

VIRGINIA DEPARTMENT OF EDUCATION

REPORT

# **Status of Regional Alternative Education Student Slots for 2008-2009**

PRESENTED TO THE

**GOVERNOR OF VIRGINIA AND THE  
VIRGINIA GENERAL ASSEMBLY**

**May 1, 2009**

# COMMONWEALTH of VIRGINIA

Patricia I. Wright, Ed.D.  
Superintendent of Public Instruction

DEPARTMENT OF EDUCATION  
P.O. BOX 2120  
Richmond, Virginia 23218-2120

Office: (804) 225-2023  
Fax: (804) 371-2099

May 1, 2009

The Honorable Lacey E. Putney, Chairman  
House Appropriations Committee  
Post Office Box 127  
Bedford, Virginia 24523

The Honorable Charles J. Colgan, Chairman  
Senate Finance Committee  
10677 Aviation Lane  
Manassas, Virginia 20110-2701

Dear Delegate Putney and Senator Colgan:

As required by the Appropriation Act, Chapter 879, 2008 Acts of Assembly, enclosed is the report for the 2008-2009 school year on the status of Regional Alternative Education Student Slots. The provisions in the act state that "The Department of Education shall report by June 30 each year, to the Chairmen of the House Appropriations and Senate Finance Committees, the number of available student slots, students placed, the request of unused slots, and the number of unused slots subsequently used by each school division for each Regional Alternative Education program."

If you have questions or require additional information relative to this transmittal, please contact Diane Jay, associate director, Office of Program Administration and Accountability, at [Diane.Jay@doe.virginia.gov](mailto:Diane.Jay@doe.virginia.gov) or by telephone at (804) 225-2905.

Sincerely,

A handwritten signature in blue ink that reads "Patricia I. Wright".

Patricia I. Wright

PIW/dj  
Enclosure

c: The Honorable Thomas Morris, Secretary of Education

## Executive Summary

The Regional Alternative Education Programs were established by the General Assembly in 1993-1994 with the intent of involving two or more school divisions working in collaboration to establish options for students who have a pending violation of school board policy, have been expelled or suspended on a long-term basis, or are returning from juvenile correctional centers. The General Assembly provides state funding based on allocated slots to the programs. A funding formula based on a standard staffing model and the composite index of local ability to pay determines funding amounts for each of the 30 programs.

The Appropriation Act, Chapter 879, 2008 Acts of Assembly, states that “The Department of Education shall report by June 30 each year, to the Chairmen of the House Appropriations and Senate Finance Committees, the number of available student slots, students placed, the request of unused slots, and the number of unused slots subsequently used by each school division for each Regional Alternative Education program.”

Statewide, there were 1,822 slots allotted by formula among 30 regional alternative education programs for 2008-2009. Twenty-five of the 30 programs indicated that they would have placements for all slots assigned to each division in each regional program. Five regional programs reported that there would be unused slots in one of their participating divisions. In each of these five regional programs, one or more of the other participating school divisions requested the additional slots. There were no unused slots to distribute statewide.

As stipulated in the Appropriation Act, Chapter 879, 2008 Acts of Assembly, the requesting school division received only the state’s share of tuition for the unused slot that was allocated for the originally designated school division. Follow-up correspondence to the school divisions receiving the unused slots indicated that the reassigned slots were used by the school divisions.

## Status of Regional Alternative Education Placements for 2008-2009

Background: The Regional Alternative Education Programs were established by the General Assembly in 1993-1994 with the intent of involving two or more school divisions working in collaboration to establish options for students who have a pending violation of school board policy, have been expelled or suspended on a long-term basis, or are returning from juvenile correctional centers. The General Assembly provides state funding based on allocated slots to the programs. A funding formula based on a standard staffing model and the composite index of local ability to pay determines funding amounts for each of the 30 programs. A list of the regional programs can be found in Appendix A.

The Appropriation Act, Chapter 879, 2008 Acts of Assembly, includes provisions for reallocating unused student slots in regional alternative education programs. The language of the provision can be found in Appendix B and is outlined as follows:

- In the event a school division does not use all of the student slots it is allocated under a regional alternative education program, the unused slots may be reallocated or transferred to another school division.
- A school division must request from the Department of Education the availability and possible use of any unused student slots. If any unused slots are available, and if the requesting school division chooses to utilize any of the unused slots, the requesting school division shall receive only the state's share of tuition for the unused slot that was allocated for the originally designated school division.
- However, no requesting school division shall receive more tuition funding from the state for any requested unused slot than what would have been the calculated amount for the requesting school division had the unused slot been allocated to the requesting school division in the original budget. Furthermore, the requesting school division shall pay for any remaining tuition payment necessary for using a previously unused slot.
- The Department of Education shall report by June 30 each year, to the Chairmen of the House Appropriations and Senate Finance Committees, the number of available student slots, students placed, the request of unused slots, and the number of unused slots subsequently used by each school division for each Regional Alternative Education program.

Process Used to Comply with General Assembly Provisions: The Department of Education issued Superintendent's Informational Memorandum 95, dated April 18, 2008, "Provisions for Reallocating Unused Student Slots in Regional Alternative Education Programs for 2008-2009." The memorandum advised division superintendents of the provisions for reallocating unused student slots in the state's Regional Alternative Education Programs. Appendix C contains the process used to determine the distribution of unused student slots

for the 2008-2009 school year. Following the distribution of the memorandum, the Department sent a data collection survey on the number of slots to be used in each Regional Alternative Education Program for 2008-2009 to the project directors of the 30 programs.

Results: Statewide, there were 1,822 slots allotted by formula among 30 regional programs for 2008-2009. Twenty-five of the 30 programs indicated that they would have placements for all slots assigned to each division in each regional program. Five regional programs reported that there would be unused slots in one or more of their participating divisions. In each of these five regional programs, one or more of the other participating school divisions requested the additional slots. There were no unused slots to distribute statewide.

Based on the process for distribution of slots established by the Department, the unused slots were distributed first to the requesting school division being served in the Regional Alternative Education Program. By this process, 25 slots were reassigned.

- In the Lynchburg regional program, Bedford reported that four of its assigned slots would not be used, and Amherst requested the four additional slots.
- In the Petersburg regional program, Colonial Heights indicated that it would not use two slots, and Dinwiddie indicated it would not use three slots. Sussex requested two additional slots, and Hopewell requested three additional slots.
- In the Stafford regional program, Spotsylvania indicated that it would not use seven slots. Stafford requested one additional slot; Caroline requested two additional slots; Fredericksburg requested two additional slots; and King George requested two additional slots.
- In the Staunton project, Staunton indicated that it would not use six of its assigned slots. Harrisonburg and Waynesboro each requested three additional slots.
- In the Buena Vista regional program, Lexington indicated that it would not use three slots. Buena Vista requested two additional slots, and Rockbridge requested one additional slot.

As stipulated in the Appropriation Act, the requesting school division received only the state's share of tuition for the unused slot that was allocated for the originally designated school division. A chart that depicts the redistribution of slots is shown in Appendix D.

In follow-up correspondence in March 2009, the school divisions receiving the unused slots indicated that the reassigned slots were used by their school divisions.

## Appendix B

**Item 140.C.11.e of Chapter 879, 2008 Acts of Assembly**  
(<http://leg1.state.va.us/cgi-bin/legp504.exe?081+bud+21-140>)

## e. Regional Alternative Education Programs

1) An additional state payment of \$6,724,960 the first year and \$6,977,930 the second year from the general fund shall be disbursed for regional alternative education programs. Such programs shall be for the purpose of educating certain expelled students and, as appropriate, students who have received suspensions from public schools and students returned to the community from the Department of Juvenile Justice.

2) Each regional program shall have a small student/staff ratio. Such staff shall include, but not be limited to education, mental health, health, and law enforcement professionals, who will collaborate to provide for the academic, psychological and social needs of the students. Each program shall be designed to ensure that students make the transition back into the "mainstream" within their local school division.

3a) Regional alternative education programs are funded through this Item based on the state's share of the incremental per pupil cost for providing such programs. This incremental per pupil payment shall be adjusted for the composite index of local ability-to-pay of the school division that counts such students attending such program in its March 31 Average Daily Membership. It is the intent of the General Assembly that this incremental per pupil amount be in addition to the basic aid per pupil funding provided to the affected school division for such students. Therefore, local school divisions are encouraged to provide the appropriate portion of the basic aid per pupil funding to the regional programs for students attending these programs, adjusted for costs incurred by the school division for transportation, administration, and any portion of the school day or school year that the student does not attend such program.

b) In the event a school division does not use all of the student slots it is allocated under this program, the unused slots may be reallocated or transferred to another school division.

1. A school division must request from the Department of Education the availability and possible use of any unused student slots. If any unused slots are available and if the requesting school division chooses to utilize any of the unused slots, the requesting school division shall only receive the state's share of tuition for the unused slot that was allocated in this Item for the originally designated school division.

2. However, no requesting school division shall receive more tuition funding from the state for any requested unused slot than what would have been the calculated amount for the requesting school division had the unused slot been allocated to the requesting school division in the original budget. Furthermore, the requesting school division shall pay for any remaining tuition payment necessary for using a previously unused slot.

3. The Department of Education shall report by June 30 each year, to the Chairmen of the House Appropriations and Senate Finance Committees, the number of available student slots, students placed, the request of unused slots, and the number of unused slots subsequently used by each school division for each Regional Alternative Education program.

4) The Board of Education shall provide assistance for the state share of the incremental cost of regional alternative education program operations based on the composite index of local ability-to-pay.

## Appendix C

**Department of Education Process for  
Determining Distribution of Unused Student Slots in  
Regional Alternative Education Programs  
2008-2009**

Provisions relating to reallocating unused student slots in Regional Alternative Education Programs

- If any unused slots are available, and if the requesting school division chooses to utilize any of the unused slots, the requesting school division shall receive only the state's share of tuition for the unused slot that was allocated for the originally designated school division.
- However, no requesting school division shall receive more tuition funding from the state for any requested unused slot than what would have been the calculated amount for the requesting school division had the unused slot been originally allocated to the requesting school division.
- The requesting school division shall pay for any remaining tuition payment necessary for using a previously unused slot.

First priority for distribution of unused slots (Distribution within Regional Programs)

Unused slots from school division(s) participating in a regional program will be distributed to other qualifying divisions being served in that regional program who have requested additional slots. All slots that each division in the regional program has certified as unused will be counted for reallocation. School divisions in the regional program that have certified unused slots will be listed from lowest to highest by composite index. School divisions in the regional program requesting additional slots will be listed from lowest to highest by composite index. Unused slots will be assigned one at a time in order from lowest to highest composite index to the requesting divisions in that regional program in order of priority based on the lowest to highest composite index ranking until no further slots remain to reallocate or all requests have been met. Remaining unused slots, if any, will be placed into the state pool of unused slots.

Second priority for distribution of unused slots (Statewide Distribution)

Unused slots that have not been awarded under the first priority will be distributed statewide to other qualifying school divisions participating in regional programs who have requested additional slots. School divisions having unused slots will be listed from lowest to highest by composite index. School divisions requesting additional slots will be listed from lowest to highest by composite index. Unused slots will be assigned one at a time in order from lowest to highest composite index to divisions requesting additional slots in order from lowest to highest composite index until no slots remain or all requests are met. Once the process has been completed, regional alternative education programs will be notified of adjustments to the original approved slots.
