

DEPARTMENT OF SOCIAL SERVICES

October 1, 2013

MEMORANDUM

TO:

Honorable Robert F. McDonnell

Governor of Virginia

Honorable William A. Hazel, Jr., M.D. Secretary of Health and Human Resources

Honorable Walter A. Stosch, Chairman

Senate Finance Committee

Honorable Lacey E. Putney, Chairman House Appropriations Committee

Mr. Daniel Timberlake

Margaret Ross Schultze, Commissioner Mayau New Schultze Annual Virginia Independence Program D Director, Department of Planning and Budget

FROM:

SUBJECT:

I am pleased to submit the Department of Social Services' Annual Virginia Independence Program Report prepared pursuant to § 63.2-619 of the Code of Virginia and Item 337 (B) of the 2013 Appropriation Act. If you have questions or need additional information concerning this report, please contact me at (804) 726-7012.

Attachment

A report of the Department of Social Services Commonwealth of Virginia

Virginia Independence Program and Other Projects Funded with the Temporary Assistance for Needy Families Block Grant

For State Fiscal Year 2012

to the Governor and the General Assembly of Virginia

October 2013

Preface

The Code of Virginia (Code) and the 2013 Appropriation Act (Act) require reports on activities for both the Virginia Independence Program (VIP), and on other projects funded with the Temporary Assistance for Needy Families Block (TANF) Grant (Appendix A):

Section 63.2-619 of the Code states:

Evaluation and reporting.

A. In administering the [Virginia Independence] Program, the Commissioner shall develop and use evaluation methods that measure achievement of the goals of the Program as specified in § 63.2-601.

B. The Commissioner shall file an annual report with the Governor and General Assembly regarding the achievement of such goals.

The annual report shall include a full assessment of the Program, including its effectiveness and funding status, statewide and for each locality; and a comparison of the results of the previous annual reports. The Department shall publish the outcome criteria to be included in the annual report. [Appendix A contains a copy of this legislation.]

Item 337(B) of the Act provides:

The Department of Social Services (DSS) shall report annually on October 1 to the Governor, the Secretary of Health and Human Resources, the Chairmen of the House Appropriations and Senate Finance Committees, and the Director, Department of Planning and Budget regarding spending; program results; clients served; the location, size, implementation status, and nature of projects funded with TANF funds; results of all formal evaluations; and recommendations for continuation, expansion, and redesign of the projects. Such report shall be combined with the report required by § 63.2-619, Code of Virginia. [Appendix A contains a copy of this section of the 2013 Appropriation Act.]

Executive Summary

The federal Temporary Assistance for Needy Families (TANF) block grant funds a host of important and effective programs throughout the Commonwealth including the Virginia Independence Program (VIP). The VIP consists of two related but distinct sets of requirements for TANF participants, eligibility requirements and work requirements. The policies that mandate eligibility requirements became effective statewide on July 1, 1995. The Virginia Initiative for Employment not Welfare Program (VIEW) is the work-related portion of VIP that requires participants to be employed or engaged in a work activity. Implementation of VIEW was phased in over a two-year period beginning in July 1995 and ending in October 1997.

Since VIP was implemented in July of 1995, the TANF caseload has dropped from 70,797 to approximately 34,000 in June 2012, a 52% decrease. Of the 181,876 TANF recipients enrolled in VIEW since 1995, over 127,327 found employment and joined the workforce by June of 2012. This caseload decline contributed to a net savings in federal and state funds of over \$937 million.

TANF was originally authorized by Congress through September 30, 2002. Reauthorization of TANF was included in the Deficit Reduction Act of 2005 (Pub. L. No. 109-171) and new regulations took effect on October 1, 2006. The Commonwealth instituted a number of changes aimed at increasing the number of TANF recipients participating in employment and training activities. Changes due to reauthorization were fully implemented and resulted in increasing the Commonwealth's TANF work participation rate from 28% in September of 2006 to 45% by June of 2012. However, the recession that started in December of 2007 had a negative impact on both the size of the TANF caseload and the number of TANF recipients that are employed. The lingering impacts of the recession continue to present challenges. In 2012, economic conditions continued to improve and the TANF work participation rate improved, but there was little change in employment levels and wages.

Report on the Virginia Independence Program and Other Projects

Funded with the Temporary Assistance for Needy Families Block Grant

Virginia Independence Program Implementation

VIP consists of two related but distinct sets of requirements for recipients of TANF, eligibility requirements and work requirements. The policies that mandated the eligibility requirements were effective statewide on July 1, 1995. These eligibility policies encourage participants to take personal responsibility for their families by requiring TANF participants to cooperate in establishing paternity, ensure regular school attendance by their children, and immunize their children. TANF participants who do not meet these requirements are sanctioned. VIP eligibility policies also cap benefits for children born more than 10 months after TANF assistance is authorized.

VIP eligibility policies are instrumental in focusing TANF participants on personal responsibility. The vast majority of participants have complied with VIP policies and have not been sanctioned for failure to cooperate.

VIEW is the work-related portion of VIP. VIEW was phased in over a two-year period beginning in July of 1995 and ending in October of 1997. VIEW policies include:

- A requirement for participants to enter a work activity within 90 days of receipt of TANF;
- A two-year time limit on TANF benefits; and
- A disregard for earned income up to 100% of the federal poverty level.

To implement VIP and VIEW, Virginia had to secure waivers of federal regulations. Key elements of the VIEW program that needed waivers included:

- Changing the work exemption so that parents of children over the age of 18 months had to participate (now changed to 12 months);
- Imposing a two-year time limit on TANF benefits for families participating in VIEW;
- Allowing a full family sanction;
- Eliminating the reconciliation process required for sanctioning;
- Imposing a period of ineligibility; and
- Requiring the signing of an Agreement of Personal Responsibility to continue receiving TANF.

And the property of the state o

and hear into a compare to introduce a function

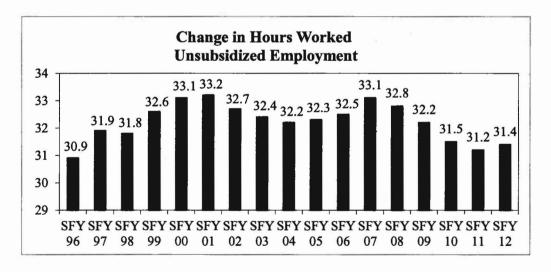

Although the waivers expired on July 1, 2003, Virginia, by using the flexibility in the federal regulations governing the block grant, has continued to operate the program as originally designed with the exception that all adult recipients of TANF, not just those participating in VIEW, are subject to the federal 60-month lifetime limit. In addition, changes were implemented in October of 2006 to help the Commonwealth meet the federal participation rate as required by the Deficit Reduction Act of 2005 (Pub. L. No. 109-171).

Since VIP was implemented in July of 1995, the TANF caseload has dropped from 70,797 to approximately 34,000 in June 2012, a 52% decrease. Of the 181,876 TANF recipients enrolled in VIEW since 1995, over 127,327 found employment and joined the work force by June of 2012. This caseload decline contributed to a net savings in federal and state funds of over \$937 million.

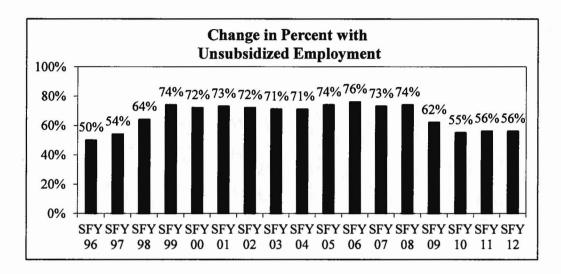

Outcome Measures

The outcome measures cover employment, earnings, program sanctions and supportive services. For SFY 2012, outcome measures show a low rate of eligibility sanctions and a high rate of participants leaving TANF with employment. Outcome measures for the 17 state fiscal years show the following changes from 1996 through 2012.

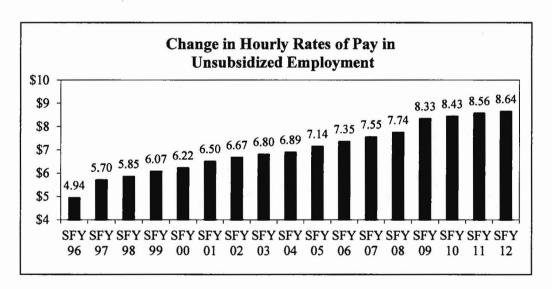

The average number of hours worked per week in unsubsidized employment rose from 30.9 in SFY 96 to a high of 33.2 in SFY 01 before beginning to fall. The average number of hours rose to 33.1 hours in SFY 2007 before falling again. In SFY 12, the hours worked per week were 31.4.

■ The percent of VIEW participants who worked in unsubsidized employment rose from 50% in SFY 96 to a high of 76% in 2006. In SFY 12, VIEW participants in unsubsidized employment dropped to 56%.

 Average hourly wages earned by VIEW participants increased from \$4.94 in SFY 96 to a high of \$8.64 in SFY 12.

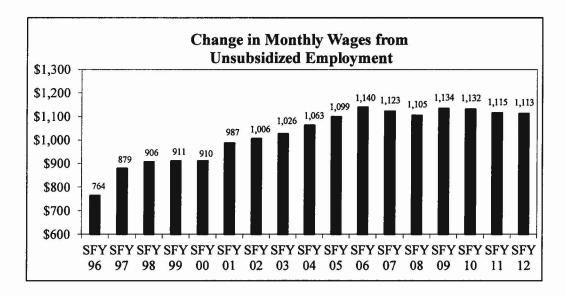

a 18 million annual per la communicación del secondo del Mallocación del communicación del medicación del Mallocación del Mallocación del communicación del medicación del Mallocación del Mal

Millian of the State State S

 Average monthly earnings for VIEW participants who left TANF with unsubsidized employment increased from \$764 in SFY 96 to a high of \$1,140 in SFY 2006. In SFY 12, the average monthly earnings were \$1,113.

Key findings for SFY 12 are as follow:

- About 25% of VIEW cases left TANF with unsubsidized employment;
- The average rate of pay rose to \$8.64 per hour; and
- Transportation and other supportive services totaling \$13.5 million in expenditures were provided to VIEW participants.

For all 17 program years, SFY 96 to SFY 12, the following are key findings:

- At least 57% of employed VIEW participants retained employment for at least six months beyond the closure of their TANF cases;
- About 84% of the participants who left TANF with employment did not return to TANF within 12 months; and
- Transportation and other supportive services totaling \$182.5 million in expenditures were provided to VIEW participants.

The outcome measures for VIP are reported in tables one through four in Appendix C. Tables one through three cover both statewide and locality specific data for SFY 12. Table four covers statewide and locality specific data for the full 17 years of program implementation because these variables require elapsed time. A statewide summary of the outcome measures for SFY 12 and the 17 program years are given below. Unless otherwise specified, totals are unduplicated by case for the stated time periods.

 Number of TANF participants that received sanctions or penalties for failure to participate in VIEW. (Table 1, Column A)

For SFY 12, 9,410 TANF clients referred to VIEW were sanctioned for failure to

participate in VIEW. From SFY 96 through SFY 12, 70,960 TANF clients were sanctioned for failure to participate in VIEW. (The total is based on the number of mandatory VIEW adults who were removed from the TANF grant while their VIEW clock was still active. This includes persons receiving one, two or three sanctions for failure to cooperate with VIEW.)

Number and percent of TANF applicants who received Diversionary Assistance. (Table 1, Column B)

During SFY 12, 2,473 cases received Diversionary Assistance payments. From SFY 96 to SFY 12, 35,025 cases received Diversionary Assistance payments. (Diversionary Assistance is available to persons applying for TANF because they have a temporary loss of income. If they are eligible for TANF, they can opt to receive a one-time Diversionary Assistance payment instead of becoming dependent on TANF.)

Number and percent that did not become TANF recipients after their period of ineligibility for TANF benefits. (Table 1, Column C)

During SFY 12, of the 2,473 cases that received Diversionary Assistance payments, 86% did not become TANF cases after the period of ineligibility. Since SFY 96, 35,025 cases have received Diversionary Assistance payments. Of these cases, 23,034, or 66%, did not become TANF cases after the period of ineligibility.

Number and percent of VIEW enrolled TANF recipients who were employed. (Table 2, Columns A, B, and C)

During SFY 12, 35,950 TANF recipients enrolled in VIEW. Of these, 20,265, or 56%, were employed in unsubsidized jobs. From SFY 96 through SFY 12, 181,876 TANF recipients enrolled in VIEW. Of these, 127,327, or 70%, were employed in unsubsidized jobs.

Average number of hours worked per week in unsubsidized jobs. (Table 2, Column D)

On average, the 20,265 VIEW enrollees employed in unsubsidized jobs during SFY 12 worked 31.4 hours per week. On average, the 127,327 VIEW enrollees employed in unsubsidized jobs from SFY 96 through SFY 12 worked 32.4 hours per week. (In cases where there was more than one employment, the most recent employment was used for the calculation of hours worked.)

Average hourly rate of pay in unsubsidized jobs. (Table 2, Column E)

Hourly rates of pay averaged \$8.64 for the 20,265 VIEW enrollees employed in unsubsidized jobs during SFY 12. Hourly rates of pay averaged \$7.56 for the 127,327 VIEW enrollees employed in unsubsidized jobs from SFY 96 through SFY 12.

AND AND ADDRESS OF THE PARTY OF

(In cases where there was more than one employment, the most recent employment was used for the calculation of hourly rate of pay.)

 Number and percent of VIEW participants who enrolled in the Community Work Experience Program (CWEP) or the Public Service Program (PSP). (Table 3, Columns A, B, and C)

During SFY 12, of the 35,950 TANF recipients who enrolled in VIEW, 7,704, or 21%, participated in CWEP or PSP. From SFY 96 through SFY 12, of the 181,876 TANF recipients who enrolled in VIEW, 43,312, or 24%, participated in CWEP or PSP. (The Public Service Program component was added effective October 2006.)

Number and percent of VIEW employed cases that left TANF with employment.
 (Table 3, Columns D, E, and F)

During SFY 12, 5,091 or 25%, of the 20,265 VIEW employed participants had employment when they closed their case. From SFY 96 through SFY 12, 72,042 or 57%, of the 127,327 VIEW employed participants had employment when their case was closed. (Employment is based on information reported to caseworkers and recorded in the Employment Services Program Automated System (ESPAS). Some participants may leave VIEW and TANF with unreported employment.)

Average monthly earnings for those leaving with employment. (Table 3, Column G)

Monthly wages averaged \$1,113 for VIEW participants who left TANF with employment during SFY 12. Monthly wages averaged \$1,048 for VIEW participants who left TANF with employment from SFY 96 through SFY 12. (Monthly wages are equal to average hours times 4.33 weeks times the hourly rate of pay.)

 Number and percent of employed VIEW participants who retained employment six months after leaving TANF with unsubsidized employment. (Table 4, Columns A, B and C)

In the first 192 months of the VIP/VIEW program, 71,003 VIEW participants left TANF with unsubsidized employment. Of those, 40,322, or 57%, retained employment for at least six months. (This measure requires at least six months elapsed time before the end of the state fiscal year.)

• Number and percent that did not return to TANF within 12 months of leaving TANF with unsubsidized employment. (Table 4, Columns D, E and F)

In the first 186 months of the VIP/VIEW program, 69,095 VIEW participants left TANF with unsubsidized employment. Of those, 58,058, or 84%, did not return to TANF within 12 months. (This measure requires at least twelve months elapsed time after leaving TANF.)

Number and percent of VIEW participants who received transportation and other support services.

Information on the number and percent of VIEW participants receiving transportation and other services is not collected. However, the total dollars spent for the 17 years following VIEW implementation was \$72 million for transportation and \$110.5 million for other supportive services.

Other Projects Funded with the Temporary Assistance for Needy Families (TANF) Block Grant

Item 337 of the Act provides for a spending strategy designed to protect families at risk and facilitate the transition to economic self-sufficiency. Federal TANF funds are being used to finance these strategies. Below are descriptions of TANF block grant projects operated in SFY 12.

Community Action Agencies

The Community Action Network consists of 28 local agencies that provide an array of services for low-income families and individuals. TANF funds are used in combination with federal Community Services Block Grant (CSBG) funds, other federal, state, local, and private sector resources to provide a wide variety of services to needy families. These services included emergency services, job readiness and employment services, case management services, supportive services including child care and transportation services for employed families, free tax preparation and assistance in securing earned income tax credits, individual development account programs, housing, community and economic development projects, family development, education, and homeless/domestic violence shelter programs. The appropriation for these programs in SFY 12 totaled \$500,000 in federal TANF funds.

The program is targeted to serve needy families with minor children. The localities served by the community action agencies are listed below:

Accomack County	Henry County	Warren County
Albemarle County	Isle of Wight County	Washington County
Alleghany County	James City County	Westmoreland County
Amelia County	King and Queen County	Wise County
Amherst County	King George County	Wythe County

During SFY 12, the TANF funds were used to expand the services provided by the community action agencies. TANF funds make up only 0.36% (\$500,000) of the \$136,603,842 in federal, state, local, and private resources that Virginia's community action agencies secured and used during SFY 12 to serve a total of 82,302 low-income families and 169,025 individuals.

The following is a list of outcomes achieved by local community action programs and services that were funded in part with TANF:

- 36,451 households consisting of 82,530 individuals had their emergency needs addressed;
- 848 children received childcare that enabled their parents to work or attend school/training;
- 2,763 unemployed individuals secured employment while another 334 employed individuals secured better jobs;
- 259 individuals were able to obtain or maintain employment due to transportation services;
- 273 individuals completed a GED program and received a certificate or diploma;
- 131 youth secured summer or other temporary jobs through youth employment programs;
- 14,572 children were fed in summer feeding programs;

- 357 youth participated in summer camp programs;
- 6,324 children received Head Start services partially supported with TANF funds;
- 2,298 youth in Project Discovery programs partially supported by TANF participated in activities designed to encourage and prepare them to attend college or other post-secondary educational institutions;
- Seven community action agencies operated transitional housing programs partially supported by TANF funds that provided housing and case management services to 166 families consisting of 415 individuals;
- 2,643 homeless families consisting of 5,949 individuals received emergency assistance and counseling;
- 1,693 families consisting of 2,385 individuals suffering from domestic violence received emergency assistance and counseling;
- 75 families obtained home ownership;
- 220 households consisting of 476 individuals secured improved housing through housing rehabilitation/home repair programs;
- 2,242 households consisting of 4,699 individuals had their homes weatherized resulting in improved energy efficiency;
- 1,249 households consisting of 2,960 individuals were able to preserve or improve their housing after receiving housing counseling;
- 25 families received assistance in repairing their water and wastewater systems;
- 242 families including 403 children increased their access to quality health care resources through the Comprehensive Health Investment Project (CHIP) programs partially funded by TANF;
- 444 at-risk elementary and middle school students received services to improve their academic success;
- 707 at-risk high school students participated in programs enabling them to graduate to the next grade level;
- 66 families increased their cash savings by participating in Individual Development Account (IDA) programs;
- 115 mothers participated in a Resource Mother Program;
- 86 families were able to maintain a safe and stable household through intensive case management services;
- 94 absent fathers increased their parental involvement as a result of fatherhood program services; and
- 2,976 ex-offenders received emergency assistance and comprehensive case management services designed to reintegrate them into their communities and families.

Domestic Violence Services

TANF funds in the amount of \$1,248,750 were appropriated for SFY 12 for domestic violence services. No funds were appropriated for administration of the program. The services provided are crisis and core services to victims of domestic violence including 24-hour confidential crisis hotline, shelter, crisis counseling, supportive counseling, information and referral, transportation, coordination of services, legal advocacy, and basic children's services.

The target population are victims of domestic violence who are either pregnant or have dependent children.

In SFY 12, the Office of Family Violence renewed 46 Domestic Violence Prevention and Services Program contracts and implemented three contracts for underserved communities making a total of 49 contracts for local domestic violence services throughout the Commonwealth. Each award included TANF funds. The following is a breakdown of services provided by the local programs:

- 16,051 adults received advocacy; 4,153 were TANF eligible (Legal Advocacy accounts for 1,517 and is included in the advocacy total).
- 3,260 adults received shelter; 996 were TANF eligible.
- 4,864 adults' children received advocacy; 1,121 were TANF eligible.

Comprehensive Health Investment Project (CHIP of VA)

The mission of CHIP of Virginia is to "improve children's health and promote wellness and self-sufficiency in low-income families, through partnerships with local communities." CHIP of Virginia programs are local public/private partnerships providing comprehensive health supervision, family support, and referral to medical and dental services for low-income at-risk children. CHIP programs provide home-based case management which helps families connect to needed services. While improved children's health is the primary goal, parents of enrolled children also develop skills to increase their self-sufficiency and care for their children.

CHIP's mission to match families to comprehensive preventive and primary care providers, coupled with family support services, guides families to the effective use of health care and other community resources. CHIP nurses and outreach staff work with families to develop plans for improving health and nutrition, increasing home safety and stability, and enhancing education and employability. The appropriation for the program in SFY 12 was \$500,000 from the federal TANF block grant.

As of June 30, 2012, CHIP of Virginia funded 8 sites, serving children in 27 localities across the state. Sites are located in Arlington, Chesapeake/Portsmouth, Jefferson Area, New River Valley, Norfolk, Richmond/Petersburg, Roanoke and Southwest. During SFY 12, CHIP nurses and outreach workers performed 21,726 home visits to 2,605 enrolled families and had a total of 25,328 face-to-face contacts.

The four CHIP core services are:

- Screening, Assessment and Planning: Services include assessing the family and child strengths and needs, leading to the development of family service plans. Assessments include child health, development and safety, family wellness and stability, parent work experience, and employability.
- Education and Support: Services include assisting parents in acquiring parenting skills, learning about growth and development, promoting the health and well-being of their families and increasing self-sufficiency.

- Follow-Up: Activities include ensuring that necessary services are received by families and are effective in meeting their needs.
- Referral and Outreach: Services include linking families to available community resources and ensuring connections to appropriate community agencies.

Ninety-one and a half percent of CHIP families received all four core services during SFY 12.

A key component of CHIP case management activities is ensuring effective use of community resources. During SFY 12, CHIP staff members made over 5,537 referrals for services. Following is a summary of SFY 12 contacts with local service providers:

- 1,457 contacts with local departments of social services;
- 870 contacts with schools;
- 565 contacts with mental health services;
- 203 contacts with the Women, Infants and Children Nutrition Program (WIC);
- 265 contacts with emergency resource providers (e.g. food banks);
- 288 contacts with housing services;
- 156 contacts regarding Medicaid applications;
- 252 contacts with Child Protective Services;
- 189 contacts with employment services; and
- Numerous other contacts with doctors, dentists, and other health services providers.

CHIP staff work with families to help them assess their needs and resources and to develop plans to meet those needs. In SFY 12, CHIP had 2,960 encounters with families during which a family needs assessment/service plan facilitation was performed. Of families actively enrolled in CHIP, 94.6% of them were engaged in family needs assessment and/or service plan facilitation during SFY 12. Family service planning targets outcomes related to both health and self-sufficiency, and families enrolled in CHIP have demonstrated positive outcomes in both areas.

CHIP works to ensure that every enrolled child has a primary care provider who provides both well-and sick-child care; offers comprehensive, coordinated, family-centered care; and is available around-the-clock. In SFY 12, 93.3% of children with at least one year of CHIP services were up-to-date or on-track with immunizations. (Children are on-track if they are not fully up-to-date, often because of a late start, but have been given as many immunizations as clinically allowable.)

Education is a key to self-sufficiency. Of the parents who have not received their high school diploma or GED prior to enrollment, 12.3% of mothers had successfully done so after two years of program services. In SFY 12, 39% of families with at least one year of CHIP services have one or both parents employed. School readiness of children also improves; in SFY 12, 52.1% of children age three to six are participating in early childhood programs or out-of-home care.

Family stability also shows improvement after enrollment in CHIP. In SFY 12, the number of families with two or more moves during the year decreased by 62.5%. The number of

families with at least one year of CHIP services reporting unmet transportation needs decreased by 19.3% and unmet food needs decreased by 34.1%.

Healthy Families

The Healthy Families model is designed to promote positive parenting, improve child health and development, and reduce child abuse and neglect. The model uses home visiting to reach families with young children.

Families become involved with the program during pregnancy or at birth. A Healthy Families Assessment Worker completes a Family Needs Assessment. If a family is identified as being at high risk of child maltreatment and in need of support services, the family is offered the opportunity to voluntarily participate in the Healthy Families program. When families accept services, comprehensive home visiting is initiated that includes Family Support Workers who monitor and follow up on prenatal, postnatal, and pediatric care. For those parents whose Family Needs Assessments identify the need for support not available through Healthy Families, information and referrals to other community resources are offered.

Healthy Families programs offer voluntary and frequent home visiting services for up to five years. The services include in-home parenting education, child development, preventive health care, and support services. Family needs are assessed and an Individualized Family Support Plan is developed. This plan includes short and long-term family goals and strategies for achieving them. Strategies may include staying in school, finding a job or a better place to live, developing effective parenting techniques, home management skills, and ensuring well baby care. The plan becomes a guide for service provision and involves linking the family with appropriate community resources to help meet all of their identified needs.

For SFY 2012, a total of \$3,425,501 was available for the Healthy Families program. This includes \$2,855,501 in federal TANF block grant funds and \$570,000 in state General Funds. This represents a 25 percent (25%) reduction from the previous year's funding. Based on reports from all sites, but recognizing some sites may have reported on all served by the program rather than those served by TANF funding alone, 5,383 adults and 3,475 children were served during SFY 2012.

The program served 81 cities and counties in Virginia in SFY 2012. This number has been reduced from SFY 2011 due to the closing of Norfolk and Portsmouth Healthy Families programs effective June 30, 2011. In addition to these programs, Accomack, Chesapeake and Halifax closed effective June 30, 2010. Localities currently served by Healthy Families are listed below:

Healthy Families Virginia (HFV) contracts with Joseph Galano, Ph.D., of the Applied Social Psychology Research Institute at the College of William and Mary, and Lee Huntington, Ph.D., of Huntington Associates, Ltd., to analyze the Healthy Families data collected from local sites. The College of William & Mary and Huntington Associates, Ltd. have completed 13 annual Healthy Families Virginia evaluation reports for the Healthy Families Virginia Initiative and Prevent Child Abuse Virginia. They have also completed a benchmark study for the Hampton Healthy Families Partnership measuring community-wide impact over a decade.

The SFY 08-12 Statewide Evaluation Report provides the results of the outcome evaluation of 33 Healthy Families sites (five stopped providing HF services and/or data in SFY11). The summary is based on outcome evaluations of two groups of sites, those that participate in the HFV statewide evaluation project and collect data using the Program Information Management System (PIMS), and data from the sites that do not use PIMS or participate directly in the statewide evaluation project. The following bullet items are notable outcomes abstracted from the report:

• Child Abuse and Neglect: No new searches were conducted for the SFY 2012 program year. The previous three years results were used to provide the best estimate of the program's impact on the rates of founded cases. First, the FY 2011 statewide rate of confirmed cases of child abuse and neglect was 0.7% based on 2,441 families. That rate was a continued improvement over the FY 2010 and 2009 rates of 0.8% and 0.9%, respectively.

- Healthy Birth Weight: Ninety-one percent of the babies born to the 1,445 enrollees were within the healthy birth weight range, surpassing the state criterion. The percentage of full birth weight represents a considerable improvement over the SFY 2001 statewide rate of 77%.
- Connection to Medical Care Providers: Approximately 97% of the 3,902 births to mothers enrolled in Healthy Families programs using PIMS had a primary medical care provider within two months of enrollment. In addition, 97% of those children continued with health care providers after six months of participation in the program. These rates far exceed the Healthy Families Virginia criteria.
- Immunizations: Eighty-eight percent of the 2,677 children in both PIMS and non-PIMS sites received 100% of their 16 scheduled immunizations. This level of performance surpassed the statewide objective, exceeds the 2012 Virginia average of 77%, and the VDH immunization rate of 67% for comparable high-risk families. This performance is superior not only to the rates for high-risk families, but also to the rates for the Virginia general population. The rate for children in the general population declined from 81.5 in 2006 to 69.9 in 2011, a precipitous decline in an indicator that many scientists view as a proxy for the overall health of our children.
- Child Development: Healthy Families programs succeeded in ensuring the referral of children with suspected delays to early intervention services and followed children to ensure the receipt of services. Approximately 91% of the 2,297 children were appropriately screened for developmental delays in SFY 2012. Ninety-nine percent of the children with suspected delays were referred for further developmental assessment and services as warranted. The 1.0% of children with suspected delays who were not referred was a result of parents leaving the program before the process was complete or declining to have their child referred.
- Maternal Health Outcomes: A total of 2,580 mothers (462 teen and 2,118 non-teen) were enrolled long enough to merit inclusion in this evaluation component. After the targeted 24-month interval, 92.6% of the teen mothers had no subsequent births, and 2.8% had a subsequent birth after the 24-month interval for a 95.4% success rate. Ninety-two percent of the non-teen mothers had no subsequent births, and 4.1% had births after the targeted 24-month interval, representing a 96.2% success rate. Delays in subsequent child birth are associated with higher educational attainment, improved children's health, increased future job status, and decreased infant homicide.
- Parent-Child Interaction: In SFY 2012, from the 2,315 parent-child interactions assessed, 93% were within normal limits. This result surpassed the statewide criterion that at least 85% of participants demonstrate acceptable levels of parent-child interaction or experience improvement after one year of participation. Additionally, 2,420 families participated long enough to evaluate their home environment. Ninety-eight percent of these families' assessments were within normal limits, again surpassing the statewide criterion of 85%. Overall, Healthy Families participants displayed greater sensitivity to their children's cues,

increased understanding of their children's development, less overall stress, and greater knowledge of alternative methods of discipline.

Employment Advancement for TANF Participants Projects

The Employment Advancement for TANF Participants Projects are designed to provide proven service approaches and strategies that help current and former TANF clients, including those who have received diversionary assistance to keep them off TANF, those with multiple barriers, and sanctioned individuals to prepare to enter, succeed, and advance in the workplace. The intent is to provide resources to expand and enhance existing service delivery efforts that address more fully the needs of the target population prior to their entry into work and during employment. Services are provided by local social service agencies, state agencies, and forprofit and non-profit organizations. The expected outcomes of the project are improved job placement, improved job retention, higher employment wages upon entry, and increased wage gains from job advancement. The program has been operating since December 1, 2004 and the most recent projects began on October 1, 2010. This report is for the period July 1, 2011 through June 30, 2012. Thirty-two programs operated on a budget of \$7.26 million during the time period. Services offered may include, but are not limited to:

- Comprehensive assessments (including utilization of psychologists and clinicians) that help identify strengths, diagnose disabilities and determine treatment and accommodations required;
- Services that stabilize an individual's situation so that he/she can participate in or retain employment and/or seek alternative financial resources such as Social Security Income;
- Intensive work preparation or work adjustment services, including education and skills training, community work experience placement and on-the-job training;
- Job development and placement services including work initiatives, subsidized employment and the development of industry-based career ladders; and
- Supportive services such as transportation assistance that support individuals retaining employment and/or obtaining higher wages, health benefits and/or jobs with a career path.

Employment Advancement Program operators included:

Arlington County Department of Human Services
Bay Aging/Transit in Urbanna
Career Support Systems, Inc. in Richmond
Charlotte County DSS
Crater Workforce Investment Board in Petersburg
Culpeper Human Services
Danville Community College
Fairfax County Department of Family Services

At the end of the twelve months being reported below, and considering cumulative totals from the beginning of the current program on October 1, 2010, the projects achieved the following:

- Of the 15,452 participants enrolled in the program, 12,054 were enrolled with placement goals. Of these, 4,282 had entered employment or 35% of those enrolled. (Those not enrolled with placement goals were provided transportation services or medical case management services.)
- Brunswick Department of Social Services, a sub-grantee of Charlotte County's Project has the highest employment rate with 93%; Tidewater Community College was next with 81%; there were several with 60% to 66%.
- The average hourly wage at all project locations for grant participants ranged from \$7.65 to \$11.59; the hourly wage for VIEW participants at these same project locations was between \$7.42 and \$10.60.
 - > Twenty-three of the 29 programs collecting wage data either achieved or surpassed the average wage rate of their corresponding local VIEW program.
 - ➤ Of those projects that surpassed or met the VIEW wage, the wage rates ranged from a high of 127% to 101% of the VIEW wage in the same area.
 - > Five programs had wage rates greater than 120% of the VIEW wage rate in the area.

The majority of the individuals enrolled in the Employment Advancement Program face multiple barriers to employment and are, in many cases, referred from VIEW because of their inability to gain employment.

Conclusion

TANF was originally authorized by Congress through September 30, 2002. Reauthorization of TANF was included in the Deficit Reduction Act of 2005 (Pub. L. No. 109-171) and new regulations took effect on October 1, 2006. The Commonwealth instituted a number of changes aimed at increasing the number of TANF recipients participating in employment and training activities. Changes due to reauthorization were fully implemented and resulted in increasing the Commonwealth's TANF work participation rate from 28% in September of 2006 to 45% by June of 2012. However, the recession that started in December of 2007 had a negative impact on both the size of the TANF caseload and the number of TANF recipients that are employed. The lingering impacts of the recession continue to present challenges. In 2012, economic conditions continued to improve and the TANF work participation rate improved, but there was little change in employment levels and wages.

Appendix A

Study Mandates

Code of Virginia

§ 63.2-619. Evaluation and reporting.

A. In administering the Program, the Commissioner shall develop and use evaluation methods that measure achievement of the goals specified in § 63.2-601.

B. The Commissioner shall file an annual report with the Governor and General Assembly regarding the achievement of such goals.

The annual report shall include a full assessment of the Program, including its effectiveness and funding status, statewide and for each locality; and a comparison of the results of the previous annual reports. The Department shall publish the outcome criteria to be included in the annual report.

2013 Appropriation Act, Item 337

Department of Social Services (765)

337 (language only)

A. It is hereby acknowledged that as of June 30, 2011 there existed with the federal government an unexpended balance of \$25,574,493 in federal Temporary Assistance for Needy Families (TANF) block grant funds which are available to the Commonwealth of Virginia to reimburse expenditures incurred in accordance with the adopted State Plan for the TANF program. Based on projected spending levels and appropriations in this act, the Commonwealth's accumulated balance for authorized federal TANF block grant funds is estimated at \$14,064,514 \$30,053,974 on June 30, 2012; \$7,577,009 \$22,192,651 on June 30, 2013; and \$32,835 \$2,844,730 on June 30, 2014.

B. The Department of Social Services (DSS) shall report annually on October 1 to the Governor, the Secretary of Health and Human Resources, the Chairmen of the House Appropriations and Senate Finance Committees, and the Director, Department of Planning and Budget regarding spending; program results; clients served; the location, size, implementation status, and nature of projects funded with TANF funds; results of all formal evaluations; and recommendations for continuation, expansion, and redesign of the projects. Such report shall be combined with the report required by § 63.2-619, Code of Virginia.
