we can clarify the issues. Just as a starting	8	speakers come at any point, and I agree with Dr.
	point, I might suggest, then, that we request and		Blanchard, I'm not sure at this point we haven't heard
	expect that any interested parties that have		pretty much all the argument. If they were going to
	information related to our Task Force agenda provide	1	submit something, that they could go through the
	that information to Mr. Pyles no later than, say, next	1	Committee first and either give them their comments
	Wednesday afternoon and that information submitted		I just, when you look at the sheet, it just concerns
	after that be accepted with prejudice, unless we		me, because the first meeting we talked so much about
	honestly feel it is newly-discovered information.		facts, and that, to me, hasn't happened.
16	•	16	CHAIRMAN TEEFEY: Okay. Good. Do you have
	requesting information about 12 or 15 different	17	-
	practices within the concept of therapeutic	18	SENATOR NEWMAN: I'm glad what was mentioned
	interchange, and would hope, and I will be glad to		carlier was mentioned. I had written down "multiple
	resubmit that letter if you didn't get it. I don't		problems/multiple cures." As we talk along, I'm
	have documentation that you got it, but those items		identifying, for instance, things like the problem of
	are the areas that I felt were of potential concern		out-of-state vendors not going through the Board of
	within that topic. And I would hope that if people on		Pharmacy and these other things which are passing by,
	this subcommittee, this Committee, have requested that		which I see as solvable problems. Unless there is
	sort of information, that we would get responses to	1	some problem in the U.S. Constitution and the Commerce
-	Page 182		Page 1
1	that prior to the meeting.	Ι,	Clause or something, I think we should be able to
2	Then, when we come to the meeting, then we		solve some of these problems. And, I'm wondering if
1 -	can talk among ourselves in a way to try to assess	1	what has been done on the other end of the table might
4	where we should come down on these issues. I'm not		be done by some of us, but maybe, more importantly, by
5	sure we all need to hear from a lot more speakers and,		the opponents/proponents here where they can present
	in particular, Mr. Rosenthal's suggestion that we		the multitude of problems. The large issue of drug
	might hear from somebody rebutting Dr. Horn's study, I		switching has many aspects to it that can be broken
	would think you would have to have Dr. Horn here, as	i .	down. And, if we can break them down, then we may
	well. So, this could go on and on forever listening	1	pick A, B and C, but we may not pick the rest.
	to lawyer-type presentations.	10	We may be able to cure those and the rest we
11	I think we're very smart people on this	1	may not be able to cure, and I'm wondering if we
5	Committee. I think we ought to be able to do the		cannot get from them the number of problems that exist
F	business of this Committee in fairly short order if we	1	and then what their cures are and maybe hear from the
1	can decide what it is we want to do and decide that		other side on what their cures are and maybe
•	this is the data that we're going to deal with. And,		collectively we can come up with some cures, as well,
1	from that point on, it's up to our brains to make		and maybe even put some of them to bed quickly.
	those decisions.	17	For instance, maybe we can ask that
18	CHAIRMAN TEEFEY: All right. That's a good	1	legislation be drafted that requires everyone to go
•	idea. And, if anybody wants to submit any materials,	I	through the Board of Pharmacy if they're going to
1	we have to have them by next Wednesday so we can get		practice in Virginia, if we agree on that and, if
	them to the Committee. Then, I think the next thing	1	that's wrong, then we can build on that information,
	that you expressed, we'll take those, that list that		and Staff has done such a great job. But if that's a
	you sent us, and we'll start working, the letter that	1	possibility of organization, that would help the guy
	you sent us, and we it start working, the retter that you sent, we'll work with that letter.	ļ.	who is not a doctor on this Committee.
25	Yes, ma'am.	25	CHAIRMAN TEEFEY: well, I think we have heard

[2]	DEPARTMENT OF MEDICAL ASSISTANCE	1	MR. TEEFEY: I'd like to thank
[3]	DEFARTMENT OF MEDICAL ASSISTANCE	[2]	everyone for coming out on this nice rainy
		[3]	morning. And I want to thank Howard and Scotti
[4] [5]	IN DE. HID (20 SPECIAL TASK FORCE	[4]	for being here. They're with the Pharmacy Board.
[6]	IN RE: HJR 630 SPECIAL TASK FORCE	[5]	We talked to them numerous times on the phone
[7]		[6]	during the month.
[8]		[7]	We went into the minutes and
[9]		[8]	took the questions that were asked at the last
	Massing of the Securial Task Force hald on	[9]	meeting and we reviewed those questions. Scotti
[10] [11]	Meeting of the Special Task Force held on	[10]	and Howard will help us answer some of these
[11]	August 20, 1997, General Assembly Building,	[11]	questions.
	House Room D, at 8:30 a.m.	[12]	Mike, do you want to go over
[13]		[13]	the materials and update?
[14]		[14]	DR. PILES: Yes, sir.
[15]	· · · · ·	[15]	Good morning. You did receive
[16]		[16]	quite a bit of material since our last meeting.
[17]		[17]	I wanted to make sure you all got a copy of the
[18]		[18]	letter that one of our Task Force members wrote,
[19]		[19]	Larry Blanchard; also, the transcript from the
[20]	CDANE SHEAD & ASSOCIATES INC	[20]	last meeting. I noticed there was a missing
[21]	CRANE-SNEAD & ASSOCIATES, INC. 4914 Fitzhugh Avenue Richmond, Virginia 23230	[21]	page, which I have placed at each of your desks
[22]	Richmond, Virginia 23230 (804) 355-4335	[22]	there. One single page representing 33 through
[23]		[23]	36 of that transcript. That missing page is
[24]		[24]	there.
[25]	·	[25]	We have also been working to

It's not in one location. I made several phone calls and may be on to something. It's kind of difficult to estimate. But we have been working on that. I have spoken to someone with the Bureau of Insurance at the State Corporation Commission. I think I'm getting to a point where I can come up, at least, with numbers in terms of how many Virginians are covered by prescription-benefit plans, so we might have an idea of, looking at impact, how they might be affected by that. Also, since our last meeting, you will hear some of this information today later, but I have included a copy of materials that we received from Scotti Russell from the Virginia Board of Pharmacy. She is the Executive	[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21]	MR. TEEFEY: We polled the Committee There were some requests by both sides to bring in speakers. And we polled the Committee. I think Dr. Blanchard last time worded it extremely well that we heard enough from outsiders that we wanted to get the Committee and get this thing on the road. We are not going to have any speakers from outside come in, but we do have a public comment period. Mary wants to speak during the public comment period. I would like you to hold the comments to two or three minutes. MS. ROULEAU: Good morning, everyone. My name is Mary Rouleau. I represent Arlington, Virginia. I'm also representing the Consumer Federation of America. We're a federation of about 240 nationwide organizations providing membership of about 15 million people. CFA has been active on this drug switching issue. A week ago we held a press

Page	5	Page	6
[1]	press conference is because we think virtually	[1]	of the findings. Of the physicians surveyed, he
[2]	none of the public and very, very few lawmakers	[2]	found that 83 percent of physicians are contacted
	are aware of either the industry's structure of	[3]	by health care and pharmacists to changeto
F]	the pharmaceutical benefit manager industry	[4]	perform a drug switch, and 76 percent of
rt 5]	and/or the implications of drug switching.	[5]	physicians believe that a plan's use of
[6]	We have been involved for a	[6]	therapeutic interchange significantly diminishes
[7]	couple of years in front of the Federal Trade	[7]	or diminishes the quality of care. 57 percent of
[8]	Commission, Food and Drug Administration, and now	[8]	the physicians responding reported that patients
[9]	we're taking our case to the Congress.	[9]	had problems after the prescription was switched.
[10]	We obviously have some very	[10]	Mark Green's office also
[11]	important anti-trust considerations associated	[11]	surveyed pharmacists in the New York City area.
[12]	with the vertical integration of this industry.	[12]	74 percent believed that substitutions diminished
[13]	But the major thrust of our press conferenceour	[13]	the quality of medical care. 79 percent are
[14]	major concernis the impact of drug switching on	[14]	somewhat uncomfortable making drug substitutions.
[15]	the quality of care for patients. We believe in	[15]	This I find troubling: Almost
[16]	some patients it presents very serious risks.	[16]	half of the pharmacists responding believe that
[17]	I gave to Mr. Teefey's	[17]	by not cooperating sufficiently with the plan
[18]	assistant here a packet of my material to give to	[18]	substitution request, they will be penalized
[19]	you all.	[19]	either by being audited or dropped from the
[20]	Suffice it say that the	[20]	network.
[21]	cornerstone of our press conference last week was	[21]	Many pharmacists also
[22]	a report from Mark Green's office. He had done a	[22]	testified at about four field hearings that they
[23]	survey of pharmacists and physicians in the state	[23]	had in New York State on this issue, and several
[24]	of New York, and it's in the material.	[24]	had to do it anonymously because they were afraid
[25]	I just want to highlight a few	[25]	of retaliation. You'll find it in the material.

Personally, I've had calls from the Pharmacy Board, a pharmacist and a patient all expressing their concern about these practices, and, basically, we are glad you're up front trying to do something. We're very concerned. I've given you a few facts and there's more in the materials. But I already know what the response is going to be from folks	<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21]</pre>	Well, I have a couple of responses to that. First of all, how would you feel if the antidote was your mother or your daughter? I think we need to personalize these issues because these are happening to real people. Secondly, I find extremely troubling, is that this whole exercise is really premised upon the antidote that drug switching contains health care costs in a way that does not diminish quality. This is what the PBM industry says and it's about time they proved it. Make a mistake and the burden of proof is on the Industry, not on the patients or health care providers. The Industry is going to have to stop using the tired claim that this is proprietary data and can't give up certain information that people could use to quantify these claims. The government and private studies that I've reviewed, and I'm sure you all have them in your materials, suggest that the

[1]	oversight. It's not just the PBM.	[1]	the way, about how she thought it was a rubber
[2]	Our particular concern, CFA's,	[2]	stamp.
[r3]	on the PBM issue is that an industry that started	[3]	Yes, absolutely. Putting the
-,	looking one way in 1990 looks very different in	[4]	word independent in a statute, frankly means
1:0]	1997 because of drug integration. We think you	[5]	nothing unless someone provides that oversight.
[6]	cannot separate the two out. So we have some	[6]	What the Roosevelt BillCalifornia bill and it's
[7]	very compelling arguments to make about industry	[7]	in your materials, requireswould require these
[8]	structure. But that doesn't necessarily address	[8]	PMT committees to make their notes public.
[9]	the subject of quality of care.	[9]	This is since the Department
[10]	MR, AYOTTE: One of the issues	[10]	of Insurance oversees this stuff in California.
[11]	of the PMT Committee is, did you recommend	[11]	The Department of Insurance would be able to look
[12]	independence for PBM?	[12]	and see that these are independent bodies making
[13]	MS. ROULEAU: Absolutely.	[13]	independent decisions. It's an oversight
[14]	MR. AYOTTE: Wasn't that part	[14]	question, I think, is where the problem is, not
[15]	of the PCS and Federal Trade Commission consent	[15]	the language.
[16]	agreement?	[16]	MR. TEEFEY: Thank you.
[17]	MS. ROULEAU: It sure was.	[17]	MS. ROULEAU: Thank you for
[18]	But the question is are they effective. That is	[18]	your time.
[19]	the \$64,000 question. It's clearly built in the	[19]	MR. TEEFEY: Are there any
[20]	consent agreement. But the issue is, are they	[20]	other speakers?
[21]	really independent.	[21]	We had a lot of very good
[22]	I don't know if you all saw	[22]	questions asked of our member of the Task Force
[23]	the Money magazine article a few months ago.	[23]	with the Pharmacy Board last time. We went back
[24]	That was just impressed upon me. A statement of	[24]	to the minutes and pulled these questions out and
[25]	one doctor, who happened to be from Virginia by	[25]	Howard Casway and Scotti Russell were kind enough
·	15	Page	
1 [ 1]	to come today to answer those questions. We had	[1]	The regulation reads: A
[2]	talked to Scotti and Howard a number of times on	[2]	permit holder or a register requesting a change
[3]	the phone. I think a lot of answers will be		perme notice of a register requesting a change

In October of that year the Attorney General of 17 states, including North Carolina, entered into a settlement agreement with Merck & Company and prescription drug benefit management subsidiary, Medco Containment Services. The agreement recognizes Medco's practice of contacting prescribers that request changes of prescriptions from non-Merck drugs to Merck drugs. Payments were made by Merck Medco to each state in the amount of \$115,000. The Medco practice was not
[5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [20] [23]	given by them today. Michael, review the questions and Howard and Scotti can help us with this. MR. WORTHINGTON: Task Force members, as Mr. Teefey indicated I got on the telephone with Mr. Casway and Scotti Russell, Executive Director of the Board of Pharmacy, earlier this week. Dr. Piles and I did. We had previously gone over the transcript and looked through for the questions you had asked regarding legality issues surrounding that. I pulled four or five of them out of there. And I would like to summarize Mr. Casway's and Ms. Russell's responses. If we need further clarification, they are here. The first question I found is: What has been done in other states to address therapeutic interchange or substitution? North Carolina recently passed a regulation requiring full disclosure if a	<pre>[4] [5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21] [22] [23]</pre>	to a different prescription drug, shall disclose to the prescriber at the time of the request any business relationship between the permit holder or the register and the manufacturer of the requested prescription drug. This action was a result of a settlement agreement in 1995. In October of that year the Attorney General of 17 states, including North Carolina, entered into a settlement agreement with Merck & Company and prescription drug benefit management subsidiary, Medco Containment Services. The agreement recognizes Medco's practice of contacting prescribers that request changes of prescriptions from non-Merck drugs to Merck drugs. Payments were made by Merck Medco to each state in the amount of \$115,000. The Medco practice was not prohibited. But Medco employees requesting a

[7] June. So it was a little late for us to actually [7] the time of last year, this was never adopted by	
[8] submit something as proposed legislation. [8] the Board of Pharmacy as something they wanted	
	to
[9] We just offered this to the [9] put forward.	
[10] staff of Legislative Services in terms of [10] MS. PIGG: Where I'm going is	
[11] technical assistance if they wanted to use it. [11] if the staff of the Board of Pharmacy felt it was	
[12] They elected not to. It was offered as a [12] within their purview of the practice of pharmacy	
[13] possible alternative, but it was not used. [13] to submit language even addressing this issue, is	
[14] MS. PIGG: Do you know why [14] that best where we put this, back to the Board of	
[15] they elected not to use it? [15] Pharmacy as opposed to legilsative efforts?	
[16] MS. RUSSELL: I assume the [16] MS. RUSSELL: The problem is	I
[17] patron Butch Davie preferred to put in [17] don't think the Board of Pharmacy has the	
[18] Mr. Durrett's bill instead. [18] statutory authority right now to deal with this	
[19] MS. PIGG: Help me understand [19] issue in regulation.	
[20] the technical piece of this. The Board of [20] Maybe Howard can address some	
[21] Pharmacy felt that it affected therapeutic [21] of the problems we might have with restraint of	
[22] interchange or that issue that affected the [22] trade if we try to do something in regulation	
[23] practice of pharmacy, so you submitted [23] versus having some statutory authority	
[24] legislationlanguage to deal with that. [24] specifically designed to deal with this problem.	
[25] MS. RUSSELL: Let me correct [25] MR. CASWAY: What we attem	oted
Page 27 Page 28	• .
[1] to do The problem was brought up to the Board [1] scope of the practice of pharmacy, to include	
[2] in the concept of The PCS program was brought [2] this kind of practice and then to expand as the	
[3] to the Board and there was a fair amount of [3] result who had to register.	
[4] discussion and communication. And actually [4] Because pharmacists right now,	
[5] representatives from PCS came to the Board [5] as Ms. Russell indicated before, non-resident	
[6] meeting prior to this November drafting of this. [6] pharmacies have to register with the Board. What	t
[7] The Board was aware of what the problem was and [7] we tried to do is expand that to include	
[8] we discussed some of the various things this [8] PBMswhat essentially would be a PBM. That	
[9] committee is looking at. [9] includes the practice of pharmacy. We expanded.	
[10] The problem that was clear, [10] I think the three things that	
	,
[11] and as I stated before, the Board of Pharmacy [11] we did was expand the practice of pharmacy; also

	to any Virginia citizen, to do so only in	[1]	over that and that would be illegal.
[2]	association with a non-resident pharmacy.	[2]	MS. RUSSELL: Absolutely.
[ 3]	What we attempted to do is	[3]	DR. HADLEY: Secondly then,
<u>ر</u> ،	take the problem and bring it in clearly,	[4]	how about clarifying again I understand the
1.5]	statutorily within the control and regulation of	[5]	PBMs are an issue. But for a pharmacist or a
[6]	the Virginia Board of Pharmacy.	[6]	mail order pharmacy outside the state of Virginia
[7]	MS. RUSSELL: Also, we	[7]	if they are registered with you, do you have that
[8]	expanded the non-resident pharmacy to make them	[8]	same level of control?
[9]	have to comply with the laws and regulations of	[9]	If they make a therapeutic
[10]	Virginia, not just their resident state.	[10]	substitution without consulting the physician, do
[11]	MS. PIGG: It sounds like that	[11]	you have any ability, regardless of the reason,
[12]	process was started but never completed.	[12]	to discipline them?
[13]	MR. CASWAY: It was sort of,	[13]	MS. RUSSELL: No. It's a
[14]	we through our hat into the ring and	[14]	non-resident pharmacy outside of Virginia.
[15]	MS. RUSSELL:it didn't get	[15]	DR. HADLEY: But they're
[16]	picked up.	[16]	registered with you.
[17]	MS. PIGG: Okay.	[17]	MS. RUSSELL: The only thing
[18]	DR. HADLEY: Can I just get	[18]	we could potentially do is, in theory, I suppose,
[19]	some clarification? If we have a pharmacist who	[19]	revoke or suspend their registration as a
[20]	is registered with the Board in the state of	[20]	non- resident pharmacy. But do we have grounds to
[21]	Virginia, who makes a therapeutic substitution	[21]	do that if the law says all they have to do is
[22]	for a chemically dissimilar drug without	[22]	comply with the rules and laws of the resident
[23]	consulting a physician, regardless of what the	[23]	state and if, in fact, their state permits that?
[24]	motivation is, whether financial gain or any	[24]	MR. CASWAY: Also, the
[25]	other reason, you currently have jurisdiction	[25]	question would be getting jurisdiction over them.

Would that be	
[5] [6] [7] [8] [10] [11] [12] [13] [14] [15] [16]	drug alternative. It might be appropriate for the patient to call the prescriber. I think we need to be careful with this so we don't prohibit activity that we think is okay and not unethical. I think in the language we originally submitted we said the section should not apply to drug substitution reducing the actual cost, co-payment or co-insurance percentage payment required for the prescription, or where the drug originally prescribed is not covered by the patient's health insurance plan.	[5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16]	the recommendation of a patient who comes in who has a headache, which one do I use? Which one is on sale? Do we transfer that same approach of sale items to our prescription medication, where the physician actually made a decision that drug A is what he or she wants, if the same pharmaceutical company came to the physician's office and offered me the same rebate along with coupons to hand to patients. Would that be perceived differently ethically? My contention is it would be. I'm having difficulty trying to assimilate all of	
[5] [6] [7] [8] [10] [11] [12] [13] [14] [15] [16] [17]	drug alternative. It might be appropriate for the patient to call the prescriber. I think we need to be careful with this so we don't prohibit activity that we think is okay and not unethical. I think in the language we originally submitted we said the section should not apply to drug substitution reducing the actual cost, co-payment or co-insurance percentage payment required for the prescription, or where the drug originally prescribed is not covered by the patient's health insurance plan. I'm not sure if that	[5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17]	the recommendation of a patient who comes in who has a headache, which one do I use? Which one is on sale? Do we transfer that same approach of sale items to our prescription medication, where the physician actually made a decision that drug A is what he or she wants, if the same pharmaceutical company came to the physician's office and offered me the same rebate along with coupons to hand to patients. Would that be perceived differently ethically? My contention is it would be. I'm having difficulty trying to assimilate all of this. If that's unethical, why isn't it the same	
[5] [6] [7] [8] [10] [11] [12] [13] [14] [15] [16] [17] [18]	drug alternative. It might be appropriate for the patient to call the prescriber. I think we need to be careful with this so we don't prohibit activity that we think is okay and not unethical. I think in the language we originally submitted we said the section should not apply to drug substitution reducing the actual cost, co-payment or co-insurance percentage payment required for the prescription, or where the drug originally prescribed is not covered by the patient's health insurance plan. I'm not sure if that completely covers it, but it's a start. I don't	[5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17] [18]	the recommendation of a patient who comes in who has a headache, which one do I use? Which one is on sale? Do we transfer that same approach of sale items to our prescription medication, where the physician actually made a decision that drug A is what he or she wants, if the same pharmaceutical company came to the physician's office and offered me the same rebate along with coupons to hand to patients. Would that be perceived differently ethically? My contention is it would be. I'm having difficulty trying to assimilate all of this. If that's unethical, why isn't it the same degree of unethical if the pharmaceutical company	
[5] [6] [7] [8] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19]	drug alternative. It might be appropriate for the patient to call the prescriber. I think we need to be careful with this so we don't prohibit activity that we think is okay and not unethical. I think in the language we originally submitted we said the section should not apply to drug substitution reducing the actual cost, co-payment or co-insurance percentage payment required for the prescription, or where the drug originally prescribed is not covered by the patient's health insurance plan. I'm not sure if that completely covers it, but it's a start. I don't think it's unethical in every case. You have to	[5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19]	the recommendation of a patient who comes in who has a headache, which one do I use? Which one is on sale? Do we transfer that same approach of sale items to our prescription medication, where the physician actually made a decision that drug A is what he or she wants, if the same pharmaceutical company came to the physician's office and offered me the same rebate along with coupons to hand to patients. Would that be perceived differently ethically? My contention is it would be. I'm having difficulty trying to assimilate all of this. If that's unethical, why isn't it the same degree of unethical if the pharmaceutical company pays my pharmacist to lobby on their behalf to	
[5] [6] [7] [8] [10] [11] [12] [13] [14] [15] [15] [16] [17] [18] [19] [20]	drug alternative. It might be appropriate for the patient to call the prescriber. I think we need to be careful with this so we don't prohibit activity that we think is okay and not unethical. I think in the language we originally submitted we said the section should not apply to drug substitution reducing the actual cost, co-payment or co-insurance percentage payment required for the prescription, or where the drug originally prescribed is not covered by the patient's health insurance plan. I'm not sure if that completely covers it, but it's a start. I don't think it's unethical in every case. You have to look at the individual circumstances.	[5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20]	the recommendation of a patient who comes in who has a headache, which one do I use? Which one is on sale? Do we transfer that same approach of sale items to our prescription medication, where the physician actually made a decision that drug A is what he or she wants, if the same pharmaceutical company came to the physician's office and offered me the same rebate along with coupons to hand to patients. Would that be perceived differently ethically? My contention is it would be. I'm having difficulty trying to assimilate all of this. If that's unethical, why isn't it the same degree of unethical if the pharmaceutical company pays my pharmacist to lobby on their behalf to the physician? Why is it not similarly unethical	
<pre>[5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21]</pre>	drug alternative. It might be appropriate for the patient to call the prescriber. 	45	Page	46
[1]	concept of trying to keep a competitive market	[1]	there. And if you did, your insurance premium
[2]	place. I understand the implications of keeping	[ 2]	would be Y instead.
[ 3]	open formularies out there.	[3]	The question is whether we
	But it's a perceptual problem	[4]	want to get into the widest base of formulary to
، [5]	and ethical problem for the physician and	[5]	be the bottom of the contract basis. I agree
[6]	pharmacist to engage in that sort of very	[6]	with part of what he says. But I also think that
[7]	intimate relationship with the pharmaceutical	[7]	the industry needs to be able to draw up those
[8]	companies, who obviously have incentive to get	[8]	contracts to keep health costs at a reasonable
[9]	their drug sold to the patient as opposed to	[9]	level, too.
[10]	their competitors' drug. Some of it doesn't	[10]	MS. RUSSELL: I don't have any
[11]	smell right.	[11]	answer for either, just a comment. I think that
[12]	And I agree with you. It's	[12]	if companies that contract with someone to manage
[13]	difficult to write legislation.	[13]	their health care benefits knew up front what
[14]	HON, NEWMAN: The other side	[14]	they were contracting for. I think that's
[15]	of it, of course, is what this side does like,	[15]	important. Again, it goes back to the issue of
[16]	that side doesn't like. The difference between a	[16]	full disclosure.
[17]	physician and a contract is that Blue Cross-Blue	[17]	Maybe if the physician knew
[18]	Shield, or whoever it is, is in business to keep	[18]	ahead of time that the patient could walk in with
[19]	those health care costs low.	[19]	a copy of the formulary with them, maybe the
[20]	They are not in the business	[20]	physician would prescribe that in the first
[21]	the same as the doctor is. They are there to say	[21]	place.
[22]	we want to make sure that a drug that will do the	[22]	I think a lot of the problem
[23]	same job that we are covering. We are covering	[23]	is you don't always know what drugs are on the
[24]	X, that's the contract you contracted with us to	[24]	formulary. I'm not sure if people contracting
[25]	get. You have not contracted for every drug out	[25]	with these PBMs actually know that.

[1]	perspective.	[1]	findings of the Horren study are validated, I
[2]	But if you look at the	[2]	think you can pretty well assume that HMOs and
[3]	questions they asked us or charged us with, we	[3]	others that run formularies are going to take
[4]	can't answer the question of how many Virginians	[4]	that into consideration. Since they are in the
[5]	this affects. We're how far into this and we	[5]	business of lowering costs, they are not going to
[6]	don't even know that basic number. How can we	[6]	do something that's against their basic charter.
[7]	possibly presume that we're going to able to	[7]	And just to try to follow
[8]	answer the majority of questions they charge us	[8]	troublemaker cost, which is what the Susan Marr
[9]	to answer? We very simply don't have the data.	[9]	
[10]	That seems to be one of the problems.	[10]	article is about, is very difficult and not an
[11]	DR. HADLEY: I would make the	[10]	easy thing to do. I don't think it's realistic
[12]	comment to that that I think it would be very	1 · ·	to say this committee will have that scientific
[12]	•	[12]	question answered. That's going to have to be
[13]	difficult for this Task Force to really answer	[13]	further litigated scientifically.
	the scientific question of are formularies cost	[14]	It seems to me that the basic
[15]	effective or not.	[15]	problem is one of jurisdiction. It sounds like
[16]	I mean, look at the	[16]	the Board of Pharmacy has adequate resources at
[17]	sophistication, the length of time and the	[17]	its hands to regulate the kinds of unethical
[18]	studies that went into the Horren (phonetic)	[18]	behavior that I think we all have a sense for,
[19]	study, which is a very provocative study.	[19]	where a pharmacist wants to make a switch where
[20]	I think it's not realistic for	[20]	it's not in the best interest of the patient, not
[21]	us to say that we're going to have that	[21]	consulting the physician, or doing it simply for
[22]	information. That's going to have to be	[22]	a kick back, which in and of itself has a
[23]	something that's going to have to be debated in	[23]	negative connotation.
[24]	scientific literature.	[24]	That's completely different
[25]	What I would say is if the	[25]	than organizations trying to structure health

There are issues here that If you will, the market place could change if they were willing to change. Many of these problems could be softened if the HMO industry would take a compassionate view, as they claim to, to put the patient first. That would	<ol> <li>[1]</li> <li>[2]</li> <li>[3]</li> <li>[4]</li> <li>[5]</li> <li>[6]</li> <li>[7]</li> <li>[8]</li> <li>[9]</li> <li>[10]</li> <li>[11]</li> <li>[12]</li> <li>[13]</li> <li>[14]</li> <li>[15]</li> <li>[16]</li> <li>[17]</li> <li>[18]</li> <li>[19]</li> <li>[20]</li> <li>[21]</li> <li>[22]</li> </ol>	me, as they do, with information why I should use drug A instead of drug B while I'm considering writing the prescription. But a whole different set of ethics are involved when I am faced with a request to change somebody when they are doing quite well. I see those as two separate problems that require two separate solutions. I would request that the Task Force continue to keep those two issues separated. I'm not sure all of that discussion we had earlier about out-of-state pharmacists and therapeutic substitutions without consulting a physician is particularly germane with what we are considering. Therapeutic substitution without consultation with a physician almost never occurs. The question we're talking about is therapeutic interchange when we do call. The question is why are they calling and how strongly should we listen to those requests to change somebody already on medication and already has a prescription written.

The purpose of the government is try to insure that those who don't follow the same good practice standards that you're suggesting everybody should emulate. Let me clarify that. The question that we asked was does your house plan have a protocol to grant exceptions where the patient is maintained on a non-formulary drug at the time the patient becomes a member of the plan. That's a grandfather rule. 30 percent said, no, they don't have a protocol, but 100 percent of those have a regular exception clause. So 100 percent
<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21] [22] [23]</pre>	the pharmacy. Again, I think there's room in the HMO industry for setting up criteria for good behavior, which would be a several hour turn around for simple drug request and the pressure to get more than 70 percent of the industry having a grandfather clause. Just as with whether it's drive through or out patient. A lot of the hassles of the industry in which I practice I practice with 30 percent of my business in HMOs. A lot of the public relations problems come about because of failure of the industry to recognize those public relations potential fiascoes and solve them before they reach this level of debate. I don't have any reason to be here other than to give my-don't want to call it antidotal, but my experience with having to make those phone calls. I explained to you today with one of my phone call and a quick approval. Whereas, my phone call	<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21] [22] [23]</pre>	there and awhile to get back. The reasons for denial are not ever stated. The reasons for inclusion of one drug in the formulary as opposed to another drug are not statedthe rationale. It's hard to phrase a letter that will fit the screen that somebody will read off on the computer. I concur with you. I saw the data in the information piece that a lot of HMOs handle this properly. The purpose of the government is try to insure that those who don't follow the same good practice standards that you're suggesting everybody should emulate. Let me clarify that. The question that we asked was does your house plan have a protocol to grant exceptions where the patient is maintained on a non-formulary drug at the time the patient becomes a member of the plan. That's a grandfather rule. 30 percent said, no, they don't have a protocol, but 100 percent of those have a regular exception clause. So 100 percent of HMOs in the state have a process, whether they

[ 1]	inhibitor. I think one of the other pharmacists	[1]	out. I'm sure what people are desiring is
[2]	said that perhaps the use of an ace inhibitor in	[2]	greater flexibility in controlling the asthma or
3]	place of a channel blocker may be a situation	[3]	whatever. I don't have any objection.
	that may be limited by this. What you're trying	[4]	MR. TEEFEY: What do you want
+] [5]	to achieve is that the outcome is the same.	[5]	to strike out?
[6]	DR. BLANCHARD: The second	[6]	DR. ROSENTHAL: On the third
[7]	example, similar therapeutic class, it does the	[7]	line beginning with "and". Strike "and" through
[8]	-	[8]	the end of the sentence.
[9]	same general thing for a general disease. DR. HADLEY: There is no	[9]	DR. PILES: That sentence then
[10]	scientifically accepted definition of how big you	[10]	would read: Therapeutic interchange is the
[11]		[11]	dispensing of a drugand actually we left with
[12]	make a therapeutic class. You could say a	[12]	two possibilities at that point, but I will read
[12]	therapeutic class is all GI drugs. In which case, H2 blockers and proton inhibitors are in	[12]	the one that we had before the breakdispensing
	•	[13]	of a drug by any person authorized by law to
[14]	the same therapeutic class. So I think you would	[14]	dispense drugs, that is a chemically dissimilar
[15]	have a very difficult time defining something.	[15]	alternative for the drug initially prescribed.
[16]	From a legal point, is it or	[17]	That's the latest suggested change. A period
[17]	isn't it in the same pharmacological class? It probably is irrelevant as long as it has the same	[17]	after "prescribed" in line three.
[10]		[19]	MR, TEEFEY: And then the next
[20]	functional results and similar safety profile. DR. BLANCHARD: I think	[20]	sentence?
[20]		[20]	DR. PILES: The next sentence
[21]	particularly in light of the fact that the suggested substitutions that I've had recommended	[21]	would read; the alternative drug is expected to
[23]		[23]	have the same clinical results and similar safety
[23]	to me are not in the same pharmacological class. That's reflective of the way this practice is	[23]	profile when administered to patients in
[25]		[24]	therapeutically equivalent doses as the drug
-[25]	being practiced in Virginia, to leave those words	[23]	merapeutically equivalent doses as the drug

PILES: Mr. Chairman, if I might, what I've done is just gone back to the resolution and what it calls for and where we are today. We do have now on the table a definition that we're comfortable with. The rest of our task includes now describing in our report to the General Assembly the practice. In fact, what it says here in the resolution was that we would
2] 3] 4] 5] 6] 7] 8] 9] 10] 11]	pharmacists who are licensed by the state, it appears to me that sufficient patient protection is in place under existing regulations. In addition, other regulations govern the regulation of prescription drugs by pharmacists and impose disclosure requirements. Based on the above and the various documents I have reviewed and arguments I have heard at Task Force meetings, I am of the mind that no legislation would be appropriate.	[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11]	DR. PILES: Mr. Chairman, if I might, what I've done is just gone back to the resolution and what it calls for and where we are today. We do have now on the table a definition that we're comfortable with. The rest of our task includes now describing in our report to the General Assembly the practice. I don't believe that there's nothing at this point. MR. TEEFEY: I would like to clarify one point. It is not uncommon to have a task force extended to another year. I want to

Page	03	Page	94
[1]	year. It's not uncommon to extend the authority	[ 1]	professional judgment. Did the pharmacist or the
	•	[2]	
12 1	of the Task Force for another year if you feel	-	physician, did they properly deal with this
	you do not have a good solution to what the	[3]	issue, or did they use whatever incentive there
$\begin{bmatrix} 1 & 4 \end{bmatrix}$	General Assembly is looking for.	[4]	was in an improper way?
[5]	DR. HADLEY: I agree with	[5]	We know that those
[6]	that, generally, and also the letter from	[6]	professional Boards are really the best place to
[7]	Mr. Counsel. I think there are a lot of	[7]	have those kinds of very fine judgment and
[8]	controversies and unanswered questions. I think	[8]	disciplinary action. That would be my lien, to
[9]	there are a lot of things in the market place	[9]	somehow assist the Board of Pharmacy in what they
[10]	that is going to affect the kind of changes that	[10]	need to do with that.
[11]	we're looking at, and it may be premature to	[11]	MS. RUSSELL: I just wanted to
[12]	interfere in that process.	[12]	clarify. I'm not sure we do have all the tools
[13]	I think that the most	[13]	we need right now to deal with what we might
[14]	propounding thing that I heard is that the Board	[14]	consider unethical conduct even by practitioners
[15]	of Pharmacy does have the authority to deal with	[15]	in the state.
[16]	those factors that we think are unethical. It	[16]	Our kick back regulation, as I
[17]	seems to me the problem again is trying to get a	[17]	mentioned before, is not very well worded to
[18]	handle on some of the out-of-the state issues and	[18]	cover what's going on today. I think we still
[19]	PBMs.	[19]	need to make changes.
[20]	If there was any	[20]	I think the problem is our
[21]	recommendation, it would be around that, to get	[21]	unprofessional conduct definition in the statute
[22]	some more authority to the Board of Pharmacy to	[22]	is very narrowly drawn. It's difficult to pull
[23]	deal with that. I think that is the proper way	[23]	other things in. I think we need some statutory
[24]	to deal with it. Because most of the issues that	[24]	relief to be able to deal with the unethical
````5]	we're talking about it's a question of	[25]	practices and to we consider unethical practices

Page 1	101	Page	102
[1]	you, I'll do my best to see if I can. I'm	[1]	required to put a diagnosis with that particular
[2]	familiar with one PBM that I represent. I can	[2]	claim. So if a drug is filled, you haven't got a
' 3]	certainly ask those questions. I don't know if	[3]	way to link that back to a diagnosis.
_[4]	it even exits.	[4]	We did a study in our own HMO
[5]	MR. TEEFEY: How about the	[5]	locally trying to look at the prescribing of
[6]	HMO?	[6]	stimulant medication, which is used for children
[7]	DR. HADLEY: I think it's very	[7]	with ADHD. We had a devil of a time trying to
[8]	difficult information to get. It gets back to	[8]	link it up to children that actually that
[9]		[9]	diagnosis. It turned out we had twice as many
[10]	the kind of information process that you have to do to see what affects total health care costs.	[10]	people receiving the drug as we had those with
1		[10]	the diagnosis.
[11]	One of the articles we looked		-
[12]	at and read; it's difficult to isolate one	[12]	There's a real problem here in
[13]	component of your health care costs. And if you	[13]	the industry in devising ways to link this up and
[14]	change that, what effect would it have on the	[14]	what it's going to take to solve this. Again,
[15]	others?	[15]	this is a problem that I think the HMO is very
[16]	I think that the problem that	[16]	interested in because we want to control total
[17]	the HMO industry has in dealing with this is that	[17]	medical costs. And if we were to adjust the drug
[18]	in many cases it is difficult to link pharmacy	[18]	cost of formulary, it increases our ER visits or
[19]	information to specific diagnosis. I know in my	[19]	hospitalizations. We're not going to do that.
[20]	own companyand I think this is fairly	[20]	The problem is we're still
[21]	typicalthe database for pharmacy claims is kept	[21]	struggling to figure out that problem. And it is
[22]	in one file.	[22]	a very difficult information process to find a
[23]	As you know, or maybe you	[23]	solution. I don't think it's a proprietary
[24]	don't know, when you fill a prescription and then	[24]	issue. I think it's an issue that the HMOs
[25]	send that in to have it paid, you are not	[25]	really don't have the information. There's a lot
Page 1	03	Page	104
[1]	C		
- ·	of controversy on that study. It's still a very	[1]	I guess the only information I
[2]	provocative study. And if that is borne out, I	[2]	I guess the only information I would like to see in the near future is what are
[2] [3]	•	[2] [3]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what
[2] [3] [4]	provocative study. And if that is borne out, I	[2] [3] [4]	would like to see in the near future is what are
[2] [3]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things	[2] [3]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what
[2] [3] [4] [5] [6]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost.	[2] [3] [4] [5] [6]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of
[2] [3] [4] [5] [6] [7]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions.	[2] [3] [4] [5] [6] [7] [8] [9] [10] [11]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is	[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management	[2] [3] [4] [5] [6] [7] [8] [9] [10] [11] [12] [13]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard	[2] [3] [4] [5] [6] [7] [8] [9] [10] [11] [12] [13] [14]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very beginning of the first meeting I stated to the
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard about this before we started. How our company	[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very beginning of the first meeting I stated to the Task Force members that I would like to see
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard about this before we started. How our company has been able to do some disease management	[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very beginning of the first meeting I stated to the Task Force members that I would like to see evidence that the practices engaged by HMOs, PBMs
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard about this before we started. How our company has been able to do some disease management strategies. Primarily, have gotten involved with	[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very beginning of the first meeting I stated to the Task Force members that I would like to see evidence that the practices engaged by HMOs, PBMs and others in Virginia that effect Virginia's
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard about this before we started. How our company has been able to do some disease management strategies. Primarily, have gotten involved with the drugs that are given for asthma and have	[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very beginning of the first meeting I stated to the Task Force members that I would like to see evidence that the practices engaged by HMOs, PBMs and others in Virginia that effect Virginia's patients, that evidence be produced to show that
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard about this before we started. How our company has been able to do some disease management strategies. Primarily, have gotten involved with the drugs that are given for asthma and have lowered our hospital cost and ER visits and so	[2] [3] [4] [5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very beginning of the first meeting I stated to the Task Force members that I would like to see evidence that the practices engaged by HMOs, PBMs and others in Virginia that effect Virginia's patients, that evidence be produced to show that these practices were sufficiently safe and that
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard about this before we started. How our company has been able to do some disease management strategies. Primarily, have gotten involved with the drugs that are given for asthma and have lowered our hospital cost and ER visits and so forth for asthma by about 17 percent.	[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very beginning of the first meeting I stated to the Task Force members that I would like to see evidence that the practices engaged by HMOs, PBMs and others in Virginia that effect Virginia's patients, that evidence be produced to show that these practices were sufficiently safe and that there was some public policy reason for engaging
$\begin{bmatrix} 2 \\ [ 3 ] \\ [ 4 ] \\ [ 5 ] \\ [ 6 ] \\ [ 7 ] \\ [ 8 ] \\ [ 9 ] \\ [ 10 ] \\ [ 11 ] \\ [ 12 ] \\ [ 13 ] \\ [ 14 ] \\ [ 15 ] \\ [ 16 ] \\ [ 17 ] \\ [ 18 ] \\ [ 19 ] \\ [ 20 ] \\ [ 21 ] \\ [ 22 ] \end{bmatrix}$	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard about this before we started. How our company has been able to do some disease management strategies. Primarily, have gotten involved with the drugs that are given for asthma and have lowered our hospital cost and ER visits and so forth for asthma by about 17 percent. But I don't know really what	[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meeting-at the very beginning of the first meeting I stated to the Task Force members that I would like to see evidence that the practices engaged by HMOs, PBMs and others in Virginia that effect Virginia's patients, that evidence be produced to show that these practices were sufficiently safe and that there was some public policy reason for engaging in them. That there is some evidence that there
[ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21] [22] [23]	provocative study. And if that is borne out, I guarantee you that HMOs don't want to do things to increase medical cost. I don't think we have the data to share with you that would be convincing, any more than what you have seen. These are active problems. But it's going to take a different level, a next generation of databases to be able to answer these questions. What you're talking about is called epidemiology of cost or disease management strategies. I was talking with Dr. Blanchard about this before we started. How our company has been able to do some disease management strategies. Primarily, have gotten involved with the drugs that are given for asthma and have lowered our hospital cost and ER visits and so forth for asthma by about 17 percent. But I don't know really what the costs or the prescription drugs are because	[2] [3] [4] [5] [6] [7] [8] [9] [10] [11] [12] [13] [14] [15] [16] [17] [18] [19] [20] [21] [22]	would like to see in the near future is what are the Board of Pharmacy's recommendations of what they would like to see from a regulatory point of view. I think that would be very useful information. You made reference to a previous bill, which I haven't seen. I think that's the base of information I would like to see. MR. MCARTHUR: I cannot resist making a point right here and now at this moment in time. At the very first meetingat the very beginning of the first meeting I stated to the Task Force members that I would like to see evidence that the practices engaged by HMOs, PBMs and others in Virginia that effect Virginia's patients, that evidence be produced to show that these practices were sufficiently safe and that there was some public policy reason for engaging in them. That there is some cost savings.

Page	105	Page	106
[ 1]		-	
	practice to produce this evidence. I'm thrilled	[1]	it being true here.
[2]	that finally today it's happened. However, what	[2]	If there is a public safety
[4]	I'm hearing is that the evidence doesn't exist or	[3]	problem, which I think you enumerated some
	that for some other reason it can't be produced.	[4]	concerns, that need to be discussed at this
[5]	I would submit to the Task	[5]	Committee and the Harvey committee and others.
[6] [7]	Force that what this means is that these	[6]	We need to discuss them on the effects of them,
[8]	companies engaged in drug switching practices in	[7]	but not the presumption that if you don't show us
[9]	Virginia are engaged in a practice which is based	[8]	where this is good, then we'll make it illegal.
[10]	on untested assumptions. They are engaging in a	[9] [10]	I've just never seen that in legislation.
[11]	practice for which they have absolutely no		MR. MCARTHUR: Your point is
[11]	studies whatsoever to support that they are safe	[11]	very well taken. I apologize. I did not have a
[12]	and absolutely no evidence to show that there's	[12]	prepared speech on this point. I didn't know
	an overall health care cost reduction.	[13]	this point was going to come up.
[14] [15]	In light of that, I would ask	[14] [15]	I did leave out one critical
[15]	the Committee to consider immediately	[16]	component to this whole problem. That is that
[17]	legislation, which would outlaw this practice	[17]	health care provider groups, both in Virginia and
[18]	until such time that such evidence is produced to	[17]	around the country, have submitted documents to this Task Force talling the Task Force reambers
[10]	protect the health and safety and welfare of Virginians.	[10]	this Task Force telling the Task Force members
[19]	HON, NEWMAN: You and I agree	[20]	that they have personally observed problems with this practice. Consumer groups have now appeared
[20]	on some things, but that statement I particularly	[20]	and told the Task Force that they had concerns
[21]	disagree with. I can't imagine us going around	[22]	about it. Studies have been produced and shown
[22]	to Virginia businesses and saying prove to us	[22]	that there are problems.
[23]	what you're doing is good or we're going to make	[23]	I don't think that I'm
[24]	it illegal. We don't do that. I can't imagine	[24]	suggesting legislation to address something that

The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're	[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7]	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions.
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing.	[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8]	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing. DR. ROSENTHAL: I'm very	[1] [2] [3] [4] [5] [6] [7] [8] [9]	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and dramatic thing to suggest.
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing. DR. ROSENTHAL: I'm very concerned about Mr. McArthur's comments. When	[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10]	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and dramatic thing to suggest. But if diagnoses were on
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing. DR. ROSENTHAL: I'm very concerned about Mr. McArthur's comments. When Dr. Hadley, not three minutes agowell, not ten	<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11]</pre>	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and dramatic thing to suggest. But if diagnoses were on prescriptions either by ICN-9 codes or some
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing. DR. ROSENTHAL: I'm very concerned about Mr. McArthur's comments. When Dr. Hadley, not three minutes agowell, not ten minutes ago told you precisely what the problem	<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12]</pre>	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and dramatic thing to suggest. But if diagnoses were on prescriptions either by ICN-9 codes or some mechanism that was coded in, then the answer
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing. DR. ROSENTHAL: I'm very concerned about Mr. McArthur's comments. When Dr. Hadley, not three minutes agowell, not ten minutes ago told you precisely what the problem is with the data. You ask me whether my client,	<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13]</pre>	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and dramatic thing to suggest. But if diagnoses were on prescriptions either by ICN-9 codes or some mechanism that was coded in, then the answer could be obtained in a relatively short period of
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing. DR. ROSENTHAL: I'm very concerned about Mr. McArthur's comments. When Dr. Hadley, not three minutes agowell, not ten minutes ago told you precisely what the problem is with the data. You ask me whether my client, which is a client, is intentionally withholding	<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14]</pre>	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and dramatic thing to suggest. But if diagnoses were on prescriptions either by ICN-9 codes or some mechanism that was coded in, then the answer could be obtained in a relatively short period of time, in a year or two I would think, over a
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing. DR. ROSENTHAL: I'm very concerned about Mr. McArthur's comments. When Dr. Hadley, not three minutes agowell, not ten minutes ago told you precisely what the problem is with the data. You ask me whether my client, which is a client, is intentionally withholding data. The answer is no.	<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15]</pre>	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and dramatic thing to suggest. But if diagnoses were on prescriptions either by ICN-9 codes or some mechanism that was coded in, then the answer could be obtained in a relatively short period of time, in a year or two I would think, over a large patient population.
[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16]	no one has spoken to or some problem that no one has proven exists. I think it's clear the problem exits. The extent to which the problem exists has not yet been determined. I would submit that part of the problem with that is that those engaged in the practice aren't telling us what they're doing. DR. ROSENTHAL: I'm very concerned about Mr. McArthur's comments. When Dr. Hadley, not three minutes agowell, not ten minutes ago told you precisely what the problem is with the data. You ask me whether my client, which is a client, is intentionally withholding data. The answer is no. I told you all I will try to	<pre>[ 1] [ 2] [ 3] [ 4] [ 5] [ 6] [ 7] [ 8] [ 9] [10] [11] [12] [13] [14] [15] [16]</pre>	business by telling businesses what Mr. McArthur would have us tell them. SPEAKER: Mr. Chairman, I wonder if it's presumptuous to wonder if this answer is ever going to be obtained. One of the components of obtaining this answer, facilitating it, is going to have diagnoses on prescriptions. I know that is a fairly revolutionary and dramatic thing to suggest. But if diagnoses were on prescriptions either by ICN-9 codes or some mechanism that was coded in, then the answer could be obtained in a relatively short period of time, in a year or two I would think, over a large patient population. [1]	MR. AYOTTE: Yes. As long	[1]	I've four or five of these notebooks now. Some
[2]	as What the Senator said earlier, that Ken	[2]	of these people are brave. They only brought one
[3]	McArthur has given where there are some policy	[3]	of them. Somebody even gave us a hand truck to
[4]	proposals. I don't have them in front of me to	[4]	
[5]	look at.	[5]	use over the holidays so we could deliver these
[6]	I would hate to have whatever	[6]	things. We want to make sure they're good,
[7]			concise policy statements.
[8]	we give as a preliminary be assumed as a final,	[7]	DR. PILES: The next meeting
	because I think that what comes out of the Harvey	[8]	will be in House Room C instead of D, but I will
[9]	study may give a final recommendation which	[9]	remind you.
[10]	encompasses all of that at one time. But I think	[10]	DR. HADLEY: Will we get from
[11]	we may have preliminary issues that we need to	[11]	Ms. Russell from the Board of Pharmacy, will we
[12]	start on now. But I would hate anybody to take	[12]	get your policy recommendations in that time
[13]	that as our final word.	[13]	interval?
[14]	MR. TEEFEY: Are we all in	[14]	MS. RUSSELL: I would be glad
[15]	agreement that you'll get your policy statements	[15]	to supply you with some staff recommendations.
[16]	in? We'll work on those policy statements	[16]	The problem is I will not have a Board meeting
[17]	DR. PILES: And I'll get	[17]	prior to that date. My regulation meets on the
[18]	things in the interim.	[18]	15th of September and could review staff policy
[19]	MR. TEEFEY:just as soon as	[19]	options.
[20]	we get some answers. We'll try to have	[20]	I can certainly tell you
[21]	everything to you longer than a week before the	[21]	whether it would have been approved by the
[22]	next meeting.	[22]	regulation committee, but I have to get them to
[23]	In the policy statement, don't	[23]	you prior to the regulation committee seeing
[24]	give us a thesis, please. Come out with a policy	[24]	them. So there may be changes or modifications
[25]	statementspecific policy statements because	[25]	from the committee.

2         vould you - There are some blund spots in the room, 3 so, when you make a comment, if you would identify yourself, it would suely help her.         2         reservising, detailing the pharmacists for generic substitution, distributing the information to the 4 payer and the patients to crease their knowledge of 5 whith are soluble comments to be 10 long-winded and not the public comments to be 10 long-winded. So wherey wants to speak, speak.         2         7         My third and final point, drug           3         8         4 breary decisions contingent upon monetary incentives 9 do not best serve the patient. Oversight would enable 10 and ensure better marketing of the drug, 12 as well as the impact on the patient populations.           13         MS WARINER: My name is Cindy 14 Warriner, and I am here representing today the 15 Virginia Pharmacists' Association.         16         11 based on the positive Cinical aspects of the drug, 12 as well as the impact on the patient populations.           14         15         Thank you.         16           16         My first is just a question and a 12 fact that there was some type of patient knowledge.         13         13           21         fact that there was some type of patient knowledge.         19         MR. ROSENTHAL: Mr. Chairman, 1           21         gatier. 11 was a on or a question, as far as, that J         2         12           23         The recommendations of this Task         2         2         12           24         There are three points I wish to 11<	Page	e 5 Page 7
2         void you - There are some blind spots in the room, 3 so, wile you make a comment, if you would identify 4 yourself, it would surely help her.         2         preseribing, detailing the pharmacists for generic 4 yourself, it would surely help her.           3         All right. We want to get right 5 on itot is, bo, well's start with the public comment 5 priod. What I would like to do is make sure that the 9 minutes, because we want the Task Force to be 10 long-winded and not the public comments to be 11 long-winded. So wheever wants to speak, speak.         7         My third and final point, drug 5 therapt decisions contingent upon monetary incentives 9 do not best serve the patient. Oversight would enable 10 and ensure better marketing of the drug, 12 as well as the impact on the patient populations.           13         MS. WARINER. My name is Cindy 14 Warriner, and I am here representing today the 15 Virginia Pharmacists' Association.         16         Thank you.           16         My first is just a question and a 10 discussion of whar has been handed out included the 21 dat that was a concern or a question, as far as, that 1 23 wanted to raise. I read the transcript, and I didn't 25 deleted to the patient howledge or consert.         10         Chalk MAN TEEFEY: Thank you, 10           14         that yot and is nobel the submoto of this Task 4         10         Yes, Steve?           19         There commendations of this Task 4         10         Page 6           11         There commendations of this Task 4         10         10         CHARMAN TEEFEY: Okay. Great. 4           11	1 the minutes for us as they have done each time, and	1 formularies, such as influencing physicians' original
1 so, when you make a comment, if you would identify 4 yourself, it would surely help her.         5 ubstitution, distributing the information to the 4 payer and the patients to crease their knowledge of 5 what is covered, et cetera. None of these mechanisms 6 are influenced by therapeutic interchange.           9 minutes, boccause we want the Task Force to be 9 minutes, boccause we want the Task Force to be 9 in moutes, boccause we want the Task Force to be 9 individed. So whoever wants to speak, speak.         7 My third and final point, drug           12 Cindy?         8 ubertany decisions contingent upon montary incentives 9 do not best serve the patient. Oversight would enable 10 and ensure better marketing of the drug products 11 based on the patient operations.           12 Cindy?         13 a well as there representing today the 14 Warriner, and 1 anologiz for missing the last 16 cettant there was some type of patient knowledge or 2 donci in what was printed and sent out had 2 doroped the patient knowledge.         16 CHARMAN TEEFEY: Thank you, 17 Cindy?           13 see, unless 1 read the transcript, and 1 dudn't         13 discussion of what has been handed out included the 21 dat was a concern or a question, as far as, that J 23 wanted to raise. I read the transcript, and 1 dudn't         18 decisions for the last, should be the 24 datwas a concern or a question, as far as, that J 25 wonted are still confused about this issue and the 8 positive impact oversight would have with regard to 31 maker. The inter of oversight would have with regard to 31 maker. The inter of oversight would have with regard to 31 dormularies are consistent the oversight would have with regard to 31 maker. The inter of oversight would have with regard to 32 supporting the policord mathavas are forter the pating 33 dormularies are consisten	2 would you There are some blind spots in the room,	
4 yourself, it would surely help her.         a payer and the patients to crease their knowledge of           5 All right. We want to get right         b what is covered, et cetera. None of those mechanisms           5 end the patients to some of that is covered, et cetera. None of those mechanisms         f are influenced by therapeutic interchange.           9 minutes, because we want the Task Force to be         is theray decisions contingent upon monetary incentives           9 minutes, because we want the Task Force to be         is theray decisions contingent upon monetary incentives           9 minutes, because we want the Task Force to be         is theray decisions contingent upon monetary incentives           10 long-winded and not the public comments to be         is theray decisions contingent upon monetary incentives           10 minutes, because we want the Task Force to be         is theray decisions contingent upon monetary incentives           11 ong-winded and not the public comments to be         is theray decisions contingent upon monetary incentives           12 minutes, because we want the Task Force to be         is theray decisions contingent upon monetary incentives           12 minutes, because we want the Task Force to be         is theray decisions contingent upon monetary incentives           14 quality of care as a number one priority.         13 minutes, because we want the tow we may print and and set out had           14 fourthalt in the values print of what was printed and set outhall         14 quality of care as a number one priorit		
5       All right, We want to get right       5       what is covered, et cetera. None of homes mechanisms         6       on into it. So, we'll start with the public comment       5       what is covered, et cetera. None of homes mechanisms         8       bold the public comments to be       7       My third and final point, drug         9       minutes, box hoever wants to speak, speak.       9       do not best serve the public. Oversight would enable         10       long-winded. So whoever wants to speak, speak.       10       as well as the inpact on the patient populations.         12       Cindy?       13       as well as the inpact on the patient populations.         13       MS WARRNER My name is Cindy       13       Thus, sonce again, improving and identifying patient.         14       Warriner, and I apologize for missing the last       13       Thus, you.         16       My first is just a question and a       16       CHAIRAN TEFEPY. Thank you.         13       To concer, and and apologize for missing the last       16       CHAIRAN TEFEPY. Thank you.         14       quality of care as a number or proving.       18       Yes, Steve?         19       definition of therapeutic interchange.       19       Jist-''''''''''''''.         21       add indicide ada sent out hand dualit.       20       jist-''''''''''''''''		_
6 on into it. So, we'll start with the public comment       7 meriod. What I would like to do is make sure that we         8 hold the public comments to no more than three       9 minutes, because we want the Task Force to be         9 minutes, because we want the Task Force to be       10 may winded and not the public comments to be         10 long winded and not the public comments to be       10 and ensure better marketing of the drug products.         11 long-winded. So whoever wants to speak, speak.       12 do not best serve the patient. Covrespidt would anable         10 ord winded and not the public comment is Cindy       13 must, not marketing of the drug products.         14 Warriner, and I am here representing today the       15 Thank you.         15 Wrignia Pharmacists' Association.       16 My first is just a question and a         17 Concern, and I apologize for missing the last       17 Cindy.         18 meeting. I was enjoying the sounty beach. The       18 Yes, Steve?         19 definition of therapputic interchange. The original       10 cirdy.         21 fact that there was some type of patient knowledge.       10 and ministrative matter. On the list of entitles         23 dropped the patient knowledge or consent, and tal       12 lenkin's office, threr is one deletion and one         24 that was a concern or a question, as far as, that I       23 deleted. I just haven't received final approval of         24 members of the tareproviders to       6		
7       Period. What I would like to do is make sure that we         8       hold the public comments to no more than three         9       minutes, because we want the Task Force to be         10       long-winded and on the public comments to be         11       long-winded and on the public comments to be         12       Cindy?         13       MS WARRINER, My name is Cindy         14       Warriner, and 1 an here representing today the         15       Virginia Pharmacists' Association.         16       My first is just a question and a         17       Concert, and I apologiz for missing the last         18       meeting. I was enjoying the sumy beach. The         19       definition of therapeutic interchange. The original         20       and I apologiz for missing the last         21       add the on to the comments.         22       and I apologiz for missing the sum of the ange provid of         23       add not the association.         24       add soursion of what has been handed out included the         24       add provid for ans as, that I         25       addition. Trudential Insurance Company should be         25       wanted to raise. I read the transcript, and I dind't         25       melast. I was enjoosed to unificulated the <td></td> <td></td>		
a hold the public comments to no more than three         9 minutes, because we want the Task Force to be         5 therapy decisions contingent upon monetary incentives           9 minutes, because we want the Task Force to be         10 long-winded and not the public comments to be         11 and more representing to and the patient Operations.           11 long-winded So whoever wants to speak, speak.         12         Cindy?         12 as well as the impact on the patient oppulations.           13         MS WARNER: My name is Cindy         14 Warriner, and I am here representing today the         15         Thank you.           16         My first is just a question and a         16         CHAIRMAN TEEFEY: Thank you,         17           17         concern, and I apologize for missing the last         17         Cindy.         18         Yes, Steve?           19         definition of therapeutic interchange. The original         20 discussion of what has been handed out included the         17         18         Yes, Steve?           19         MR ROSENTHAL: Mr. Chairman, I         20 justI'm Steve RosenthalT just have an         21 administrative matter. 1	Benefit Manager to include any current PBMs, HMOs or		similar to the Virginia Voluntary Formulary that sets
	any other third-party payers or managers of pharmacy	1	standards for exchange of generic drugs for brand
	benefits, and do a statute to require registration	3	name drugs, to set up a Board which would set
_ (	with the Board of Pharmacy in order to operate in		standards for therapeutic interchange as to which
	Virginia.	1	drugs could be maybe safely, in some cases,
6	The Board of Pharmacy really does	6	substituted for other drugs; define what therapeutic
7	not have the ability, at this point in time, to	7	classes really are. And, after that is done, consider
8	effectively carry out its statutory obligation to	8	changing the prescription blank format to have a
	regulate the practice of pharmacy in Virginia,	9	third check box wherein physicians, prescribers
10	because so many decisions that affect the practice of	10	could, up front, allow therapeutic interchange with
11	pharmacy are being made by entities other than those	11	complete knowledge of what that meant, and in cases
12	which we license or register. This would give the	12	where they felt it maybe didn't impact public safety.
13	Board the ability to have some oversight over these	13	This might eventually cut down on
	entities that are currently operating in Virginia and	14	a lot of the phone calls that pharmacists have to
15	impact the practice of pharmacy so greatly.	15	make, allow the physician some choice up front, and,
16	The Board, at this time, doesn't	16	cut down on some of the workloads for both PBMs,
17	want to specifically make recommendations as to what	17	pharmacists and prescribers.
18	they do and don't consider appropriate practice, but	18	I don't think we could be quite
19	allow you, the Committee, or the public pharmacists	19	ready to put a proposal together in time for this
20	to have plenty of time to develop regulations as to	20	particular General Assembly session. I mean, this
21	what may or may not be considered appropriate in the	21	would take a lot of work. But I think it's
22	drug-switching issue. We've had other problems	22	something, if we're going to keep using formularies,
23	related to, I think I mentioned last time, the sale	23	if PBMs are going to keep using preferred drug lists
24	of confidential patient-specific information. We're	24	as a mechanism for reducing cost, then this might be
125	now having problems with imposition of certain	25	something we would want to consider looking at.
	Page 10		Page 12
1	requirements on pharmacies in Virginia that are	1	Questions?
	contrary to other State laws and regulations, such as	2	MS. PIGG: This is Cindy Pigg.
	time lines for the length of time that a prescription	3	Scotti, can you just help me
	would be good for that's contrary to current State	4	understand, are there practices that you're hearing
5	laws and regulation that are affecting the practice	5	reports of that said, and it's kind of jumping off of
6	of pharmacy. Different types of activity that some	6	your point, too, here, I think, that there is a
7	oversight by the Board would be, would give the Board	7	distinction between what the contract between the
8	the ability to truly regulate the practice of	8	patient, the member, and their insurer is versus the
9	pharmacy.	9	patient care.
10	The second policy option that the	10	And, point number two, and then
1	Board would like to see considered would be to	11	maybe even in point number three, but that's not the
	require, and I think I heard last week that just	12	point, it seems like the Board is gettingthe
	about all PBMs and HMOs do have some type of an	13	assumption is that just because the prescription is
	appeals process, but require all PBMs to have a	14	not paid for, that means that the patient cannot have
	written appeals process whereby a patient or a	15	it. And that's a contractual relationship. I don't
16	practitioner may appeal a PBM's denial of payment for	16	know that there are PBMs, and maybe there are, that
	a prescribed drug in favor of a preferred or	17	are saying, you can't dispense this drug. I don't
	formulary drug and require that the denial of the	18	think they're saying you can't dispense it. They're
	prescribed drug not take effect until after the	19	saying it's not a covered part of the contract.
	completion of the appeals process.	20	MS. RUSSELL: Well, I think that's
151	The third option that the Board	21	a problem that all the health professions are having
	would like you to consider, and realizing that this	1	to deal with. Yeah, you're right, the PBMs are
	would be a lengthy process, would be to consider	23	saying, we're not going to pay for it, not that you
	possibly setting up an independent board or committee		can't have it or you can't comply with the State law,
25	to develop standards and guidelines, maybe something	25	but we're just not going to pay for it. If you

# **Condenselt**<sup>™</sup>

Page 13	Page 15
1 dispense it for two years then, you know,	1 different than how appeals are handled for other
2 But, as a matter of, you know,	2 things of which there are already statutes involving,
3 fact, in a lot of cases, that does create a denial	3 that have been, you know, set up for HMOs.
4 for that patient, because they can't afford to pay	4 Typically, in a situation like
5 for it.	5 that, if there is and then, first of all, you don't
6 MS. PIGG: But, if they didn't	6 evenan HMO doesn't always know, if a denial is
7 have a drug rider at all, would you feel it was the	7 issued, whether or not it is even going to be
8 Board's responsibility to say to the pharmacist,	8 appealed. Typically, there is a period of time that
9 you've got to give that drug to the patient, even if	9 you allow up to 60 days. So, if a denial is issued,
10 they can't pay for it? I'm just wondering; I guess my	10 maybe only, you know, a fraction of those are even
11 question is, is the Board interested in entering into	11 going to be appealed.
12 the relationship that's a contract between the	12 So I think that that is very
13 employer and the member and the payer?	13 problematic to say that if an HMO or a PBM issues a
14 MS. RUSSELL: No. I mean, I think	14 denial that that doesn't take effect until somebody,
15 some of the business aspects of this are best left to	15 you know, appeals it, and they go through that whole
16 the Bureau of Insurance, but only, I mean, I think	16 process. And you're allowed, you know, by the State
17 that certain policies by PBMs do affect the practice	17 statutes, a certain period of time to respond to
18 of pharmacy, such as a company saying, we are not	18 those.
19 going to pay for a prescription that's over a year	19 So, I think what would be better,
20 old or over six months old, when, in fact, State law	20 if there would be something like that, would be rules
21 regulations may allow it to be refilled for a longer	21 that would be consistent with the other kind of
22 period of time. It creates additional workload for	22 appeals. And, typically, what that would mean is, if
23 pharmacists, which ultimately can create additional	23 the appeal was won by the patient, that the payment
24 mistakes. It creates extra workload on the	24 for that would then be retroactively applied. But
25 prescriber when the doctorwhen pharmacists have to	25 not that the denial wouldn't take effect until there
Page 14	Page !
1 call and get a second prescription. And it also	1 had been an appeal and it had been heard.
2 creates the situation where you've got two open	2 I think just technically that
3 prescriptions for the same drug for the same patient,	3 would be very difficult to do what you're talking
4 and I think that's a problem.	4 about.
5 Whether we would What we would	5 MS. RUSSELL: The difference I see
6 want to do to resolve that, I don't have that answer	6 with pharmacy benefits and other types of denials is
7 at this point in time, but, yeah, I do think when	7 that you've got to have immediate permission to make
8 policies, business decisions, affect, get into	8 that switch before the drug is dispensed. So, if it's
9 affecting the actual practice of pharmacy, that maybe	9 denied, I mean, if you call the prescriber and the
10 the Board should have some oversight. But only to the	10 prescriber says, no, I do not want this drug
11 extent that it does affect the practice of pharmacy	11 switched, then you've got, I mean, you've got
12 and not necessarily the business decisions or the	12 immediate notification that they're appealing. I
13 contract. I doubt many patients really know what's in	13 mean,
14 the fine print of their contract.	14 DR. HADLEY: Well, there are
15 MS. PIGG: I can't speak to that.	15 expedited appeal procedures. I mean, you know,
16 The information is there. They may or may not elect	16 that's allowed by current statute for the HMOS.
17 to read it.	17 But, to give you another example
18 MS. RUSSELL: Or may or may not	18 of this, I mean, there are more than just the
19 get it even.	19 therapeutic interchange kinds of appeals that take
20 DR. HADLEY: Ms. Russell?	20 place. Some of them have to do with the generic
21 MS. RUSSELL: Yes.	21 drugs.
22 DR. HADLEY: Dr. Hadley. Your	22 MS. RUSSELL: And that's not what
23 recommendation about how the denials should be	23 we're talking about.
24 handled with respect to the appeal process, I think,	24 DR. HADLEY: Patients are
25 is problematic, and that would be a little bit	25 appealing, you know. They want the brand name or

H	IR 630 Conde	nso	sIt™
	Page 17		Page 19
1	they appeal, you know. And it's very clear in their	1	to consider that and Well, I heard you say that's
	contract that there are certain drugs that are		not where you're going with this at all. You're
1	veluded by a contract, you know, such as the	1	trying to focus in on the practice of pharmacy,
	osmetic ones we talked aboutMinoxidil for hair		things that may affect the practice of pharmacy.
5	loss. I mean, believe it or not, even though that's	1	But, I think you're It needs to be real The
	written clear in black and white in the contract,	1	Task Force needs to be very cautious in the fact that
	people appeal that sort of thing.		it's very explicitly stated or else you do have a
8	MS. RUSSELL: And that's not what		problem with the Bureau of Insurance that
9	we're talking about.		nonformulary drugs are not covered benefits.
10	DR. HADLEY: So, I think that's	10	DR. HADLEY: Again, I think you
1	the problem.		have the problem, too: suppose you require the PBM to
12	MS. RUSSELL: Yes, and maybe I	1	pay for a drug until it is appealed. Again, the
13	didn't make that clear. I'm not talking about generic	1	majority of these are never even appealed. So does
	versus brand, and we're not talking about drugs that		that mean they're supposed to pay for that drug
	would be normally denied, blanketly denied because		ad infinitum? You would set up a situation where it
	they're for cosmetic purposes or whatever reason. I'm		would be in the patient's and the doctor's interest
	talking about the issue that you're here to talk		never to appeal it, because you'd have to pay for
	about, which is the drug-switch issue, the switching	1	that until "an appeal was worked through."
	of chemically dissimilar drugs for the same	19	MS. RUSSELL: Not necessarily.
	therapeutic purpose where you would pay for one drug	20	DR. HADLEY: So, I think, the
F	in a therapeutic class, but not necessarily another.	1	other thing, just one other point. I think the other
22	MS. PIGG: But it does get to the	22	
	same issue as covered versus noncovered, because,	23	
	again, getting back to the contract, it says drugs		differencesI think Dr. Blanchard has brought this
	not on the formulary are not covered benefits, unless	1	out in some of his discussionswhere sometimes a
1-			
1	Page 18	1	Page 20
	the exception process is gone through. So it really is the same issue of covered/noncovered. That's what		patient will present a new prescription, has never
			been on a particular drug entity. They have just
	formulary equals, covered; nonformulary equals		been diagnosed for whatever condition, presents with
	noncovered.		a drug in a particular therapeutic category. They're
5	MS. RUSSELL: But, again, you have		informed, this particular drug is not on our
	got a drug for a prescription and you're going to		formulary, but we have another drug in our formulary
	probably If something was not covered for cosmetic	1	in the same drug, you know, class. We'd like to
	purposes, for example, you would tell the patient	1	substitute that. There's really The patient has
	right then it was not covered. If you want it, you	1	never been put on that drug, has never been titrated
	have to pay for it.		and that probably is a different situation than the
11	In the other situation, you	1	patient who, let's say, joins a particular health
	wouldn't tell the patient that. You would say, let me	1	plan and has maybe been on Drug A for ten years, well
	call the prescriber and see if we can get them to	1	titrated, doing well, and this is the transition-type
	switch to this other drug that is covered. The	1	of situation that we talked about. That may be a
	patient may or may not have been on the other drug	1	specific situation where, you know, some things, such
	for a period of time. And you're either going to get	1	as you're talking about, a patient who is on a
	a yes or a no within a certain period of time whether	1	chronic medication, was well titrated, well
	they want to switch or not. And I guess the committee		controlled, no side effects, that may require some
	or Board felt that if the PBM had to pay for the	í	special handling.
	denied drug until they could get through the appeals	20	But I think to make a blanket
21	process, that it might have the effect of making the	1	statement like that, that, you know, you have to pay
	ppeals process go a little bit faster.		for it until the appeals process is worked through,
4.J 2.1	MS. PIGG: But, again, that	1	would be very difficult and problematic. Again, there
	recommendation would go directly in conflict with the	1	are expedited appeal situations so that if the doctor
20	contract. And, again, I just think the Board needs	25	and the patient decided to take advantage of that

11.	Condo	ense	eIt <sup>™</sup>
	Page 21		Page 23
1	for, say, a transition drug, I mean, then you could,	1	insurance companies or the HMOs or anybody else. But,
2	for example, have a rule where you dispense, you	2	you can't use that kind of gotcha mentality when
3	know, 72 hours worth of medication. And an expedited	3	you're talking about taking care of patients' lives.
	appeal is supposed to be resolved within two business	4	The last thing, and I promise to
5	days.	5	shut up after that, is your proposal number three.
6	So, you know, perhaps something	6	Were you not happy with the definitions that are
7	like that, but not to leave it completely open that	7	being made of therapeutic interchange the last time
8	you could get the medication forever by just not	8	through? Because I think that addresses the problem.
	appealing, it doesn't seem to me to make sense.	9	The problem with having an extra box on a
10	MS. RUSSELL: And I don't think	10	prescription pad is that if two or three physicians
11	that's what we had anticipated, and this is not, by	11	have such prescription pads, and we all check the
12	any means, worked out in detail.	12	boxes, then we end up with patients taking Macrolides
13	DR. HADLEY: Yes.	13	biotics, antiulcer medications and antifungal
14	MS. RUSSELL: It's just a concept	14	medications, and getting cardiac arrests because we
15	whereby the patient would not be immediately denied.		don't really know what drug our patient is taking.
	If you call the physician to make a switch, and he	16	If you specify drugs that you
	says, no, to me, that ought to institute the appeal	17	know are safe, regardless of the fact that your
	process. I mean, if he says, no, I don't want to		patient is also seeing an allergist and everybody
	switch, because, you know, I want this patient on	1	else, then you feel much more comfortable about
	this particular drug for whatever reason, you're	20	that. I don't think we can use this kind of a
21	going to deny payment of the drug to that patient	21	blanket approach to therapeutic interchange.
22	until they can get it worked out.	4	Although it's probably well-intended, I think it's a
23	DR. MOFFATT: I've got a handful		little misguided.
24	of problems, and I am not sure where they all come	24	Thanks.
25	from.	25	MS. RUSSELL: I didn't mean it to
	Page 22		Page
1	It started out I certainly	1	be an easy, quick solution, and I think, again, there
2	share your concern. I can't make the company pay for	2	would need to be a lot of details worked out. I think
3	a drug just because I've liked it forever and stall	3	that if a change was made, the physician, prescribing
	appeal until my patient doesn't need the drug	4	physician, should be immediately notified in writing
•	anymore. So, obviously, that needs a little	5	that that change was made and what it was switched
6	polishing. I don't find that a cogent argument	6	to. I think there should be a limitation on the
	against your point in saying that they have got to	7	number of switches you could do per prescription,
	provide the drug at first. I think that's a technical	1	like maybe one, as a maximum. And I think there
9	problem that is certainly surmountable.		should be a book like the formulary. You know which
10	I'm very uncomfortable with the	1	drugs could possibly be substituted for a brand name
	Defense, if that's the right word, that "it's in the		drug that was prescribed and you okay that by
112	contract." The patient should have read the contract.	12	checking a voluntary formulary box.
			If you know When I say define
13	All right. That's talking about a legal gotcha.	13	•
13 14	That's not talking about the practice of medicine.	14	therapeutic interchange, yeah, I'm comfortable with
13 14 15	That's not talking about the practice of medicine. Maybe I'm a little pollyanna about this, but I see a	14 15	therapeutic interchange, yeah, I'm comfortable with the definition that was done last time. But I think
13 14 15 16	That's not talking about the practice of medicine. 	Page 49		Page 51
1	is a pharmacist in this room or many pharmacists, I	1	DR. BLANCHARD: Is it appropriate
2	mean, physicians who really object to the phone	2	to slightly change the subject and start talking
3	calls, to generate the phone calls from the	3	about policy recommendations? I understand what
1 4	pharmacist. I think in a lot of cases, when we're	4	we're talking about here. It's another one of many
5	informed, we'll change it if it's appropriate. If the	5	issues that we have talked about for the last several
	patient can't afford the drug, we'll say, come on by,	6	months on which people of good will can have
7		7	significantly different opinions, you know, about
8		8	which we may not reach any sort of consensus in this
9	that, oh, we're trying to save you some work by	1	body, and I think the opinions expressed at both ends
	communicating directly with the patient, and I think		here have been heard.
	that's bogus.	11	CHAIRMAN TEEFEY: I think
12	MS. PIGG: Part of the driver,	12	DR. BLANCHARD: We shouldn't beat
13	though, I think, and the whole reason for the	13	that one into the ground any more.
	legislation is that the pharmacists don't want to	14	CHAIRMAN TEEFEY: I agree with
	call.	15	you. We asked the Task Force, and we asked the public
16	DR. MOFFATT: I think we do have a		to send in options after the last meeting, and we
17	problem. I don't mind being second-guessed so much-	1	have got some options to work with. And Mike
	I'm getting kind of used to itbut, what bothers me	•	Worthington, do you want to go over and start with
	about this letter is not what bothers Dr. Dalton.		the options, and then Michael Pyles will finish up?
	What bothers me is, why the pharmacy wants this	20	MR. WORTHINGTON: Mr. Chairman,
	change to happen. If Astra is paying Rite Aid to push	ł	Members of the Task Force, good morning.
	Astra's product and that's why Rite Aid is	22	I will briefly review
	approaching my patient, I have a problem.	23	CHAIRMAN TEEFEY: Now, before Mike
24	If it really is just that I'm not		gets started, we still have one option on the floor,
25	bright enough to know that Lanacort is just as good	1	and one option on the floor is still Senator Newman's
'		+	Page 52
11	as the other drug I'm using with a similar side	1	option. And I want to make sure that we understand
	effect profile. That's my problem, really.		that we still have Senator Newman's option on the
3	But, what really bothers me is		floor.
	whether there is something underneath the surface	4	MR. WORTHINGTON: You should have
	that's making them push this drug on my patient. Now,		in front of you three pages, the first of which looks
	what happens, as I understand it now, is an	1	like this: "Propositions To Be Considered By The
	interesting double whammy on a doctor.		Special Task Force."
8	I have my choice. When a	8	SENATOR NEWMAN: Do you have more
	pharmacist calls me up and says, listen, this isn't		copies of this?
	in the patient's formulary. If you change it to drug	10	MR. WORTHINGTON: Do you have any
	"Y," then he gets a break. I can either be a real		we can share with them?
	schmuck and make my patient pay more money. Or, I	11	DR. PYLES: I don't know if we
(	can accede to the switch, and be held liable if there		have any more.
	is a side effect. I don't like that combination. And	1	-
	I really want to know what's making the pharmacist	14 15	CHAIRMAN TEEFEY: I have an extra.
	ask for this change. I believe, if I look back far	1	MR. AYOTTE: Mike, this is what
	enough in these proceedings, that will be one of our	17	you guys have put together? MR. WORTHINGTON: It's what was
	original worries whether what the PBMs are doing is		sent to us.
	culpable by having, basically, a kickback problem.	18	CHAIRMAN TEEFEY: That was sent to
	And, I would rather you look there and look into		US.
	looking whether or not this really is a cheaper	20	MR. AYOTTE: Can you identify it
	alternative for a drug, that there are two of them	1	for us, please?
	out on the market.	22	MR. WORTHINGTON: For each one?
24	DR. BLANCHARD: Mr. Chairman?	23	MR. WORTHINGTON: FOI each one? MR. AYOTTE: Yes.
25	CHAIRMAN TEEFEY: Dr. Blanchard.	24	
<u> </u>	CUMINIAN TEEFET, DI. DIANCHALU.	25	MR. WORTHINGTON: Sure, as I go

CRANE-SNEAD & ASSOCIATES, INC.

1	through it. Does everyone have a copy? That's it.	1	that's tough to recommend to the General Assembly.
	That's correct.	2	So, my option is, if we can't come up with something
3	SENATOR NEWMAN: Mr. Chairman?	3	that is strongly supported by the data, then we
4	CHAIRMAN TEEFEY: Yes, sir.		consider rolling this study over until next year, and
5		1	we can get a better holistic approach to be given to
6	going, I do think we all need this in our hands.		the General Assembly.
	But, if anybody in the audience needs this, could we	7	It's not a motion yet, Mr.
	also have some available to interested people out	8	Chairman, because I think we need to hear all of the
	there? There are copy machines all over this	1	options that are in front of us.
	building that can run out as many as is necessary.	10	MR. WORTHINGTON: Senator Newman
	Can we have that?		refers to the Harvey Morgan Study. It's technically
112	CHAIRMAN TEEFEY: Here is an extra	1	HJR 574. The School of pharmacy at the Medical
113	one.		College of Virginia will be doing that study for the
14	MR. WORTHINGTON: Would you like		Department, and it is due to us about this time next
	to take a break and allow for that? Five minutes or		year. That's the technical name for it.
	so?	16	I will briefly, very briefly,
17	CHAIRMAN TEEFEY: We'll be with		simply review the six propositions, if you will, that
	you in a minute.	1	you have in front of you, and then I will turn it
19	MR. WORTHINGTON: Okay.	1	over to Dr. Pyles who has three or four more that
20	Are we ready? Yes, ma'am?		have been submitted. You'll notice that the six that
21	MS. POWELL: Could we ask Senator	1	are in front of you are pretty much dichotomized into
1	Newman to review the option that he has on the floor		those that require legislative action and those that
	for us?	1	require regulatory action by, I believe it's three
24	CHAIRMAN TEEFEY: Yes. Senator	1	different State agencies.
- ·	Newman, can you remember it?	24	Proposition Number 1, submitted
F		25	
	Page 54		Page 5/
	SENATOR NEWMAN: Well, nobody	1	by Mr. Ken McArthur.
	likes my option. But, my option is this: There is	2	MS. WARRINER: Mike, can I just
•	an ongoing study out there to study the effects of		have point of clarification on these?
	the core issue that we are talking about here, and	4	MR. WORTHINGTON: Yes.
1	that is the Morgan Study looking at PBMs.	5	MS. WARRINER: Those that were
6	As I have reviewed the		submitted by Ken McArthur were also endorsed by the
r	information that's come in, we have a lot of		Virginia Pharmacists Association.
	expertise here. I think I've gained new friends	8	MR. WORTHINGTON: Okay.
	here. But, a core issue is yet to be decided by that	9	MS. WARRINER: I just didn't want
10	group.		Ken, Ken, Ken, Ken.
11	I believe that it may be of some	11	MR. WORTHINGTON: Thank you.
	assistance to this committee to consider the option	12	MR. COUNCIL: I'm sorry to
L	of continuing this study, which would be a huge		interrupt, but what's the source of these
	change no matter what we recommended and the General	14	propositions?
1	Assembly would have to approve almost all of the	15	MR. WORTHINGTON: I will do that
	changes we have come up with, until a full amount of		as I go through each one.
	information can be provided by the other group that	17	Okay, the first one?
1	studied it. The other side of it is that we simply	18	MS. WARRINER: Yes.
1	have gotten very little information. True empirical	19	MR. WORTHINGTON: All six, Cindy,
	data that we need has been told to us by staff is	20	is that correct?
21	simply not available and not out there.	21	MS. WARRINER: Yes.
22	I don't think that we can go into	22	MR. WORTHINGTON: Well, they're
23	the General Assembly very well and say we really	23	six submitted by Mr. McArthur and all endorsed by the
24	think that what you ought to do is this, but our	24	Virginia Pharmacy Association. I'll get that out of
25	basis is that we don't have much basis. I think	25	the way right now.

In addition to the ones that Senator Newman and I have been discussing over here that we need to, preserving the ethics of all practices involved here, that we tend to want to involve ourselvesrely more heavily on the free market system and less on legislative solutions. I have to admit I'm very pessimistic about the ability of a Task Force such as this, either today or one year from today, being able to micromanage this practice of therapeutic substitution or therapeutic interchange. I would hope that the basic tenets, though, are that we would have to admit that, although we have, as representatives of the Commonwealth, a lot of disparate interests to protect	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	documents, I don't find any contention necessarily with the managed care contention. I'm going to quote from several of the documents, "A well-developed and well-managed formulary may enhance quality of patient care by encouraging physicians to prescribe medications that are safe, effective, and likely to produce the best possible outcomes. Such a formulary may help patients and physicians to have access to the best and most effective drugs on the market." I would like to hope that we could conclude that. Nevertheless, it seems to me that the public seems worried about the process. Its concern that it may affect patient outcomes; it may increase patient inconvenience; it may undermine the professional trust placed in doctors and pharmacists, and I think we have debated at length the relative		
2 3 4 5 6 7 8 9 10 11 12 13 14 15 16	conclusions, though, I think I had to assume that we would agree on three or four points. In the materials that were provided in several situations, but, in particular, in April, 1997, report from the United States Office of the Inspector General, revealed to me a surprising lack of oversight over PBMs, much more oversight over the HMOs than there are over the PBMs. They clearly say that the pharmacy benefit management companies have emerged as significant players, and I did not hear anybody refute their findings that, among other things, the HMOs' biggest concern about PBMs is their result in potential bias from their alliances with pharmaceutical manufacturers. The Inspector General this year said that HMOs rely primarily on PBM supplied data	
2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2 2	Page 70 way. It seems inconsistent with me that if there is a soul left in the practice of pharmacy, that the pharmacist would want to protect this ethical relationship. In all the discussions we've had, the only person, other than the physician, who has an "ethical relationship" with their patient as opposed to a business relationship, is the pharmacist that has been protected through a lengthy history from the Board of Pharmacy. It seems to me that the Task Force would want to find it, though, a preferable approach compared to the bill last year that tried to define what unacceptable behavior was and got into trouble, quite frankly, because it is next to impossible to go down the list and try to determine everything that might be conceivably deemed to be objectionable. It	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17	Page 72 In particular, we have heard testimony on this subject. 1	poorest are going to drop off the bottom.	1	With regard to Recommendation 3,		
2	My concern is, if we go with the	2	again I would ask, and let me make two comments on		
· 3	approach that is presented here, I think it will	3	that. Is it really appropriate for this Task Force		
, 4	represent the largest change that the General	4	to make recommendations to the General Assembly about		
5	Assembly has ever requested and may very well have	5	a private association? Now, having said that, this		
6	the worst effect on the low incomes that are, and the	6	issue is, in fact, being discussed. We had a		
7	lower-end jobs that are right now teetering on	7	committee meeting just last week with the Medical		
8	whether or not their insurance company, their	8	Directors and the Virginia HMO Association in which		
9	insurance is going to be continuing. So, I have,	9	this issue and all aspects of the therapeutic		
10	specifically, a lot of other little concerns. But,	10	substitution interchange was discussed. So, I think		
	on a holistic basis, I think this is good argument	111	that that issue is being appropriately dealt with.		
	for considering continuation of the study.	12	We have presented a survey to show, in fact, that		
13	-	13	those that have closed formularies have the		
14	some comments?	14	appropriate appeal mechanisms, and we think that this		
15	MR. AYOTTE: Yes. I have a	1	issue will be appropriately handled there.		
16	concern with Recommendation Number 1. As a	16			
	pharmacist, I think that, and with Dr. Dalton's	17			
	earlier conversation, the conversations between the	18			
	pharmacist and the doctor keep them in the loop.	19			
	When something occurs that, A, may save a patient	20	formulary benefits are not just coming from the HMOs.		
	some money or may be beneficial to the patient is		We're probably in the minority of this, if you look		
	completely taken out and "made in an unethical	22			
	contact," I think that the triangle of health care is	23	that. Again, we talked about some of the		
	there. For eight, nine years now the pharmacist has	1	employer-specific plans. More and more I have		
	been one of the most respected professionals. I	1	just got a survey that shows that the		
	Page 82		Page 84		
1 1	think you're making him, in the eyes of the world, a	1	employer-specific plans are gradually increasing.		
	criminal, a money grubber. I just think that if the	1	Many of the PBOs, what they call in certain indemnity		
	doctor has the ultimate control and can say yes or	1	programs of which I have no idea how many millions of		
	no, and the pharmacist uses good decision-making		people would be covered in the Commonwealth of		
1	processes and doesn't just make that call, which I		Virginia, many of them have managed formulary benefit		
	don't think is happening, I really believe that we	1	programs.		
	can go with just the current Board of Pharmacy issues				
	that protect the patient and give the doctor that	1	Virginia HMO Association and say they're the only		
	control and make the pharmacist call the doctor, but	1	ones that have to deal with this issue, what the		
	loop in those people that don't have current control	1	circumstances are under which you should allow, shall		
	of the Board of Pharmacy.		we say, exceptions to the formulary and allow these		
12	I would think that the original		transition kinds of issues, just doesn't get at the		
	one that takes in out-of-state prescriptions would	1	heart of the problem. Because, again, this problem,		
1	help us more there because that seems to be the area		this issue goes way beyond the Virginia HMO		
	of the most concern.		Association. So, again, I think I'd have a very		
16	CHAIRMAN TEEFEY: Any other	16			
1	comments?	17			
18	DR. HADLEY: Mr. Chairman. I	18			
19		19			
	very hard time supporting Recommendation Number 4,	1	there would be more than two people taking pot shots		
	the issue of medical liability to PBMs. I mean, we	1	at this. But, if I can rebut them to some extent or		
	haven't even discussed that issue, and I think it is		at least discuss them as they go along, it might		
	a complex one. And, to bring that up at the Eleventh		help. With respect to singling out the Virginia		
	Hour seems to me to be inappropriate and it would be	1	Association HMO, I view this in a different light and		
	difficult to support that.	4	that is that there has been lots of lobbying, to me,

	Page 89		Page 9
	es. We acknowledge that whether it's the		companies and on their formularies they have drugs
	oice or the doctor's choice, it		that they get at a discount. Now, is that a kickback
	ends up determining the care that the	3	or is that a discount?
	. But the following sentence is always,	4	The other thing is, if a drug is
	t really practice the medicine, the doctor		on a formulary and the pharmacist tries to change
	l say. It may be appropriate to change		that drug because the pharmacist is getting a
	dation 4 to have the Legislature study the		kickback, that's another thing. But, the more I hear
	ness of any legislation regarding the		in here, and I am talking from a layman's viewpoint,
9 liability of :			now, I'm not talking as a pharmacist or a doctor, and
10	I have circulated an article in		I think I'm probably the only layman up here, but I
	Business Section of the Times-Dispatch by		have one lawyer up here. He's going to defend me. The
	t Quinn, I think, talking about the changes		only thing I'm trying to say is, is the problem as
	Country with respect to managed care		big as we think it is because are most of the
-	nd some degree of liability. Threatening	1	switches related, are most of the requests for
	with liability is not the same as trying to		switches related, because the drug is not on the
	out of business. It's simply a question of	16	formulary, and, therefore, they're trying to get a
	ep people appropriately accountable. I	17	drug for the patient that is on the formulary? I
	ad in the past two weeks several legal		think that's one case.
	t the changing nature of the degree to	19	
	and the stuff determined by the Department		separate those two things, because I have a feeling
	f they have a supervisory role, and its	1	that a small fraction of the switch requests are
22 relationship	with ERISA plans.	1	requests that a person wants to switch a drug that's
23	There is a growing body of legal		already on the formulary. And, I think, when we look
	at is beginning to apply general public		into the final report, and I don't know, and I don't
25 safety issue	s to what previously have been ERISA	25	think we're going to know that until after we get the
	Page 90		Page 9
	ans. I don't know which way that is	1	study back that Senator Newman was talking about. I
	of course, in their own thing. But, to	2	think if we jump to conclusions and make

<ul> <li>4 because it is</li> <li>5 Medicaid, it</li> <li>6 ERISA, fails</li> <li>7 least, set the</li> <li>8 control and</li> <li>9 programs ar</li> <li>10</li> <li>1 still have to</li> <li>2 have got two</li> <li>3 that we're ta</li> </ul>	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture	4 5 6 7 8 9 10 11 12 13	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is
4 because it is 5 Medicaid, if 6 ERISA, fails 7 least, set the 8 control and 9 programs ar 10 11 still have to 12 have got two 13 that we're ta 14 drugs, becau	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic	4 5 6 7 8 9 10 11 12 13 14	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it
<ul> <li>4 because it is</li> <li>5 Medicaid, it</li> <li>6 ERISA, fails</li> <li>7 least, set the</li> <li>8 control and</li> <li>9 programs ar</li> <li>1 still have to</li> <li>2 have got two</li> <li>3 that we're ta</li> <li>4 drugs, becaus</li> <li>5 is on a form</li> </ul>	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it	4 5 6 7 8 9 10 11 12 13 14 15	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we
4 because it is 5 Medicaid, it 6 ERISA, fails 7 least, set the 8 control and 9 programs ar 10 11 still have to 12 have got two 13 that we're ta 14 drugs, becau 15 is on a form 16 drugs. I thin	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the nk we're talking about two different	4 5 6 7 8 9 10 11 12 13 14 15 16	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have their own formularies. They come up with their own
<ul> <li>4 because it is</li> <li>5 Medicaid, it</li> <li>6 ERISA, fails</li> <li>7 least, set the</li> <li>8 control and</li> <li>9 programs ar</li> <li>10</li> <li>11 still have to</li> <li>12 have got two</li> <li>13 that we're ta</li> <li>14 drugs, because</li> <li>15 is on a form</li> <li>16 drugs. I thin</li> <li>7 things. If it'</li> </ul>	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the	4 5 6 7 8 9 10 11 12 13 14 15 16 17	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have
<ul> <li>4 because it is</li> <li>5 Medicaid, it</li> <li>6 ERISA, fails</li> <li>7 least, set the</li> <li>8 control and</li> <li>9 programs ar</li> <li>1 still have to</li> <li>2 have got two</li> <li>3 that we're ta</li> <li>4 drugs, becaus</li> <li>5 is on a form</li> <li>6 drugs. I thin</li> <li>7 things. If it'</li> <li>8 pharmacist of</li> </ul>	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the nk we're talking about two different s not on the formulary and the calls back and that drug is not covered,	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have their own formularies. They come up with their own programs. And do we have any control over that
<ul> <li>4 because it is</li> <li>5 Medicaid, it</li> <li>6 ERISA, fails</li> <li>7 least, set the</li> <li>8 control and</li> <li>9 programs ar</li> <li>10</li> <li>1 still have to</li> <li>1 atill have to</li> <li>1 atill have got two</li> <li>2 have got two</li> <li>3 that we're ta</li> <li>4 drugs, because</li> <li>5 is on a form</li> <li>6 drugs. I thing</li> <li>7 things. If it'</li> <li>8 pharmacist of</li> <li>9 that's one the</li> </ul>	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the nk we're talking about two different s not on the formulary and the calls back and that drug is not covered, hing. If it is on the formulary and the	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have their own formularies. They come up with their own programs. And do we have any control over that anyway? So I think we've got a bushel of a lot of
<ul> <li>4 because it is</li> <li>5 Medicaid, it</li> <li>6 ERISA, fails</li> <li>7 least, set the</li> <li>8 control and</li> <li>9 programs ar</li> <li>10</li> <li>11 still have to</li> <li>12 have got two</li> <li>13 that we're ta</li> <li>14 drugs, becau</li> <li>15 is on a form</li> <li>16 drugs. I thin</li> <li>17 things. If it'</li> <li>18 pharmacist of</li> <li>19 that's one the</li> <li>10 pharmacist of</li> </ul>	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the nk we're talking about two different s not on the formulary and the calls back and that drug is not covered,	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have their own formularies. They come up with their own programs. And do we have any control over that anyway? So I think we've got a bushel of a lot of appeals here. SENATOR NEWMAN: Mr. Chairman?
4 because it is 5 Medicaid, if 6 ERISA, fails 7 least, set the 8 control and 9 programs ar 11 still have to 12 have got two 13 that we're ta 14 drugs, becaus 15 is on a form 16 drugs. I thin 17 things. If it' 18 pharmacist of 19 pharmacist of 10 pharmacist of 11 wants it swi	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the nk we're talking about two different s not on the formulary and the calls back and that drug is not covered, and the drug is covered and he	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have their own formularies. They come up with their own programs. And do we have any control over that anyway? So I think we've got a bushel of a lot of appeals here.
4 because it is 5 Medicaid, if 6 ERISA, fails 7 least, set the 8 control and 9 programs ar 10 11 still have to 12 have got two 13 that we're ta 14 drugs, becau 15 is on a form 16 drugs. I thin 17 things. If it' 18 pharmacist of 19 that's one th 20 pharmacist of 21 wants it swi 2	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the nk we're talking about two different s not on the formulary and the calls back and that drug is not covered, hing. If it is on the formulary and the calls back and the drug is covered and he itched, that's another situation. The problem is, I'm sure, and, in	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have their own formularies. They come up with their own programs. And do we have any control over that anyway? So I think we've got a bushel of a lot of appeals here. SENATOR NEWMAN: Mr. Chairman? CHAIRMAN TEEFEY: Yes, Senator
4 because it is 5 Medicaid, if 6 ERISA, fails 7 least, set the 8 control and 9 programs ar 10 11 still have to 12 have got two 13 that we're ta 14 drugs, becau 15 is on a form 16 drugs. I this 17 things. If it' 18 pharmacist of 20 pharmacist of 21 wants it swi 22 the original	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the nk we're talking about two different s not on the formulary and the calls back and that drug is not covered, ning. If it is on the formulary and the calls back and the drug is covered and he itched, that's another situation. The problem is, 1'm sure, and, in Bill, if there was any type of financial	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have their own formularies. They come up with their own programs. And do we have any control over that anyway? So I think we've got a bushel of a lot of appeals here. SENATOR NEWMAN: Mr. Chairman? CHAIRMAN TEEFEY: Yes, Senator Newman. SENATOR NEWMAN: I'm sorry. I'm
4 because it is 5 Medicaid, if 6 ERISA, fails 7 least, set the 8 control and 9 programs ar 10 11 still have to 12 have got two 13 that we're ta 14 drugs, becau 15 is on a form 16 drugs. I thin 17 things. If it' 18 pharmacist of 19 that's one th 20 pharmacist of 21 wants it swi 22 the original 24 strings to that	s ludicrous because it won't cover t won't cover Medicare and it won't cover to take into account that you've, at e stage appropriately for what we do other forces will determine what other re covered. CHAIRMAN TEEFEY: But, I think we keep two things in mind. I think we o pictures here. We have got one picture alking about switching drugs, therapeutic use it's not on a formulary. And, if it nulary, we are talking about switching the nk we're talking about two different s not on the formulary and the calls back and that drug is not covered, hing. If it is on the formulary and the calls back and the drug is covered and he itched, that's another situation. The problem is, I'm sure, and, in	4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24	recommendations, when we get back to the General Assembly and discuss this next year, if we do make a recommendation, if it's going to hold any water, and I think we will have wasted the whole time that we have spent here by jumping to conclusions in making recommendations. I just, I keep hearing that and I keep hearing the conflict, is it really switching when it's not on the formulary and the person is going to get nothing? And then when Jimmy said, it shines a whole other light on this thing, that we have businesses and we have businesses that have their own formularies. They come up with their own programs. And do we have any control over that anyway? So I think we've got a bushel of a lot of appeals here. SENATOR NEWMAN: Mr. Chairman? CHAIRMAN TEEFEY: Yes, Senator Newman.

1	though I may disagree with the broad nature of this,		these issues are very prevalent and as big as we're
2	I'm wondering, Mr. Chairman, if we may hear from,	2	making them out to be here, and it may not be.
3	maybe in a five-minute form, the proponents and	3	
4	opponents of this proposal that are out there. At	4	We're going to take a break.
5	least, we get the benefit of their input on it, and	5	
	then we can discuss it. And let's vote and see what	6	NOTE: At this point, a recess was
7	we think about this so that we can move on.	7	had from 10:35 a.m. to 10:46 a.m., whereupon the
8	CHAIRMAN TEEFEY: All right. We	8	hearing proceeded, viz:
9	have one person from each side. Do you want	9	
10	MS. PIGG: Can we take a break?	10	CHAIRMAN TEEFEY: All right. Let's
11	CHAIRMAN TEEFEY: Yes, can we take	11	get started again, if we can. All right. We're going
12	a break and let me choose	12	to have Mr. McArthur and Mr. Jenkins respond to the
13	MR. COUNCIL: Could I ask Dr.	13	Doctor's proposals. And who wants to go first? Oh,
	Blanchard one question, because I had to have heard	14	I'm sorry, Wyatt.
	this wrong? I think you said, Dr. Blanchard,	15	MR. JENKINS: I'll be happy to.
	something to the effect that the formulary de facto	16	Thank you, Mr. Chairman and Members of the Task
17	became the prescription because of 90-some percent	17	Force. My name is Matt Jenkins, and I am retained by
	acquiescence by the physician? I'm sure I didn't get	18	Rite Aid. But, as many of you know, I have been
19	that right. What was the comment?	19	functioning somewhat as a coordinator for an ad hoc
20	DR. BLANCHARD: That's pretty	20	coalition of persons and entities that are concerned,
21	close.	21	and I want to be careful, as I make these remarks,
22	DR. PYLES: That's pretty close.		that I don't purport to speak for persons who haven't
23	DR. BLANCHARD: The studies I have	23	authorized me to do so. But, in deference to the
24	seen show that whether formulary is minimally	24	Chair's wish that we try and do this one side to
25	restricted or tremendously restricted, doctors end up	25	another, I will ask the indulgence of those entities
	Page 94	Τ	Page 9
1	having their prescriptions okayed or originally	1	on whose behalf I have been communicating, and if
2	written 95 percent of the time on formulary. So,	2	they disagree with what I say, they are free to
3	whereas they may prefer to have some other drug,	3	please note that.
4	because of the pressure of either the patient saying,	4	I'm responding somewhat to Dr.
5	I don't have it covered or the pressure of HMOs	5	Blanchard's proposal on the fly, having only seen it
6	evaluating what percentage of the time you write on	6	this morning. But, I have several concerns about the
7	formulary or off formulary, you end up writing,	7	appropriateness of these as recommendations to be
<sup>-</sup> 8	according to the directive of the PBMs formulary	8	adopted by the Task Force, and I will tick them off
9	decision. And, in essence, that does determine the	9	in numerical order.
	drugs the patient ends up getting, because the doctor	10	I'll point out that the first
	is basically stuck in the position of picking from	11	recommendation, if I read it right, would make it
12	the drugs from that company.	12	unethical and inconsistent with accepted practice of
13	MR. COUNCIL: Isn't the corollary,	13	pharmacy for a pharmacist in Virginia to call a
14	I mean, assuming the physician is doing his job,	14	physician and inform the physician that the drug he
	isn't the corollary that in ten percent of the cases	15	has prescribed for the patient, cash-paying patient,
•	it is very significant to the patient and those are	1	is much more expensive than a therapeutically
	the ones where the doctor would not approve the	1	interchangeable alternative and would the physician
1	switch?		wish to know that, because the patient might
19	DR. MOFFATT: Five percent.		otherwise not elect to have the prescription filled.
20	MR. COUNCIL: Five percent, okay.		And the Chair noted earlier that the one person about
21	DR. BLANCHARD: My only other		whom we most wish to remain concerned is the right of

Ken McArthur has been covering this hearing, as all of you know, and has spoken to you on several occasions, and so I have talked with him about this and want to make just a couple of observations.
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 .2	With respect to the third recommendation, I think that Dr. Hadley's comments and the comments of others have indicated that the Virginia Association of HMOs is, as a body, on top of this issue, and is, as a body, looking at best practices within the industry, and, as a body, will probably find that those who practice the best practices are probably going to be the most financially successful. And, I think, as in life, and so is true in business, imitation is a sincere form of flattery and it's also a way to fund profitable behavior and emulate it. And, from what I understood earlier, there are HMOs that are attacking this problem, and they're finding it to their benefit and the benefit of their members to deal with this. With respect to the fourth recommendation, I am astonished by this recommendation in that what Mr. Council said earlier, I think, rings very, very true. If we wish to see entities running away from the provision of any type of benefit, put them in the line of fire on liability. If you wish to impose upon entities that	1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22	think, send a message that people ought to be thinking about this in the private sector and, to my knowledge, they are. Thank you. CHAIRMAN TEEFEY: Thank you, Mr. Jenkins. Mr. Durrette? MR. DURRETTE: Thank you, Mr. Chairman and Members of the Committee. My name is Wyatt Durrette and, along with Ken McArthur, we represent a group of independent pharmacies in Virginia. I speak for them, and I think, in part, for the Virginia Pharmacists Association. But, like Mr. Jenkins, I am looking at these recommendations for almost the first time. I was able to glance at them last evening. Ken McArthur has been covering this hearing, as all of you know, and has spoken to you on several occasions, and so I have talked with him about this and want to make just a couple of observations. I am going to start inversely
3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23	With respect to the third recommendation, I think that Dr. Hadley's comments and the comments of others have indicated that the Virginia Association of HMOs is, as a body, on top of this issue, and is, as a body, looking at best practices within the industry, and, as a body, will probably find that those who practice the best practices are probably going to be the most financially successful. And, I think, as in life, and so is true in business, imitation is a sincere form of flattery and it's also a way to fund profitable behavior and emulate it. And, from what I understood earlier, there are HMOs that are attacking this problem, and they're finding it to their benefit and the benefit of their members to deal with this. 	will be for the next few weeks, representing a		a consensus, on something. Remember, however, that
	Virginia business in a malpractice suit against a law	2	what motivated those of us who promoted this
	firm, and I am the trial attorney. So, the issue of	1	legislation originally and accepted this Task Force
	liability attached to making decisions that have	1	as a compromise was not because the individual
	consequences for people's lives is one that needs to	5	pharmacist in his or her store, whether it was a
	be seriously considered, whether or not you adopt a	6	chain store or a community pharmacy, was creating the
	recommendation or a recommendation that it be	7	problem associated with therapeutic interchange or
	studied. Those who make decisions in the marketplace,	8	drug switching. It was the corporate entities that
	effectively de facuo decisions, that have	9	were driving the practice.
10	consequences, need to be held accountable.	10	Whether they were PBMs, whether
11	Now, they can be held accountable	11	they were HMOs, whether they were the new arrivals to
	by Government or they can be held accountable in the	1	the drug-switching marketplace, chain drug stores, no
	private sector. But, part of being held accountable		matter which corporate entity it was, it was those
	in the private sector is being financially	14	corporate entities driven by the profit motive, which
15	responsible for those decisions if a Plaintiff can	15	all of us who believe in the free market endorse the
	prove, in a Court of law, that those decisions	16	profit motive, but we know from a long series of
17	proximally caused harm. Now, if it is correct that	17	legislation from antitrust laws to preventing
	physicians prescribe from the formulary in 95 plus	18	drive-through mastectomies, we all know that
	percent of the time, then the formulary becomes, de	19	Government regulates the profit motive, to some
	facto, the controlling authority for the prescription	20	extent, when it's in the public interest to do so.
21	that's written. If the physician overrides it, nobody	21	So, don't lose focus on the fact
	has to worry about it. But, to the extent that that	22	that it's not the individual pharmacist standing
	has become the decision because the physician is	23	behind the counter that is driving this practice. It
	busy, the pharmacist is busy, the appeals process is	24	is the corporate entities who stand to profit from
25	too protracted and too prolonged or for whatever	25	this practice that are driving it. And let that be
	Page 102		Page 104
1	reason, then, if there is harm to the consumer, to	1	part of your thought process.
2	the patient, why shouldn't the one who made the	2	Finally, with regard to the
3	decision be accountable? At least a recommendation	3	Recommendation Number 2, I think that given the
4	to look seriously at that ought to be made.	4	changing nature of the marketplace, the moving target
5	Now, Recommendation 1, to go back	5	that all of this has proven to be over time, the fact
6	to that, and to go to, first of all, to Matt's	6	that the marketplace, as we know it today, is not the
7	comment regarding the cash-paying patient, I think	7	same marketplace that it was last year at this time,
8	he's right. I think Recommendation 1, as written,	8	and it won't be the same one next year at this time.
9	would affect a phone call that ought to be made and	9	So, having the appropriate regulatory body look at
10	would make that unethical. I don't think the Board of	10	these practices with respect to governing them and
1	Pharmacy would literally do that. So, I would suggest	11	regulating them and licensing them seems to me to be
2	that you look at Number 1 and that you either	12	a step in the right direction.
13	consider broadening it or make its language more	13	With respect to the certification
4	general so that the Board of Pharmacy can look at the	14	and decertification, that's no different than
	practice of pharmacy from the standpoint of its		licenses that anybody has. If you're licensed by a
16	ethics and how appropriate conduct by pharmacists		regulatory body, you're expected to conform with the
17	would influence the communication between ph :rmacist		standards associated with your license, and, if you
8	and physician.	1	don't, you lose it. And if you don't have that
19	Now, in that regard, let me say		enforcement mechanism, it's a toothless tiger. So, I
20	that while we believe these proposals, to some	20	think Recommendation Number 2 is solid, and ought to
21	extent, move in the right direction, we believe they	21	be passed.
22	have some shortcomings, and so we don't, I don't	22	Finally, Number 3, I would have
	necessarily bless them all enthusiastically. But I do	1	I would make it broader. I don't think there is
	believe that this Task Force needs to come forward		any The HMO Association probably is of less
25	with some kind of recommendations, if they can reach	25	concern to many of us than the pharmacy benefit

1	management firms. They have an association. So I		have an automobile and I have air bags on both sides
	would say for Number 3 that, perhaps, it needs to be		of my automobile. I have another automobile that has
	more generic, maybe naming no association in		air bags on one side and not on the other. If I have
	particular, but encouraging all associations that	1	an accident and the passenger in my car is killed, is
	have for its, for their membership, companies who		the manufacturer responsible? You're saying, no, the
	engage in this practice to do what Recommendation		manufacturer is not responsible. Well, I'd stop
	Number 3 anticipates or have the General Assembly		selling that car if I was the auto dealer, because
	consider it.		what we are saying is, if I make a decision not to
9	So, Mr. Chairman, those are my		have a drug on a plan, and I pass it off to the
10	comments.		person that's selling that product and handling that
11	CHAIRMAN TEEFEY: Thank you, sir.	,	product for me, then that person is liable for that
12	MR. COUNCIL: May I just ask Mr.		product. I think we've got to look at the air bags
	Durrette a couple of questions?		on automobiles.
14	CHAIRMAN TEEFEY: Can I ask one	1	
		14	1
	question on liability? And I know we have a lot of		automobile, I don't think that the manufacturer is
	lawyers in here. Let's say that I'm a company and I		responsible and I don't think the dealer is
	set up a drug benefit for my employees, and I leave a	1	responsible because that person bought that
	drug off of there. And what we're saying in here is,	1	automobile that only had an air bag on one side. I
	if I leave that drug off, then I am liable? I could		think we're talking about the same thing here as
	be liable for leaving that drug off, because it's in		we're talking about automobiles, as we're talking
	the PDR?	21	5 / <b>.</b>
22	MR. DURRETTE: Well, the	1	that's why I want it, because I know Matt made an
	question	23	inference to it.
24	CHAIRMAN TEEFEY: Let me ask you	24	
25	MR. DURRETTE: Just one second,	25	CHAIRMAN TEEFEY: Number 4.
	Page 106		Page 108
1	though.	1	MR. DURRETTE: Okay.
2	CHAIRMAN TEEFEY: Yes.	2	CHAIRMAN TEEFEY: The liability.
3	MR. DURRETTE: The question, who	3	And, you know, I just wanted to bring that out about
4	do you attach that liability to? I would not, when I	4	the air bags, because I think we're talking about the
5	say I have mixed emotions about all this, I would not	5	same thing.
6	attach it to the employer. I think all of us know	6	MR. DURRETTE: Well, I don't, if
7	I think this is the real world. The real world is	7	you want me to, I could talk for about ten minutes on
8	that the employer contracts with the PBM or an HMO	8	the difference between your hypothetical on the air
9	and there may be formulary in existence at that	9	bags and the drug-switching program from the
10	time. I don't think anybody for that employer knows	10	standpoint of a lawyer, but I don't know that that's
	what drugs are on that formulary or off that	1	profitable. They're not the same thing, and they
	formulary. And that formulary is only going to last	1	would not have the same liability consequences.
	for three months or six months until some	13	CHAIRMAN TEEFEY: It's both. It's
14	manufacturer gives that, whoever creates that	1	both health.
	formulary a better deal, and then it's going to be a	15	MS. WARRINER: Mr. Chairman, point
	different formulary than the manufacturer got at the	16	of question. I think you were, and maybe I'm wrong
	time of the contract, and he ain't going to have any		and maybe Dr. Blanchard can clear it up, I don't
	idea what the employer got at the time of the		think it was talking about full liability, Joe. I
	contract. He doesn't have any idea what's on the	1	think they were talking about a shared liability.
	formulary. So, I would not extend the liability to		Right now they hold no liability.
,	the employer, but to whoever makes the decision to	21	CHAIRMAN TEEFEY: No, I don't
	say you can have this drug, but you can't have that	1	think you're right, Cindy. I don't think you have
	one, unless you pay for it.	1	shared liability. I think the one that hassomebody
24	CHAIRMAN TEEFEY: All right. And	1	ends up with the full liability.
1	let me put one other picture out here. Suppose, I	25	MR. DURRETTE: Well, in most
25			

### **CondenseIt**<sup>™</sup>

		2115	
	Page 109		Page 111
	instances it's shared. There is a concept called	1	mean, it clearly pulls in the plan sponsor. It would
	joint and several liability and sometimes it applies	2	make him liable. The sponsor is the one that's
	and sometimes it's doesn't. But, usually, anybody	3	providing the pharmacy benefits, and I reiterate what
	that's It depends on all the facts and	4	I said earlier on this morning. I think any kind of
	circumstances of what you're talking about. But,	5	legislation like this can only reduce the number of
	most of the time there is going to be more than, it	6	employers that are going to be willing to undertake
	could be more than one person liable. And, in this	7	this liability and provide a benefit. I would,
	particular content, the pharmacist may have a	8	secondly, say as to PBMs, for all that they're being
	liability, individually, and his corporate employer	9	hammered about some of their practices here, the
	may have liability. The physician may have liability	10	general thought, as it was my impression, was that
	and, under certain circumstances, depending on where	11	PBMs, in fact, have done a lot of good in delivering
	the Courts go, the corporate employer may have	12	pharmacy benefits.
	liability. And the question is, should anyone else	13	I cannot imagine that a PBM can
14	have liability in this chain?	14	charge somebody six cents to process a claim and
15	And, all Number 4 suggests is, is	15	undertake this kind of liability. I mean, it is going
16	that if the decision is initially driven by somebody	16	to dramatically change the industry, and it's going
	who chooses this drug on and this drug off, and, down	17	to have a negative long-term consumer impact.
18	the chain, at the end, the patient suffers harm, why	18	MR. DURRETTE: Mr. Council, if
19	should liability stop where the decision began in the	19	what you say is true, then there must be a horrible
20	first place? Why shouldn't that decision-making	20	risk to the public associated with drug switching,
21	process be included in the liability chain?	21	because there would have to be a lot of injuries and
22		22	a lot of lawsuits and a lot of claims. So if you're
23	back to my air bag. That's the same situation with my	23	right that creating liability for the consequences of
24	air bag. I wear two hats. I have another hat that I	24	drug switching would put PBMs out of business and
25	have 850,000 people uninsured, and we have been	25	drive up the cost of health care and eliminate
	Page 110	1	Page 112
1	battling for years as to how to get 850,000 people		pharmacy benefit programs, then there are a lot of
	insured. I don't want to create a situation where		injured people walking around out there because of
3	I'm going to have six million people uninsured. You	1	this practice who now don't have the right to sue.
1	know, I have people right in this room that speak to	4	MR. COUNCIL: Well, now you're
	the people that are uninsured, that are speaking to	5	suggesting that intelligent companies don't look
	this with the possibility of putting more people on	1	around and try and waive risk before they're sued
	the uninsured list, and hypocrisy is not real good.		themselves, and I don't think that's so.
1	You can't sit, you can't have it both ways, and	8	MR. DURRETTE: I'm saying there
4	that's why I brought out the situation with the air	9	isn't the risk right now because there is no
	bags. I mean, I just don't want us to get into a	1	liability for that practice.
	position where we force more people, where we force	11	MR. COUNCIL: Another comment I'd
	companies to drop insurance or pharmacy benefits.	1	just like to make, and this has been said a lot here.
	Because here are these same people that are fighting		I would agree that a plan sponsor may not know what
	for certain things in here always talking about	1	particular drugs are on or not on a formulary. But,
	pharmacy benefits where there are not enough, they	1	I think it's a real misperception to think that the
1	need more, et cetera, and that's why I brought out my		PBMs are undertaking these practices without the plan
	air bag situation, because I think it is the same	1	sponsor's knowledge and consent. I'd just cite a
1	thing we're talking about.		couple of examples. The last four State employee
19	MR. COUNCIL: A couple comments,	1	plans that I have seen go out for request for
20	if I may, Mr. Chairman.	1	proposals, one of the first things in the cost
21	CHAIRMAN TEEFEY: Yes, sir.	4	section they want to know is how much of the rebate
22	MR. COUNCIL: I know Mr. Durrette	1	am I going to get? And what they're hoping you're
23	said that he is just seeing this language, and he	1	going to do is you're going to respond, we will give
	would make modifications to it, also. But, that's	1	you a hundred percent of the rebates. They are fully
	not what Recommendation 4 says as it's written. I	4	aware of what's going on in this field. Medicaid,
		1	

H	HJR 630 Condenselt <sup>TM</sup>						
	Page 113		Page 115				
1	it's my understanding they get a hundred percent of	1	stated. I don't think the employer is involved in				
	the rebates.	1	the decision as to which drug is available and which				
. 3	So, I can't tell you what's on my		drug isn't. So, to the extent that Proposal 4				
. 4			extended to the employer, that would be one of the				
5	But, the employers that are paying for those plans	1	things that I might disagree about. Because I don't				
•	have a good general idea about what's going on in	1	think the employer makes the decision. And, in order				
	relation to formularies and rebates. In addition to	1	to be accountable legally, I think you have to make				
	that, there have been recent cases interpreted in	1	it, you have to consciously or carelessly do				
	Department of Labor Regulations that basically say,		something that causes harm to someone else. I don't				
	the failure to disclose what rebates are received and		think the employer does that.				
	whether they're shared back with the plan sponsor can	11					
	have serious consequences. So, I can't give you		contemplates a formulary, Joe.				
	statistics. But I don't think it's accurate to	13					
1	suggest that intelligent corporate employers who are	1	there on that, let's say we take the employer out,				
	offering plans don't have a generally good	1	and we do leave the PBM in there, and they make a				
	appreciation of what's going on in terms of the	1	decision that that's not on the formulary. Aren't				
	administration of those pharmacy benefits.		you still saying we're eliminating formularies?				
18		18					
1	say anything and, if I did, I misspoke, to suggest	1	so. Recommendation Number 1 specifically allows and				
	that the employer would not generally know that there		approves, ethically, a contact by the pharmacist if				
	was a formulary program and generally know that drugs		the drug is not on the formulary to generate the				
	were on and off the formulary and that there were		change to a formulary drug. So, Recommendation Number

6	MR. DURRETTE: But, we know	6	confused, having not sat in this position before,			
7	CHAIRMAN TEEFEY: That's why I say	1	about the process. But the spirit with which my			
8	I think we've changed the game plan I thought we came	1	recommendations were given were the assumption this			
	in here to talk about, and that's why I brought out a	9	was going to work in a situation where the Task Force			
10	little while ago, we're talking about two different	10	members will try to decide what, if any, parts of			
11	situations.	11	recommendations are what they would like to			
12	The first situation is, it's not	12	accomplish, can they be rewritten in a way that works			
13	on the formulary, that's it. The other situation is,	13	better, and in normal parliamentary procedure you may			
14	it is on the formulary and the pharmacist calls in to	14	extract proposals. You can extract single items out			
15	try to switch to a drug that's on the formulary. I	15	of that. Perhaps, for purposes of discussion, we			
16	think we have a problem there.	16	might extract Number 4 and start getting some			
17	MR. DURRETTE: And I agree with	17	feedback on the other proposals on what the Task			
18	you. I thought that that delineation was a good one,	18	Force feeling is. Otherwise, we're never going to			
19	and I agree with you that that situation is perhaps a	19	get to vote on this up or down.			
20	more serious situation than the formulary.	20	CHAIRMAN TEEFEY: All right. Well,			
21	CHAIRMAN TEEFEY: Yes. And then I	21	let's do this. Let's vote on the proposal to start			
22	go back to Senator Newman's recommendation that we	22	with.			
23	wait until the PBM study comes out, because I don't	23	SENATOR NEWMAN: The entire			
	know how many switches are one or how many switches	24	proposal?			
25	are the other. I think we don't know how many	25	CHAIRMAN TEEFEY: The entire			
	Page 118		Page 120			
1	switches are because it's not on the formulary and	1	proposal to start with.			
2	how many switches are on the formulary, and we have	2	All of those in favor of the			
	got, and please take this with a grain of salt,	3	proposal, say aye.			
4	greedy pharmacists.	4	DR. BLANCHARD: Excuse me. We are			
5	MR. AYOTTE: I don't take that	1	voting on the proposal without a chance to amend the			
6	with a grain of salt.	6	proposals in light of the comments?			
7	MR. DURRETTE: Well, remember	7	CHAIRMAN TEEFEY: Well, then we're			
8	again that Recommendation I think you have to look		going to bring the proposal up. We're going to bring			
	at Dr. Blanchard's Recommendations in their		that up. You have presented a full proposal to us,			
	entirety. I would suggest, for heaven's sake, don't	10	and I want to deal with the full proposal first.			
	get hung up on Recommendation 4. I mean, things with	11	All in favor of the full			
	regard to Recommendation 4 are going to come to the	1	proposal, say aye.			
	General Assembly whether this Committee says or does	13				
	implement it or doesn't. There are other people who	14	NOTE: (Affirmative response.)			
	have an interest in the area covered by	15				
1	Recommendation Number 4, and you can bet your bottom	16	CHAIRMAN TEEFEY: Raise your			
	dollar that the Virginia General Assembly is going to	1	hands, please. One, two, three, four.			
	get legislation extending liability corporately to	18	All opposed. One, two, three,			
4	HMOs and PBMs. That's coming. Everybody knows it's	1	four, five-			
	coming. So, Number 4 is not the heart of this.	20	CHAIRMAN TEEFEY: The opposed have			
21	Number 1, Joe, contemplates the	1	it.			
	existence of a formulary and says it's okay to make	22	SENATOR NEWMAN: Mr. Chairman?			
	the phone call. It's okay if the drug isn't on the formulary. So, Number 1 tries to accommodate the real	23	CHAIRMAN TEEFEY: Okay, Senator Newman.			
	formulary. So, Number 1 tries to accommodate the real					
4 J	world where formularies exist and where pharmacists	25	SENATOR NEWMAN: I don't want to			

HJ	Conde	nso	
	Page 121		Page 123
1	limit the debate, and we'll go down whatever	1	people shared my view that, perhaps, the biggest
	processes this committee decides to do.		problem was out-of-state pharmacists switching drugs
3	Wouldn't this have been a great		without consulting with the physician. Now, we're at
4	place to start in May, because now we're talking	4	the final hour here, and I haven't even seen that
	about some things that have some relevance and some	5	issue addressed. If anything, Recommendation 1, while
6	proposals back and forth. I've looked at the	6	it says that out-of-state pharmacists should be made
7	out-of-state dispensing idea, and maybe that's a good	7	accountable to this regulation, would discourage them
8	idea, too. But, the discussion we just had on four,	8	from consulting the physician.
9	we can have on one, two and three, and I may even	9	So, it seems to me we've gone
10	agree with part of them and disagree with other	10	just about 360 from where I thought we were going to
11	parts, Mr. Chairman. But this is not in the last	11	address what everyone considered one of the major
12	meeting, at almost noon, on this last day, the type	12	deficiencies at the moment. So, I'm in favor of the
13	of recommendations I think we want to give to the	13	motion, if for no other reason, than to give us the
14	General Assembly.	14	time to address the out-of-state pharmacy situation.
15	I believe that it might be of	15	MS. PIGG: I just have a question
16	some value to step back now and say, let us work in	16	to make sure we still have a problem.
17	conjunction with the Morgan Study. Let us come up	17	Mr. Durrette, I heard you say
18	with some recommendations next year that we can have	18	that representing the independent pharmacists, that
19	confidence in, that we have thought through.	19	they agree or endorse the whole formulary concept,
20	Mr. Chairman, on that basis, I'd	20	which has quality of care and financial
21	like to make a motion that we continue this study	21	consequences. So, it was my understanding, and maybe
22	until next year, ask the General Assembly to do so	22	incorrectly so, that that was really the driver
23	with the current makeup of the study, and coordinate	23	behind the whole proposed legislation that the
24	our study with the Morgan Committee.	24	pharmacist did not endorse the formulary concept if
25	CHAIRMAN TEEFEY: Do I have a	25	there were financial components.
	Page 122		Page 124
1	second for that motion?	1	MR. DURRETTE: If I said it the
2	MR. AYOTTE: second.		way you just quoted me back, I didn't intend to say
3	CHAIRMAN TEEFEY: Is there any		that the pharmacists endorsed the whole formulary
	discussion?		concept. I did intend to say that these proposals
5	DR. DALTON: Yes, there is. I	1	accepted the formulary in the marketplace and
	think that we need to start somewhere, and I think		approved it and allowed the pharmacist to make the
	that the situation is a dynamic one. When the Morgan	7	call if the drug wasn't on the formulary.
	data comes out, it's going to be dated. It's going to	8	A formulary, the language that
	be reflective of percentages and numbers as they are	1	Dr. Blanchard read when he was making his opening
	right now. I think by our doing nothing, we're going		remarks, about formulary having to be put together
1	to influence those numbers because these practices		with medical considerations to find the drugs that
	are going to change in the direction where abuses are	1	will be most effective, that work best for the
	going to be increased, if there is that window of		patients and influence prescribing decisions along
	opportunity that seems to be open to those who choose	•	that line, is my ideal of the way medicine should be
1	to take advantage of it. I think we need to have		practiced.
1	something concrete to come out, even if it's	16	But, to the extent that the
	something that is not completed. But, I think that		formulary deviates from that and substitutes the
	by our just saying, let's put it on the back burner,		profit motive of the decision maker, or the medical
	again, is not what I have been contributing my time for.	1	considerations and the enforcement mechanisms which
20		20	
21	MR. COUNCIL: Mr. Chairman?		it's the way to practice medicine or to deliver health care.
22	CHAIRMAN TEEFEY: Yes, sir.	22	
	MR. COUNCIL: If I may just make a couple of comments in favor of the motion. When this		CHAIRMAN TEEFEY: Any other discussion?
	Task Force started, it struck me that I thought many	24	DR. BLANCHARD: Yes, sir. My

	Page 129	Γ	Page 131
1	CHAIRMAN TEEFEY: That's fine. I	1	MR. AYOTTE: Mr. Chairman, can I
2	didn't understand that. But,	2	ask a question?
1 3	MR. COUNCIL: Is the expectation	3	CHAIRMAN TEEFEY: Yes, sir.
4	• • •	4	MR. AYOTTE: Scotti, is it the
5	what we're saying or not?	5	intent of the Board to look at this regulation for
6	DR. BLANCHARD: No. My expectation		out-of-state dispensing one way or another? Or, are
7	is that we would vote on the motion that I proposed		you looking for us to direct that?
	in the midst of his motion, having been advised that	8	MS. RUSSELL: Mike, this is not
	it was necessary to separate the two.	9	a It's not a regulation. It's a statute. The
10	SENATOR NEWMAN: I'm confused,		problem with the existing statute, not just this, is
111	now.		that the existing statute requires nonresident
12	DR. BLANCHARD: I attempted to		pharmacies to comply with the laws and regulations of
13	make a motion that, included in our Task Force	1	their residence state. And I think that maybe better
	Report, would be a recommendation that legislation be	1	than this particular language might be the language,
	adopted by the General Assembly that accomplishes	1	at least for the nonresident pharmacy portion of the
	what Mr. Jenkins has so eloquently pointed out in 3		draft we submitted last year, where what we do is
	Number B on Page 2 of his letter: "It is unlawful for	1	require nonresident pharmacies to comply with the
	any nonresident pharmacy to dispense a drug that is	1	laws and regulations of Virginia, specifically. And
	chemically dissimilar, without the prior approval of		that would take care of this and anything else that
	the prescriber or his lawful designee." I think this	1	they happen to do that was a violation of Virginia
	is something that this Task Force agrees on.	1	laws or regulations.
22	SENATOR NEWMAN: Which one?	22	So I would go with the more
23	DR. BLANCHARD: 3.		general approach than just this.
24	CHAIRMAN TEEFEY: Number 3.	23	MR. AYOTTE: Would that be
25	DR. HADLEY: 3-B.	ł	something that you would look to find, no matter
I	Page 130	- ·	Page 132
1	SENATOR NEWMAN: Mr. Chairman, may		what? Or is this
-	I?	2	MS. RUSSELL: Well, we've already
3	CHAIRMAN TEEFEY: Yes, sir.	-	submitted our administrative proposals for this
4	SENATOR NEWMAN: I like the	)	Bill. And we, the Board of Pharmacy, would not be
5	proposal, too, and it's something that the Doctor and	1	looking at this change for this particular
	I agree on, which is movement. I am still your	1	legislative session. It's a little late. But that
	friend and all those good things. But, I don't know		doesn't mean you couldn't recommend that.
	if we do want a bifurcated statement going to the	8	CHAIRMAN TEEFEY: I think we're
	General Assembly now. But, if there is a, if we	_	going to have a motion.
	don't stop here, I think we're going to go down the	10	DR. BLANCHARD: My motion is
	rest of the list, is that the Are we going to go	11	dependent, though, on the answer to that question, to
1	that far?		some extent, and that is, if we make such a
13	DR. BLANCHARD: Two. Two things.	1	recommendation to approve or to recommend a change
	Move on and discuss them.		such as what was just recommended, would the
15	SENATOR NEWMAN: well, Mr.	1	legislature be able to act on that this year or does
	Chairman, the will of the Committee. I don't mind		it still have to go through your process first? Are
4	Number 3, but I don't want to go down the list of the		you precluded from supporting it because you have
	rest of them, either, because we have agreed that we	f	already sent in your other stuff?
	are going to look at this holistically. So, I guess	18	MS. RUSSELL: No, we're not
	the will of the Committee, if they want to take up	1	
	these items.		in as an Administration Bill.
22	I hope that we don't get into a	22	SENATOR NEWMAN: Mr. Chairman?
	situation where we say we're going to roll it over,	22	CHAIRMAN TEEFEY: Yes.
24	and we is young to other a hittireated mercane to the	74	
	and we're going to offer a bifurcated message to the General Assembly, also.	24 25	SENATOR NEWMAN: Could we then consider an amendment? I think you have agreed that

H	HJR 630 CondenseIt <sup>™</sup>					
	Page 133		Page 135			
1	we will only consider Number 3 of Mr. Jenkins'	1	DR. PYLES: I just wanted to, as			
2	document as saying, we want to continue this study	2	the Facilitator, make sure that we understand. I			
	until next year, however, let us now We all agree.		wanted to review real quickly what we'll be thinking			
	I don't think there is any disagreement. We can		about as we carry this over.			
	disagree on Number 2 of the other document. But,	5	One of the things that was			
	there is no disagreement on Number 3 of this one.	6	included in HJR 630 was that the Task Force would			
	However, we asked the General Assembly to deal with	7	identify the components of the cost of this			
	these out-of-state issues as embedded in Number 3. Is		practice. So we need to be thinking about, as we			
1	that reasonable?		carry this over, how we're going to go about			
10	CHAIRMAN TEEFEY: I think the Task		identifying the components of cost and be able to			
11	Force can ask that in our report, and it can come up		make recommendations on those. And the other part of			
	in General Assembly and support what they are doing		it was, to determine the impact of the practice on			
	as the Board of Pharmacy.		the health care and the affected professions and the			
14	DR. BLANCHARD: I'd second that		overall cost of health products and services. So I			
1	motion.		think that, as we go forward and think about it, we			
16		F	need to be thinking about how we're going to do that,			
17	CHAIRMAN TEEFEY: Any discussion?		÷ • • •			
		l I	because that was a part of the resolution, as well.			
18	NOTE: (No response.)	18	CHAIRMAN TEEFEY: I think that's a			
19		1	good idea, Mike, and I think we're better prepared			
20	CHAIRMAN TEEFEY: Call for the		going into next year than we were coming into this			
21	question. All in favor		year. It's a very, very complicated and convoluted			
22	DR. HADLEY: Just a		problem.			
1	clarification.	23	I want to thank everybody on the			
24	CHAIRMAN TEEFEY: Yes.		Task Force. This has really been very, very			
25	DR. HADLEY: So, we'd only be	25	difficult. And, I want to thank everybody on the			
	Page 134		Page 13t			
1	voting for the Amendment 3-B of Mr. Jenkins', not	1	Task Force.			
2	Recommendation 2? Is that correct?	2	Scotti, I just want to thank you			
3	DR. BLANCHARD: Not Recommendation	3	and your staff for helping us out on this, and I want			
4	2.	4	to thank the people in the audience, because I think			
5	My recommendation to 3-B is sort		now that we have really a beacon that we can follow.			
6	of amended by Mr. Ayotte to include what Scotti	1	And, Scotti, I think you helped form this beacon.			
	Russell suggested.	7	I just want to thank everybody			
8	CHAIRMAN TEEFEY: Right.	1 .	for the time they've put into this.			
9	DR. HADLEY: Okay. I think we can	9	MR. SZALWINSKI: Mr. Chairman, if			
	support that.	-	I might.			
11	CHAIRMAN TEEFEY: All right. All	10	CHAIRMAN TEEFEY: Yes, sir.			
	in favor, say aye.	11	MR. SZALWINSKI: One of the things			
	in lavor, say aye.	1	-			
13	NOTE discourse office the		that I would also suggest is that we began to			
14	NOTE: (Unanimous affirmative	1	characterize data as to how managed care prescription			
	response.)	1	programs benefit the public, the way that they are			
16		1	currently administered. Because, again, I point to			
17	CHAIRMAN TEEFEY: All opposed?	1	the IMS data. There is significant data out there to			
18			suggest that people with managed care get more			
19	NOTE: (No response.)		prescription drug coverage than other folks, and			
20			that's a good thing. We need to keep that in mind.			
21	CHAIRMAN TEEFEY: Do we all know	21	MS. PIGG: I just have a question			
22	where we are now?		on how the governmental process works. So, we've			
23	DR. BLANCHARD: We all know where		recommended that the Task Force be continued to			
	we stand.	24	continue studying this. Does that preclude or is			
24			there the potential that folks that may not agree			

2 3 4 5 6	Page 137 with that that were not on this Task Force could submit legislation to this General Assembly?	1	Page 139
2 3 4 5 6		1	
3 4 5 6	submit legislation to this General Assembly?	· •	
4 5 6		2	
5 6	CHAIRMAN TEEFEY: That can happen	3	
6	at any time.	4	
	MS. PIGG: Any time? And, of	5	
	course, then, I guess you can come back and say there	6	CERTIFICATE OF COURT REPORTER
1	is already a study studying this?	7	
8	CHAIRMAN TEEFEY: What we're going	8	
9	to recommend to the General Assembly is, we discussed	9	I, PATRICIA PRICE WHITE, hereby certify that
	this, and we didn't come to a conclusion and we think	10	I was the Court Reporter in the foregoing Hearing,
11	another year of study is important.	11	when heard on the 17th day of September, 1997.
12	DR. BLANCHARD: Mr. Chairman, will	12	I further certify that the foregoing
13	we see the draft before it hits?	13	transcript is a true and accurate record of the
14	DR. PYLES: Absolutely.	1	HEARING herein.
15	CHAIRMAN TEEFEY: Yes.	15	Given under my hand this 22nd day of
16	DR. BLANCHARD: And, the second	1	September, 1997.
	thing, Dr. Pyles, will you be addressing some of your	17	,
	cost issues or referring some of those to Delegate	18	
	Morgan's Committees?	19	
20	DR. PYLES: Well, that is one of	20	
21	the other things I think we have to clarify. We need	21	PATRICIA PRICE WHITE, RPR, CP
	to look at exactly what that study is going to do. As	22	
	I recall, it looks at various aspects of PBMs, but	23	
	not so much in the context of what we've talked	24	
	about. So I think that, in the interim, before the	25	
		<u></u>	
	Page 138		
	report goes out and we get a draft to you, perhaps we	1	
	need to clarify and get to you what that study is		
	expected to produce, and then we can go from there		
	and get your comments in terms of how we can go about that if that a class Mar Chairman		
	that, if that's okay, Mr. Chairman.		
6	CHAIRMAN TEEFEY: That's fine.		
/	Thank you all for coming.		
8
