TO: The Honorable Mark Warner, Governor of Virginia

And

Members of the Virginia General Assembly

The 2004 General Assembly, through House Joint Resolution 122, requested the Virginia State Crime Commission study crime and crime prevention on Virginia's college campuses.

Enclosed for your review and consideration is the interim report which has been prepared in response to this request. The Commission received assistance from all affected agencies and gratefully acknowledges their input into this report.

Respectfully submitted,

I. Authority

The *Code of Virginia*, §30-156, authorizes the Virginia State Crime Commission (“Crime Commission”) to study, report and make recommendations “on all areas of public safety and protection.” Additionally, the Crime Commission is to study “compensation of persons in law enforcement and related fields” and to study “apprehension, trial and punishment of criminal offenders.”¹ Section 30-158(3) empowers the Crime Commission to “conduct studies and gather information and data in order to accomplish its purposes as set forth in §30-156. . .and formulate its recommendations to the Governor and the General Assembly.”

Using the statutory authority granted to the Crime Commission, staff conducted a study on campus safety in the Commonwealth. Recommendations concerning best practices for campus safety in the Commonwealth will be presented in the final report.

II. Executive Summary

During the 2004 Session of the Virginia General Assembly, Delegate Phillip A. Hamilton introduced House Joint Resolution 122 (HJR 122), which directed the Crime Commission to study campus safety at Virginia’s public and private institutions of higher education.² Specifically, the resolution directs the Commission to examine the following areas: (i) current Virginia policies, procedures and programs used to promote safety at institutions of higher education; (ii) nature of criminal offenses at Virginia’s public and private institutions of higher education; (iii) use of best practices or models for campus safety nationally; and, (iv) need to develop statewide procedures to ensure the dissemination of information pertaining to best practices for campus safety to Virginia’s public and private institutions of higher education.

In spring 2004, Crime Commission staff began a study pursuant to HJR 122. Due to the expansive scope of the study mandate, the study was extended from one year to two years. The first year of the study focused primarily on colleges and universities (“colleges”) with an official police department. The second year of the study will continue to focus on colleges with police departments, as well as, colleges with security and public safety departments (“security departments”).

In the first year, Crime Commission staff focused on the collection of information from Virginia colleges with police departments. A literature review was conducted to gain an understanding of campus safety issues and models. Several visits to college campuses were made to understand the operations of campus police departments. Additionally, many campus crime statistics were requested, collected and compiled. A detailed survey was also developed and disseminated to each campus police department in the Commonwealth.³ The survey was used to gather information regarding each campus police department’s budget, personnel, training,

equipment, administrative relations and campus demographics. Finally, a Crime Commission Campus Safety Task Force was created to aid in the formulation of best practice recommendations.

III. Methodology

The Crime Commission will utilize several research methodologies to address the directives of the two- year study mandate on campus safety inside the Commonwealth including: (i) literature review, (ii) field visits to selected institutions, (iii) statistical analysis of reported crimes on campus, (iv) surveys of institutions and other key stakeholders, (v) convening of the Crime Commission Campus Safety Task Force and, (vi) creation of best practices for campus safety.

Virginia has 141 distinct public, private, and out-of-state satellite institutions of higher learning.⁴ Considering the large breadth of the study as well as the study intent, the colleges studied were limited to the 75 four-year and above public and private non-profit and two-year public colleges. This refinement excluded trade schools, technical institutes, for-profit colleges and two-year private colleges.

The study was separated into two increments: the first year of the study focused primarily on campuses with a police department, while the second year of the study will focus on campuses with a security department. After taking into consideration the many different types of campuses across the Commonwealth, the Crime Commission Campus Safety Task Force will develop campus safety best practices for colleges. Specific actions for year-one and year-two are detailed below.

Crime Commission staff conducted five primary activities during the first year to address the study priorities. Again, the activities undertaken in the study's first year emphasized campuses with police departments. The activities included:

- Literature review of relevant national, state and academic studies;
- Dissemination of surveys to 29 campus police departments;
- Visits to four campuses;
- Collection and initial analyses of existing campus crime and workload statistics; and,
- Creation of the Crime Commission Campus Safety Task Force.

The Crime Commission plans to conduct the following activities during the second year to address the study priorities. In addition to the continuing analyses of campus police departments, the study will also turn its focus to campuses with security departments. Thus, activities for the second year of the study include:

⁴ State Council of Higher Education for Virginia, statistics concerning Virginia's colleges and universities, *available at*, <http://www.schev.edu/Policymakers/HigherEducationSysOverview.asp?from=schevs>.

- Convening of the Crime Commission Campus Safety Task Force;
- Continuation of literature review;
- Continuation of campus visits;
- Dissemination of survey to campus security departments;
- Collection and analysis of judicial referrals;
- Statistical analyses of Clery offenses, UCR offenses, crime logs, and dispatch records; and,
- Formulation of best practices for campus safety in the Commonwealth.

IV. Background

The Commonwealth of Virginia boasts 75 distinct colleges that are either four-year and above public, private non-profit or two-year public colleges. These colleges have a variety of differences including:

- enrollment ranging from under 1,000 to over 35,000 students;
- rural versus urban settings;
- whether the campus has a police department versus a security department;
- whether the campus is located in a higher crime area or a lower crime area; and,
- Whether a hospital, stadium or special complex is located on campus.

In the past, there have been concerns regarding safety on the Commonwealth's campuses. Since 1992, at least four studies have been conducted within the Commonwealth regarding campus safety issues. Specifically, the issues examined included sexual assaults on campus,⁵ substance abuse among college students,⁶ and security on Virginia's campuses.⁷ These reports culminated in recommendations, of which some were followed across Commonwealth campuses. However, previous studies and resulting college actions have not eliminated all campus safety concerns.

V. Year One Study Activities

The Virginia State Crime Commission conducted five primary activities during the first year to address the study priorities, all of which focused upon campuses with police departments. Listed below are the five areas along with a discussion of each:

- Literature review of relevant national, state and academic studies;
- Dissemination of surveys to campus police departments;
- Visits to four campuses;

⁷ Va. H.D. Doc. 36 (1994).

- Collection and initial analyses of existing campus crime and workload statistics; and,
- Creation of the Crime Commission Campus Safety Task Force.

Literature Review

Staff conducted a literature review of existing national, state and academic campus safety studies. While the review of current campus safety literature is ongoing, the following is a summary of findings from the study's first year literature review.

Crime on college campuses has become a national concern. There is little question that the media in the 1980s and 1990s have played a significant role in raising public awareness of campus crime and in creating a sense that campuses provided unsafe environments.⁸ However, as cited below, consistent evidence shows that campuses are safer than both the nation as a whole and the communities that surround them.

A. Campus Characteristics and Crime Rates

A number of factors need to be considered when looking at campus crime rates. Crime rates are influenced by forces both on and off campus. A review of the literature found at least five factors that influence crime rates on campus. These factors include:

- Number of students living on-campus in residence halls;
- Financial characteristics of the institution and student body;
- Demographic characteristics of the student body;
- Impact of alcohol and drugs; and,
- Presence of certain organizations.

First, one of the most consistent factors in increasing campus crime rates has been the proportion of students living on-campus in residence halls. McPheters (1978), who conducted one of the first noteworthy studies of campus crime, found that the number of students living in residence halls influenced campus crime rates.⁹ Likewise, other researchers such as Fox and Hellman (1985), Sloan (1992, 1994) and Volkwein et al. (1995) agreed that the percentage of students living on campus positively influences the crime rate on campuses.¹⁰ Accordingly, other studies that have examined community colleges, which tend to have no residential students, have found a significantly lower crime rate. Bromley (1999) and Volkwein et al. (1995) both

found that two-year institutions, who cater to commuter students, generally experience lower amounts of violent and property crime.¹¹

Second, the overall affluence of the institution and student body has also been found to increase campus crime rates. For example, researchers such as Fernandez and Lizotte (1995), Volkwein et al. (1995), Sloan (1992, 1994) and Fox and Hellman (1985) found that certain financial characteristics of institutions, such as cost per term and wealth of students, increased the campus crime rate, specifically property crime rates.¹²

Third, other studies have found that demographic characteristics of the student body can lead to an increase in campus crime rates. For instance, Fox and Hellman (1985) have cited a positive correlation between the percent of male students and crime;¹³ while other studies such as Sloan (1994) and Volkwein et al. (1995) have cited a positive correlation between the percentage of minority students and the violent crime rate.¹⁴

Fourth, the impact of alcohol and drugs on campus crime rates cannot be ignored. Lively (1998) noted that drug and alcohol arrest rates on campuses have been consistently increasing.¹⁵ Furthermore, studies have consistently shown that alcohol and drugs are implicated in the majority of violent campus offenses. Specifically, Sloan (1994) notes that over 95 percent of such offenses committed on campuses involve alcohol or drugs.¹⁶

Fifth, certain types of organizations on campus can affect campus crime rates as well. For example, Sloan (1992) found that institutions with a higher number of national fraternities and sororities on campus tend to have higher levels of campus crime.¹⁷

B. Campus Crime Rates and the Influence of the Surrounding Community

Another factor that has been examined repeatedly in the literature is the effects of campus location and the surrounding community on campus crime rates. Many studies, including the U.S. Department of Education's Report to Congress (2001), Bromley (1995), Volkwein et al. (1995) and Fox and Hellman (1985) have all found that the overall rates of campus crime are lower than rates of crime in the general community.¹⁸ Specifically, the U.S. Department of Education's 2001 Report to Congress stated that, "...our nation's colleges are safe. In nearly

every category of crime for which data were collected, college campuses showed lower incidence of crime than comparable data for the nation as a whole.”¹⁹

Crimes are not only less common on campuses, but also less violent. Numerous studies including Reaves and Goldberg (1996), Bromley (1985), Sloan (1994) have consistently indicated that violent crime rates are substantially lower than the communities that surround them and than the nation as a whole.²⁰ In addition to the aforementioned studies, many more have shown that property offenses, specifically larcenies, constitute the overwhelming majority of campus crime.²¹

Several studies have also consistently held that campus location alone does not significantly affect the overall campus crime rate.²² However, when examined more closely, location does seem to affect the mix of crime. For instance, Fox and Hellman (1985) noted that as campuses become more urban, their violent crime rate tends to be higher.²³

Other studies have attempted to determine the effects of community crime on campus crime rates. For example, Fernandez and Lizotte (1995) found that community crime rates do not significantly affect campus crime rates, with the exception of robbery and motor vehicle theft.²⁴ Thus, if the surrounding community has a prevalence of robbery or motor vehicle theft, the campus will typically have higher rates for those crimes as well. Furthermore, while concern over community offenders on campus is warranted, the majority of offenders committing crimes on campus are its own students. Sloan (1994) found that over 80 percent of reported campus crimes involved students victimizing other students.²⁵

Finally, research has found that certain crimes are more underreported than others. Sexual assault is one such crime that remains highly underreported across the nation.²⁶ Research supports this trend on college campuses as well. Karjane et al. (2002), Fisher et al. (1998) and Koss et al. (1987) all highlight the fact that students, specifically women, are exposed to high risks of sexual victimization on campuses.²⁷ These studies also indicate that women are less

likely to report the crime when the perpetrator is an acquaintance of the victim, which is the situation for the majority of sexual assaults on campuses. In sum, sexual assaults remain underreported on campuses, as well as, the nation as a whole.

C. Guidelines

Several governmental and administrative organizations have developed guidelines to address campus crime and victimization. These guidelines and standards cover topics such as, recruitment and training, communications and record keeping, crime prevention, victim assistance, sexual assaults, natural disasters, homeland security and community policing on campuses, along with other overall policies and procedures for campus law enforcement agencies.²⁸

Survey of Campus Police Departments

A comprehensive survey was sent to each of the 29 campus police departments in Virginia (*See Attachment 2*). The survey covered the following areas and brief descriptions of some subsections are included below:

- Campus demographics
 - Department to which campus police reports;
 - Number of students, faculty, and staff;
 - Number of buildings;
 - Number of fraternities and sororities;
 - Large-scale special events such as basketball and football games; and,
 - Hospital serviced by campus police.

- Budget
 - College budget;
 - Campus police budget;
 - Campus police source of funds;
 - Department expenditures (i.e.: salaries, benefits, equipment, etc.); and,
 - Outsourcing.

- Personnel and training
 - Number of administrators, officers, technical support, and security officers;
 - Salaries and types of benefits offered;
 - Staff separations; and,
 - Recruitment and training.

- Operations
 - Number of shifts;
 - Department responsibilities;
 - Residence hall and building security;
 - Relationship with other law enforcement agencies;
 - Accreditation; and,
 - Policies and procedures.

- Equipment
 - Weapons and protective gear;
 - Patrol vehicles;
 - Communications;
 - Surveillance technology; and,
 - Computer technology.

- Administrative Relations/Resources
 - Adequacy of personnel for needs;
 - Adequacy of facilities for needs; and,
 - Adequacy of communications for needs.

The survey was designed to yield the status of all the Commonwealth's campus police departments including present capabilities and strengths, as well as, illuminate some of the differences and limitations of each.²⁹ The survey results will be the starting point for the Task Force to understand Virginia's campuses with police departments.

Campus Visits

In order to more fully understand campus law enforcement operations, Crime Commission staff made visits to four colleges: Christopher Newport University, University of Richmond, University of Virginia and Virginia Commonwealth University. These full-day visits were instrumental in understanding the nature of crime on campuses, campus police organizations, equipment definitions, funding mechanisms, overall difficulties and the uniqueness of each institution. These meetings were also helpful in showing the resources and equipment of the police departments as well as comprehending day to day department activities. Police Chiefs and their staff provided significant time during the visits. In addition to campus visits, the Crime Commission staff briefed the Virginia Association of Campus Law Enforcement Administrators (VACLEA) on two different occasions; the briefings allowed for helpful questions and answers from the campus police department representatives at the meetings.

²⁹ In developing our survey, many questions were compiled from several existing questionnaires including the 1995 and 2005 Bureau of Justice Statistics Survey of Campus Law Enforcement Agencies and VA H.D. 36 (1994).

Crime Commission Campus Safety Task Force

The Virginia State Crime Commission established the Crime Commission Campus Safety Task Force to review and analyze the results from the data analyses, literature review, survey instruments and campus visits. The Task Force includes the following agencies and types of individuals:

- *Virginia Association of Campus Law Enforcement Administrators (VACLEA)*
 - Chief Willie Fuller, President of VACLEA, will select six members of this association. Selection shall be based on various criteria, including campus location, enrollment size, public or private, two-year or four-year, and police or security/public safety department.
- *College Administrators*
 - Four college administrators will be selected. One administrator will be selected from a two-year community college and three will be selected from four-year public or private institutions.
- *Academia*
 - Two criminal justice/criminology professors.
- *Virginia College Parents Association*
 - One representative from this association.
- *Council for Independent Colleges in Virginia*
 - One representative from this association.
- *Virginia 21*
 - Two students from this organization.
- *Local Law Enforcement*
 - Two representatives from local law enforcement, one representing a police department and the other a sheriff's department, that have concurrent jurisdiction with a college or university.

The first meeting of this Task Force will occur in the second year of the study. At least three meetings will take place to formulize best practice recommendations for campus safety in the Commonwealth.

Campus Crime Statistics

Crime Commission staff gathered campus crime statistics from a number of sources to gain a comprehensive view of campus crime in Virginia. Statistics were gathered from both federal and state sources, as well as campus police departments. Specifically, these include the U.S. Department of Education's Clery Act statistics, the Virginia State Police's Handbook of Uniform Crime Reports (UCR), and each campus's crime log and dispatch records. Analyses found that

there is no one measure of crime, but rather each provides useful statistics that, when placed in its proper context, can be combined to create a clearer picture of campus crime. Various difficulties and limitations must be acknowledged for each of the sources for campus crime statistics. However, by focusing on several different sources, a more accurate and comprehensive view of campus crime will be gained.

A. Clery Act

Under the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act (“Clery Act”) and the Code of Federal Regulations (CFR, Title 34), each institution of higher education in the United States that participates in federal student aid programs must produce and distribute an annual report containing crime statistics and statements of security policy. One of the reasons Congress authorized the act was to help potential college students and their parents research criminal offenses on college campuses. Specifically, these institutions must disclose the number of reported murders, forcible and non-forcible sex offenses, robbery, aggravated assaults, burglaries, motor vehicle thefts, arsons, negligent manslaughters, and hate crimes. Further, statistics of arrests or referrals for campus disciplinary action for liquor law violations, drug law violations and illegal weapons possession must be provided.

There are several limitations of Clery statistics that need to be recognized. First, the Clery Act does not require all crimes to be reported. For example, some of the most commonly reported crimes including larceny/theft, vandalism, threats and harassment are not mandated to be reported. Thus, an accurate picture of campus crime cannot be achieved if these statistics are the only data source examined. Second, because all non-police personnel are required to report criminal incidents on campus (with exception of religious and professional counseling personnel), the data is not directly comparable to data from the FBI’s Uniform Crime Reporting System which only collects statistics from police authorities. However, similar to the UCR, the statistics represent alleged criminal offenses and do not necessarily reflect prosecutions or convictions for crime.

Another limitation is whether an arrest is made by campus police or a surrounding jurisdiction that contains the campus. Local police agencies are not required to collect or report crime statistics to campus officials for areas such as streets, parking lots, and sidewalks through or adjacent to campuses. Also, since the base measure of enrollment size is the number of undergraduates, crime rates may be overstated since the number does not account for the number of faculty, staff, graduate students and friends of students. Finally, there are also various inconsistencies in reporting due to interpretational differences of crime definitions. This may cause certain campus crimes to be categorized incorrectly.

In spite of these limitations, the statistics do offer an account of campus crime that is instructive to compare with other sources of data. Before the Clery Act requirements, campus crime statistics were less available and thorough. Clery Act Statistics were gathered from 2000-2003 for every two-year public and four-year public and private institution from the Office of Post Secondary Education campus security statistics website.³⁰ Crime Commission staff

³⁰ Office of Post Secondary Education Campus Security Statistics Website, *available at* <http://www.ope.ed.gov/security/>.

conducted a preliminary analysis of this data, including a compilation of the number and types of crimes for colleges. Staff's compilation of the 2002 Clery Report statistics can be found in Attachment 3.

B. Uniform Crime Reports (UCR)

The Federal Bureau of Investigation created the UCR program, which is a system of collecting, compiling and analyzing crime statistics from participating law enforcement agencies throughout the nation. The Virginia State Police is the Commonwealth's central repository for such statistics. The UCR lists all types of crimes and provides greater specificity in reporting. There are several key differences between how crime statistics are reported under the UCR program and the Clery Act. First, the Virginia UCR is a mandatory program where each law enforcement agency submits monthly reports of crimes and arrests. While reporting under the Clery Act is mandatory as well, it includes reports from both law enforcement and non-law enforcement entities. Second, UCR calculates crimes in an incident driven fashion (NIBR) that is distinct from Clery report data. The UCR-NIBR system counts every offense within each incident; whereas, Clery statistics only include the most serious offense in each incident. For example, if someone was robbed and raped, the UCR-NIBR system would count both offenses in the incident. Clery Act statistics would count only the rape, which is considered the more serious offense in the incident

Staff gathered the UCR Group A Offenses³¹ for the 22 campus police departments and their surrounding localities that are published in Virginia State Police's "Crime in Virginia" handbook for years 2000-2003.³² Additionally, the number of arrests reported from each campus police department was requested from the Virginia State Police.

The UCR has limitations as well. The UCR-NIBR data system does not match the individual incident with the specific outcome. Thus, each crime is not matched with whether an arrest was made, the complaint unfounded or the crime cleared. The UCR-NIBR system does not accurately reflect the volume of clearances each department produces in a given year. The number of arrests in a locality does not provide offense clearance information in that a person arrested could clear a number of different offenses.³³

C. Crime Logs

According to the Code of Federal Regulation (CFR), Title 34, §668.46, every school that has a campus police or security department must maintain a daily crime log. They must record all reported crimes, even those not required to be reported in the annual Clery report. The log entries must contain the nature of the crime, date, time, general location of each crime and the disposition of the complaint, if known. The most recent 60-day period of the log must be open to

³¹ Group A offenses include the following: murder, non-negligent murder, kidnapping/abduction, forcible rapes, other forcible sex offenses, robbery, aggravated assaults, simple assaults/intimidation, arson, extortion/blackmail, burglary, larceny, motor vehicle theft, counterfeiting/forgery, fraud, embezzlement, stolen property, destruction/damage/vandalism, drug/narcotic offenses, non-forcible sex offenses, pornography, gambling, prostitution, bribery and weapon law violations.

³³ DEPARTMENT OF STATE POLICE, *Crime in Virginia*, (Va. 2002).

public inspection during normal business hours. Any records older than 60 days must be made available within two working days of the inspection request. These logs must be kept available for seven years.

As part of the study, crime log copies were requested from each campus police department for the period of July 1, 2002 through June 30, 2004. Over 16,000 records from campus police department crime logs were received. The crime logs were in a variety of forms which ranged from hand-written logs to electronic logs that needed differing amounts of computer data manipulation. In order to compile the logs in a uniform, analyzable form, hand-written logs were entered in a database and the electronic logs were converted into the necessary format. The results of this analysis will be completed in year two of the study.

D. Dispatch Records

Dispatch records include all “calls for service” that an agency receives each day. Calls for service are diverse and place varying levels of demand upon the officers that respond. For example, a campus police officer can be dispatched to anything ranging from a suspicious event, crime, accident, escort service request, building check/lock-up to traffic or animal control. Other than criminal events, very few calls for service are evidenced in any of the campus crime statistics. Thus, dispatch records help to determine a department’s true workload. It is important to determine whether or not department workloads affect safety on campuses.

Dispatch and/or daily blotter records were gathered for the period of July 1, 2002 through June 30, 2004 from campus police departments. Twenty-four of the twenty-nine schools with police departments were able to retrieve records from either their local dispatch center or their daily blotters. Departments submitted these records in various formats, both electronic and handwritten. The total amount of records submitted was in excess of 500,000. Prior to receiving any dispatch records, Crime Commission staff intended to analyze all college dispatch records. However, after receipt of numerous records that required manual input, an eight month sample was chosen instead of the full two years. The months included in the sample were February 2003-04, April 2003-04, July 2002-03 and September 2002-03. The results of this analysis will be completed in year two of the study.

In sum, the first year of the study was devoted to the background assessment and collection of information necessary for addressing the directives of the HJR 122 mandate. On December 15, 2004, Crime Commission staff briefed the Commission regarding the overall study methodology, 2004 study activities and 2005 study plans for House Joint Resolution 122.

VI. Year Two Study Activities

The Crime Commission plans to conduct the following activities during the second year to address the study priorities. In addition to the continuous examination of campus police departments, the study will also turn its focus to campuses with security departments. A discussion of each of these activities follows.

- Convening of the Crime Commission Campus Safety Task Force;
- Continuation of literature review;
- Continuation of campus visits;
- Dissemination of survey to campus security departments;
- Collection of judicial referrals;
- Statistical analyses of Clery offenses, UCR offenses, crime logs, and dispatch records; and,
- Formulation of best practices for campus safety in the Commonwealth.

Crime Commission Campus Safety Task Force

The Crime Commission Campus Safety Task Force will convene in year two. A total of at least three formal meetings with this Task Force are expected to occur. As stated prior, this Task Force includes diverse individuals representing various entities. Crime Commission findings from the literature review, statistical analyses, police department and security surveys will all be reviewed and analyzed to develop best practice recommendations for college campuses in the Commonwealth.

Literature Review

The literature review of national, state and academic studies for any additional relevant material to aid in the resolution's directives will be continued. A compilation of best practice recommendations and models will be disseminated to the Crime Commission Campus Safety Task Force for consideration.

Campus Visits

Staff will conduct additional site visits to selected institutions that represent a cross-section of schools varying by location, student enrollment, whether public or private, whether a police or security department, whether two-year or four-year, proximity to an urban area and type of funding stream. During site visits, staff will conduct a campus safety checklist and will discuss campus safety issues with students, faculty, and staff. Staff will also meet with police and security personnel to discuss their roles, activities, difficulties and proactive measures undertaken to promote campus safety.

Campus Surveys

Analysis of the police department surveys will be conducted in the second year of the study. Also, a separate survey instrument for those campuses with security departments will be developed, disseminated and analyzed. Security Directors will assist in the refinement of this instrument. The survey will cover similar issues such as campus demographics, budget, operations, equipment, administrative relations and needed resources. Also, staff will survey students, faculty and staff perceptions of campus safety. The findings from these surveys coupled with the findings of the police department survey will assist the Crime Commission Safety Task Force in formulating best practice recommendations for campus safety in the Commonwealth.

Judicial Referrals

In addition to the other campus crime statistics, Crime Commission staff will examine college judicial councils and judicial referral processes to understand the mechanisms for on-campus discipline. In order to obtain this information, staff will work with the State Council of Higher Education for Virginia (SCHEV) to facilitate colleges' compliance to Crime Commission requests. The information desired is the type of offense, disposition and sanction for all acts that would be considered criminal in a court of law.

Statistical Analyses

A thorough analysis of all collected campus crime and workload statistics for the 75 distinct colleges will be conducted in the second year of the study. This includes all Clery and UCR statistics, crime logs, judicial referrals and dispatch records. The purpose of examining several sources of campus crime statistics is to provide the most comprehensive and accurate view possible. Individual characteristics of colleges will be taken into consideration in order to put their crime statistics in context.

The statistical analysis will entail:

- Comparison and analyses of reported Clery offenses and arrests between all institutions (2000-2003);
- Comparison and analyses of arrests and offenses for each of the 22 schools who reported to UCR for years 2000-2003;
- Comparison of offenses by school size and surrounding population;
- Breakdown of crimes into violent, property, drug-related and weapons-violations;
- Comparison of 2000-2003 per capita offenses for campus to surrounding city/county; and,
- Other relevant summaries and analyses.

Campus crime logs were gathered from July 1, 2002- June 30, 2004. Statistical analysis of crime logs will revolve more around compiling the types of crime that occurred on campus, when and where they occurred, as well as the arrest rate for different types of crime. Dispatch records will be analyzed for the selected sample of February 2003-04, April 2003-04, July 2002-03 and September 2002-03. Activities such as escorts, security checks, building lock-ups, traffic and animal control, as well as, criminal occurrences will be tabulated and compared by time of day and day of week. This analysis will highlight the different types of tasks and calls for service that police departments handle and how variable these duties are across the Commonwealth's college campuses.

The analyses for Clery offenses, UCR offenses, crime logs, and dispatch records will be presented to the Task Force. This data will promote further understanding of campus safety and the differences among Virginia's college campuses, which will aid in developing best practice recommendations.

Best Practice Recommendations

The Crime Commission Campus Safety Task Force will create best practice recommendations for Commonwealth colleges. These recommendations will take note of the unique characteristics of Virginia's colleges; a strong emphasis will be placed on realistically addressing colleges' campus safety abilities. In order to determine how best to improve safety at institutions of higher education, factors such as geographical dispersion, urban or rural location, campus size, lack and nature of funding and training for police and security personnel will be considered. Further, the Task Force's diverse make-up promotes a comprehensive perspective of campus safety that ensures its recommendations will take into account the complexity of campus safety issues within the Commonwealth.

House Joint Resolution 122 (2004)

2004 SESSION

ENROLLED

HOUSE JOINT RESOLUTION NO. 122

Directing the Virginia State Crime Commission to study campus safety at Virginia's public and private institutions of higher education. Report.

Agreed to by the House of Delegates, March 10, 2004

Agreed to by the Senate, March 9, 2004

WHEREAS, numerous aggravated assaults, sexual offenses, robberies, burglaries and other serious crimes are committed every year on the campuses of Virginia's institutions of higher education; and

WHEREAS, institutions of higher education around the country as well as private campus safety organizations have developed innovative campus safety programs that would be beneficial to Virginia colleges; and

WHEREAS, the Virginia Center for School Safety is developing a list of best practices of safety procedures for elementary and secondary schools; and

WHEREAS, no such information has been developed for the system of higher education; and

WHEREAS, information about best practices of campus safety programs and policies would be extremely beneficial to the security of students attending Virginia institutions of higher education; and

WHEREAS, personal safety and security are crucial preconditions that facilitate learning on college campuses; now, therefore, be it

RESOLVED by the House of Delegates, the Senate concurring, That the Virginia State Crime Commission be directed to study campus safety at Virginia's public and private institutions of higher education. The study shall examine (i) current Virginia policies, procedures, and programs used to promote safety at institutions of higher education; (ii) the nature of criminal offenses at Virginia's public and private institutions of higher education; (iii) the use of best practices or models for campus safety nationally; and (iv) the need to develop statewide procedures to ensure the dissemination of information pertaining to best practices for campus safety to Virginia's public and private institutions of higher education.

Technical assistance shall be provided to the Commission by the Secretary of Education, the General and Professional Advisory Committee and the Student Affairs Advisory Committee to the State Council of Higher Education for Virginia, and the Council of Independent Colleges in Virginia. All agencies of the Commonwealth shall provide assistance to the Commission for this study, upon request.

The Virginia State Crime Commission shall complete its meetings by November 30, 2004, and the Chairman of the Commission shall submit to the Division of Legislative Automated Systems an executive summary of its findings and recommendations no later than the first day of the 2005 Regular Session of the General Assembly. The executive summary shall state whether the Commission intends to submit to the General Assembly and the Governor a report of its findings and recommendations for publication as a document. The executive summary and report shall be submitted as provided in the procedures of the Division of Legislative Automated Systems for the processing of legislative documents and reports and shall be posted on the General Assembly's website.

VIRGINIA STATE CRIME COMMISSION

HJR 122 STUDY OF CRIME AND CRIME PREVENTION ON COLLEGE CAMPUSES

Section 30-156 of the *Code of Virginia* authorizes the Virginia State Crime Commission to study and make recommendations on all areas of public safety and protection in the Commonwealth. The 2004 Session of the Virginia General Assembly enacted House Joint Resolution 122 (HJR 122) requesting the Virginia State Crime Commission conduct a comprehensive study of crime and crime prevention on Virginia's public and private college campuses. As part of this study, the Commission is surveying all college and university police departments to collect opinions and information on issues related to crime and crime prevention on college campuses.

The survey is divided into six (6) sections, including:

1. Campus profile;
2. Budget;
3. Personnel/training;
4. Operations;
5. Equipment; and,
6. Administrative relations/resources

Reminders

Please sign and date the signature page at the end of this section.

Please fill out this survey for MAIN campus operations where officers are assigned on a daily basis. Section 6 will address any satellite operations applicable to your agency.

Please return ALL survey sections together by **January 10, 2004**. If you have any questions, contact Stephen Bowman, Staff Attorney, at (804) 225-4534 or via e-mail, (Sbowman@leg.state.va.us). We thank you for your assistance in this important study effort.

Checklist

The following is a reminder list of attachments that should be included along with the other six sections of the survey. Please take the time to review and initial this list to ensure that each item is included. If applicable, the requested items may be submitted in electronic format on a 3 ½" disk or CD.

Section 2- Budget:

- List of outsourced personnel from other state and local law enforcement agencies used in 2004; amount paid by officer name and department affiliation (*page 4*).
- Financial Attachments – (*page 1*).
 - Police Department's FY1999 budget
 - Police Department's FY2004 budget
 - Police Department's FY2005 budget
 - Police Department's FY1999 actual expenditures
 - Police Department's FY2004 actual expenditures

Section 3- Personnel and Training

- List of additional, specialized and "in-house" law enforcement training that were provided for your officers in FY2004 (*page 8*).
- Copy of contractual obligation for time of service that your agency uses (*page 10 if applicable*).

Section 4- Operations

- Copies of each mutual aid agreement(s) (*page 5 if applicable*).
- Copies of each concurrent jurisdiction agreement(s) (*page 6 if applicable*).
- Copy of ALL policy/procedure manuals (*page 8*).
- Copy of the most recent surveys (any and all) conducted by YOUR agency (*page 11*).
- Copy of the most recent university/college national accreditation questionnaire results (*page 12*).

Section 5- Equipment

- Fleet List: Include ALL vehicles (cars, vans, motorcycles, scooters, bicycles, etc.) AND their descriptions including type, year, mileage, make, marked/unmarked (*page 3*).

Section 6: Administrative Relations and Resources

- List of program/new initiative requests for the past 5 years, including whether it was funded, and to what degree. Include the amount of funds available for program/new initiatives across the college or university (*page 5*).

SECTION 1

Campus Profile

REMINDERS:

Please sign and date the signature page at the end of this section.

Please fill out this survey for MAIN campus operations where officers are assigned on a daily basis. Section 6 will address any satellite operations applicable to your agency.

Please return ALL survey sections together by January 10, 2004. If you have any questions, contact Stephen Bowman, Staff Attorney, at (804) 225-4534 or via e-mail, (Sbowman@leg.state.va.us). We thank you for your assistance in this important study effort.

SECTION 1: CAMPUS PROFILE

1. Name of College/ University: _____
2. Name of Campus Policing Agency: _____
3. Name and Official Title of the Head of Campus Policing Agency:
 - a. Name: _____
 - b. Title: _____
4. Name and Official Title of the Person to which the Agency Head reports to:
(Be as specific as possible. For example, "Vice President of Administration")
 - a. Name: _____
 - b. Title: _____
5. Which of the following describes your college/university? *(Please check one.)*
 - Single campus
 - Multiple campuses; if so, how many: _____

Reminder: The remainder of this survey is designed for MAIN campus operations where officers are assigned on a daily basis. Satellite operations will be addressed in section 6.

6. Please provide the *headcount* of students enrolled on the main campus as of September 30, 1999 and 2004. Headcount is defined as individual students who have paid regular student fees and were registered for academic courses for the Fall 1999 and 2004 semesters.

SECTION 3: PERSONNEL/TRAINING

This section of the survey is designed to determine differences in overall staffing levels from September 1999 to September 2004. Questions for 1999 will be briefer than those for the current year.

FUNDED PERSONNEL ONLY- September 1, 1999

1. What was the total number of full-time and part-time employees, funded by all sources working in your department as of **September 1, 1999**?

_____ Employees

1a. Of the number of employees working in the department on **September 1, 1999**, how many were working in the following capacities? **DO NOT DOUBLE-COUNT**. List employee in area of primary responsibility. *(Part-time includes those persons working less than 40 hours per week or those working hourly without benefits).*
