

June 30, 2014

Mr. Dan Timberlake, Director Virginia Department of Planning and Budget 1111 East Broad Street, Room 5040 Richmond, Virginia 23219-3418

RE: Fort Monroe Authority (FMA)

Dear Mr. Timberlake,

In accordance with the Fort Monroe Authority Act, we are enclosing with this letter copies of the FMA's FY15 and FY16 governmental fund and enterprise activity budgets. These budgets were approved by the FMA Board of Trustees at its meeting on June 19, 2014. We are also enclosing a narrative explanation of budget categories that provides background information on each budget line item.

Since the transfer of 312.75 acres of property to Commonwealth ownership in June 2013, the FMA has been working to fulfill the preservation requirements established in the governing documents, including the Programmatic Agreement and Statewide Memorandum of Understanding, while positioning the property for land sales in the approved areas and long-term ground leases in areas where fee simple sales are restricted. After a two-year process with a great deal of public involvement, the Land Use Master Plan was adopted by the FMA Board of Trustees in October 2013 and Governor McDonnell approved the plan in December 2013. The FMA is currently working with the City of Hampton to incorporate the Land Use Master Plan into the City's comprehensive plan. The two parties are also working to develop a zoning ordinance to govern the future use of land parcels sold or ground leased to private parties. These two steps are critical to ensure that private property at Fort Monroe is developed in accordance with the Land Use Master Plan. The FMA expects to complete this process during FY15.

The FMA, in cooperation with the Virginia Department of Environmental Quality, continues to work with Army environmental counsel to agree on the need for and process for remediating environmental issues on four additional reversionary parcels collectively encompassing 43+ acres. These parcels and the accompanying structures, infrastructure and utility systems will transfer to the Commonwealth by reversion once the Army completes investigation and any remediation required by the CERCLA environmental laws. This process is expected to continue through FY16.

The FMA continues to negotiate with the Army for two additional parcels of land at Fort Monroe with disputed title. In order to avoid a protracted legal process in federal courts, the FMA is working with the Army to negotiate an Economic Development Conveyance (EDC) that would resolve the title dispute and result in the transfer of approximately 83.2

acres together with the buildings, infrastructure and utility systems to the Commonwealth. During FY15 the FMA and Army will complete separate appraisals of the disputed property to determine the market value of the disputed parcels.

In brief, the governmental fund budget includes the approved appropriation from the Commonwealth's General Fund of approximately \$6.7 million for FY15 and \$5.5 million for FY16 and a large carryover of funds from FY14. The carryover results from the delay in electric utility transfer that was budgeted to transfer in October 2013 combined with the FMA strategy to delay non-critical projects to preserve working capital in the event that a budget was not approved by July 1, 2014. The surplus will be used to fund delayed projects in FY15 and FY16. The budget reflects continued support from the DOD Office of Economic Adjustment of approximately \$225 thousand from an extension of the FY14 grant and \$550 thousand from new grant requests for FY15 and FY16, although the grants have not been approved at the time of this letter. The expenses reflected in the governmental budget are related to the evaluation, analysis and planning for the reuse of Fort Monroe; the operation of utility systems and common areas; the historic preservation of nearly 200 structures; and the continuation of tourism and educational activities for residents, tenants and visitors as mandated from the FMA Act. Expenses reflected in the government fund budget include personnel and benefits for the majority of the FMA staff. The governmental fund also includes deficit funding for the enterprise activity fund for both FY15 and FY16. More information can be found in the attached government fund budget narrative.

The governmental fund budget was adjusted to remove the majority of the capital projects that were originally proposed to be funded by appropriated general funds. Since the General Assembly approved a \$22.5 million bond allocation for capital projects at Fort Monroe, to be managed by the Department of General Services, the FMA will work with DGS and the Virginia Public Building Authority to develop a capital spending plan that will be presented to the FMA Board for approval prior to the commencement of any projects through VPBA.

The enterprise activity fund reflects the Authority's residential and commercial leasing activities at Fort Monroe. During FY14, the FMA took control of the natural gas, water and sewer master-metered accounts from the Army. FMA began billing third-party tenants for metered and non-metered utility consumption for these 3 commodities in October 2013. As a result, the FMA has established a Utility Fund budget to reflect the portion of utility bills paid by the FMA but not billed to residential or commercial tenants. The FMA continues to lease and manage the 176 residential housing units, a portion of which require significant renovations to bring the units to leasable condition. Using funds from the supplemental FY14 appropriation, the FMA has begun a process to renovate eight residential units. Approximately half of the units were completed in FY14 with the balance to be completed using carryover funds in early FY15. The FMA is also evaluating the conversion of the former 9-unit inn into a 10-unit apartment building. The FMA, working

with its commercial leasing and management contractor, maintains over 1.1 million square feet of non-residential properties. As of the end of FY14 approximately 237 thousand square feet has been leased to state and local governmental entities and private businesses. Given the large inventory of vacant historic buildings the FMA expects the enterprise fund to operate in a large deficit until such time as property can be leased or sold to private parties. More information can be found in the attached enterprise fund budget narrative.

The Fort Monroe Authority greatly appreciates the support we receive from the Department of Planning and Budget through the appropriated funds and bond allocations. Please let us know if you have any questions.

Respectfully submitted,

John K. Hutcheson

Deputy Executive Director and Treasurer

Fort Monroe Authority

cc: G. Glenn Oder

The Honorable Richard Brown

Toni Walker

	Personnel Services
36	Salaries, Wages and Contract Cost: During FY15 the FMA will continue to hire staff to complete the transfer of the Casemate Museum to the FMA. On July 1, 2014 the new Museum Historian position will be filled. A part-time administrative assistant is scheduled to
	be hired in FY15 will complete the Museum staffing. The FMA expects to hire a student pursuing an engineering or GIS degree from a local university to work part-time to assist the FMA with field measurements, GIS mapping and CAD drawings for projects and events at Fort Monroe. There are no new hires reflected in the FY16 budget on the Government Fund.
	Bonus Program: The amounts budgeted for FY15/16 are based on the bonus plan proposed
37	in the budgets originally approved by the House of Delegates and Senate during the 2014 Special Session. Any budgets payments must be approved by the FMA Board prior to payment to employees.
	Fringe Benefits: FMA employees are eligible for all benefits available to state employees. The
	amounts for FY15/16 include costs projections based on information received from the
38	Department of Human Resource Management and Department of Planning and Budget.
	Fringe benefit costs have been estimated for the two new positions based on average fringe
	costs since health care costs, the largest component of fringe benefit costs, are based on
40-	family status and cannot be determined until both new positions are filled. Employee Counts: The projected staffing for the Government Fund for both FY15 and FY16 is
40-	20 full-time positions, 1 contract employee position and 2 part-time positions.
42	Other Supplemental Labor
	Communications Summer Intern: The FMA hires a local university student to assist the
	communications and special events departments with a number of projects during the
46	months of June to August including weddings at the Gazebo, picnic shelter rentals, Thursday
	night Music by the Bay concert series, the Fourth at the Fort concert/fireworks and the
	Virginia Symphony Orchestra concert.
	Other Temps & Interns: The FMA has a Memorandum of Agreement (MOA) with the OAG
	for a paralegal assistant. This paralegal is law school student who has completed law school
47	but has not passed the bar exam. The FMA reimburses the OAG for the costs under the
	terms of the MOA. FMA was informed that the OAG will no longer bill for the cost of this
	paralegal. The balance of this line item is for temporary labor.
	Management Services Bay Area Economics (BAE): BAE is the FMA's economic modeling consultant. BAE is working
	in conjunction with the FMA, OAG and BRAC attorney, to refine and revise FMA's EDC
	application, business plan and financial model. This is a continuing contract and includes
51	revisions to draft EDC Application and revisions to comprehensive financial model and
	business plans based on the outcome of the Master Plan project and in response to the DoD
	review of the EDC Application. This contract has been extended due to the delay in the
	transfer of the two disputed land parcels from the Army.
F 2	Historic Tax Credit Advisors: The Fort Monroe property includes over 100 historic buildings.
52	The FMA expects to receive proposals from tenants and/or developers to utilize federal and

	state historic tax credits to fund adaptive reuse projects (offices buildings converted to
	residential units). The FMA budgets for advice from a historic tax credit advisory firm in
	expectation that historic tax credit advice may be needed to successfully reuse historic
	buildings on long-term ground leases.
	John Reynolds, NPS Advisor: John Reynolds assisted with the preparation of written material
	leading to a legislative proposal for National Park Service establishment through
53	Congressional actions. The FMA believes it may benefit from Reynolds' advice during the
	negotiating of the deed and overlay easement on the Inner Fort area as well as the process
	of transferring ownership of Commonwealth property to the NPS.
	Supplemental Security Services Contract: The FMA issued an RFP for unarmed security
	patrols on Commonwealth property. The Hampton Police Division (HPD) submitted an
	unsolicited proposal to FMA's Executive Director to provide supplemental security through
	the use of extra-duty officers (EDO). After reviewing the proposals from the private security
54	firms the selection panel determined that using armed HPD extra-duty officers (EDO) to
	patrol the property would be more effective due to the EDO ability to exercise all authority
	granted to a sworn officer of the law. The EDOs patrol the property 4-hour shifts around the
	clock. The HPD will provide supplemental EDOs for special events as requested by the FMA.
	Public Program Costs
	Casemate Museum Operating Costs: Under the Programmatic Agreement, the Casemate
	Museum must remain open and available to the public. Until such time as the museum can
58	become self-sustaining, it will be funded by the FMA government fund. During FY14 the
	FMA received a donation of over 800 artifacts from the Army Center for Military History.
	Utilities: There are no functioning individual meters for utilities at Fort Monroe. The FMA
	took control of the utility accounts in FY14 and continues to bill on the same square footage
59	basis used by the Army until the utility meters can be installed in the Museum at which point
	the FMA will bill the Museum for actual consumption.
	Security: The Museum has a contract with a local security firm to provide a security guard
60	during the hours that the Museum is open to the public.
	PILOT Fee: During FY13 the City of Hampton granted an exemption from the PILOT fee for
61	the Museum property.
-	Repairs, Maintenance and Custodial includes the cost of non-capital repairs and
62	maintenance at the Museum including the cost of the weekly cleaning service.
63	Contracts: All current contracts are reflected in other line items.
	Public Relations and Marketing includes the cost for advertising special events at the
64	Museum. The majority of advertising is done on social media sites.
	General and Administration includes the cost for general and administrative expenses
	including training, professional memberships and printing. This line item has increased over
65	prior years related to the introduction of the education programming for school and tour
	groups.
	Special Events Costs: No costs have been reflected for special events. The FMA is expecting
66	the Fort Monroe Foundation to provide direct grants to pay for special event costs.
	and the state of the state of the state of the special exercises control of the state of the sta

	Utility Operating Costs
70	Electric Utility Facility Charge: The electric service at Fort Monroe is currently operated under a privatized agreement between the Army and Dominion Virginia Power (DVP). The Army and DVP are currently negotiating for the termination of this privatized agreement. DVP believes the Army owes a termination fee under the contract. The Army disputes this claim. Upon transfer, DVP has proposed that the FMA operate under a facility contract similar to a state university. DVP's rate agreement with the Commonwealth for state entities allows DVP to charge facility customers a return on invested capital as part of the rate base. The rate for excess facility construction costs paid for by the state entity is .54% per month. The rate for excess facility construction costs paid for by DVP is 1.46%. Based on the \$10+ million invested capital amount provided by DVP, the monthly facility charge is estimated at \$60,000-\$150,000 per month or approximately \$720,000-\$1,800,000 per year. The budgets for FY15/16 reflect the electric contract transfer in July of 2014 at the \$60,000 per month facility charge. If the DVP/Army result in a less favorable outcome, the FMA may have a large budget issue that would require a request for supplemental appropriation.
71	Utility Marking Fees: Veolia will coordinate the utility marking but the FMA is responsible for the cost of the marking for water, sewer, natural gas, and telecommunication lines as part of the Miss Utility dig permit process.
72	PPEA Operator for Water/Sewer/Stormwater: The public works contractor began operations in April 2012 based on the expected transfer date of reversionary property from the Army. The annual cost of the contract is approximately \$1.2 million dollars with an annual CPI-based increase. The base contract was revised in FY14 to include natural gas system maintenance and utility marking for ground disturbing activity that were not part of the original PPEA proposal.
	Public Information, P/R and Marketing
76	Public Notices includes the cost of posting public notices for Board and committee meetings, recruitment activities and RFP's. This item also includes advertising in the local newspaper and on specialized web sites to attract qualified candidates. The average cost for a three day ad in the local newspaper exceeds \$300. Cost for specialized web sites range from \$50 to \$100 per posting.
77	Marketing Consultant: The FMA works with a marketing consultant to develop branding and advertising materials for Fort Monroe.
78	Public Relations Consultant: FMA engages the services for a public relations firm to provide public relations planning, coordination and implementation at the local, regional and national levels.
79	Marketing – Graphics and Design includes the cost of graphic design for brochures, videos, event advertising media and small-space ads in appropriate media outlets.
80	Marketing – Advertising includes the cost of producing and distributing brochures, videos, event advertising as well as interaction on open houses, commercial trade events, residential home events and small-space ads in appropriate media outlets.

	Tradeshows: The FMA attends local tradeshows to market the Fort Monroe Reuse Plan and
81	to attract potential tenants and residents. These costs include registration, advertising and
	supplies for attending tradeshows to showcase Fort Monroe properties and events.
	Web Site Hosting: The FMA uses an outside web service to host its public website. This line
82	item includes the cost of monthly services for Website hosting and periodic maintenance of
	website content.
	Domain Name Registrations: FMA has registered a list of domain names for its current and
83	future use. This line item reflects the annual fees for maintaining the registration of those
	web domain names.
	Architectural, Engineering and Market Research
	Kimley-Horn: Kimley-Horn continues to serve as the FMA's civil engineering consultant,
	providing advisory services with regard to the utility infrastructure and the provisions of
87	municipal and private utility services including the municipal services meetings, private utility
87	coordination meetings and support documents, EDC support and document preparation,
	Board meeting and briefing packet presentations and documents as well as participation in
	real estate meetings, planning and development technical and design support.
	Property Survey Fees: The future ownership of certain parcels by the NPS and the need for
88	compiled plats as exhibits for deed and documents will require the FMA to periodically
	engage the services of a professional property survey firm.
89	GIS Project: The majority of this multi-phase project was funded by OEA and completed in
85	FY14.
	Historic Structure Report: This study will be focused on the condition of the Casemate
	Museum and adjacent spaces. The report will document the condition of the physical and
90	mechanical systems of the casemate. This information will be used to plan proactive
	maintenance and rehabilitation of the structure. The project is 90% funded by OEA as a
	carry-over of the FY14 OEA grant.
	Master Plan Project: The Master Plan Project was fully funded by OEA until FY14 when the
	FMA used general fund dollars to complete the \$500k+ project. The Master Plan was
	approved by the FMA Board of Trustees in October 2013 and approved by Governor
	McDonnell in December 2013. The FMA is currently working with the City of Hampton to
91	incorporate the Master Plan into the City's comprehensive plan and zoning ordinances. Once
	completed, the Master Plan contractor will complete the final documents. It is expected that
	the FMA will continue to engage the services of the Master Plan contractor to assist in the
	evaluation of proposals for development and re-development to ensure the proposals are
	consistent with the Master Plan.
	Matrix Environmental: Matrix Environmental, the FMA's environmental engineering
	consultant, continues to provide review and recommendations for environmental
92	remediation during the BRAC property transfer and disposition process to ensure FMA's
-	interest are represented with respect to actions and decisions that are under consideration
	by the U.S. Army and the VDEQ related to U.S. Army's Installation Restoration Program (IRP),
	Military Munitions Response Program (MMRP) and the federal Comprehensive Response,

	Compensation, and Liability Act (CERCLA) required actions as well as providing consulting
	and advisory services on environmental issues with the potential to affect the
	redevelopment planning and property transfer initiatives. The FMA expects that
	environmental cleanup activities will continue through FY16.
	Property Physical Condition Assessment Phase 1: The FMA engaged a roof specialist to
	inspect all the roofs and roofing systems at Fort Monroe. The roofing specialist performed a
	visual and physical inspection of each building roofing system to determine its approximate
93	age, roof type and condition. The report made recommendations on the remaining age and
93	time for roof replacement and an estimate for the replacement roof. This report is being
	used to identify critical needs for roof replacements and to develop a schedule of roof repair,
	maintenance or replacement for the future protection of the roofing systems. This project
	was completed in FY14.
	Property Physical Condition Assessment Phase 2: Once the roofing inspection report was
	completed, the FMA realized that a physical analysis of the remaining building systems was
	needed. The condition assessment will serve as an invaluable tool for determining the total
94	cost of ownership of the property, what safety conditions must be corrected and what
	maintenance problems should be resolved to protect Fort Monroe's historic assets. The
	project is 90% funded by OEA and was partially completed in FY14. The balance of the
	project will be completed in FY15.
	Mill Creek Dock/Launch: The former floating car-top watercraft launch in Mill Creek was
	destroyed by Hurricane Irene. Working with the NPS Captain John Smith Water Trails
	program office the FMA replaced the missing kayak/canoe launch with a handicap-accessible
95	launch. The first phase of the grant includes 50% cost sharing for the launch and
	improvements to the pier as well as design fees for Phase 2. The second phase of the project
	which will focus on parking lot and crosswalk improvements and a handicap-accessible ramp
	or stairs to the adjacent sandy beach. It is expected that Phase 2 of the grant will also with
	50% funded by the NPS grant. Commercial Appraisals: Professional commercial appraisers will be needed to provide
	appraisals of commercial properties including the disputed parcels. These appraisals will be
96	used for determination of property values, rehabilitation tax credit basis, to establish the
	ground rent for long-term ground leases, to verify City assessments, for development
	planning and in negotiations with potential lessees or buyers.
	Disputed Property Appraisals: The FMA and Army have agreed to have appraisals done on
97	the two disputed parcels to determine the fair market value of the property. Once
	completed in FY15, the appraisals will be used as part of the EDC negotiations with the Army.
	Residential Appraisals: Professional residential appraisers will be needed to provide
	appraisals of residential properties. These appraisals will be used for determination of
98	rehabilitation tax credit basis, to establish the ground rent for long-term ground leases, to
	verify City assessments, for development planning and in negotiations with potential lessees
	or buyers.
	General and Administrative

102	Postal & Express Services includes the cost for express delivery services and postage for documents sent to Board members, vendors, employees, OEA, the State of VA and others as required by the operations of the FMA. Cost is based on actual expenditures during previous years adjusted for expected changes in rates or levels of activity.
103	Printing Services includes the cost of printing documents for distribution such as the Historic Preservation Manual and Design Standards, Programmatic Agreement and Interpretive Master Plan as needed. This line item also includes the printing costs for flyers and communication material related to management and leasing of residential and commercial properties as well as public information and safety pamphlets for residents, visitors and employees of tenants. These documents must be updated as changes to operational hours of public areas and safety guidelines must be conveyed to all visitors during and after the transition. Large-size documents and high-volume printing are sent to local printing service for cost-savings.
104	Local Exchange Services: Cox Communications provides telephone and internet service to FMA offices.
105	Wireless Services: Verizon Wireless provides cellular phones and service to key staff members. The FMA provides for these services to ensure that key staff members are available when traveling out of the office and after hours.
106	Skilled Services reflects the cost for specialized services such as photography used for real estate brochures and websites.
107	Organization Memberships: The FMA maintains membership in various organizations such as the Association of Defense Communities (ADC), Virginia Municipal League, National Association for Interpreters, National Housing & Rehabilitation Association (NH&RA), American Planning Association, Virginia Association of Museums, National Trust for Historic Preservation, Preservation League, Urban Land Institute (ULI) and the Society for Human Resource Management (SHRM). These national, regional and local organizations all benefit the staff or operation of the FMA. Some benefits include free public notices & new-hire advertisements as well as conferences and tradeshows for information sharing, idea exchange and marketing of Fort Monroe properties.
108	Publication Subscriptions: The FMA receives daily copies of the local newspaper, the Daily Press. The FMA also subscribes to the Egnyte file sharing & large-file backup system which provides for the distribution and sharing of files and attachments too large for email distribution.
109	Employee Workshops and Conferences include registration fees for conferences & workshops such as ADC, ULI and NH&RA conferences and local ULI and SHRM seminars.
110	Employee Education and Development: The FMA provides tuition reimbursement for employees pursuing relevant undergraduate and graduate degrees pursuant to the Employee Handbook. The FMA supports continuing employee development and expects to fund these costs in the future.
111	Audit Fees: The costs for the FMA's annual external audit pursuant to Auditor for Public Accounts requirement in the Fort Monroe Authority Act. These costs include the single audit

	required by OEA grant funding and special reports required by Virginia Department of
	Accounts Component Unit Directive reporting.
	BRAC Attorney Fees: Due to the partial transfer of property in FY13 and the delay in
	negotiations for the disputed property, Garrity Knisely attorney David Knisely continues to
	provide legal services to support the implementation of the Base Closure and Realignment
	("BRAC") process for Fort Monroe. His services include participation in the EDC negotiations,
	preparation of EDC application, and participation in numerous meetings, conference calls
	and document reviews. Knisely coordinates with the Attorney General's Office regarding
1440	environmental covenant options regarding reversionary property. Knisely provided review of
112	National Park Service proposal and coordination with EDC and environmental cleanup
	requirements, and assistance with the preparation of the quitclaim deed and related
	covenants for reversionary and federal surplus property. Knisely will coordinate with the
	OAG regarding the review and preparation of environmental deed covenants for
	reversionary property, assist in the structuring of environmental privatization efforts as
	components of the EDC and assist the Authority in the negotiation of the final content of the
	Finding of Suitability to Transfer in support of conveyances of federal surplus and
	reversionary property. The EDC negotiations are ongoing.
	Other Attorney Fees: The FMA requires support from the Office of the Attorney General and
113	other attorneys with subject matter expertise. The OAG bills FMA for OAG legal services.
113	Other outside counsel, approved by OAG, is contracted for specific legal expertise. The FMA
	expects to require counsel for specific legal issues such as zoning, appraisals and utility agreements. The FMA was directed to engage outside counsel to provide these services.
	Payroll Fees: FMA payroll is processed by an outside vendor who charges for processing
	semi-monthly payroll, preparing quarterly and annual tax reports as well as preparing W-2's.
114	The service cost for the monthly processing of flexible-saving accounts is also included in this
	line item.
	Reference Checks for HR: As part of hiring process, FMA contracts with an outside agency to
115	perform new-employee background checks.
	Bank Service Fees include monthly account charges for the Authority's bank accounts
116	including charges for the receipt and processing of wire transactions and transfers of funds
	between various payroll, flex saving and operating accounts.
117	Line of Credit Charges: The FMA has established a line-of-credit (LOC) for emergency cash
11/	flow coverage.
118	Custodial Services includes the cost for custodial services for weekly cleaning of FMA office.
119	Grounds Maintenance includes the cost for grounds-keeping for the FMA office.
120	Building Maintenance and Repair includes the cost for non-capital building maintenance and
	small repairs for FMA office space.
121	Equipment Maintenance and Repair includes the cost for repair and maintenance for FMA
	office equipment.
122	Moving and Relocation Services includes the purchase of moving supplies; moving service to
	dismantle, move and reassemble furniture and file cabinets; dismantle, move and

reassemble server, computers and phone system; relocate rented copier; dismantle, move and reassemble large format plotter as necessary. The large amount in FY15 reflects the FMA's move of its main office to Building 83 so that Building 1 can be donated to the NP5. Meeting Cost/Supplies is for meeting supplies such as folders and inserts, labels and bottled water. Computer IT maintenance and cabling: The FMA contracts for IT maintenance and cabling services with Vicom. The contractor ensures system integration, data integrity and provides network services to integrate the phone system, email system and wireless communication devices including cell phones, laptops and iPads. The cost includes server and phone support contracts. Data Backup Services: The FMA uses a Barracuda backup appliance to back up server data. The data is copied to a secure off-site location for additional redundancy. Travel, Subsistence and Lodging includes travel costs including personal vehicle mileage, rental vehicles, lodging and subsistence for overnight trips. Auto Gas and Maintenance: The FMA owns a passenger van for property tours and transportation. This line items includes gasoline, repair and maintenance costs. Office Supplies includes the costs of office supplies including paper, pens, staples, files folders, hanging folders, post-it notes, ink cartridges, tape, steno pads and other office supplies for FMA staff. Research Materials: The FMA occasionally obtains reference books, article reprints, maps and other reference materials for FMA library or departmental use. BCOM Cooperative Service Cost: FMA will rely on the Department of General Services sure of Capital Outlay Management to enforce the Virginial Uniform Statewide Building Code to assure compliance with life safety and code requirements in design and construction. FMA will reimburse BCOM for building inspections and plan reviews. Archeologist Service Cost: As part of its requirements under the Programmatic Agreement and Land Use Control Implementation Programs

FMA will reimburse BCOM for building inspections and plan reviews. Archeologist Service Cost: As part of its requirements under the Programmatic Agreement and Land Use Control Implementation Programs the FMA must engage the services of a qualified archeologist when performing ground disturbing activities such as utility repairs in archeologically sensitive area or when uncovering artifacts during any activities. VDEQ Cooperative Service Cost: FMA will rely on the Department of Environmental Quality for technical review and advice related to environmental operations or management of remediation activities at Fort Monroe. PILOT Fee to Hampton: This line item includes the cost of the PILOT fee for the FMA office building and other community facilities. This line and the associated line in the Enterprise Fund are subject to an annual cap for FY15 and FY16. Refuse Service Charges includes the cost for trash and recycle collection for the FMA office building. Utilities includes the cost of utilities for FMA office space calculated by the FMA Utility Fund on a per square foot basis for Electric, Water, Sewage and Gas. Equipment Rentals: The FMA leases a Sharp multi-function copier/printer/scanner. The costs	127	, , , ,
and other reference materials for FMA library or departmental use. BCOM Cooperative Service Cost: FMA will rely on the Department of General Services Bureau of Capital Outlay Management to enforce the Virginia Uniform Statewide Building Code to assure compliance with life safety and code requirements in design and construction. FMA will reimburse BCOM for building inspections and plan reviews. Archeologist Service Cost: As part of its requirements under the Programmatic Agreement and Land Use Control Implementation Programs the FMA must engage the services of a qualified archeologist when performing ground disturbing activities such as utility repairs in archeologically sensitive area or when uncovering artifacts during any activities. 1 136 1	135	·
	136	

137	Building Rentals includes the cost to rent a suitable space for meetings, cost of AV
	equipment and an individual to operate it plus cost to rent tables, chairs and podiums.
138	Property Insurance includes the cost of insurance on FMA office building and equipment
139	Workers Comp Insurance includes the cost of Workers' Compensation Insurance for FMA
126	employees.
136	D&O Insurance includes the cost of liability insurance for FMA directors and officers.
137	Auto Insurance includes the cost for vehicle insurance for the FMA van.
	Furniture and Equipment
	Desktop Computer Systems includes the replacement cost for outdated desktop computer
145	systems and new computers for additional employees. FMA attempts to replace desktop
	systems every 4 years to ensure that employees have reliable equipment and current
	software versions.
146	Mobile Computers includes the replacement costs for outdated laptop computers and
	tablets.
	Computer Hardware: As part of complying with various GASB requirements the FMA
147	relocated its central network and accounting servers to the central telecommunications
	building in FY14. In FY15 the FMA will upgrade its server to replace an older version that is no
	longer supported by Microsoft.
	Copper/Fiber Network Equipment: In FY14 the FMA reactivated the existing fiber network
	by installing fiber switches removed by the Army in 4 key buildings and 3 FMA office
148	locations (headquarters, Casemate Museum and leasing office). As new demand is created
140	for access to the fiber network (security cameras, remote building access, etc.) the FMA will
	need to purchase additional fiber switches to extend access to the central network
	resources.
	Computer Software includes the cost of software for new computers including Windows 7,
149	Office Professional, Adobe Professional and annual renewal of virus protection and other
	specialty user software such as GIS and project management software.
150	Accounting Software Upgrade: This project was completed in FY14.
	Utility Billing Software: Now that the utility infrastructure has transferred to the
151	Commonwealth, the FMA is responsible for billing non-regulated utility charges to residents
	and tenants. Once individual meters are installed the FMA will acquire a specialized software
	package designed to bill natural gas, water, sewer and stormwater fees.
	Front Gate Security Camera: In FY14 the FMA installed security cameras at the front gate to
	record traffic entering and exiting the property as a deterrent to crime and to provide
152	investigative support to the Hampton Police Division. The images are stored on a stand-alone
132	storage device in the security building. During FY15 the FMA intends connect the security
	camera to the fiber network to facilitate remote monitoring and access to the recorded
	images.
153	Office Furniture and Accessories: The FMA intends to relocate its main office to Building 83
	during FY15. The FMA expects to reuse furniture and fixtures in its existing office or

	abandoned in other buildings. The FMA made need to purchase small specialty items to	
	supplement the existing furniture.	
154	Casemate Museum – Water Diverters includes the fabrication and installation costs for	
	diverter shields to collect water dripping from vaulted arches in Casemate 20, the location of	
	the Casemate Museum.	
	Casemate Museum – Collections Management Software: In FY14 the FMA acquired its own	
155	collections management software. The software requires an annual maintenance contract	
	which is reflected in this account.	
	Casemate Museum – Door Replacement: The Museum has 21 doors to the individual	
156	casemates. The majority of the doors are in need of replacement. The FMA will start a	
130	replacement program in FY15 with the entrance, exit and emergency exit doors. The	
	remaining doors will be replaced at approximately 4 per year.	
	Casemate Museum – Electrical System Study and Upgrade: The FMA desires to investigate	
157	the electrical system in the Museum to determine the condition of the electrical system in	
	FY15. It is expected that any recommended upgrades will be completed in FY16.	
	Casemate Museum – HVAC Replacements: The Casemate Museum is conditioned by HVAC	
158	units placed on top of the Fortress ramparts. There are several units that will need to be	
150	replaced in the near future. In FY15 the FMA will commence a multi-year program to replace	
	the worst of the HVAC units.

	Revenue Categories	
240	Funds Carryover from prior FY: Beginning in March of 2014 the FMA became concerned about the deadlock in approving the budget bill. The FMA began delaying projects and activities that weren't required or critical or funded by outside grant funds in order to build a cash reserve in the event that a budget wasn't passed before the beginning of FY15. This will result in approximately \$2.0 million in surplus funds carried at the end of FY14. Now that the budget has been approved the FMA will commence the delayed projects and activities.	
241	Carryover to next FY: The FMA expects to utilize approximately \$1.2 million of the surplus during FY15 resulting in approximately \$820,000 in surplus funds to be carried into FY16. The FMA expects to fully utilize the carryover funds in FY16.	
242	Casemate Fees for Tours and Admissions: Beginning in FY14 the FMA started charging tour groups for guided tours of the Casemate Museum. The Casemate Museum also receives some grant reimbursement funding from the Fort Monroe Foundation.	
243	Funding (to)/from Enterprise Fund: Any surplus of funds from business type activities are returned to the government fund as a revenue item. However, any shortage in net cashflow in the enterprise fund must be funded from government funds. Since receiving the 312.75 acres in June 2013 and the associated utility systems the Authority has revised its Enterprise Fund income and expenses to reflect the funding shortfall. While rental revenue is expected to increase, the large inventory of vacant historic buildings that must be heated, cooled and repaired is expected to result in an enterprise fund deficit until such time as the FMA can begin to transfer property to third-parties through fee simple sales or long-term ground leases.	
	Appropriations and Grants	
247	OEA Reimbursement Grant: The OEA grant provides for reimbursement of certain eligible expenses related to the planning for the reuse of former military properties. The FY14 grant has been extended to allow the FMA time to complete the Historic Structure Report and the Property Condition Assessment Phase 2. During the FY14 application process the OEA informed the FMA that all 2005 BRAC bases have been placed on a 3-year step down program to reduce and eliminate future OEA grants. The FY15 grant will not be less than \$550,551. For FY16 the OEA support will be capped at \$550,551. The OEA grant requires a 10% non-federal match which is funded from state appropriations.	
248	Fort Monroe Foundation: The FMA expects the Fort Monroe Foundation to pay for expenses directly in lieu of providing grants to the FMA for public programs. Instead of reflecting Foundation support equal to the special event costs (line 64) the FMA has requested that the Foundation pay the expenses directly.	
249	VDOT Urban Maintenance Grant: The FMA entered into a Memorandum of Agreement with the City of Hampton to allow the City to pass through the VDOT Urban Maintenance Funds for the VDOT eligible roads at Fort Monroe. In exchange the FMA will be responsible for the maintenance of roads at Fort Monroe.	
250	Mill Creek Grant: The National Park Service Captain John Smith Water Trails office has approved a 50/50 grant to assist with public access to the Chesapeake Bay and its tributaries	

	explored by Captain John Smith. The project is described on line 95 above and this line
	reflects the 50% reimbursement from the NPS for the 2 phases of the project.
251	National Park Service: Other than the Mill Creek grant above, all other NPS grants have been
	completed. As part of the property donation to the NPS to support the creation of the
	National Monument, the FMA expects that a Cooperative Management Agreement will be
	developed to reimburse the FMA for providing services such as grounds and utility
	maintenance on NPS-owned property.
	State Appropriation, General Fund: For FY15 the General Assembly approved the FMA
252	request for operational support of \$6,718,155. For FY16 the General Assembly approved the
	FMA request for operational support of \$5,489,033.
	Supplemental State Appropriation, General Fund: The FMA received a supplemental
253	appropriation for FY14. The FMA currently has no need for a supplemental appropriation for
	FY15.

	Personnel Services	
12	Salaries, Wages and Contract Cost: Since bringing the residential leasing and management responsibility in-house during FY13 the Authority has employed an asset manager, 3 administrative employees and a part-time accounts payable assistant. In order to improve the performance of the maintenance contractor the Authority converted one of the administrative positions to fund the Residential Maintenance Supervisor. During FY15 the FMA expects to fill one administrative position with a part-time employee. It is expected that this candidate will eventually transition into a full-time employee in FY16. Bonus Program: The amounts budgeted for FY15/16 are based on the bonus plan proposed in the budgets originally approved by the House of Delegates and Senate during the 2014 Special Session. Any budgets payments must be approved by the FMA Board prior to payment to employees.	
14	Fringe Benefits: Fringe benefits are included for state employee positions only. The fringe benefits amounts reflected for FY15 and FY16 are based on the guidance provided by DHRM and are based on the current benefit levels for health care and other benefits.	
	Administrative	
24	Labor-Administration: The Authority's contract with its commercial leasing and management company (OPCRES) requires the Authority to reimburse the contractor for salary and benefits for contractor employees dedicated to the Authority's portfolio. This line item contains the salary and benefit reimbursement for the assistant commercial property manager.	
25	Advertising includes the cost of advertising rental properties, typically residential properties. The FMA/OPCRES attempt to utilize free or low cost services whenever possible.	
26	Building 73 Office Utilities includes the cost of utilities for the Authority's leasing office in building 73. Since there are no individual meters, the FMA Utility Fund bills utilities on a per square footage basis and this line reflects the estimated cost for utility billing.	
27	Bank Fees & Finance Charges: No charges are expected.	
28	Training include the cost of keeping FMA employees trained on property issues including tenant/landlord laws and lead-based paint remediation and maintenance.	
29	Professional Services – Courts/Collections includes the cost of filing any landlord actions such as delinquent rent collections or evictions.	
30	Leasing Commissions: (non-CAM): The OPCRES contract includes a consulting fee for the contractor advising the Authority on non-lease related matters.	
31	Leasing Commissions: The FMA/OPCRES contract includes the payment of leasing commissions to OPCRES. It is expected that these commissions will be capitalized with the lease.	
32	Office Supplies includes the cost of office supplies including paper, toner and ink cartridges, and includes more durable items such as calculators, clipboards and notebooks used in the rental office.	

	Furniture, Fixtures and Equipment Expense – Computers/Software: The cost of computers
33	and software below the level to be capitalized. The FMA also pays maintenance and support
	fees for its property management software (OneSite).
	Furniture, Fixtures and Equipment Expense – Copier/Fax: The FMA has elected to lease its
34	copier to ensure that it can replace and upgrade its equipment every 3 years. The lease
	payment includes maintenance so the FMA believes that leasing is the best option for
	copiers.
25	Pagers/Cell Phones includes the cost of cell phones and cell phone service for the FMA
35	leasing and maintenance staff.
36	Postage/Courier includes the cost of postage for mailing invoices and notices.
37	On-Line Fees includes the cost of any internet connectivity service and any other internet-
37	based services such as credit bureaus.
38	Telephone – Management Office includes the cost of telephone service leasing and
	maintenance offices.
39	Meals/Lodging/Travel includes the cost of mileage reimbursements when employees use
	their personal vehicles for business purposes.
40	Conference/Training Fees includes the cost of registrations for conference attendance.
41	Uniforms: The FMA/OPCRES provides uniforms for its maintenance employees so they
	present a uniform image and are identifiable to the tenants.
	Management Fees
	Management Fees: The FMA/OPCRES contract includes a provision for the payment of a
	management fee to cover the cost of OPCRES non-reimbursable expense, typically the area
45	manager and accounting functions. The fee is based on receipts from commercial rent
	receipts. The contract contains a cap of \$150,000 in management fee which was reached
	with the transfer of the 312.75-acre parcel and 85 commercial properties on June 4, 2013.
	Insurance
49	Vehicle Insurance includes the cost of insurance for the Authority's maintenance vehicles.
	Property Insurance includes the cost of insuring all Commonwealth property at Fort Monroe
	and the federal properties currently under lease from the Army. The properties are insured
50	through the state's Department of Risk Management (DRM). The DRM establishes the
	premium rates that the FMA pays. These premiums are allocated to the properties on a per
	square footage basis.
	Cleaning
54	Cleaning – Office Building: The cost for cleaning service for the FMA/OPCRES leasing office.
	Cleaning Contract: Some of the commercial contracts require OPCRES to provide nightly
	cleaning services during the business week. OPCRES will contract with a cleaning company to
55	provide these services. The cost of that contract is recorded in this line item. These expenses
	are expected to increase as the FMA leases buildings to third-party tenants on a gross lease
	basis.
56	Cleaning Supplies includes the cost of purchasing any cleaning supplies to be used in
	cleaning the properties.

HVAC Contract: OPCRES has engaged a qualified HVAC company to service the large commercial HVAC systems. These systems will be inspected on a regular basis as a part of the contract. Extermination Contract includes the cost of a managed pest control program as well as individual rodent trapping for squirrels and raccoons. Emergency Generator Contract: A small number of the commercial properties are equipped with emergency generators. These generators must be inspected and operated on a regular basis to ensure they remain in operating condition. OPCRES contracts with a company to perform the regular inspection and testing program. Equipment Service Contract/Lease includes the cost of service contracts on copier/fax. Fire/Life Safety: Most of the commercial buildings have sprinkler systems installed. These systems must be inspected and tested on a regular basis. OPCRES contracts with third-party company to perform these services. Landscaping – Contract: OPCRES contracts with a grounds maintenance company to cut the grass in the open areas and around commercial buildings and apartment buildings. Landscaping – Plants/Flowers/Mulch: The grounds maintenance contractor also provides bi-annual services such as mulching and planting in visible public areas such as the entry gate and Cannon Park. Trash Removal/Recycling Contract: OPCRES contracts for trash collection for commercial properties through a bulk waste trash company. Alarm Services Contract: Fire laarm systems and fire extinguishers in the commercial buildings must be inspected annually. The fire alarms are monitored by a third-party monitoring company. Elevator Contract: A small number of the commercial buildings have elevators. These elevators must be inspected on a regular basis. Preventive maintenance and repair services will also be a part of this contract with a third-party elevator service company. Water Treatment Contract: OCPRES contracts with company to inspect the cooling towers and to provide water treatment chemicals for the cooling towe		Service Contracts		
commercial HVAC systems. These systems will be inspected on a regular basis as a part of the contract. ·		building not reflected in the other maintenance categories below.		

77	Consulting – Architectural/Engineer includes the cost of consultation from a licensed architect or engineer.
78	Lead-Based Dust Remediation: The environmental inspection report indicated the presence of lead-based dust in residential units. This line includes the cost for FMA to implement an ongoing cleaning program for homes occupied by children under 6 and women of childbearing age and to develop an inspection and testing protocol for the future. This project includes the contract cost of cleaning and the consulting industrial hygienist.
79	Door & Glass Repair/Replacement includes cost of repairing interior and exterior doors including screen doors. This line item also includes the cost of replacing broken window and door glass.
80	Electrical Repair & Maintenance includes the cost of electrical repairs that require contracting with a licensed electrician.
81	Light Bulbs includes the cost of replacing light bulbs in common areas and commercial buildings.
82	Generator Repairs includes the cost of any repairs to building generators that are outside of the generator service contracts. This may include the fuel tanks that supply fuel to the emergency generators.
83	Equipment R&M includes the cost of maintenance contracts and repair supplies for non-HVAC building equipment.
84	Maintenance Equipment Rental includes the cost for equipment rentals such as hydraulic lifts necessary for the maintenance of the property.
85	Landscaping R&M includes the cost for repairs and maintenance on landscaping systems.
86	Locks and Keys includes the cost of repairing and/or replacing door locks and keys. It also includes the cost of replacing lock cores that the Army requires that we return as part of the property transfer.
87	Painting includes the cost of contracted painting jobs. Typically the residential and commercial units will require some level of painting prior to occupancy. The cost of commercial painting may be recorded as a tenant improvement if it is part of a larger project.
88	Flooring R&M – Interior includes the cost of sanding and coating residential hardwood floors prior to re-leasing a residential unit.
89	Painting R&M – Exterior: In FY15 the FMA will commence an exterior painting program to replace deteriorating paint coatings on residential and commercial buildings. The loss of protective paint has resulted in damage to wooden structures. The FMA will begin by painting the worst buildings first and working through the entire inventory. The project is expected to be continuous due to the number of buildings and the limited amount of funding.
90	Irrigation R&M: A small number of commercial buildings and public areas have irrigation systems. OPCRES has engaged a third-party company to provide irrigation repair services on an as-needed basis for items that cannot be repaired by the maintenance team.
91	Contracts – Other includes the cost of miscellaneous contracts not reflected elsewhere.

92	Plumbing includes the cost of engaging third-party plumbing contractors to fix problems that cannot be repaired by the maintenance team or Veolia.
93	Fire/Security Equipment R&M includes the cost of repairing any of the fire alarm systems in the buildings that is outside of the maintenance contract.
94	Signage includes the cost of installing signage at commercial properties.
95	Small Tools includes the cost of small tools that are below the level to be recorded as capital assets such as hammers, wrenches, screwdrivers, chainsaws and drain snakes.
96	FF&E – Appliances includes the cost of replacing appliances in residential units.
97	FF&E – Other includes the cost for trash and recycling bins for new residential leases and portable generators.
98	Supplies – R&M includes the cost of general maintenance supplies such as nails, screws, bolts, nuts, etc.
99	Supplies – Electrical includes the cost of supplies used for electrical repair items such as switches, outlets and light fixtures.
100	Supplies – Landscaping includes the cost of supplies used for landscaping such as irrigation heads.
101	Supplies – HVAC includes the cost of supplies for HVAC repairs such as Freon, filters and replacement thermostats.
102	Supplies – Painting includes the cost of supplies for painting repairs such as paint, brushes, rollers, trays, tarps, etc.
103	Supplies – Plumbing includes the cost of supplies for plumbing repairs such as flapper valves, stem washers, p-traps, water supply hoses, etc.
104	Vehicle – Fuel includes the cost of purchasing fuel for the maintenance vehicles and golf carts.
105	Vehicle – R&M includes the cost of any repairs or maintenance on the maintenance vehicles and golf carts such as tires and oil changes.
106	Tenant Improvements: The Authority expects to lease 20,000 square feet of commercial space per year. The Authority budgets \$12.50 per square foot for tenant improvements. Since the majority of this cost is painting and carpet it falls below the level for capitalized asset treatment.
107	Building Renovations for leasing: As part of the FY14 supplemental appropriation the FMA requested funds to make repairs to buildings that were not suitable to lease to residential tenants. Because of the timing of the supplement FY14 appropriation only half of the repairs will be completed in FY14. The balance of the repairs will be completed in FY15.
108	HVAC Repairs includes the cost of an on-going program to replace malfunctioning or inefficient HVAC systems to compensate for the deferred maintenance during the BRAC period. Any major capital repairs will be completed under the capital improvement plan.
109	Roof R&M: The preliminary results of the roof condition assessment project indicate a large number of buildings in need of roof repairs. The major roof repairs are reflected as capital projects. The cost of non-capital repairs will be reflected in this account.
	1 to 19 and 1 to 1 t

	Cotton Clausing / Paragin The FAAA has been requiring a significant encount of demand of fit
110	Gutter Cleaning/Repair: The FMA has been repairing a significant amount of damaged soffit
	and fascia boards. Investigation has revealed downspouts and gutters clogged with leaves
	and pine needles. The FMA needs to implement a gutter cleaning program to keep the
	gutters and downspouts open in order to reduce the damage to soffit and fascia boards.
	Tree Maintenance: The Fort Monroe property has a large inventory of trees including the
111	500-year old Algernoune Oak. Since the property transferred to the Commonwealth in June
	2013 the FMA has realized the need to provide funding for an ongoing tree maintenance
	program. This account will include lightening protection, root fertilization, tree pruning and
	dead tree removal.
112	Fascia/Soffit Repairs: In combination with the gutter cleaning and painting programs
	mentioned above this account reflects the cost to repair the damaged soffit and fascia
	boards discovered during the gutter cleaning or exterior painting program.
113	Parking Lot Repairs & Striping: The need for parking lot maintenance is defined and
	recommended in the roadway section of the Fort Monroe Infrastructure Condition
	Assessment Report prepared by Kimley-Horn and Associates dated June 2010. The Authority
	will begin a program for parking lot repair and/or restriping to improve the look of parking
	lots to support the leasing of commercial properties.
	Taxes and Licenses
	PILOT Fee to City of Hampton: The cost of the PILOT paid to the City of Hampton for any
	properties available for lease to residential or commercial tenants not exempted by use.
114	These fees are billed semi-annually by the City of Hampton and are based on the assessed
	value of property at Fort Monroe as if the property were privately-owned property within
	the boundary of Hampton. The FMA has the right to contest the assessments of property
	value just like any other private landowner in the City of Hampton. The FY15 and FY16
	budgets reflect the cap on PILOT payments reflected in the state biennial budget.
	Utilities
	Electricity includes the cost of electrical usage. Since no individual meters exist, these
	charges are billed on a square footage basis. The Authority is beginning to take responsibility
	for the utility master meter accounts. The Army has turned over utility bill amounts for the
121	prior year. The bills revealed that the Authority had not budgeted amounts sufficient to
	cover the actual bills. The amounts in FY15 and FY16 have been adjusted based on this new
	information. Some of these charges are recoverable from residential tenants as part of the
	monthly rent and from commercial tenants as part of the CAM recovery.
122	Electricity (Non-CAM includes the cost of electrical service that is not recoverable from
	commercial tenants such as public street lighting.
	Trash Removal/Recycling Contract includes the cost of trash removal contracts for
123	commercial and residential properties.
124	Water and Sewer includes the consumption charges for water and sanitary sewer. Since the
	FMA took over the utility accounts the monthly bills revealed that the FMA had not
	budgeted amounts sufficient to cover the actual bills. The amounts in FY15 and FY16 have
	been adjusted based on this new information.
L	a contraction and contract in contraction

122	Fuel and Oil includes the cost of purchasing diesel fuel and oil to be used for emergency generators and fuel-oil fired boilers/heaters.	
123	Natural Gas includes the cost of natural gas consumption based on the master meter	
	readings. As with the other utilities the bills revealed that the FMA had not budgeted	
	amounts sufficient to cover the actual bills. The amounts in FY15 and Fy16 have been	
	adjusted based on this new information.	
Furniture, Fixtures and Equipment (non-Capital)		
130	Moisture Control Equipment: No expense are budgeted in that area for the biennial period.	
131	Computer Equipment for Leasing Office: The leasing office got new computers when the	
	Authority took over leasing of the residential properties. These computers will begin to reach	
	the end of their functional life starting in FY15 and will be replaced.	
Capital		
138	Tenant Improvements are expected to be recorded as described in line 106 above.	
139	FF&E - Vehicles: As the FMA/OPCRES maintenance staff increases the Authority will need to	
	purchase additional maintenance trucks and carts. The FY16 amount budget reflects either	
	one truck or two maintenance golf carts.	
	Convert Building 80 to Residential: Building 80 is a 9-unit historic inn. The FMA issued an EFP	
	for an operator for the Inn. We received no qualified proposals. Since the FMA has a waiting	
141	list for one-bedroom units the FMA Board authorized the FMA staff to develop plans to	
	convert the building into apartment units. Based on preliminary estimates the cost to	
	complete the renovations is approximately \$350,000. Once completed the renovation will	
	add eight 1-bedroom, 1-bath units and two 2-bedroom, 2-bath units to the available	
	inventory.	
Revenue Categories		
	Chamberlin Ground Lease: The Chamberlin ground lessee currently pays the Army	
162	approximately \$75,000 in annual ground rent. Despite the Chamberlin being on reversionary	
	property, the parcel and ground lease did not transfer with the 312.75-acre parcel.	
164- 165	Residential Leases – Homes: The Authority has leased over 90% of the available residential	
	units by the end of FY14. As part of the lease-up the Authority had to offer significant rent	
	incentives to entice new residents to Fort Monroe. With the supplemental appropriation	
	provided to repair the "down" units, the Authority expected to increase residential revenue	
	through additional leases and a phase-out of most of the in rental incentives.	
166	Residential Leases – Garages: The Authority leases surplus garage units to residents or	
	private citizens.	
167	Residential Leases – Apartments: Due to the damage to the apartments resulting from	
	Hurricane Irene the FMA deconstructed the Apartments in FY13. Thirty of the 31 structures	
	were removed. Building 300 was retained for future conversion to public restrooms.	

168	Commercial – Office/Warehouse: The Authority has been working on several new	
	commercial tenants during FY14 and is working with several new prospects. Based on a new	
	market study completed as part of the Master Plan project the Authority can reasonably	
	expect to lease 20,000 square feet of office space at \$12 per square foot on an annual basis.	
	The projections are reflected in the current budgets.	
169	Event Rentals: The FMA will rent the large picnic shelter north of the Bay Breeze club until it	
	is transferred to the NPS. The FMA also rents the Gazebo for weddings. The Authority	
	expects these expenses to cover the expenses of the rental and has chosen to eliminate both	
	the minimal revenue and expense for simplicity.	
170	CAM Recoveries: Some of the commercial leases include provisions for the FMA to recover	
	certain common area maintenance (CAM) charges such as the water/sewer contract charges,	
	security and grounds maintenance. These are billed to tenants based on a ratio of rentable	
	square footage as a percentage of the entire portfolio.	
	Utility Reimbursement: Some of the commercial leases include provisions for expense	
	recoveries for increases over the base year rate. This protects the FMA if non-controllable	
171	expenses such as PILOT or utility rates increase significantly. Any amounts over an	
	established base year rate per square foot are recoverable from tenants. The account also	
	includes the portion of residential rent.	
	Construction Loan: The FMA has originally intended to use bank financing to renovation	
172	Building 80 (as mentioned on line 141 above). However, due to the surplus of funds from	
	FY14 the FMA now believes it can fund the renovations without the need for a bank loan.	
	Revenue – Utility Fund: The FMA now bills third-party tenants for natural gas, water and	
173	sewer usage. These tenants include the Chamberlin, St. Mary's Catholic Church and the Army	
	Caretaker. Following GASB and GAAP guidance the FMA has established the FMA utility fund	
	to track revenue and expenses related to the operation of these utilities.	
174	Other Income: This line item includes miscellaneous income such as late fees, NSF charges	
	and forfeited security deposits.	
Interfund Activity		
	Funding (to)/from Government Fund: Any surplus of funds from business type activities are	
	returned to the government fund as a revenue item. However, any shortage in net cashflow	
	in the enterprise fund must be funded from government funds. Based on the property	
177	condition assessments and a number of expense adjustments including gutter/fascia and	
	parking lots repairs, the lead-based dust cleaning and maintenance program and the	
	significant change in utility expenses the Authority projects large shortage of operating	
	revenue for the enterprise fund that will require funding from the Government Fund.
