### **Commonwealth of Virginia**

**Debt Capacity Advisory Committee** 

**REVISED Report to the Governor and General Assembly** 

**February 25, 2008** 

### COMMONWEALTH of VIRGINIA

Office of the Governor

Jody M. Wagner Secretary of Finance

February 25, 2008

P. O. Box 1475 Richmond, Virginia 23218

The Honorable Timothy M. Kaine Governor of Virginia Patrick Henry Building, 3<sup>rd</sup> Floor Richmond, Virginia 23219

The Honorable Bruce F. Jamerson Clerk of the House of Delegates Virginia House of Delegates State Capitol, Room 303 Richmond, Virginia 23219

The Honorable Susan Clarke Schaar Clerk of the Senate Senate of Virginia State Capitol, 3<sup>rd</sup> Floor Richmond, Virginia 23219

Dear Governor Kaine, Mr. Jamerson, and Ms. Schaar:

On December 17, 2007, the Debt Capacity Advisory Committee (the "Committee") submitted to you our estimate of the maximum amount of new tax-supported debt that prudently may be authorized for the next two years. The Committee reconvened on February 25, 2008 to reevaluate the Debt Capacity Model (the "Model") in light of the February 11, 2008 revised revenue forecast. Other assumptions used in the December 17, 2007 report (e.g., interest rates, issuance of authorized and unissued debt, etc. remain unchanged. We are pleased to present this revised report.

### The Debt Capacity Model

The Model calculates the maximum amount of incremental debt that may prudently be issued by the Commonwealth over the next ten years and features an additional two years of debt issuance capacity as a reserve beyond the end of the ten-year issuance period. The reserve is used as a hedge against variations in other assumptions used in the Model, such as interest rates and revenue growth. The Model uses as a base assumption that tax-supported debt service should be no greater than five percent of revenues. In our view, five percent is consistent with maintaining the Commonwealth's premier credit ratings. The Debt Capacity Model is attached as Exhibit A.

The Honorable Timothy M. Kaine The Honorable Bruce F. Jamerson The Honorable Susan Clarke Schaar February 25, 2008 Page 2

### Recommendation

The Committee believes that based upon the Debt Capacity Model and the Governor's Revised Official Revenue Forecast of February 11, 2008:

- A maximum of \$795.74 million of tax-supported debt could prudently be authorized by the 2008 Session of the General Assembly; and
- A maximum of \$795.74 million of tax-supported debt could prudently be authorized by the 2009 Session of the General Assembly.

This authorization is above and beyond the tax-supported debt that is currently authorized but unissued. The recomendation does not include any pending debt authorization currently before the 2008 General Assembly.

Although the Committee's statutory requirement is to recommend the amount of debt that prudently may be authorized for the biennium, we have noted the period of time between the authorization of capital projects and permanent financing can span several years. When factoring authorized and unissued debt into the Model's assumptions, issuance expectations are considered. Similarly, when evaluating debt proposals that involve issuance over multiple years, issuance expectations may lessen the immediate impact on debt capacity.

The Committee makes no recommendation as to the actual amount of debt to be authorized by the General Assembly and approved by the Governor, or which projects, if any, should be chosen for debt financing. These decisions are most appropriately made through the budgetary and legislative processes. Please see charts in Exhibits C-8 through C-11 for information on the Commonwealth's outstanding debt.

### Sensitivity

The Committee recognizes that it cannot predict the future level of interest rates or the pace of revenue growth and recognizes the sensitivity of the Model results to such factors. For example, a one percent change in general fund revenues in each and every year of the Model solution horizon will change the amount of annual debt capacity by approximately \$14.26 million. A change in general fund revenues of \$100 million in each and every year of the Model solution horizon will produce approximately \$6.89 million of incremental annual debt capacity change. Attached as Exhibit B are sensitivity analyses that demonstrate the impact on the Model of changes in external factors such as interest rates and revenues, or internal factors such as excess capacity.

The Honorable Timothy M. Kaine The Honorable Bruce F. Jamerson The Honorable Susan Clarke Schaar February 25, 2008 Page 3

### **Conclusion**

We trust this report and our recommendations are useful as we move forward to conclude the 2008 Session of the General Assembly. It has been our pleasure to advise you on including the concepts of debt affordability and debt capacity management into the Commonwealth's debt management programs. The Commonwealth of Virginia has become an acknowledged leader among states in the area of debt capacity management, and is repeatedly held out as an example of how the process should work.

Sincerely,

/s/ Jody M. Wagner, Chairman Jody M. Wagner, Chairman

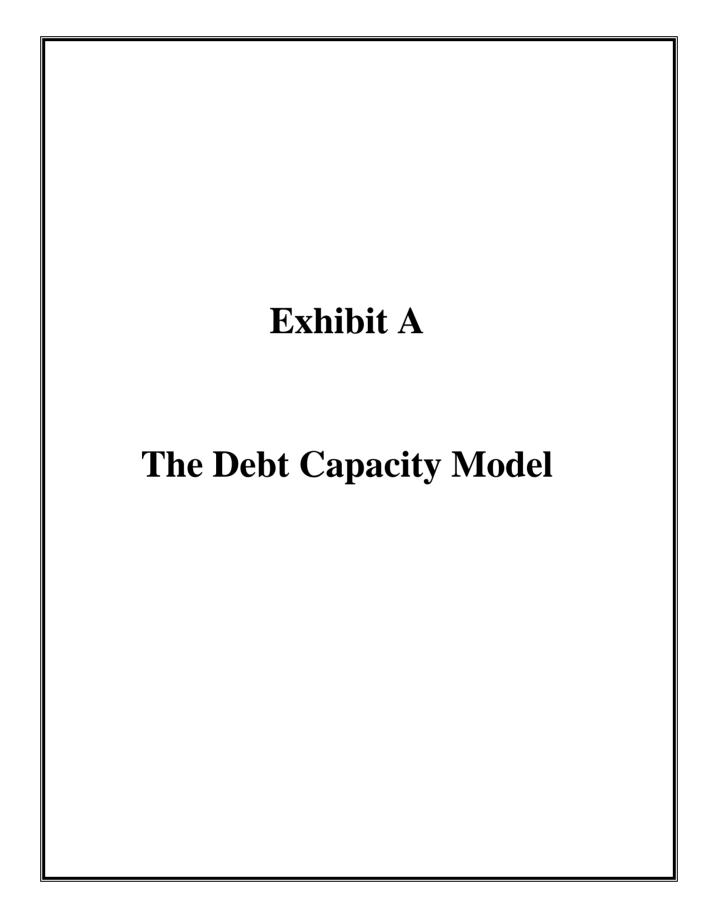

/s/ Walter W. Craigie Walter W. Craigie /s/ William K. Butler, II William K. Butler, II

Attachments

- Rating agencies view control of tax-supported debt as one of four key factors affecting credit quality.
  - control of debt burden
  - economic vitality and diversity
  - fiscal performance and flexibility
  - administrative capabilities of government
- Virginia's goal is to maintain AAA/Aaa/AAA ratings for General Obligation debt.
  - Commonwealth's "AAA" rating reaffirmed by Fitch Ratings, Moody's and Standard & Poor's (November 2007)
- Definition of tax-supported debt.
  - debt service payments made or ultimately pledged to be made from general government funds
  - corresponds with rating agency definition
  - contrast with debt not supported by taxes such as moral obligation debt

### **General Observations and Assumptions**

- Virginia's Debt Affordability Model:
  - Debt Affordability Measure
     Tax-Supported Debt Service < 5%</li>

### Revenues

- 10-year issuance period
- Incorporates currently authorized but unissued debt
- Blended revenue growth rate
- Term and structure:
  - 20-year bonds
  - Assumed interest rate of <u>4.34%</u> for 9(b) and 9(c) General Obligation debt. 9(d) debt has an assumed interest rate of 4.84%.
  - Level debt service (except 9(b) debt)
  - 9(b) General Obligation debt is amortized on a level principal basis
- Actual debt service of all issued tax-supported debt, including capital leases, installment purchases and regional jail reimbursement agreements (see page A-3 for liability inclusion criteria).
- Blended Revenues:
  - General fund revenues and state revenues in Transportation Trust Fund, including transfers of ABC and Lottery profits. For purposes of the Model, 9(c) revenues and debt service of self-supporting projects are offset and have a neutral impact on debt capacity.
- Interest Rates:
  - Assumed issuance of authorized but unissued tax-supported debt and associated debt service, computed using estimated interest rates based on the average of the last eight quarters of The Bond Buyer 11 Bond Index for general obligation debt 9(b) and 9(c), and a 50 basis point higher rate for 9(d) debt.

### **Debt Capacity Model General Observations and Assumptions**

### Debt Capacity Advisory Committee Liabilities included in the Debt Capacity Model

- 1) Outstanding tax-supported debt as determined by the DCAC.
  - General obligation bonds (Section 9(a), 9(b), and 9(c)).
  - Obligations issued by the Commonwealth Transportation Board or Virginia Port Authority that are secured, in whole or in part, by the Transportation Trust Fund.
  - Obligations issued by the Virginia Public Building Authority and the Virginia College Building Authority secured, in whole or in part, by general fund appropriations.
  - Obligations payable under regional jail Reimbursement Agreements between the Treasury Board and localities, regional jail authorities or other combination of localities.
  - Capital leases (80% of total of first year amounts in Commonwealth CAFR for both primary government and component units).
  - Installment purchases (80% of total of first year amounts in Commonwealth CAFR for both primary government and component units).
  - Obligations for which the debt service is paid from payments received from the Commonwealth on a capital lease.
- 2) Authorized but unissued tax-supported debt as determined by the DCAC.
  - The issuance of obligations to fund a project(s) must be authorized by an Act of the General Assembly (either an Act specifically authorizing the issuance of debt, or Appropriation Act language) with no contingency for subsequent General Assembly approval. If obligations are authorized but will require further action by the General Assembly before they can be issued, then such obligations will not be included in the Model. The practical application of this rule will be that if debt can be issued for a project without any further action on the part of the General Assembly, such debt will be considered as authorized for issuance.

### **Debt Capacity Model General Observations and Assumptions**

### Debt Capacity Advisory Committee Liabilities included in the Debt Capacity Model

- 3) That portion of outstanding moral obligation debt for which the underlying debt service reserve fund has been utilized to pay all or a portion of debt service and for which the General Assembly has appropriated funds to replenish all or a portion of such debt service reserve fund as requested by the moral obligation issuer.
  - In the event that a moral obligation issuer has experienced an event of a
    default on the underlying revenue stream and such issuer has been forced
    to draw on the debt service reserve fund to pay debt service, the
    Committee shall immediately meet and review the circumstances
    surrounding such event and report its findings to the Governor and the
    General Assembly.
  - In the event this section is invoked, the Committee's Report to the Governor and General Assembly shall include, one Model scenario showing annual tax-supported debt capacity with inclusion of the moral obligation debt (or portion thereof) in question.
  - Inclusion of the debt in the Model is in no way intended to bind the Governor or General Assembly to make future appropriations to replenish future draws on such debt service reserve fund(s).
  - The subject debt will be removed from the Model once the General Assembly has not appropriated funds to replenish such debt service reserve fund(s).

### **Parameters of the Model**

- (1) **Blended Revenues** include all general fund revenues (exclusive of transfers), ABC and Lottery profits transferred to the general fund and state tax revenues in the Transportation Trust Fund.
- (2) **Base Capacity to Pay Debt Service** is calculated as the product of the Debt Capacity Maximum Ratio and Revenues. [Column 2 = Column 1 x .05]
- (3) **9(c) Revenues** represents 9(c) revenue equal to debt service on outstanding 9(c) debt.
- (4) **Total Capacity to Pay Debt Service** is calculated as the Base Capacity plus 9(c) revenues equivalent to 9(c) debt service. It represents the maximum level of debt service allowed given the 5% debt service/revenues ratio. [Column 4 = Column 1 x 5%+Column 3]
- (5) Annual Payments for Debt Service on Debt Issued is actual debt service on all tax-supported debt outstanding at the end of the most recent fiscal year and on any issuance to date since fiscal year end.
- (6) Annual Payments for Debt Service on All Planned Debt Issuances is the estimated amount of debt service for currently authorized and unissued tax-supported debt assumed to be issued within the ten-year period.

### **The Debt Capacity Model (continued)**

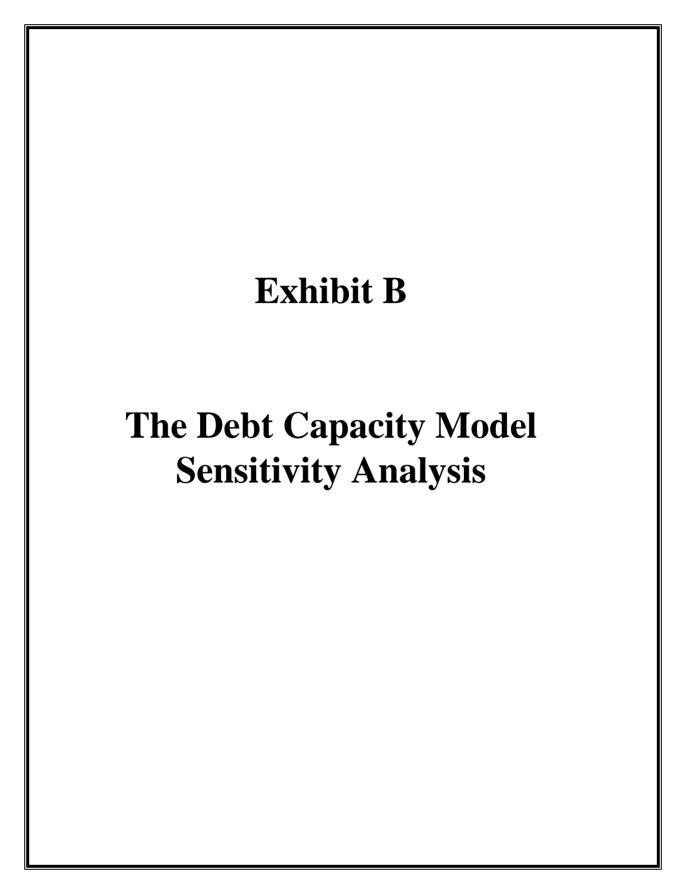

### **Parameters of the Model**

- (7) Actual and Projected Debt Service as a % of Revenues is the sum of Annual Payments for Debt Service on Debt Issued and Annual Payments for Debt Service on All Planned Debt Issuances less 9(c) debt service equal to revenue, divided by Revenues. 9(c) Revenues and 9(c) Debt Service are treated as offsetting.
- (8) **Net Capacity to Pay Debt Service** is Total Capacity to Pay Debt Service less Annual Payments for Debt Service on Debt Issued and Annual Payments for Debt Service on All Planned Debt Issuances. [Column 8= 4-5-6]
- (9) Amount of Additional Debt that May Be Issued is the amount of additional tax-supported debt (above and beyond that which is currently authorized but unissued) that may be issued in any given year without exceeding Overall Capacity to Pay Debt Service.
- (10) **Debt Service on the Amount of Additional Debt that May Be Issued** is the estimated amount of debt service for the Additional Debt that may be Authorized and Issued.
- (11) **Remaining Capacity to Pay Debt Service** is Net Capacity to Pay Debt Service less Debt Service on the Amount of Additional Debt that may be Authorized and Issued. [Column 11=8-10]
- (12) **Total Debt Service as a % of Revenues** is the sum of Annual Payments for Debt Service on Debt Issued, Annual Payments for Debt Service on All Planned Debt Issuances and Debt Service on the Amount of Additional Debt that may be Authorized and Issued, divided by Revenues and 9(c) Revenues.

### **The Debt Capacity Model (continued)**

### **Parameters of the Model**

- Model solves for annual capacity, above and beyond authorized amounts assumed issued for the next ten fiscal years at the 5% debt service/revenues level over a ten-year period.
  - \$ 795.74 million is equal annual issuance capacity.
    - debt service/revenues ratio rises to a maximum of 4.58% in FY 2016
    - projected issuance never reaches 5% capacity and two years excess capacity is maintained at end of ten-year period
- Two years of excess capacity is a function of conservatism.

### **The Debt Capacity Model Sensitivity Analysis**

### **Excess Capacity Sensitivity**

 Model solution provides for two years of excess capacity remaining at end of the ten-year Model period which results in the following annual debt capacity:

### 2 Year Excess Capacity

\$795.74 million

- If the Model solution is altered to reduce the two years of excess capacity to **one year of excess capacity**, the following annual debt capacity figures are produced:
  - Debt service as a percentage of revenues peaks at 4.77% in fiscal year 2016.
  - \$875.32 million of annual debt capacity is available for the tenyear Model period.
- If the Model solution is altered to reduce the two years of excess capacity to **no excess capacity**, the following annual debt capacity figures are produced:
  - \$972.00 billion of annual debt capacity is available for the tenyear Model period.
  - Debt service as a percentage of revenues peaks at 4.99% in fiscal years 2016.

### **The Debt Capacity Model Sensitivity Analysis**

### **Revenue Sensitivity**

• If the Model solution is altered to increase or decrease General Fund revenues, the following incremental annual debt capacity changes are produced:

For each change of \$100 million

in each and every year

\$ 6.89 million

For each 1% change of revenues

in each and every year

\$ 14.26 million

### **Interest Rate Sensitivity**

• If the Model solution is altered to change interest rates, the following annual debt capacity figures are produced:

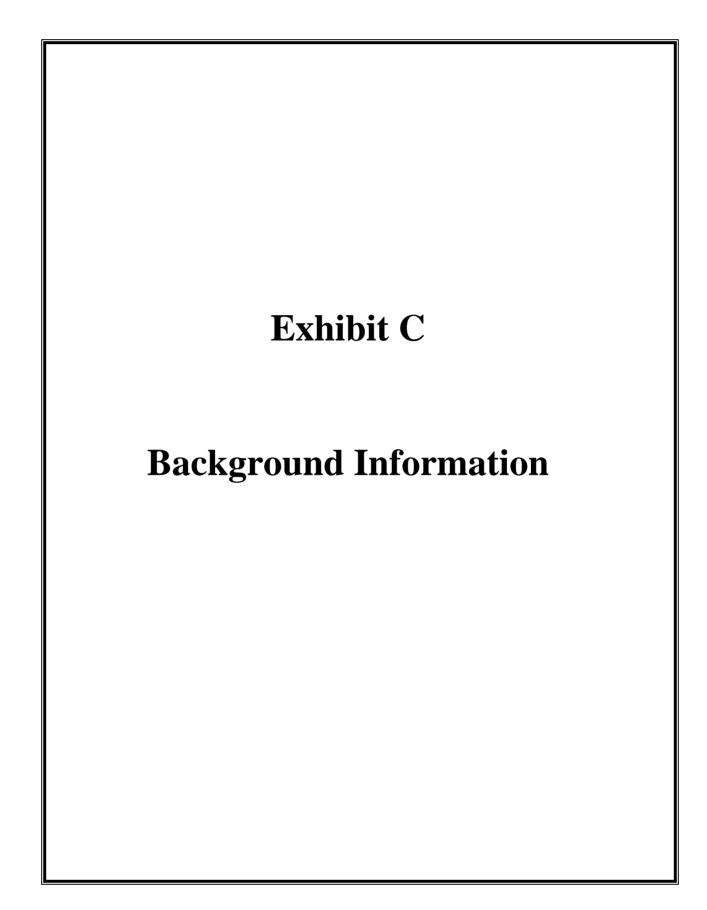

Add 100 basis points to base rate

\$731.05 million

Subtract 100 basis points from

base rate

\$869.73 million

### **Background**

Creation of the Debt Capacity Advisory Committee was recommended in *An Assessment of Debt Management in Virginia*, December 1990. The Committee was originally created in September 1991, by Executive Order #38. The Committee was subsequently codified under Chapter 43 of the 1994 Virginia Acts of Assembly, as amended.

The Committee's mandate is to annually review the size and condition of the Commonwealth's tax-supported debt and submit to the Governor and the General Assembly before January 1, an estimate of the maximum amount of new tax-supported debt that prudently may be authorized for the next biennium (Section 2.2-2714 Code of Virginia). This estimate is advisory and in no way binds the Governor or the General Assembly.

In developing its annual estimate and in preparing its annual report, the Committee shall, at a minimum, consider:

- the amount of tax-supported debt that, during the next fiscal year and annually for the following nine fiscal years, will be outstanding and the amount of tax-supported debt which has been authorized but not yet issued;
- a projected schedule of affordable, state tax-supported debt authorizations for the next biennium:
- projected debt service requirements during the next fiscal year and annually for the following nine fiscal years based on existing outstanding debt, previously authorized but unissued debt, and projected debt authorizations;
- the criteria that recognized bond rating agencies use to judge the quality of Commonwealth bond issues;

### **Background (Continued)**

- any other factor that is relevant to (i) the ability of the Commonwealth to meet its projected debt service requirements for the next two fiscal years; (ii) the ability of the Commonwealth to support additional debt service in the upcoming biennium; (iii) the requirements of the statewide capital plan; and (iv) the interest rate to be borne by, the credit rating on, or any other factor affecting the marketability of such bonds; and
- the effect of authorizations of new tax-supported debt on each of the considerations listed above.

The Committee is also required to annually review the amount and condition of moral obligation debt and other debt for which the Commonwealth has a contingent or limited liability and make recommendations to ensure the prudent use of such obligations.

In addition, the Committee is also required to review the amount and condition of Commonwealth obligations that are not general obligations or moral obligations, and when appropriate, recommend limits on such additional obligations to the Governor and to the General Assembly.

### **Review of the December 2006 Report**

The Committee issued its fifteenth annual report to the Governor and the General Assembly on December 15, 2006. The report addressed the following issues:

- Reaffirmed the use of debt service on tax-supported debt and related long-term obligations as a percentage of revenues as the debt affordability measure used in the Model. In addition, reaffirmed a maximum ratio of debt service as a percentage of revenues of 5%.
- Concluded that the Commonwealth could issue \$945.57 million of tax-supported debt in each year from fiscal year 2007 through fiscal year 2016 above and beyond tax-supported debt already outstanding or authorized, while still holding the ratio to tax-supported debt service as a percentage of revenues below 5%.
- Recommended that \$945.57 million of tax-supported debt could be prudently authorized by the 2007 and 2008 Sessions of the General Assembly, representing a maximum authorized amount of \$1,891.14 million for the biennium.
- Noted that the Model's results are sensitive to changes in revenues. Specifically, that a one percent change in general fund revenues in each and every year of the Model's solution horizon will change annual debt capacity by approximately \$15.19 million. A change in general fund revenues of \$100 million in each and every year of the Model's solution horizon will produce an incremental debt capacity change of approximately \$6.81 million annually.
- Made no recommendation as to which projects, if any, should be chosen for debt financing or how they should be prioritized. Reaffirmed that this decision was most appropriately made through the budgetary and legislative processes.

### **Review of the December 2006 Report (Continued)**

- Continued to recommend that Cabinet Secretaries work with the Secretary of Finance to develop a proposal for rescinding unnecessary authorizations for consideration in the 2007 General Assembly Session.
- Continued to recommend the use of financing processes which promote the lowest possible cost of funds to the Commonwealth by by utilizing traditional financing vehicles such as the Virginia Public Building Authority and the Virginia College Building Authority whenever appropriate.
- Reviewed outstanding moral obligation debt and other debt for which the Commonwealth has a contingent or limited liability. The Committee reconfirmed that the Commonwealth is not unique in its use of moral obligation debt, as a number of other state issuers utilize the moral obligation pledge. The Committee continued to review the types of programs, statutory caps, outstanding amounts and other financial data for certain other states that utilize moral obligation bond programs and compared these to Commonwealth issuers. The Committee recommended no changes to existing programs and recommended no change to levels of statutory caps for the three issuers currently utilizing the moral obligation pledge of the Commonwealth.

### **Moral Obligation Debt**

• Definition of Moral Obligation Debt:

Moral obligation debt refers to a bond issue structure originally created in the 1960s and utilized primarily by state housing finance agencies or state-administered municipal bond banks as additional credit enhancement for revenue bond issues. A government's moral obligation pledge provides a deficiency make-up for bondholders should underlying project revenues prove insufficient. The mechanics involve funding a debt service reserve fund when the bonds are issued. If a revenue deficiency exists, reserve fund monies are used to pay bondholders. The issuer then informs the legislative body requesting that it replenish the reserve fund before subsequent debt service is due. The legislative body "may", but is not legally required to, replenish the reserve fund.

- Rating agencies do not include in tax-supported debt ratios as long as bonds are self-supporting.
- Commonwealth Moral Obligation Debt Issuers:
  - -Virginia Resources Authority
  - -Virginia Housing Development Authority Multi-Family Housing Bonds

### **Moral Obligation Debt**

Issuer	Statutory Limit	Outstanding At June 30, 2007	Available Authorization
Virginia Resources Authority	\$ 900,000	\$ 678,600	\$ 221,400
Virginia Housing Development Authority	1,500,000	449,350	1,050,650
Total	\$2,400,000	\$1,127,950	\$1,272,050

### Dates upon which issuers expect to meet or exceed statutory borrowing cap:

VHDA: - Alternative financing programs initiated in

fiscal year 1999 do not require use of moral obligation. Does not expect to issue additional

moral obligation debt.

VRA: - Cap raised from \$550 million to \$900 million

in 2001. Cap is not expected to be reached prior

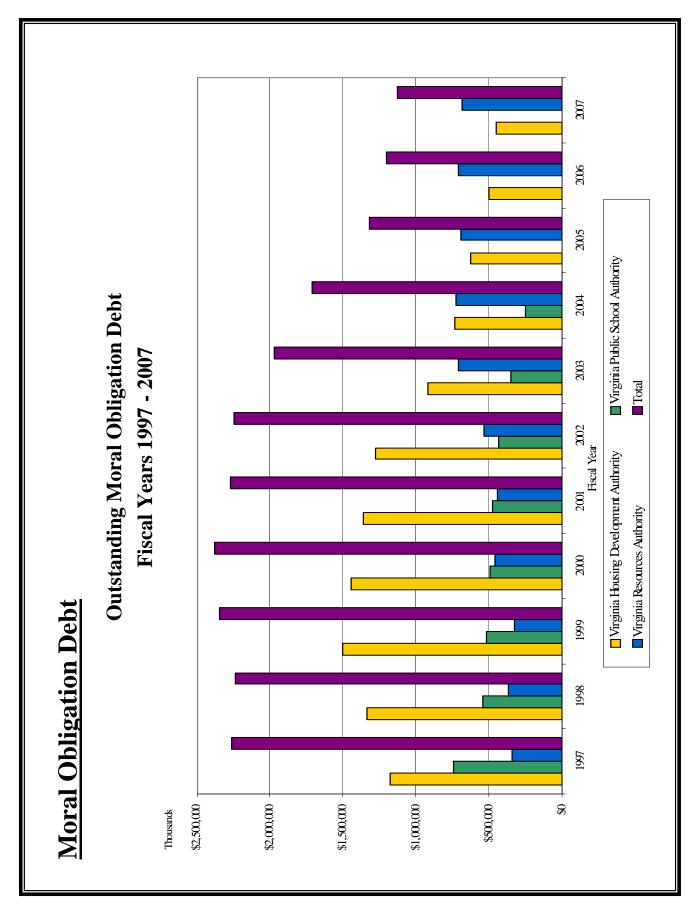

to fiscal year 2011.

**Bond Ratings:** Fitch Moody's S&P

**VHDA** 

(Multi-Family): N/R Aa1 AA+

VRA: N/R Aa2 AA

### **Contingent or Limited Liability Debt**

- The only non-tax-supported debt obligations for which the Commonwealth has a contingent or limited liability are those which utilize a "sum sufficient appropriation" (SSA) to pay debt service.
- SSA was previously only used on certain revenue bonds issued by the Virginia Public School Authority under its 1997 Resolution. The Virginia Public School Authority had \$2,793,195,000 of 1997 Resolution bonds outstanding as of June 30, 2007.
- The 2000 Appropriation Act (Chapter 1073) authorized the use of SSA for certain revenue notes issued by the Virginia Public School Authority under its Educational Technology Program. The SSA was codified during the 2001 General Assembly session. The Virginia Public School Authority issued its first series of notes enhanced by the SSA in the Spring of 2001. Notes outstanding as of June 30, 2007 equal \$172,390,000.

<b>Bond Ratings:</b>	<u>Fitch</u>	Moody's	<u>S&amp;P</u>
VPSA (1997 Resolution):	AA+	Aa1	AA+
VPSA (Equipment Technology Notes):	AA+	Aa1	AA+

### **Moral Obligation Debt**

### **Excess Capacity Sensitivity**

• The current Model solution provides for two years of excess capacity remaining at end of the 10-year Model period (excluding moral obligation debt) which results in annual debt capacity of \$795.74 million.

### **Total Moral Obligation Debt Sensitivity**

- If the Model solution is altered to assume conversion of the entire \$2.4 billion statutory cap for all moral obligation debt to tax-supported debt, the following annual debt capacity figures are produced:
  - -Debt service as a percentage of revenues peaks at 4.97% in fiscal year 2012.
  - -\$577.56 million of annual debt capacity is available for the ten-year model period.

### **VHDA Sensitivity**

- If the Model solution is altered to assume conversion of the VHDA's total outstanding moral obligation debt (as of 6/30/07) to tax-supported debt, the following annual debt capacity figures are produced:
  - -Debt service as a percentage of revenues peaks at 4.61% in fiscal year 2016.
  - -Annual debt issuance capacity of \$754.89 million is available for the ten-year Model period.

### **Moral Obligation Debt**

### **VRA Sensitivity**

- If the Model solution is altered to assume conversion of the VRA's total statutory moral obligation cap of \$900 million to tax-supported debt, the following annual debt capacity figures are produced:
  - -Debt service as a percentage of revenues peaks at 4.63% in fiscal year 2016.
  - -\$734.05 million of annual debt issuance capacity is available is available for the ten-year Model period.

### **Sum Sufficient Appropriation Sensitivity**

### **VPSA Sensitivity**

- If the Model solution is altered to assume conversion of the VPSA's total outstanding debt secured by a sum sufficient appropriation (as of 6/30/07) to tax-supported debt, the following annual debt capacity figures are produced:
  - -Debt service as a percentage of revenues peaks at 4.93% in fiscal year 2012.
  - -Annual capacity of \$250.00 million is available during fiscal years 2008 and 2009, with capacity rising to \$460.00 million during the remaining eight years of the Model period.
