

**A Status on the Implementation of the Comprehensive Services**

**Act Match Rate Incentive for Residential Care**

*Prepared by  
The Office of Comprehensive Services for  
At-Risk Youth and Families*

*October 2010*

**Status on the Implementation of the Comprehensive Services Act Match Rate  
Incentive for Residential Care  
October 2010**

**Study Mandate:**

As part of the *Children's Services System Transformation: Connecting Kids and Families for Life* initiative, a varying system of local match rates was developed beginning in FY2009. This local match rate initiative lowered the local match rate by 50% for local community based services and increased the local match rate (up 25% in F10) for certain congregate care services funded by the Comprehensive Services Act. The goal was to provide a financial incentive to provide community supports locally in lieu of congregate care placements.

The 2010 Appropriations Act, Chapter 874, Item 274, C 3.c requires the State Executive Council shall:

***“By October 1 of each year, The State Executive Council (SEC) shall provide an update to the Governor and the Chairmen of the House Appropriations and Senate Finance Committees on the outcomes of this initiative.”***

**Background:**

State Executive Council policy allows local governments until September 30 to file final (expenditure) claims for the prior CSA program year. Since final FY10 program year expenditures will not be finalized until after October 1, 2010, this report provides an update of the Incentive Match Rate initiative as of August 25, 2010.

The statutory purpose of the Comprehensive Services Act (CSA) is to create a system of services and funding for troubled youth and their families that is child centered, family focused and community based. Reducing residential care for children who can appropriately be served in the community is a key CSA performance measure. For the past four years (FY2005 – 09) the ratio of children served in the community to total children served has hovered around 40%; the 2009 performance measure result was 39.82%. The CSA target for FY 2009 was 50% of children served in the community.

The Joint Legislative Audit and Review Committee (JLARC) identified that community based service gaps are the primary obstacle to serve children in the most appropriate, least restrictive setting. In 2007/08, the Casey Strategic Consulting Group provided policy advice to strengthen CSA financial incentives to reduce reliance on residential care, serve children in their homes and invest funds for the development of community based services. Though modified during the 2008 General Assembly session, in short, the

policy advice consisted of phasing in a system of financial incentives over the biennium that is consistent with the statutory purposes of the CSA:

- preserve and strengthen families;
- design and provide services that are responsive to the unique and diverse strengths and needs of troubled youth and families and;
- provide appropriate services in the least restrictive environment, while protecting the welfare of children and maintaining the safety of the public.

**Original Appropriations Act Incentive Match Language:**

The following are excerpts from the CSA 2009 Appropriations Act, Chapter 781, mandating the establishment of an incentive match rate system for CSA pool fund expenditures:

*“Notwithstanding the provisions of C 2 of this Item, beginning July 1, 2008, the Secretary of Health and Human Resources shall oversee the implementation of a system of financial incentives that is consistent with the statutory purposes of the Comprehensive Services Act. The financial incentive system shall use the methodology in place on July 1, 2007, for calculating the base rate for each locality. The Secretary shall establish a work group to implement the changes in state and local match rates for the Comprehensive Services Act (CSA) program. The work group shall include representatives from the Virginia Association of Counties, the Virginia Municipal League, the Virginia League of Social Services Executives, the Virginia Association of Community Service Boards, the Virginia Coalition of Private Providers, the Virginia Association of School Superintendents, the Department of Education, the Department of Juvenile Justice, and the Office of the Executive Secretary of the Supreme Court. The work group shall examine the impact of the match rate changes on local and state administration of the program, reporting requirements, service development and delivery, quality assurance, utilization management, and care coordination to ensure that children continue to receive appropriate and cost-effective services.*

***Community Based Services. Beginning July 1, 2008, the local match rate for community based services for each locality shall be reduced by 50 percent.***

***Localities shall review their caseloads for those individuals who can be served appropriately by community-based services and transition those cases to the community for services. Beginning January 1, 2009, the local match rate for residential services for each locality shall be increased by 15 percent above the fiscal year 2007 base rate after a locality has incurred a total of \$100,000 in residential care expenditures for the period of January 1, 2009, through June 30, 2009. Beginning July 1, 2009, the local match rate for residential services for each locality shall be 25 percent above the fiscal year 2007 base rate after a locality has incurred a total of \$200,000 in residential care expenditures”***

## **Local Government Training**

At the June 12, 2008 SEC meeting, final CSA match rate service categories and definitions were approved (Appendix A). Using that information, all CSA reporting systems, at both the state and local government level, were modified to accommodate new reporting requirements. In June 2010, the SEC modified two CSA service categories and definitions in order to clarify the relationship between special education and CSA and the use of CSA funds (Reference SEC June 24, 2010 minutes at: [Virginia Comprehensive Services Act For At Risk Youth and Families \(CSA\)](#))

To assist local governments with the new match rate incentive system, five regional training sessions were performed across the state in July and August 2008. These sessions were targeted to CSA coordinators, local fiscal management and local CSA data set coordinators. These 5 training sessions were attended by 219 local staff. Regional follow-up sessions were held in the Spring 2009. Follow-up training was conducted in FY10 at 6 regional sites between May to September.

## **Financial Status as of October 2010**

State Executive Council policy allows local governments until September 30 to file final (expenditure) claims for the prior CSA program year. Since final FY10 program year expenditures will not be finalized until after October 1, 2010, this report provides an update of the Incentive Match Rate initiative as of August 25, 2010

With the implementation of the Incentive Match Rate system, local governments local match rate share varies monthly based on the service mix provided to children. To monitor the shift in the effective local match rate, the Office of Comprehensive Services created an **Effective Match Rate** report, tracking the shift in match by locality (see Table 1 attached). This report provides, by locality, the:

- The actual FY09 effective local match rate
- FY10 Base Match Rate – representing the base local share as specified in the Appropriations Act, Chapter 874
- FY10 # of Reports – representing the number of FY Pool Fund Reports filed by the local government thru August 25, 2010
- FY10 Total Net Expenditures – representing the total expenditures (gross cost less refunds) reported on the FY10 Pool Fund reports (filed as of August 25, 2010)
- FY10 Local Match Rate – representing the actual local match determined by the service mix from the filed Pool Fund reports filed through August 25, 1010

- FY10 State Match – representing the actual state share match to be paid from the filed Pool Fund reports filed through August 25, 2010
- FY10 Effective Match Rate – representing the calculation of the actual local match paid divided by the net expenditures claimed
- FY10 Rate Difference – representing the difference between the effective local match rate calculation from the local base match rate
- FY10 Local Match @ Base Rate – representing the calculation of the local base match rate multiplied by the total net expenditures claimed. This would have been the actual local share in absence of the match rate incentives.
- FY10 Local Match Rate- representing the actual local match determined by the service mix from the filed Pool Fund reports filed through August 25, 1010
- Dollar Difference (Savings) – representing the difference between the Actual Local Match and the Local Match at the base rate. The negative amount represents the decline in actual local match on pool fund expenditures

Prior to the adaptation of the Incentive Match Rate system, the historical effective local match has hovered at 35.80%. Through August 25, 2010, the local match rate has declined 2.43% representing a shifting of funding from local to state of \$7,476,809.

The primary reason for the funding shift from local to state governments is an emphasis placed on transitioning children from the use of residential care to less expensive community based care. In FY10 it is expected that the use of lower cost (lower local match) community based care will decline approximately 15% from FY09 and the use of congregate care (higher local match) will decline in excess of 20%. Final results will not be available until mid-October.

Of the 131 local CSA entities, 121 saved local share with the incentive match rate program in FY09 (reference Table 2). The locality with the largest local match savings enjoyed a local match saving in excess of \$600K; the smallest saving was \$4. A total of 9 localities experienced higher local share and for 2 localities there was no impact.

Table 1

Office of Comprehensive Services  
 Effective Match Rate Report - Sorted by FIPS
