Re: 2009 Accomplishment of the Rappahannock River Basin Commission

Dear Governor Kaine:

As Chairman of the Rappahannock River Basin Commission, I am pleased to present this report to you on the accomplishments during 2009. I remain deeply appreciative of the continued membership and the work efforts expended by members of the House of Delegates and my fellow co-workers in the Senate.

Please do not hesitate to call upon me if I may be of further assistance.

With kindest personal regards and all best wishes, I remain

Sincerely,

Emmett Hanger
Chairman

Annual Report of the Rappahannock River Basin Commission
January 2010

As defined in Section 62.1-69.27 of the Code of Virginia, the Commission's purpose and mission is to provide guidance for the stewardship and enhancement of the water quality and natural resources of the Rappahannock River Basin. The Commission is a forum in which the state, and fourteen local governments to include The City of Fredericksburg and the counties of Culpeper, Spotsylvania, King George, Orange, Richmond, Essex, Westmoreland, Fauquier, Caroline, Rappahannock, Stafford, Lancaster, and Madison and citizens of the Commonwealth work to affect the Basin's water quality, quantity and other natural resources. We continue to promote communication, coordination and education, and by seeking appropriate solutions to identified problems, the Commission promotes activities by local, state and federal governments and individuals that foster voluntary resource stewardship for the environmental and economic health of the Basin.

Since our last report, we have continued to carry out our designated work program with significant success. In 2009, we conducted four meetings in March, June, September and December in the Spotsylvania County, town of Tappahannock, Madison County and the city Richmond (in the Capitol building) respectively. Meeting materials are available on the Commission's website: www.RappRiverBasin.org

The Commission spent considerable time reviewing the proposed Stormwater Regulations and the proposed Emergency AOSS Regulations. With the assistance of the Non-Point Source Pollution Work Group the Commission submitted comments on both draft regulations.

Dr. William Cox of Virginia Tech, who had previously worked with the RRBC and its Water Allocation Group, prepared a detailed summary of the laws, regulations and agreements that govern water quality in Virginia in 2005. This past year RRBC staff completed its third update to Dr. Cox's summary. This summary is posted on the Commission's website and is used by water resource professional across the Commonwealth.

The Rappahannock River Basin Nonpoint Source Workgroup: There have been eleven meetings of the Nonpoint Source Workgroup. Serving as the Commission's technical advisory group their charge is to advise us on how the tributary strategy can be implemented in a reasonable way with a high degree of success. There were also multiple meetings of several subcommittees of the work group on specific tasks, primarily planning the 2009 Symposium on developing market-based strategies to promoting water quality.

The Work Group was asked this year to continue working on some of the recommendations of the 2007 Rappahannock River Summit. The primary effort has been to begin to develop recommendations for facilitating market-based approaches to our non-point source pollution problems. It was pointed out at the 2007 summit that it is highly unlikely that there will ever be sufficient public-sector resources to clean up the Rappahannock River (and the Chesapeake Bay) to desired levels and therefore we must investigate ways to encourage and facilitate private-sector investment.

Annual Report of the Rappahannock River Basin Commission
January 2010

To that end the work group planned a symposium on the topic. A Steering Committee was assembled and met regularly between June and December to plan the event. The symposium was held December 9th. Over 120 attendees, representing the private sector, higher education, non-government organizations as well as federal, state, regional and local governments, participated in the daylong event. The work group will begin in early January to assemble a report on the event including recommendations on how to facilitate increased market-based efforts.

The Commission staff continues to maintain information on the website. In addition to a listing of members and events it contains information on Commission meetings and the continuing efforts of the Non-point Source Group.
