

VIRGINIA TOBACCO Indemnification and Community Revitalization COMMISSION

ANNUAL REPORT

Fiscal Year 2009

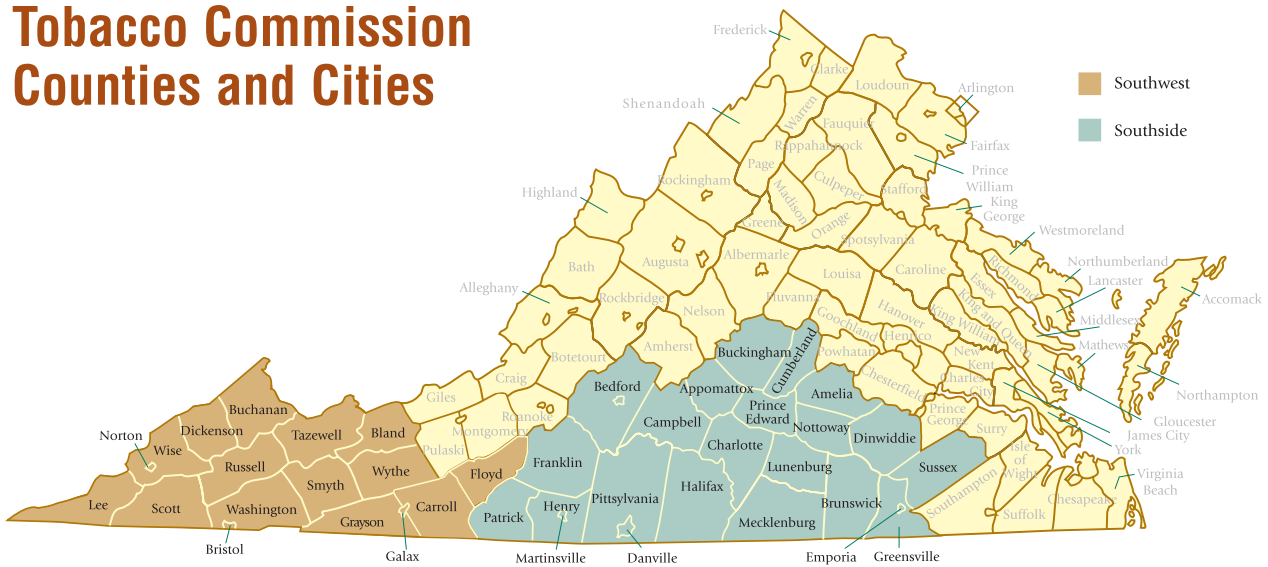

Our Mission

“The Commission is established for the purposes of determining the appropriate recipients of moneys in the Tobacco Indemnification and Community Revitalization Fund and causing distribution of such moneys for the purposes provided in this chapter, including using moneys in the Fund to (i) provide payments to tobacco farmers as compensation for the adverse economic effects resulting from loss of investment in specialized tobacco equipment and barns and lost tobacco production opportunities associated with a decline in quota and (ii) revitalize tobacco dependent communities.”

Section 3.2-3101, Code of Virginia

Tobacco Commission Counties and Cities

Del. Kathy Byron joined Region 2000 and Bedford County officials in November as the Center for Advanced Engineering & Research broke ground in the New London Technology Park. The Center, one of several research centers funded across the tobacco region in FY09 to accelerate innovation and commercialization, is being built with a \$7.7 million Special Projects grant.

Virginia Tobacco Indemnification and Community Revitalization Commission

701 E. Franklin Street, Suite 501 • Richmond, Virginia 23219

October 1, 2009

To the Governor and Members of the General Assembly of Virginia:

The Virginia Tobacco Commission was created by an Act of the Assembly on July 1, 1999, and today, it is my pleasure to present the enclosed Annual Report for the year ending June 30, 2009. Thanks to your collective vision in 1999, the Commission continues to serve the Commonwealth's most challenging economic region, the tobacco belt, and has made significant progress in revitalizing a 400-year old economy. On behalf of the Commission, I am pleased to report our progress to you.

Economic losses sustained by tobacco growers and quota owners in Virginia have reached \$479 million since the time of the Master Settlement Agreement when total asset value was estimated at \$1.2 billion. These losses have profoundly changed the tobacco industry in Virginia. To date, the Commission, together with other sources, has indemnified over 90 percent of that loss and is on course to reach 100 percent by 2011. Soon, the first of our two statutory missions will be complete.

Our second statutory mission, revitalization of tobacco-dependent communities, remains our constant focus and to date, the Commission has funded over 1,100 projects in 41 localities, many of which are described in the pages that follow. While this report is a fair and accurate accounting of the Commission's use of resources, the real story is found in the words of countless citizens who have said to me and other Commission members, "Where would we be if not for the Virginia Tobacco Commission."

On behalf of the Commission, I am grateful for your support of our mission and look forward to another year of partnership with you in bringing renewed prosperity to Virginia.

Sincerely,

Charles R. Hawkins
Chairman

Fund Descriptions and Commission Priorities

Fund Descriptions and Commission Priorities

Using the earnings and corpus from the Tobacco Indemnification and Community Revitalization Endowment established from securitization proceeds, the Commission made available \$20.6 million for indemnification and \$115.3 million for economic revitalization in the tobacco-growing region in fiscal year 2009. Revitalization is accomplished through eight grant programs that make awards to local governments, government entities (such as Planning District Commissions and Industrial Development Authorities), and non-profit organizations. Awards are guided by the Commission's Strategic Plan, recommended by a committee for each program, and monitored by Commission staff. The Plan's Funding Policies call for projects that maximize leveraging from applicants and other partner organizations, and give preference to projects that have regional participation and generate the most significant outcomes for the residents, businesses and localities in the tobacco region.

Regional Economic Development

Regional economic development funds for Southside and Southwest are designated for projects that will expand and diversify the economic base in the tobacco-dependent region, creating new employment opportunities and reducing dependence on tobacco-related activities. The funds are used to develop industrial sites and business/technology parks, improve water, sewer and other utility infrastructure, establish workforce training facilities, and develop tourism infrastructure. Southside localities and organizations received grants totaling \$18.3 million, and Southwest received grants totaling \$10.6 million.

Education

Education funds are awarded for projects designed to create a world-class workforce in the tobacco region, including scholarships, community college programs, workforce training, and vocational and adult education programs. Grants totaling \$10.7 million were awarded this fiscal year for educational projects, including \$3.3 million to the tobacco region's eight community colleges and \$3.8 million in scholarships and loans for tobacco region residents who are attending four-year degree-granting institutions.

Technology

Technology grants are awarded to develop regional networks that provide open access to high-speed, redundant broadband connectivity at an affordable cost to regional users. These networks allow the tobacco region to grow businesses that require this connectivity and to more effectively market the region as a location for business development. Grants totaling \$16.4 million were awarded to build infrastructure in the tobacco region. To date, more than 1,800 miles of fiberoptic "backbone" have been constructed in southern and southwestern Virginia.

Innovation

Innovation grants include three areas of funding: Special Projects, Tobacco Region Opportunity Fund (TROF), and Agribusiness.

Grants are awarded under the Special Projects fund for projects that benefit several localities within one region or have the potential to have a significant impact on the economy of the tobacco

region as a whole. These funds are provided for projects such as research facilities and regional business development that impact multiple localities. Special Projects totaling \$45.1 million were funded this fiscal year for projects including research and development centers, telemedicine, small business lending and e-commerce, workforce training centers, and regional tourism destinations and marketing.

The TROF was created to revitalize the economies of the tobacco region through incentive grants to companies that will create new jobs and bring new private capital investment of at least \$1 million to localities within the region. This fund is successfully assisting communities by diversifying their economic base and reducing dependency on tobacco-related employment. The Commission works closely with the Virginia Economic Development Partnership to leverage the Governor's Opportunity Fund and other state and local incentives. The Commission made \$5.4 in commitments to help attract 21 new companies, create 1,830 new jobs, and provide \$484 million in capital investment to the tobacco region.

Agribusiness grants are awarded to assist tobacco producers and the tobacco region's agricultural community in diversifying into new production opportunities and developing value-added enterprises. Eleven agribusiness projects received grants totaling \$3.3 million for programs and facilities, including regional programs for livestock herd improvements, bio-energy feedstocks, agribusiness education and cooperative marketing of locally-grown produce.

Reserve Fund

The Reserve Fund was established in FY09 to provide a commitment of funds that are needed to attract non-Commission project funding, including federal ARRA stimulus funds. The initial projects approved by the Commission include funds to match federal requests for new construction projects in broadband deployment, sustainable energy production, workforce training facilities and utility/site development for business parks. The Commission made commitments of \$5.6 million for four projects seeking matching funds.

Indemnification

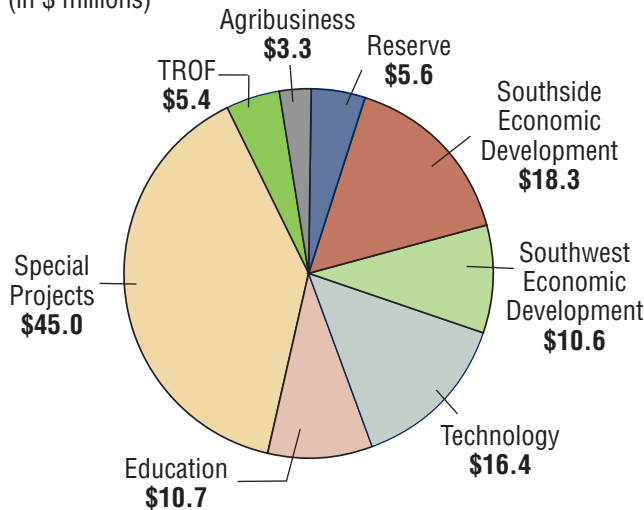

Total quota losses for a given year are calculated to be the difference between that year and the average quota for 1995-98. According to the Code of Virginia, the total value of quota in Virginia is estimated to be \$1.2 billion, and the Commission has adopted a rate of \$12 per pound to compensate for those losses (to be divided between producers and quota owners). Annually, the Commission determines an amount to be made available for indemnification of these losses. From its inception through the end of fiscal year 2009, the Commission has made available for indemnification \$267.7 million, leaving a remaining obligation of \$41.2 million for losses through 2002, the effective year of the federal tobacco quota buyout. Actual amounts paid are determined by verification forms submitted to the Commission by producers and quota owners. Over 46,500 claims were processed in the fiscal year.

The Robert Russa Moton Museum in Farmville (Prince Edward County) is being renovated with a Southside Economic Development grant to prepare it to be a primary destination on the Civil Rights in Education Trail. The former high school is the site of the 1951 student walkout that led to the landmark Supreme Court decision in Brown v. Board of Education.

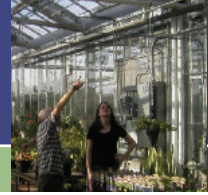

Southwest Economic Development grants funded construction of the Crooked Road Technology Center in Scott County's eCorridor Regional Park, which is now open as a site for business, research and education using the robust broadband connectivity of the TICR-funded Lenowisco network.
