Market Review & Fund Performance Analysis

Virginia Birth-Related Neurological Injury Compensation Fund

For Period Ending December 31, 2008

Capital Advisory Group 7100 Forest Avenue, Suite 301 Richmond, VA 23226 (804)648-3500

Overview

Capital Advisory Group 7100 Forest Avenue, Suite 301 Richmond, VA 23226 (804)648-3500

Market Performance Highlights

- The stock markets suffered through one of the worst years on record in 2008. The S&P 500 Index's 37% loss was eclipsed only by the 43.4% decline in 1931.
- The 4th Quarter results were dismal across domestic and international equity markets, with losses of 20% and higher. The results would have been markedly worse if not for a meaningful rally from late November through year end. During that period, the S&P 500 Index rallied nearly 17% as investors began to believe a bottom had been reached. Apparently, January was not consulted in that assessment as the market has continued to drop up to this writing.
- In the U.S., large cap issues performed best as the Russell 1000 Index lost 22.5%, while midcap, small cap, and microcap benchmarks fell further with declines of 27.4%, 26.1% and 28.1%, respectively, as measured by the Russell indices.
- Sector-wise, Financials fell 37% and was the worst performer of the GICS sectors. In all, 6 of the 10 sectors had losses of more than 20% for the quarter.
- International equities offered no diversification benefit as the MSCI EAFE Index fell 20% and the MSCI Emerging Markets Index declined 27.6%.
- Among developed countries, Japan weathered the turmoil best (-10%) while Austria suffered the most (-43%).
- Developing countries had mixed results with China managing to hold their decline to just 10% while Russia's market fell by more than 51% for the quarter.
- Fixed income results varied widely with long U.S. Treasuries leading the way, posting gains of approximately 18% while the Merrill Lynch High Yield Master II Index lost an equivalent amount (-17.6%). The Barclay's Capital Aggregate Bond Index gained 4.6% as high grade gains in the treasury and corporate markets were partially offset by losses in the commercial mortgage-backed and asset-backed segments of the index.
- The Citibank Non-US World Govt Bond Index rose 5.5% on a hedged basis and was up 8.8% with currency exposure as the dollar weakened in the closing weeks of the year. The JPMorgan EMBI+ Index (emerging markets debt) fell nearly 5%.
- Outside of traditional equity and fixed income markets, performance in the 4th Quarter was even worse. Falling energy, agricultural, and metals prices drove commodity indices down, reflected in the DJ-AIG Commodity Index decline of 47% for the quarter.
- REITs, which had held up well for the first three quarters of 2008, were severely punished as declining valuations, increasing vacancy rates and a worsening economic outlook pushed the NAREIT Equity Index down 38.8%.
- The HFRI Hedge Fund of Funds Index dropped over 8% for the quarter and over 20% for 2008, suffering their worst year on record. Liquidity dried up, markets were artificially influenced by regulators suspending the ability to short certain stocks, deleveraging reached unprecedented proportions and the market was introduced to the largest episode of fraud on record courtesy of Bernard Madoff.
- 2009 has started off with a number of positive factors in place that could set the stage for a significant rally with the return of some level of confidence and stability. The lowest interest rates and inflation rate since the end of WWII, tremendous drop in energy prices, massive fiscal stimulus, and an open checkbook from the U.S. Government to keep the financial system from plunging into the abyss will eventually become the cornerstones of a significant and sustainable rally.

Market Performance Highlights

Performance Summary

Total Fund Returns for Periods Ended December 31, 2008

	Last Quarter	Year to Date	Last Year	Last 3 1/4 Years
VBIF Total Fund	(9.0)	(20.9)	(20.9)	(0.5)
VBIF Total Fund (net)	(9.1)	(21.2)	(21.2)	(0.7)
VBIF Index Target	(9.1)	(19.1)	(19.1)	(0.2)
VBIF Style Target	(11.3)	(23.5)	(23.5)	(2.2)

Overview

- The S&P 500 Index declined -21.9% for the quarter, marking 5 consecutive quarters of losses.
- The loss of 37% for 2008 was the largest annual drop for the S&P 500 since 1931's decline of -43.4%.
- Impacted by the continuing global financial crisis, the VBIF portfolio incurred a loss of -9% for the 4th quarter and -20.9% for the year.
- The VBIF account's performance results continue to rank above the median of the funds in the Callan institutional tax exempt database for all periods measured.
- The Fund's conservative strategy and high allocation to bonds helped to preserve value relative to most other institutional fund results.
- The majority of the Fund's individual managers outperformed their peers for the quarter.
- Alliance Bernstein's large cap value fund was terminated due to continued underperformance and replaced with Boston Partners.
- The Fund remains in compliance with all guidelines and policies.

Markets Outlook Summary – January 23, 2009

A number of economic, political and psychological factors influence emerging trends in the domestic stock and bond markets. The following chart summarizes our reading of the primary factors that are presently driving expectations for the next six to twelve months.

INFLUENCING	PRESENT CONDITION	IMPACT ON	IMPACT ON
FACTOR		BONDS	STOCKS
Economic Fundamentals			
Inflation/Trend	Low/Declining	Positive	Positive
Fed Policy/Liquidity	Aggressive/Increasing	Positive	Positive
Fiscal Environment	Highly Stimulative	Neutral	Positive
Consumer Spending Trend	Declining	Positive	Negative
Capital Spending Trend	Declining	Neutral	Negative
GDP Growth Forecast	-3% to -1.5%	Neutral	Negative
Current Dollar Trend	Range Bound	Neutral	Neutral
Interest Rate Conditions			
Short-Term Rates	Extremely Low	Positive	Positive
Long-Term Rates	Stable	Neutral	Neutral
Yield Curve	Normal	Neutral	Neutral
Relative Credit Spreads	High	Negative	Negative
Stock Market Fundamentals			
Earnings Growth	Declining	Positive	Negative
Earnings Expectations	Declining	Positive	Negative
Valuation Level	Undervalued	Neutral	Positive
Current Issues			
Consumer Confidence	Extreme Pessimism	Positive	Positive
Employment Trend	Declining Sharply	Positive	Negative

Summary Observations - Bold denotes a change from the preceding Markets Outlook Summary

In the aftermath of the worst year in the stock market since 1931 and an ongoing global credit

crisis, the stock market remains volatile and nervous about a weakening economy and ongoing operating losses in major banking institutions. Despite the onslaught of discouraging economic statistics, investors should take heart in a wide range of market metrics that are signaling depressed valuation levels not seen since the end of the "stagflation" decade in the early eighties. Paradoxically, low consumer confidence levels may be a positive as well, as sentiment at current depressed levels has been historically followed by significant stock market recoveries. In response to contracting business activity, central bankers around the globe are applying aggressive levels of monetary stimulus, and a massive fiscal program is quickly working its way through the legislative process in Washington. We are hopeful these policy initiatives will work to heal the credit markets, allowing the economy to regain its footing later this year. Meanwhile, we favor certain fixed income sectors over equities and cash equivalents.

Quarterly Performance Report Disclosure/Account Reviews (INST)

Important Disclosure Information

This report has been prepared by Capital Advisory Group (CapGroup) using information from sources that include the following: the computer software, investment manager and fund sponsor databases of Callan Associates, Inc.; the fund custodian(s); investment manager(s); third party data vendors; the client; and other outside sources as directed by the client. Account information has been compiled solely by CapGroup and has not been independently verified. CapGroup assumes no responsibility for the accuracy or completeness of the information provided, or methodologies employed by any providers external to CapGroup.

In reviewing this report, it should be noted that past performance may not be indicative of future results. The individual account performance information contained in this report reflects the reinvestment of dividends, and is net of applicable transaction fees and mutual fund expenses, but not custody fees, investment manager fees and the investment advisory fees charged to the Account by CapGroup. Historical performance results for investment indices and/or categories have been provided for general comparison purposes only, and generally do not reflect the deduction of transaction and/or custodial charges, or the deduction of an investment management fee, the incurrence of which would have the effect of decreasing historical performance results. Comparative performance information for manager universes has been provided by Callan Associates, Inc. and does not reflect the deduction of investment manager fees, the incurrence of which would have the effect of decreasing the historical returns for the respective universes. It should not be assumed that your account holdings correspond directly to any comparative indices or manager universes. A copy of our current written disclosure statement discussing our advisory services and fees continues to remain available for your review upon request.

Virginia Birth-Related Neurological Injury Compensation Program

A lifetime of help

Phone: 804-330-2471 Fax: 804-330-3054 9100 Arboretum Pkwy Suite 365 Richmond, VA 23236 www.vabirthinjury.com April 14, 2008

Board of Directors 9100 Arboretum Parkway Suite 365 Richmond, VA 23842

Dear Members of the Board:

The annual financial report of the Virginia Birth-Related Neurological Compensation Program (the "Program") for the year ended December 31, 2007, is submitted herewith. This financial report has been prepared by the Program's finance department in accordance with accounting principles generally accepted in the United States of America and conforms to the requirements of the Governmental Accounting Standards Board (GASB).

Responsibility for both the accuracy of the presented data and the completeness and fairness of the presentation, including all disclosures, rests with the Program. We believe the data, as presented, is accurate in all material respects; that the data is presented in a manner designed to fairly set forth the financial position and results of the operations of the Program as measured by the financial activity of its various accounts; and that all disclosures necessary to enable the reader to gain the maximum understanding of the Program's financial affairs have been included.

This letter of transmittal is designed to compliment the Management's Discussion and Analysis (MD&A) and should be read in conjunction with it. The Program's MD&A can be found immediately following the independent auditor's report.

A brief history of the Program, its fiscal operations, and selected accomplishments are presented below.

Organization and Function

With soaring medical malpractice insurance rates and insurance companies on the brink of eliminating coverage in the mid-1980s, up to one-quarter of the state's obstetricians were threatened with having to close their office doors. To alleviate this crisis, Virginia worked with all stakeholders including physicians, associations, insurers, lawyers and others to develop an innovative solution; the Virginia Birth-Related Neurological Injury Compensation Program. The Program was a first of its kind nationally.

The Program's legislation presents a very specific definition of 'birth injury', which represents a very small number of births each year. By keeping many of the most expensive cases out of the court system, combined with a medical malpractice award cap, the medical malpractice insurance industry has been reasonably stabilized in Virginia (especially when compared to other states) allowing physicians to do what they do best – treat patients.

Although the Program was created by the General Assembly it operates as a separate organization. A seven member volunteer board appointed by the Governor directs the Program. The Program is regulated by statute and the Code of Virginia is very specific in how it operates. All admissions are through the Virginia Workers' Compensation

Board of Directors Virginia Birth-Related Neurological Injury Compensation Program April 14, 2008

Commission; the Program itself does not admit claimants. Financial Reports are filed annually with the Governors office, the Virginia Senate and the Virginia House of Delegates. At least every other year, the State Corporation Commission is required to conduct an actuarial study of the Program.

Entry into the Birth-Injury Program does not provide for any set amount of compensation. The Program operates much like an insurance policy in that it pays for actual medically necessary costs and other legislatively stipulated benefits. Additionally, the Program is the payer of last resort in all situations. There is no cap on the total eligible lifetime costs.

No state funds are involved in providing services to claimants. Funding is derived only from legislatively allowed sources including, participating physician fees, participating hospital fees, non-participating physician assessments and liability insurer assessments.

Reporting Entity

The annual financial report includes all funds and accounts of the Program. In accordance with accounting principles generally accepted in the United States of America for governmental entities, there are no component units to be included in the reporting entity.

Major Initiatives

Participating Physicians and Hospitals are continuing to become more aware of the benefits of participation for themselves as well as their patients. A qualifying birth can occur despite the heroic efforts of everyone involved. When it does happen, entry into the Birth Injury Program is important to both families and health services providers.

Of the 850 physicians that regularly deliver babies in Virginia, 622 participated in 2007, a record high in program history. Along with the coverage benefits of participation, physicians also receive a reduction or credit on their malpractice insurance premiums. During 2007 31 hospitals enrolled in the Program.

The Program covers expenses that insurance and other programs do not. Medically necessary expenses such as doctor and hospital visits, therapy, nursing care, and medical equipment are mandated by the guiding legislation. The statute also provides a wage benefit paid to the claimant from age 18 to 65, and payment for legal expenses related to filing the claim. In addition, the board provides benefits including handicapped accessible vans, handicapped accessible bedroom and bath additions to homes, rental assistance, and allowances for therapeutic toys, medical service dogs and experimental therapies.

The Program's operations and staff are efficient and administrative cost, as a percentage of total expenses (administrative plus claimant), remain low at 9.4%.

Philosophy

The Birth-Injury Program plays a unique role in the Commonwealth of Virginia. As previously noted, the Program was established due to a need to improve the tort climate for medical care in the state, with the specific purpose of keeping malpractice insurers writing policies. It accomplished the goal immediately. According to studies and anecdotal information from key players in the industry, the Birth-Injury Program is still fulfilling this role.

Board of Directors Virginia Birth-Related Neurological Injury Compensation Program April 14, 2008

However, over the past 20 years the more publicly visible role has become the Program's contribution to caring for this specific group of children. Here, the information also shows that they receive more benefits and greater care than those utilizing the tort system.

In fact, an article written by an actuary who has studied the Program and a similar organization in Florida noted that such approaches are highly efficient as compared to tort remedies. He writes that the vast majority of money involved in the Birth-Injury Program is used for claimant care whereas in the tort system substantial percentages of funds go to other purposes.

Along with striving for such efficiency, the Program has worked to assure its financial reserves receive maximum growth with minimum risk. This has been accomplished through careful planning and the use of a sophisticated investment policy and practice.

With no legislated ability to increase funding, the Program continues to utilize such prudent practices to assure that available resources provide ongoing care for admitted claimants.

Financial Controls

The Deputy Director is responsible for establishing and maintaining an adequate internal control structure. In fulfilling this responsibility, estimates and judgments are required to assess the expected benefits and related costs of control procedures. The objectives of the control system are to provide the Program with reasonable, but not absolute, assurance that assets are safeguarded against loss from unauthorized use or disposition and are recorded properly to permit the preparation of financial statements in accordance with accounting principles generally accepted in the United States of America. All internal control evaluations occur within this framework. The Program's internal control structure adequately safeguards assets and provides reasonable assurance of proper recording of financial transactions.

The Program's accounting records are maintained on the accrual basis. Revenues are recognized in the accounting period in which they are earned and become measurable; expenses are recognized in the period incurred, if measurable. The accounting and reporting policies conform to accounting principles generally accepted in the United States of America and reflect practices appropriate for a governmental enterprise.

Independent Audit

The Program's guiding legislation (38.2-5015B) requires an annual independent audit of the Program's financial records and transaction by an independent certified public accountant selected by the Board of Directors.

Acknowledgements

The staff of the Finance Department accomplished the preparation of this annual financial report for year ended December 31, 2007. We would like to express our appreciation to all members of the Finance Department who assisted and contributed to its preparation.

Respectfully submitted,

Independent Auditors' Report

The Audit Committee Virginia Birth-Related Neurological Injury Compensation Program Richmond, Virginia

We have audited the accompanying statements of net assets of the Virginia Birth-Related Neurological Injury Compensation Program (the "Program") as of December 31, 2007 and 2006, and the related statements of revenues, expenses and changes in net assets and cash flows for the years then ended, which collectively comprise the Program's basic financial statements as listed in the table of contents. These financial statements are the responsibility of the Program's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America, and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of the Program as of December 31, 2007 and 2006 and the respective changes in financial position and cash flows for the years then ended in conformity with accounting principles generally accepted in the United States of America.

In accordance with *Government Auditing Standards*, we have also issued our report dated April 14, 2008 on our consideration of the Program's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and other matters. The purpose of that report is to describe the scope of testing of internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* and should be read in conjunction with this report in considering the results of our audits.

Management's Discussion and Analysis on pages 3 through 9 and other required supplementary information on pages 31 through 33 are not a required part of the basic financial statements but are supplementary information required by the Governmental Accounting Standards Board. We have applied limited procedures, which consisted principally of inquiries of management regarding the methods of measurement and presentation of the required supplementary information. However, we did not audit this information and express no opinion on it.

Our audit was made for the purpose of forming our opinion on the basic financial statements taken as a whole. The schedule of general and administrative expenses is presented for purposes of additional analysis and is not a required part of the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and, in our opinion, is fairly stated in all material respects in relation to the basic financial statements taken as a whole.

Cheng, Buhant +Halland LEP

Richmond, Virginia April 14, 2008
Management's Discussion & Analysis

This section of the Virginia Birth Related Neurological Injury Compensation Program (the Program) annual financial report represents our discussion and analysis of the Program's financial performance during the fiscal years ended December 31, 2007 and 2006. Please read it in conjunction with the Program's financial statements and accompanying notes.

FINANCIAL HIGHLIGHTS

- The 2007 revenue from fees and assessments increased by \$877,907 or (4%). Fees assessed from participating physicians increased \$379,553 or (13%), participating hospitals decreased \$211,117 or (7%), insurance companies increased \$695,822 or (6%) and mandated physicians fees increased \$13,649 or (.4%). (An explanation of significant variances is included later in this report).
- The 2006 revenue from fees and assessments increased by \$1,596,029 or (8%). Fees assessed from participating physicians increased \$501,344 or (21%), participating hospitals increased \$173,450 or (6%), insurance companies increased \$631,645 or (6%) and mandated physicians fees increased \$289,590 or (8%).
- The Program's total net assets increased by \$1.7 million from a deficit of \$129.3 in 2006 to a deficit of \$127.6 in 2007. The relatively small change is primarily due to the increase in investments of \$28.5 million being offset by the increase in the unpaid claims reserve (liability) of \$27.8 million.
- In 2007 the Program provided \$6,449,000 in nursing care, \$255,000 in therapy, \$581,000 for 15 handicapped accessible vans, \$757,000 for housing benefits, \$203,000 for durable medical equipment and technology, \$96,000 for hospitals and physician visits, and \$284,000 for claimant legal fees.
- The Program paid the first award of \$100,000 according to Virginia Code \$38.2-5009.1 Infants dying shortly after birth.
- In 2007 nine claimants became eligible to receive the wage benefit when they reached their 18th birthday. Eligible claimants could receive half of the average weekly wage in the Commonwealth of workers in the private non-farm sector. (See Virginia Code §38.2-5009.2) A total of \$49,000 was paid to the four eligible claimants requesting the benefit.
- The average cost per active claimant in 2007 and 2006 was approximately \$94,000 and \$115,000 respectively. (An explanation of the decrease is included later in this report).
- As of December 31, 2007 there was a record high of 622 participating physicians, up 45 from 577 physicians in 2006. Participating Hospitals decreased by 2 from 33 in 2006 to 31 in 2007.
- Administrative expenses were 9.4% and 8.4% of the total expenses (administrative plus claimant) paid in 2007 and 2006 respectively. Administrative expenses increased a percentage point primarily due to expenses related to the stakeholders meetings, including conference rooms, meals, and actuarial research.
- The stakeholders of the Program continued to meet during 2007 to develop a legislative plan for reducing or eliminating the Program's actuarial deficit. Resulting legislation included changing the actuarial methodology to that used in the Florida program, reimbursing family members for providing nursing or attendant care, and an increase in assessments for participating physicians and hospitals. The legislation was submitted to the 2008 General Assembly legislative session for consideration.

Management's Discussion & Analysis

• At the close of 2007 the Program had a total of 134 admitted claimants, 25 of which are deceased. Fifteen claimants were admitted one of which was deceased and one existing claimant became deceased. Eight claimants were pending as of December 31, 2007. See chart below.

Total Active Claimants as of 12/31/2006 and 2007

	Total 12/31/05	2006 Activity	Total 12/31/2006	2007 Activity	Total 12/31/2007
Admitted	111	8	119	15	134
Deceased	20	3	23	2	25
Active	91		96		109

OVERVIEW OF THE FINANCIAL STATEMENTS

The financial section of this annual report consists of three parts: management's discussion and analysis (this section), the basic financial statements and the notes to the financial statements, and other supplemental information.

FINANCIAL ANALYSIS

Net Assets:

The following table reflects the condensed Net Assets of the Program:

Table 1Net AssetsAs of December 31, 2007, 2006 and 2005(In millions)

	2	2007	2006	2005
Current Assets	\$	20.6	\$ 17.4	\$ 10.7
Non current Assets		206.5	179.0	155.8
Total Assets		227.1	196.4	 166.5
Current Liabilities		12.0	13.8	12.1
Deferred Revenue		21.5	20.5	19.3
Unpaid Claims Reserve				
Admitted Claims		223.8	183.3	164.9
Incurred but not reported claims		97.4	108.1	95.3
Total Unpaid Claims Reserve		321.2	 291.4	 260.2
Total Liabilities		354.7	325.7	 291.6
Unrestricted Net Assets (Deficit)		(127.6)	(129.3)	(125.1)
Total Net assets	\$	(127.6)	\$ (129.3)	\$ (125.1)

Management's Discussion & Analysis

At December 31, 2007 and 2006, the total assets of the Program were \$227.1 and \$196.4 million, respectively; total liabilities were \$354.7 and \$325.7 million, respectively, while combined net assets were negative \$127.6 and \$129.3 million, respectively. The actuarial estimate of future claim payments of children born on or prior to December 31, 2007, plus their estimate of future claim administration expenses, exceeds the funds assets. This deficit is primarily due to the portion of the unpaid claims reserve for claims incurred but not reported of \$102.2 million in 2007 and \$108.1 million in 2006.

The increase in current assets from \$17.4 million in 2006 to \$20.6 million in 2007 consists primarily of assessments collected and deposited. The amount held in current assets (cash & cash equivalents) is in compliance with the Investment Policy Statement (IPS). The \$27.5 million increase in non current assets from \$179 million in 2006 to \$206.5 million in 2007 consists primarily of \$17.6 million in investment income and \$12.0 million in assessments deposited and invested.

Current assets exceed current liabilities by \$8.6 million in 2007. Current assets are comprised of cash, cash equivalents and short-term investments while current liabilities consist primarily of claims estimated to be paid within the next year. According to the IPS the target range for cash allocation is between 3% and 15% and current assets are in compliance. As revenue is received it is invested with approximately \$1 million held in liquid cash equivalents to meet the short-term needs of the fund.

The total unpaid claims reserve for December 31, 2007 and 2006 were \$332.2 and \$304.4 million respectively. At December 31, 2005 the total unpaid claims reserve was \$271.2 million. This represents the estimated cost for claimants currently admitted into the Program and an estimated number of not yet admitted claimants (incurred but not reported, IBNR) with birth dates prior to fiscal year-end that will be admitted to the Program subsequent to fiscal year-end. This reserve is based on a mandated annual actuarial study.

A summary of the claims provision is a follows:

	2	2007	2	2006	2	2005
Provision for insured events of current year	\$	24.3	\$	23.0	\$	21.0
Increase (decrease) in provision for insured						
events of prior years		(6.2)		3.5		16.1
Interest		19.9		17.8		15.0
Total Claims Provision	\$	38.0	\$	44.3	\$	52.1

Due to the program's relatively short history changes in actuarial assumptions add volatility to this important estimate. Those changes for 2007, 2006 and 2005 are summarized as follows:

Assumption Changes	2007 Change in Prior Year Provision	2006 Change in Prior Year Provision	2005 Change in Prior Year Provision		
Mortality	9.9	9.2	13.5		
Nursing	(8.3)	9.7	-		
Deceased at admission	-	(14.0)	-		
Claims Administration Expense	1.6				
Other Factors	(9.4)	(1.4)	2.6		
-	(6.2)	3.5	16.1		

Management's Discussion & Analysis

The most volatile piece of the claims provision, the change in the provision for prior year's, is described in the above table. As the Program gains more claims experience the actuaries refine the assumptions they use for their forecasts. These changes in assumptions not only affect the current years forecast but also have a particularly volatile affect on the prior years estimate. The mortality table continues to be revised increasing the life expectancies of the claimants and the estimate of future claim payments. While there was no overall change in the total estimate, the decrease in the projections for nursing cost offset the projected increase from mortality and claims administration expense. The actuaries decreased their forecast by \$8.3 million to reflect a decrease in nursing cost observed in 2006. In addition, the actuaries increased their estimate by \$9.9 million due to the increasing life expectancy of claimants and \$1.6 million for future claims administration expense. The \$11.8 million decrease in "Other Factors" is primarily due to actual claims expenses being significantly less than the actuary's estimates. These changes in assumptions together with the difference in estimated and actual claims expense resulted in a \$6.2 million decrease in the total claims provision from \$44.3 in 2006 to \$38.1 in 2007. Other factors may also include inflation, interest rates, investment performance, and number of claimants.

The Program does not recognize a liability for the two claimants the actuaries estimated would be eligible to receive the award up to \$100,000 according to Virginia Code §38.2-5009 Infants dying shortly after birth. It is assumed they will receive this one time award immediately when they are admitted so there is no effect on future liability. In addition, it is difficult to predict how often this benefit will be awarded to eligible claimants.

For more detailed information for the claims reserve refer to Note 5 of the financial statements.

Accounts payable as of December 31, 2007 and 2006 is \$1,009,500 and \$805,600 respectively, showing an increase of \$203,900. The increase is primarily due to timing; however the total still represents approximately one month's expenses. The majority of the accounts payable are nursing expense and other miscellaneous medical expenses that were paid in January and February 2008

In addition, claimant expenses decreased \$760,000 from \$11,050,000 in 2006 to \$10,290,000 in 2007. This decrease was primarily due to a decrease in housing expenses, specifically renovation cost. The Program's guidelines allow for a one-time benefit of an addition of a handicapped accessible bedroom, bath, and storage area to the claimants home. During 2006 there were 17 projects with an average cost of \$66,000 compared to 2007 with 15 projects with an average cost of \$32,000. Most of the renovations in 2006 were large projects located in northern Virginia where construction costs are higher than the rest of the state. The Program purchased 21 vans with an average cost of \$40,000 in 2006 compared to 15 in 2007 with an average cost of \$37,000. The reduction of average cost in vans is primarily due to the Program finding dealers that were willing to sell the vans at a lower price. In addition, claimant legal expenses and purchase of medical equipment decreased in 2007.

Management's Discussion & Analysis

Changes in Net Assets:

The following chart shows the revenue and expenses for the current fiscal year:

Table 2 Changes in Net Assets As of December 31, 2007, 2006 and 2005 (in millions)

		2007	2006	2005
Revenues	-			
Fees and Assessments	\$	22.3	\$ 21.6 \$	19.9
Net Investment Income & other		17.6	18.6	6.1
Total Revenues		39.9	40.2	26.0
Expenses				
Provision for claims		38.1	44.2	51.9
General and administrtation		0.1	0.1	0.1
Total Liabilities		38.2	44.3	52.0
Change in net assets		1.7	(4.1)	(26.0)
Beginning net assets		(129.3)	(125.2)	(99.1)
Ending net assets	\$	(127.6)	\$ (129.3) \$	6 (125.1)

REVENUES

Revenues consist of legislatively established assessments placed on participating and non-participating physicians, hospitals, and insurance companies and also investment income. For the fiscal years ended December 31, 2007 and 2006, revenues totaled \$39.9 and \$40.2 million, respectively. The slight decrease in total revenues is primarily due to the increase in fees and assessments being offset by the decrease in investment income (as described below).

Assessments for 2007 for participating and non-participating physicians were \$5,300 and \$280 respectively. Participating Hospitals are assessed a fee of \$50 per live birth for the prior year, as reported by the Department of Health, not to exceed \$180,000. In 2007 liability insurers paid one quarter of one percent on the direct premiums written during the prior year.

The participating physicians assessments increased \$380,000 or (13%) from \$2.8 million in 2006 to \$3.2 million in 2007. The number of physicians participating reached a record high of 622, 45 more than in 2006. From 2005 to 2006 the number of participating physicians increased by 41 from 536 to 577 respectively. The continued increase is due in part to the increased awareness of the benefits of the Program as well as the malpractice insurers requiring the insured to participate.

Management's Discussion & Analysis

In 2004 the General Assembly authorized increases in future years assessments according to the following chart, however the 2006 actuarial report states that these increases will not be enough to restore the fund to actuarial soundness.

				Non-	
Year	Pa	rticipating	Par	rticipating	Hospital
2005	\$	5,100.00	\$	260.00	\$50/live birth not to exceed \$160,000
2006	\$	5,200.00	\$	270.00	\$50/live birth not to exceed \$170,000
2007	\$	5,300.00	\$	280.00	\$50/live birth not to exceed \$180,000
2008	\$	5,400.00	\$	290.00	\$50/live birth not to exceed \$190,000
2009	\$	5,500.00	\$	300.00	\$50/live birth not to exceed \$200,000

Liability Insurers pay one quarter of one percent of premiums written in prior year.

Net investment income decreased by \$1.0 million from 2006 to 2007. In 2007 the Program experienced the first year with it's fully diversified portfolio established by the Board in 2006. Although interest and dividend income increased by \$.9 and \$1.8 respectively it was offset by decreases in realized and unrealized gains of \$1.8 and \$1.6 respectively. The decrease in the value of the portfolio is not significant especially considering the extreme volatility in the markets.

EXPENSES

For the fiscal years ended December 31, 2007 and 2006 expenditures totaled \$38.2 million and \$44.3 million respectively. Expenses are comprised of general administrative and claims related expenses, the latter of which reflects both the increases in claims reserve and the claims paid during the year.

General administrative expenses include the portion of salaries, rent, cost of office equipment, and all other expenses not directly related to claims. Administrative expenses were 9.4% and 8.4% of the total expenses (administrative plus claimant) paid in 2007 and 2006 respectively. Administrative expenses increased a percentage point primarily due to expenses related to the stakeholders meetings including conference rooms, meals, and actuarial research. Management estimates that approximately 80% of the total administrative expenses are directly related to claims administration. Of the total administrative expenses of \$987,000 in 2007 approximately \$789,000 or 80% is related to claims and \$197,000 is related to program administration. In 2006 80% or \$754,000 of a total \$943,000 in Administration expenses was related to claims and \$189,000 was related to program administration.

Provision for claims includes the portion of general administration expenses related to claims and actual and future expenses related to claims. Claimant expenses include nursing, therapy, physician and hospital visits, prescriptions, housing, transportation, the wage benefit and durable medical equipment. Provision for claims has decreased from \$51.9 million in 2005 to \$44.2 million in 2006 to \$38.1 million in 2007. These decreases are primarily due to the changes in the assumptions and differences in the estimated future claims expense and actual expense and discussed previously in this report.

CAPITAL ASSETS

Capital assets consist of computer equipment, office equipment and automobiles. Depreciation is calculated on the straight-line method over the estimated lives of the related assets. The seventeen Trust Homes owned by the Program are recorded as investments (real estate held in trust) because they are considered appreciable.

Management's Discussion & Analysis

ECONOMIC FACTORS

The increase in claims reserve for December 31, 2007 and 2006 are \$27.8 million and \$33.2 million respectively. The decrease is due to changes made in the actuarial assumptions from year to year as more credible data on the Program is collected. These changes are discussed earlier in this report. It is important to note that there are significant uncertainties related to the estimates of future claim payments. Forecasts are highly sensitive to changes in assumptions like inflation, interest rates and mortality. There are few claimants in the program (134 admitted as of 2007), twenty-one are 16 years or older and 9 have attained the age of 18. Only 97 claimants have been in the program three years or more as of 2007. There is also considerable variability in the actual payment made to individual claimants. Nursing expenses are the largest payment category and any changes in cost or utilization of nursing services would have a major impact on findings. Forecasts of the number of eligible claimants are also uncertain due to the length of time from birth to application to the program, number of participating doctors and hospitals, and legislative changes. An increase in the number of eligible claimants will have a direct effect on the number admitted and will increase the cost of the program. These factors have a volatile effect on the estimate of the claims reserve.

The 2007 Actuarial report states that the Program is not in any immediate danger of defaulting on the payment of benefits; although not actuarially sound, it has sufficient assets to pay benefits for about 20 years. The report explains that if the Program collects the required assessments and if the level of participation of physicians and hospitals remains at the 2007 level, the fund will be able to continue to make claim payments for all claimants, including those admitted after December 31, 2006 (even if those claimants are born after December 31, 2006), for approximately the next 20 years. This time span has increased from the 17 years cited in the 2006 report due to the higher investment yield and favorable nursing experience in 2006.

As previously mentioned in this report 2007 was the first complete year with the newly established investment portfolio. The relatively conservative asset allocation and diversification of investment strategies allow the portfolio to minimize risk but still take advantage of a positive market. Considering the volatility in the market the Program's investments earned a respectable 9.8% return for the year and 10.3% return since inception. Even with a significantly more conservative asset allocation plan than most benefit or non-profit funds, the Program's account's results again exceed 90% of the funds in the Callan institutional account database. This database contains performance data from other large institutional funds and allows the investment advisor to compare and rank the Program's investment results to similar funds.

As of December 31, 2007 the portfolio was invested in 60% active managers and 40% index funds. The Board believes these actions together with the guidance from CapGroup, the Program's investment advisor, have significantly improved the investment strategy and will continue to enhance the financial position of the program, which is an important factor in reducing the actuarial deficit.

CONTACTING THE PROGRAM'S FINANCIAL MANAGEMENT

This financial report is designed to provide users (e.g. citizens, taxpayers, claimant families, service providers and creditors) with a general overview of the Program's finances and to demonstrate the Program's accountability for the funds it receives. Questions concerning this report or requests for additional information should be directed to the Deputy Director, 9100 Arboretum Pkwy. Suite 365, Richmond, VA 23236, 804-330-2471 or visit our website at http://www.vabirthinjury.com.

NOTES TO FINANCIAL STATEMENTS

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 1 – Summary of significant accounting policies

Nature of organization – The Virginia Birth-Related Neurological Injury Compensation Program (the "Program") was established under the Virginia Birth-Related Neurological Injury Compensation Act (1987,c.540). The Program is a related organization for which the elected officials of the Commonwealth of Virginia are accountable as they appoint a voting majority of the board. The Act creates a compensation program that assures lifetime care of infants with severe neurological injuries. The Program is funded through annual assessments of participating physicians and participating hospitals. Liability insurers and non-participating physicians contribute to the fund, if necessary, based upon actual experience of the fund. The Program receives no federal government funding.

Basis of accounting – The Program operates as an insurance enterprise fund subject to Governmental Accounting Standards Board Statement No. 10 (GASB 10), "Accounting and Financial Reporting for Risk Financing and Related Insurance Issues," Governmental Accounting Standards Board Statement No. 30 (GASB 30), "Risk Financing Omnibus – An Amendment to GASB Statement No. 10," and Financial Accounting Standards Board Statement No. 60 (FAS 60), "Accounting and Reporting for Insurance Enterprises."

The financial statements of the enterprise fund are presented on the accrual basis of accounting, using the economic resources measurement focus. Under this method of accounting, revenues are recognized when earned and expenses are recorded when liabilities are incurred without regard to receipt or disbursement of cash. Enterprise funds distinguish operating revenues and expenses from non-operating items. Operating revenues and expenses generally result from providing services and collecting fees in connection with the proprietary fund's principal ongoing operations.

In accordance with Governmental Accounting Standards Board (GASB) Statement No. 20, "Accounting and Financial Reporting for Proprietary Funds and Other Governmental Entities that Use Proprietary Fund Accounting," proprietary fund types may follow all applicable GASB pronouncements as well as only those Financial Accounting Standards Board (FASB) pronouncements and predecessor APB Opinions and Accounting Research Bulletins issued on or before November 30, 1989. Under paragraph 7 of GASB Statement No. 20, the Program has elected not to apply FASB pronouncements issued after November 30, 1989.

Use of estimates – The preparation of the financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect certain reported amounts and disclosures. Accordingly, actual results could differ from these estimates.

Cash equivalents – For purposes of the statement of cash flows, cash equivalents are defined as short-term, highly liquid investments that are both (a) readily convertible to known amounts of cash and (b) so near maturity that they present insignificant risk of changes in value because of changes in interest rates. Generally, the Program considers investments with original maturities of three months or less to be cash equivalents.

Investments - At December 31, 2007 and 2006, the Program's investments are stated at fair value based on quoted market prices. The Program's investments consist of various index mutual funds and actively managed investments including large and small cap equities, foreign equities, and bonds. Mutual fund investments are valued at their quoted net asset value on the last trading day of the year. Equity securities are valued at the last reported sale price or, if no sale, the latest available bid price on the last business day of the year. All other investments are valued based on amounts provided by the investment advisor or fund administrator. Real estate is stated at lower of cost or fair value. The fair value of real estate investments is based on independent appraisals.

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 1 – Summary of significant accounting policies (continued)

Capital assets – Capital assets with a cost of \$1,000 or more (threshold implemented in fiscal year 2004) are recorded at cost. The costs of major improvements are capitalized while the cost of maintenance and repairs, which do not improve or extend the life of an asset, are expensed. Depreciation is provided over the assets' estimated useful lives of three to seven years using the straight-line method.

Unearned revenue – Unearned revenue represents amounts for which revenue recognition criteria have not been met. It is the Program's policy to recognize mandated assessments, participating doctor and hospital fees, and insurance fees in the period in which the assessment or coverage is related. Unearned revenue is classified as non-current since management has determined that it will not be used to pay expenses in the next twelve months.

Estimated liability for unpaid claims – The liability for unpaid claims represents management's estimate, developed in conjunction with the assistance of the Program's actuary, of the Program's discounted estimated cost of payments for both claimants admitted to the Program and an estimated number of not-yet-admitted claimants with birth dates prior to the date of the statement of net assets that will be admitted to the Program subsequent to the date of the statement of net assets. Changes in estimates of such costs are recognized in results of operations in the period in which the changes in estimate are made.

Management believes the estimate of the discounted liability for unpaid claims is adequate. The development of liabilities for future benefit requires management to make estimate and assumptions regarding mortality, morbidity, lapse, expense, and investment experience. Such estimates are primarily based on historical experience and future expectations of these assumptions. The Program's actual incurred losses may vary significantly from the estimated amount included in the Program's financial statements. Management monitors actual experience and, if circumstances warrant, revises its assumptions and the related future policy benefit estimates.

Reclassifications – Certain prior year amounts have been reclassified for comparative purposes to conform to the current year presentation.

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 2 – Deposits and investments

The Program's deposit and investment portfolio consists of the following at December 31:

	2007		2006		
Cash and deposits:					
Cash on hand	\$	123	\$	106	
Deposits with financial institutions - demand deposits		7,991,369		5,115,735	
Investments:					
Deposits with financial institutions - money market accounts		11,061,009		9,671,033	
Mutual funds:					
Small cap index		-		-	
Large cap index		22,452,850		21,600,256	
Bond index		51,760,006		43,638,281	
INTECH Risk Managed Large Cap		11,812,029		8,815,748	
Artisan Funds Inc. (Int'l Growth)		14,922,012		12,462,918	
Harbor Funds (Int'l Value)		15,651,869		12,848,871	
SSGA Funds (Emerging Markets)		7,364,008		5,224,308	
Western Asset Core Plus (Bond Fund)		17,125,228		16,668,091	
Investment Managers:					
Rainier Investment Management (Large Cap Growth)		15,348,754		8,647,578	
Great Lakes Advisors (Large Cap Value)		7,718,758		8,765,291	
Alliance Bernstein (Large Cap Value)		8,956,969		9,396,272	
Eagle Asset Management (Small Cap Growth)		5,406,126		4,682,066	
TAMRO Capital Partners (Small Cap Value)		4,423,922		4,687,294	
Atlantic Asset Management (Core Fixed Income)		9,693,176		9,294,832	
Richmond Capital Management (Core Fixed Income)		9,646,106		9,281,722	
	\$	221,334,314	\$	190,800,402	

Deposits – The Program's bank deposits are in local bank accounts subject to FDIC coverage; however, such balances substantially exceed those limits of coverage.

Investments – In accordance with the Virginia Birth-Related Injury Compensation Act, Section 38.2-5016 of the Code of Virginia, the Board of Directors is given the authority to invest the Program's funds in a careful and prudent manner at the advice of the investment advisor.

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 2 – Deposits and investments (continued)

<u>Credit risk:</u> The Program manages the credit quality of its investment portfolio by limiting its fixed income portfolio having ratings of less than single "A" quality to 20%. The Program's rated debt investments at December 31, 2007 are as follows:

		Market value	Μ	larket value
	Rating	2007		2006
-				
(1)	AAA	\$ 10,704,901	\$	9,404,383

(2)	AA1/AA2	51,760,006		43,638,281
(1)	AA+	17,125,228		16,668,091
(1)	AAA-BBB	9,693,176		9,294,832
(3)	AA	9,646,106		9,281,722
		\$ 99,285,525	\$	88,553,959
	(2) (1) (1)	 (1) AAA N/A (2) AA1/AA2 (1) AA+ (1) AAA-BBB 	Rating 2007 (1) AAA N/A \$ 10,704,901 356,108 (2) AA1/AA2 AA+ 51,760,006 17,125,228 (1) AAA-BBB 9,693,176 9,646,106	$\begin{array}{c cccc} Rating & 2007 \\ \hline \\ (1) & AAA & \$ 10,704,901 & \$ \\ N/A & 356,108 \\ \hline \\ (2) & AA1/AA2 & 51,760,006 \\ (1) & AA+ & 17,125,228 \\ \hline \\ (1) & AAA-BBB & 9,693,176 \\ \hline \\ (3) & AA & 9,646,106 \\ \hline \end{array}$

(1) Average of Moodys and Standard & Poors ratings

(2) Moodys Investors Service/Standard & Poors

(3) Lehman rating

<u>Interest rate risk</u>: As of year-end 2007 and 2006 the underlying investments of the above bond index mutual fund have a stated average weighted maturity of 6.8 years. The Western Asset Core Plus bond fund has a stated average weighted maturity of 7.5 years. The investments of Atlantic Asset Management and Richmond Capital Management have an average weighted maturity of 6.7 years and 6.1 years respectively. The Program does not have a formal investment policy that limits investment maturities as a means of managing its exposure to fair value losses arising from increasing interest rates.

<u>Foreign currency risk</u>: The Program manages its risk associated with foreign currency fluctuations by limiting its investments in international developed and emerging index funds to 20% of its overall portfolio. The Program's investments subjected to foreign currency risk at December 31, 2007 and 2006 are as follows:

			farket Value 2007	N	1arket Value 2006
Mutual funds:					
Artisan Funds Inc. (Int'l Growth)	(1)	\$	14,922,012	\$	12,462,918
Harbor Funds (Int'l Value)	(2)		15,651,869		12,848,871
SSGA Funds (Emerging Markets)	(3)		7,364,008		5,224,308
		\$	37,937,889	\$	30,536,097

1. Artisan Fund typically holds between 80-120 stocks, diversified across most major sectors and typically at least 18 countries. The team invests primarily in developed markets, but also may invest up to 20% of the Fund's net assets at market value at the time of purchase in emerging markets.

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 2 – Deposits and investments (continued)

- 2. Harbor Fund will usually invest in a minimum of ten countries throughout the world. The fund focuses on companies located in Europe, and the Pacific Basin and emerging industrialized countries whose economies and political regimes appear more stable and are believed to provide some protection to foreign shareholders.
- 3. SSGA Fund will typically invest at least 80% of its assets in securities issued by companies domiciled, or doing business, in countries determined to have a developing or emerging economy or securities market. The investments are diversified across many countries, usually 10, in order to reduce volatility associated with specific markets. The fund invests primarily in the International Finance Corporation Investable (S&P/IFCI) Index and/or Morgan Stanley Capital International Emerging Market (MSCI EM) countries.

<u>Custodial Credit Risk:</u> Custodial credit risk is the risk that, in the event of the failure of the counterparty, the Program will not be able to recover the value of its investment or collateral securities that are in the possession of an outside party. The Program's deposits are uncollateralized and investment securities are held at SunTrust and registered in SunTrust's name.

The Program's return on investments for years ending December 31, 2007 and 2006 is summarized as follows:

	2007		2006
Interest income	\$ 1,146,901	\$	201,663
Dividend income	8,405,573		6,604,828
Realized gain (loss) on investments	2,448,245		4,296,732
Net appreciation in fair value of investments	6,058,034		7,675,684
Investment fees	(449,390)		(111,948)
Fiduciary fees	(62,675)		(65,130)
Net investment income	\$ 17,546,688	\$	18,601,829

The calculation of realized gains and losses is independent of the calculation of the net appreciation in fair value of investments; therefore, realized gains and losses in 2007 and 2006 include unrealized gains and losses on those same investments recognized in prior periods as part of the net appreciation or deprecation in the fair value of investments.

Note 3 – Investments in real estate

Under guidelines established by the Board of Directors, the Program could, up until 1999, approve the purchase or construction of a home for the family claimant subject to certain restrictions. The home is held in a trust and remains the property of the Program, subject to use by the claimant's family during the term of the trust and subject to conditions imposed by the trust agreement. The trust expires upon the death or institutionalization of the claimant, and stipulates that during occupancy the family is responsible for the payment of utilities, general maintenance of the home, and certain other similar obligations.

Properties are stated at original cost plus the cost of any improvements, but not in excess of appraised fair values. The carrying value of the real estate investments amounted to \$5,180,492 at December 31, 2007 and \$5,110,121 at December 31, 2006.

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 4 - Capital assets

Capital assets at December 31, 2007 and 2006, and the related changes for the years then ended were as follows:

	January 1, 2007 II			creases	D	ecreases	December 3 2007		
Computer equipment	\$	53,414		3,439	<u></u>	(10,835)	\$	46,018	
Office equipment	\$	39,026		588		(8,004)	\$	31,610	
Automobiles		17,237		-		-		17,237	
		109,677		4,027		(18,839)		94,865	
Less accumulated depreciation		(93,375)		(6,504)		15,518		(84,361)	
Capital assets, net	\$	16,302	\$	(2,477)	\$	(3,321)	\$	10,504	

	Ja	inuary 1,					Dec	ember 31,
		2006	In	Increases		Decreases		2006
Computer equipment	\$	50,623		2,791	·	-	\$	53,414
Office equipment		36,601		2,425		-	\$	39,026
Automobiles		17,237		-		-		17,237
		104,461		5,216		-		109,677
Less accumulated depreciation		(84,706)		(8,669)		-		(93,375)
Capital assets, net	\$	19,755	\$	(3,453)	\$	_	\$	16,302

Depreciation expense for the year ended December 31, 2007 and 2006 was \$ 6,504 and \$8,669 respectively.

Note 5 – Estimated liability for unpaid claims

The estimated liability for unpaid claims is the discounted estimated cost of payments for both claimants admitted to the Program and an estimated number of not-yet-admitted claimants with birth dates prior to the date of the statement of net assets that will be admitted to the Program subsequent to the date of the statement of net assets. This discounted cost represents the amount that would need to be invested, as of the date of the statement of net assets, to pay the claimant expenses as they become due. The liability is determined based on an actuarial study, which is mandated to be performed no less frequently than biennially (done annually for 2007 and 2006). Eligible costs under the Program are costs not otherwise paid by private insurance or other government programs. Costs include nursing, housing, hospitals and physicians, physical therapy, vans, medical equipment, prescription drugs, various other incidental items, loss of earnings, and claim filing expenses.

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 5 – Estimated liability for unpaid claims (continued)

In general terms, the estimated liability for unpaid claims is determined as follows:

- (1) The total number of claimants is estimated (actual number of admitted claimants plus estimate of the number of not-yet-admitted claimants).
- (2) Future payments, by category of expense paid for each claimant, are forecast. These estimates are based on the actual payments made by the Program on behalf of the claimants who had been in the program for three or more years as of December 31, 2007 and 2006 (taking into consideration each claimant's insurance coverage and eligibility for Medicaid), as well as assumptions regarding future cost of inflation and future increases in the utilization of the benefits and services of the Program.
- (3) Projected future payments to each claimant are adjusted to reflect an assumed life expectancy for each claimant and the time value of money.

The estimated liability for unpaid claims is forecast based on actual information through the prior fiscal year. Actuarial assumptions represent estimates that are critical to reported operations. The assumptions used in the forecast are reasonable and management believes the indicated liability is adequate.

	2007	2006
Rate of claims inflation (varies based		
on category of expense)	.76% - 5.36%	1.00% - 5.38%
Investment earnings / discount rate	6.54%	6.56%
Mortality:		
Average life expectancy of		
claimant at birth	23.4 years	22.3 years
Average life expectancy of		
claimant that attains the		
age of three	25.4 years	24.4 years
Estimated number of claimants born		
on or before year end.		
not yet admitted to the Program.		
Estimate is based on review of how		
long it takes for claimants to		
be admitted to the Program	44 claimants	42 claimants

The total number of claimants (admitted claimants and not-yet-admitted claimants) is estimated to be 176 and 166 as of December 31, 2007 and December 31, 2006 respectively. The estimated claims reserve includes projected increases for future claims payments due to expected increase in number of claimants as a result of House Bill No. 2048 (this bill provided for certain extended benefits and the payment of certain administrative costs including attorneys fees), which became effective July 1, 2003.

Significant actuarial assumptions for each fiscal year include:

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 5 – Estimated liability for unpaid claims (continued)

During fiscal year 2004, House Bill No.1407 was enacted, reducing the coverage of additional administrative costs. This legislature repealed a portion of the previous bill mentioned above and became effective January 1, 2005. Management estimates that the effect on the estimated claims reserve was a reduction to the reserve of approximately \$28,600,000.

The following represents changes in the aggregate reserves for the Program during the past two years:

	2007	2006
Unpaid claims and claim adjustment expenses at beginning of year	\$ 304,400,000	\$ 271,200,000
Incurred claims and claim adjustment expenses:		
Provision for insured events of current year	24,340,909	23,000,000
Increase (decrease) in provision for insured events of prior years	(6,159,132)	3,463,504
Total incurred claims and claim adjustment expenses	18,181,777	26,463,504
Interest	19,907,760	17,790,720
Total claims provision	38,089,537	44,254,224
Payments:		
Claims and claim adjustment expenses attributable to insured events of		
prior years	10,289,537	11,054,224
Total payments	10,289,537	11,054,224
Total unpaid claims and claim adjustment expenses at year end	\$ 332,200,000	\$ 304,400,000

The total undiscounted unpaid claims and claim adjustment expenses amount to \$1,300.8 million and \$1,115.1 million at December 31, 2007 and 2006, respectively, and represent unaudited estimates.

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 6 – Employee benefits

The Program pays each employee an amount equal to 23% of his or her salary in lieu of a benefits package. This additional salary is to be used by the employee to acquire certain benefits, if they so choose, and is subject to income and payroll taxes. Additional benefits paid by the Program to their employees amounted to \$81,088 and \$79,736 for the years ending December 31, 2007 and 2006, respectively. These benefits are included as salary and benefits expense on the Program's supplementary schedule of general and administrative expenses.

Note 7 – Operating lease commitments

The Program leases its office space under an operating lease expiring on April 25, 2008. Rent expense under this lease amounted to \$58,005 and \$56,494 for fiscal years 2007 and 2006, respectively.

The future minimum obligation under this lease is \$19,284.

The Program leases office equipment on a month-to-month basis. Rent expense for this equipment amounted to \$1,971 and \$2,387 at December 31, 2007 and 2006, respectively, and is included in other expenses on the supplemental schedule of general and administrative expenses.

The Program entered into a new lease for a new office space beginning April 25, 2008 and expires in April 2013. Future minimum obligations under this new lease are as follows:

2008	\$ 40,573
2009	\$ 62,685
2010	\$ 64,566
2011	\$ 66,504
2012	\$ 68,496
2013	\$ 22,833

Note 8 – Liquidity

The actuarial study performed for the year ended December 31, 2006 determined that the Program was not actuarially sound. However, the actuarial study did point out that the Program is not in any immediate danger of defaulting on the payment of benefits and that the Program has sufficient assets to continue to pay for claimants' benefits for the subsequent twenty years.

At the request of the Commonwealth of Virginia, management evaluated possible solutions for resolving the deficit over the long-term. The resulting legislation was submitted to the 2008 General Assembly for consideration.

Note 9 – Contingencies

Various pending and threatened lawsuits claim eligibility for program benefits. Management believes the Program's claims reserves based upon actuarial assumptions are adequate to provide for the ultimate resolution of these claims.

Notes to Financial Statements Years Ended December 31, 2007 and 2006

Note 10 – Subsequent events

In response to a letter from Delegate Harvey Morgan, Chair of the House Commerce and Labor Committee, the Program met with stakeholders to develop a legislative plan for reducing the Program's actuarial deficit. The resulting legislation (H 1305) was passed during the 2008 General Assembly session. It contains changes that affect both the operational and financial aspects of the Program. The following are a list of the significant changes to the Program included in this legislation:

- The medical review panel shall include three physicians from the fields of obstetrics, pediatrics, pediatric neurology, neonatology, physical medicine and rehabilitation or other specialty appropriate to the case.
- The Workers Compensation Commission shall direct the Program to pay the medical school that provided the medical review \$3,000 per claim reviewed.
- The Program may reimburse for nursing and attendant care provided by a relative or legal guardian.
- The Board will increase from seven members to nine including six citizen representatives including an investment professional, CPA, personal injury attorney, relative of a disabled child, a member with professional experience working with the disabled and a qualified at-large member.
- Participating physicians fees will increase as follows:

Year	Fee
2009	\$5,600
2010	\$5,900
2011	\$6,000
2012	\$6,100
2013	\$6,200

• Participating Hospital fees will increase as follows:

Year	Fee per live birth	Maximum
2009	\$52.50	\$200,000
2010	\$55.00	\$200,000

• To employ the actuarial methodology used by the Florida Birth-Related Neurological Injury Compensation Association that accounts for individual participant costs.

The increase in fees for the participating physicians and hospitals will have a minor effect on the deficit. The more significant reduction will come from the change in the actuarial methodology. According to the Program's actuary the reduction may be about \$44 million.

Supplementary Schedule of Claims Development Information As of December 31, 2007

(In Thousands)

Notes to Required Supplementary Information Years Ended December 31, 2007 and 2006

Note 1 - Claims development information

The table on the preceding pages illustrates how the Program's earned revenue (net of reinsurance) and investment income compare to related costs of loss (net of loss assumed by re-insurers) and other expenses assumed by the Program as of the end of each of the previous ten years. The rows of the table are defined as follows: (1) This line shows the total of each fiscal year's gross earned premiums and reported investment revenue, amounts of premiums ceded, and reported premiums (net of reinsurance) and reported investment revenue. (2) This line shows each fiscal year's other operating costs of the Program including overhead and loss adjustment expenses not allocable to individual claims. (3) This line shows the Program's gross incurred losses and allocated loss adjustment expense, losses assumed by reinsurers, and net incurred losses and loss adjustment expense (both paid and accrued) as originally reported at the end of the year in which the event that triggered coverage occurred (called birth year). (4) This section of ten rows shows the cumulative net amounts paid as of the end of successive years for each birth year. (5) This line shows the latest re-estimated amount of losses assumed by re-insurers for each birth year. (6) This section of ten rows shows how each birth year's net incurred losses increased or decreased as of the end of successive years. (This annual re-estimation results from new information received on known losses, reevaluation of existing information on known losses, and emergence of new losses not previously known.) (7) This line compares the latest re-estimated net incurred losses amount to the amount originally established (line 3) and shows whether this latest estimate of losses is greater or less than originally thought. As data for individual birth years mature, the correlation between original estimates and re-estimated amounts is commonly used to evaluate the accuracy of net incurred losses currently recognized in less mature birth years. The columns of the table show data for successive birth years.

Notes:

Insurance Companies pay one quarter of one percent of net direct premiums written, however, only the liability portion of the premium is assessable as determined by the Workers Compensation Commission.

Legislation states (38.2-5020 E) that if required to maintain the Fund on an actuarially sound basis, liability insurers shall pay an assessment to the Fund. During the years 1998 through 2001 the fund was considered actuarially sound by the State Corporation Commission and insurance carriers were not required to pay. In 2002 the Fund was determined to be actuarially unsound and the liability insurers were required to pay.

Legislation states (38.2-5020 G) that if the State Corporation Commission determines the Fund is actuarially sound it will suspend the assessment on non participating physicians. The assessment will be reinstated if it is determined that the assessment is required to maintain actuarial soundness. During the years 1998 through 2001 the fund was considered actuarially sound and non participating physicians were not required to pay. The assessment was reinstated in 2002 due to the Fund being determined not actuarially sound.

Hospitals	31	33	32	33	29	23
Insurance companies	506	495	496	484	497	466

Notes:

State law allows a physician to be exempt from paying the mandated assessment if one of the five following criteria are met:

1. Employed by the Commonwealth of Virginia or federal government and income form professional fees from a source other than the Commonwealth of Virginia or federal government is less than 10% of annual salary.

2. Enrolled in a full-time graduate medical education program accredited by the American Council for Graduate Medical Education.

3. Retired from active medical practice.

4. Engaged in active clinical practice that was limited to the provision of services, voluntary and without compensation, to any patient of any clinic organized in whole or in part for the delivery of health care services without charge.

5. Not practicing medicine in Virginia (either not currently practicing or practicing in another state).

6. The above E6 exemption numbers are due to undeliverable addresses returned by the Post Office.

Physicians that are delinquent as of year end are turned over to the State Corporation Commission, Division of Insurance.

Legislation states (38.2-5020 E) that if required to maintain the Fund on an actuarially sound basis, liability insurers shall pay an assessment to the Fund. During the years 1998 through 2001 the fund was considered actuarially sound by the State Corporation Commission and insurance carriers were not required to pay. In 2002 the Fund was determined to be actuarially unsound and the liability insurers were required to pay.

Legislation states (38.2-5020 G) that if the State Corporation Commission determines the Fund is actuarially sound it will suspend the assessment on non participating physicians. The assessment will be reinstated if it is determined that the assessment is required to maintain actuarial soundness. During the years 1998 through 2001 the fund was considered actuarially sound and non participating physicians were not required to pay. The assessment was reinstated in 2002 due to the Fund being determined not actuarially sound.

COMPLIANCE SECTION

This page left intentionally blank.

Independent Auditors' Report on Internal Control over Financial Reporting and on Compliance and Other Matters Based on an Audit of Financial Statements Performed in Accordance with *Government Auditing Standards*

The Audit Committee Virginia Birth-Related Neurological Injury Compensation Program Richmond, Virginia

We have audited the financial statements of Virginia Birth-Related Neurological Injury Compensation Program (the "Program") as of and for the years ended December 31, 2007 and 2006, and have issued our report thereon dated April 14, 2008. We conducted our audit in accordance with auditing standards generally accepted in the United States of America and the standards applicable to financial audits contained in *Government Auditing Standards* issued by the Comptroller General of the United States.

Internal Control over Financial Reporting

In planning and performing our audit, we considered the Authority's internal control over financial reporting as a basis for designing our auditing procedures for the purpose of expressing our opinion on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of the Authority's internal control over financial reporting. Accordingly, we do not express an opinion on the effectiveness of the Authority's internal control over financial reporting.

A control deficiency exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent or detect misstatements on a timely basis. A *significant deficiency* is a control deficiency, or combination of control deficiencies, that adversely affects the entity's ability to initiate, authorize, record, process, or report financial data reliably in accordance with generally accepted accounting principles such that there is more than a remote likelihood that a misstatement of the Authority's financial statements that is more than inconsequential will not be prevented or detected by the Authority's internal control.

A *material weakness* is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the financial statements will not be prevented or detected by the Authority's internal control.

Our consideration of internal control over financial reporting was for the limited purpose described in the first paragraph of this section and would not necessarily identify all deficiencies in internal control that might be significant deficiencies or material weaknesses. We did not identify any deficiencies in internal control over financial reporting that we consider to be material weaknesses, as defined above.

Compliance and Other Matters

As part of obtaining reasonable assurance about whether the Program's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts, and grants, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of

our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed an instance of noncompliance that is required to be reported under *Government Auditing Standards* which is described below.

Finding:

The Code of Virginia contains various requirements designed to safeguard state and local funds. Collections must be secured in accordance with the Virginia Security for Public Deposits Act (the "Act") (Section 2.2-4400 et. seq. of the Code of Virginia). The Act requires governmental entity's to use bank and financial institutions that meet specific collateralization requirements.

As of December 31, 2007 the Program's deposit accounts were not identified as public deposits at the financial institution in which they were held, even though the financial institution is a qualified depository under the Act.

Response:

On April 9, 2008 the Program made arrangements with their financial institution to ensure all deposit accounts are identified as public deposits under the Act.

This report is intended solely for the information and use of the Audit Committee, management, and others within the Program, and is not intended to be and should not be used by anyone other than these specified parties.
