

COMMONWEALTH of VIRGINIA

DEBRA FERGUSON, Ph.D. COMMISSIONER DEPARTMENT OF BEHAVIORAL HEALTH AND DEVELOPMENTAL SERVICES Post Office Box 1797 Richmond, Virginia 23218-1797

December 1, 2014

Telephone (804) 786-3921 Fax (804) 371-6638 www.dbhds.virginia.gov

The Honorable Walter A. Stosch Co-Chair, Senate Finance Committee General Assembly Building, Suite 626 Richmond, VA 23219

Dear Senator Stosch:

I am pleased to submit the Department's 2014 *Report on Virginia's Part C Early Intervention System* to the Chairs of the Senate Finance and House Appropriations Committees to comply with the reporting requirements of Item 308H.2 of the 2014 *Appropriation Act*. In accordance with those requirements, this report includes data on the total revenues used to support Part C services, total expenses for all Part C services, total number of infants and toddlers and families served using all Part C revenues, and services provided to those infants and toddlers and families.

Please feel free to contact me if you have questions about the report.

Sincerely,

Debra Furguson, PhD.

VII.	Conclusion	14
	Appendix A: Local System Names and Included Localities	15

#### **EXECUTIVE SUMMARY**

In the 2014 *Appropriation Act*, paragraph H.2. of Item 308 directs the Department of Behavioral Health and Developmental Services (DBHDS) to report the following information to the Chairmen of the Senate Finance and House Appropriations Committees on October 1 of each year: (a) total revenues used to support Part C services, (b) total expenses for all Part C services, (c) total number of infants and toddlers and families served using all Part C revenues, and (d) services provided to those infants and toddlers and families.

#### Overview of Fiscal Climate for Part C in FY2014 and Beyond

The additional state funds allocated by the Governor and the General Assembly for the end of FY2013 and for FY2014 made a significant difference in helping Virginia's Part C early intervention system recover from the significant budget shortfalls and noncompliance with federal requirements experienced in FY2013. Local systems resumed child find (outreach) efforts and those local systems that had cut services in FY2013 are now serving all eligible children. Looking ahead, the system is still growing and remains stressed. While revenue realized through the Medicaid Early Intervention Services Program continues to provide funding for services to children with Medicaid, the amount of funding (i.e., federal, state, local, private insurance, and family fees) available for services to children without Medicaid and the reimbursement rate for service coordination (i.e., case management) for children with Medicaid are inadequate to cover the costs for these services. Unless funding keeps pace with growth, Virginia runs the risk of falling back into noncompliance, which puts federal funding at risk and results in children and families not getting the supports and services they need in a timely and effective manner. The Department, in collaboration with other state agencies and local stakeholders, is continuing to identify and evaluate possible sources of additional revenue, to closely monitor the local fiscal situation and to ensure local system personnel have the skills to provide effective oversight of local budgets and spending. DBHDS is providing guidance and management support to the local lead agencies to address these issues.

#### Data System Update

The existing early intervention data system, the Infant and Toddler Online Tracking System (ITOTS), was developed and implemented in 2001 primarily to meet annual federal reporting requirements related to child data. The system provides data on who is getting services and includes the number of children by local system, race/ethnicity, gender, age, and the reason for eligibility. Reports can be pulled for point-in-time data on who is being served, annual review, and limited trend data. ITOTS presents a number of challenges to the Department in meeting federal and state reporting requirements, including the following:

- □ Child data is collected in ITOTS only at entry into the early intervention system and is not collected as child status or service needs change.
- No financial data for Part C services is collected through ITOTS, resulting in a burdensome paper process for collection and reporting of comprehensive and reliable data related to the cost of providing services and the revenue sources that are accessed in providing services.

- □ Local systems incur additional costs as ITOTS cannot accept data from local information systems. Additional time is spent preparing manual or Excel reports.
- □ ITOTS data reports are limited in scope and, therefore, the analysis of the available data does not allow analysis of outcomes.

ITOTS allows for the collection of data on the services planned on each child's initial IFSP but does <u>not</u> provide for the collection of data on how those services change over time, on delivered services, or on payment for services. Because of the significant limitations of this system, there is no mechanism available for local systems or for DBHDS to get the kind of real-time, ongoing data necessary to effectively and efficiently monitor service delivery for individual children, to study trends and patterns, or to monitor funding sources and service costs by child or by local system.

Between 2006 and 2010, a number of initiatives were implemented to analyze and improve ITOTS. Although incremental data system improvements have been implemented to address data integrity and better reporting, fiscal constraints and competing data priorities within the Department led to delays in developing or purchasing a data system with the complete functionality necessary to enter and report on delivered services and to have more complete and accurate revenue and expense data.

Since many local agencies and service providers have or are in the process of developing and implementing electronic health record systems, the Department's focus on data collection for all programs (not just the Part C early intervention system) has shifted to identifying and implementing the most effective and efficient mechanism for importing the data already collected by local systems into a state database through which that data can be aggregated, analyzed and reported. The Department has designated \$250,000 for FY2015 to develop such an interface for Part C early intervention data. The interface itself will not expand the type of data collected in ITOTS but will provide a foundation upon which service delivery and financial data can be added and collected directly from local systems in the future. Until such a system is fully developed and implemented, the Department's challenges in meeting federal and state reporting requirements will continue.

# **Revenue and Expense Data**

The table below shows revenue from all sources as reported by the 40 local early intervention systems for FY2014.

Revenue Source	FY14 Revenue Amount
Federal Part C Funds	\$ 8,487,876
State Part C Funds	\$ 14,282,542
Other State General Funds	\$ 673,815
Local Funds	\$ 8,077,743
Family Fees	\$ 869,429
Medicaid (State and Federal shares)	\$ 13,807,886
Targeted Case Management	\$ 5,706,222
Private Insurance	\$ 10,526,639
Grants/Gifts/Donations	\$ 4,196
In-Kind	\$ 438,406
Other	\$ 4,446,144
Total	\$ 67,320,898

Total Revenue to Support P	Part C Early Intervention Sector	ervices
----------------------------	----------------------------------	---------

In accordance with Item 308.H.2, the chart below provides detail about the total amount of federal and state Part C funds expended in FY2014 for Part C early intervention services as reported by the 40 local lead agencies and the private providers with whom those local lead agencies contract.

Assessment for Service Planning	\$	2,834,718
Assistive Technology	\$	16,921
Audiology	\$	5,284
Counseling	\$	81,467
Developmental Services	\$	3,281,199
Evaluation for Eligibility Determination	\$	1,078,638
Health	\$	57,864
Nursing	\$	6,419
Nutrition	\$	20,679
Occupational Therapy	\$	1,817,646
Physical Therapy	\$	2,712,323
Service Coordination	\$	12,352,135
Social Work	\$	68,355
Speech language pathology	\$	8,424,425
Transportation	\$	99,962
Vision	\$	68,494
Other Entitled Part C Services	\$	580,862
EI Services by private providers \$29,629,		29,629,174
Total-Direct Services \$63,136		53,136,565*

Total Expenditures for all Part C Early Intervention Services

\*The local lead agencies reported an additional \$7,495,903 of expenses related to the system components (administration, system management, data collection and training) that are critical to implementation of direct services. **Therefore, total expenses are \$70,632,468**.

In FY2014, reported expenses exceeded reported revenue in the Part C early intervention system. This discrepancy is primarily related to an increase in the number of children served, some local systems pushing expenses from late FY2013 into FY2014 due to significant budget shortfalls in FY2013, and the insufficient reimbursement rate for Early Intervention Targeted Case Management.

#### **Total Number of Infants, Toddlers and Families Served**

A total of 16,272 infants, toddlers and families received Part C early intervention services in the one-year period from July 1, 2013 – June 30, 2014. As anticipated, the additional state funds allocated for the Part C early intervention system in the last quarter of FY2013 and for FY 2014 resulted in an increased number of children served in FY2014. The 16,272 children and families served in FY2014 represent a 4.8% increase from FY2013, when budget shortfalls caused some local system to establish waiting lists for services.

The following table breaks down the services that were provided to Part C eligible infants and toddlers by the type of early intervention service determined to be needed in order to achieve the child's outcomes as listed on the child's Individualized Family Service Plan (IFSP).

Type of Early Intervention Service	Estimated # of Children With Initial IFSP Listing That Service in FY2014
Assistive Technology	13
Audiology	74
Counseling	4
Developmental Services	2,471
Health Services	0
Nursing Services	4
Nutrition Services	6
Occupational Therapy	2,526
Physical Therapy	4,061
Psychological Services	4
Service Coordination	16,272*
Sign Language and Cued Language Services	6
Social Work Services	38
Speech-Language Pathology	5,387
Transportation	2
Vision Services	98
Other Entitled EI Services	201

#### Services Provided to Infants, Toddlers and Families

\* All eligible children receive service coordination.

In addition to the services listed on IFSPs, a total of 10,137 children received an evaluation to determine eligibility and/or an assessment for service planning in FY2014.

#### FULL REPORT

#### I. Background

Congress enacted early intervention legislation in 1986 as an amendment to the Education of Handicapped Children's Act (1975) to ensure that all children with disabilities from birth through the age of three would receive appropriate early intervention services. This amendment formed Part H of the Act, which was re-authorized in 1991 and renamed the Individuals with Disabilities Education Act (IDEA). When the IDEA was re-authorized in 1998, Part H became Part C of the Act. IDEA was reauthorized most recently in December 2004. Virginia has participated in the federal early intervention program, under IDEA, since its inception.

#### **General Assembly Guidance and Support**

In 1992, the Virginia General Assembly passed state legislation that codified an infrastructure for the early intervention system that supports shared responsibility for the development and implementation of the system among various agencies at the state and local levels. The Department of Behavioral Health and Developmental Services (the Department), was designated and continues to serve as the State Lead Agency. The broad parameters for the Part C system are established at the state level to ensure implementation of federal Part C regulations. Within the context of these broad parameters, 40 local lead agencies manage services across the Commonwealth.

Subsequent to 1992, the General Assembly passed legislation establishing mandates for state employees' health plan and private insurance coverage for early intervention services, maximizing Medicaid coverage for Part C eligible children. In 2001, the General Assembly adopted legislation requiring a statewide family fee system.

In 2004, the Department commissioned a cost study of Virginia's Part C Early Intervention System. Based on the projected number of eligible children and the average annual per child cost for early intervention services identified in the cost study, the General Assembly significantly increased the allocation of state general funds for use in the provision of early intervention services from \$125,000 per year during 1992 – 2003 to \$975,000 in 2004, and \$3,125,000 in 2005. For FY2007, a total of \$7,203,366 was appropriated.

In 2012, the General Assembly appropriated the state funds necessary to increase the Medicaid reimbursement rate for early intervention targeted case management from \$120 per month to \$132 per month for FY2013, beginning July 1, 2012. In order to address a looming \$8.5 million deficit in funding for early intervention due to significant increases in the number of children served and static federal funding, the General Assembly provided critical support for Virginia's early intervention system in 2013 by allocating an additional \$2,250,000 in state general funds for early intervention in FY 2013 and another \$6 million for FY 2014. The 2014 *Appropriation Act*, under Item 308.H.2., states:

"By October 1 of each year, the Department shall report to the Chairmen of the House Appropriations and Senate Finance Committees on the (a) total revenues used to support Part C services, (b) total expenses for all Part C services, (c) total number of infants and toddlers and families served using all Part C revenues, and (d) services provided to those infants and toddlers and families."

#### **Report of Required Data**

To the maximum extent possible, the following narrative, charts and other graphics respond to the legislative requirements as delineated in Item 308.H.2. The information provided for each reporting requirement includes identifying limitations in the data reported and future steps for addressing the limitations. The following data is based on reports received from the 40 local lead agencies and includes data from the private providers with whom the local lead agencies contract.

#### II. Total Revenue Used to Support Part C Services

As noted previously, the ITOTS data system does not collect financial data for Part C early intervention services. However, in its contracts with local lead agencies, the Department requires reporting of revenues from local lead agencies. In addition, revenue reporting is required from private providers.

Revenue Source	FY14 Revenue Amount
Federal Part C Funds	\$ 8,487,876 *
State Part C Funds	\$ 14,282,542 *
Other State General Funds	\$ 673,815
Local Funds	\$ 8,077,743
Family Fees	\$ 869,429
Medicaid	\$ 13,807,886**
Targeted Case Management	\$ 5,706,222
Private Insurance and TRICARE	\$ 10,526,639
Grants/Gifts/Donations	\$ 4,196
In-Kind	\$ 438,406
Other	\$ 4,446,144
Total	\$ 67,320,898

#### Total Revenue to Support Part C Early Intervention Services

\*These figures are the amount of Part C funding actually received by local systems. In some cases, local systems had more funds than indicated in the allocation table below because they had retained earnings from the previous fiscal year.

\*\* Although this appears to be a reduction in Medicaid revenue since FY2013, the Medicaid revenue figure reported in FY2013 inadvertently included (and, therefore, double-counted) the Targeted Case Management revenue. The total for Medicaid and Targeted Case Management revenues for FY 2013 and FY2014 differ by roughly \$200,000.

The following table represents the federal and state revenue allocated by the Department to the 40 local lead agencies:

Infant & Toddler Connection of	State	Federal
Alexandria	\$ 412,833	\$ 239,134
Arlington	\$ 636,154	\$ 367,027
Augusta-Highland	\$ 120,634	\$ 77,033
Central Virginia	\$ 367,816	\$ 211,354
Chesapeake	\$ 393,200	\$ 227,871
Chesterfield	\$ 531,271	\$ 304,275
Crater District	\$ 110,465	\$ 69,539
Cumberland Mountain	\$ 114,573	\$ 72,549
Danville-Pittsylvania	\$ 113,839	\$ 105,523
DILENOWISCO	\$ 70,106	\$ 67,602
Fairfax-Falls Church	\$ 2,475,199	\$ 1,348,524
Goochland-Powhatan	\$ 101,861	\$ 67,786
Hampton-Newport News	\$ 372,098	\$ 281,232
Hanover	\$ 219,409	\$ 133,533
Harrisonburg/Rockingham	\$ 146,842	\$ 96,103
Henrico-Charles City-New Kent	\$ 517,979	\$ 296,705
Loudoun	\$ 458,488	\$ 267,120
Middle Peninsula-North Neck	\$ 202,726	\$ 204,852
Mount Rogers	\$ 81,195	\$ 112,730
Norfolk	\$ 379,376	\$ 219,261
Portsmouth	\$ 165,663	\$ 181,500
Prince William, Manassas and Manassas Park	\$ 736,285	\$ 417,803
Rappahannock-Rapidan	\$ 182,125	\$ 109,859
Richmond	\$ 294,001	\$ 166,856
Shenandoah Valley	\$ 294,377	\$ 241,339
Southside	\$ 80,024	\$ 53,219
Staunton-Waynesboro	\$ 76,776	\$ 52,226
the Alleghany-Highlands	\$ 52,676	\$ 59,956
the Blue Ridge	\$ 393,636	\$ 225,373
the Eastern Shore	\$ 64,296	\$ 85,181
the Heartland	\$ 112,089	\$ 87,288
the Highlands	\$ 49,458	\$ 55,526
the New River Valley	\$ 196,993	\$ 116,158
the Piedmont	\$ 119,040	\$ 73,914
the Rappahannock Area	\$ 700,643	\$ 399,017

#### Funds Allocated by Local Lead Agency\*

Infant & Toddler Connection of	State	Federal
the Roanoke Valley	\$ 353,665	\$ 199,124
the Rockbridge Area	\$ 102,625	\$ 72,255
Virginia Beach	\$ 816,615	\$ 466,035
Western Tidewater	\$ 299,220	\$ 173,713
Williamsburg-James City-York Poquoson	\$ 363,947	\$ 242,277
Total	\$ 13,280,218	\$ 8,248,372

\*Please see Appendix A for a listing of the localities included in each system.

**Limitations:** Because the local lead agencies and private providers each maintain separate billing and accounting systems, there is no method to reliably ensure non-duplication of reporting in revenue categories, with the exception of Medicaid and Medicaid Targeted Case Management revenue. Through a data exchange agreement between the Department and the Department of Medicai Assistance Services (DMAS) for implementation of the Medicaid Early Intervention Services Program, the Department is able to report the exact amount of Medicaid funds used to support Part C early intervention services for FY2014.

**Future Actions to Address Limitations:** Non-duplication of revenue reporting for other revenue sources can only be fully ensured once a reliable statewide mechanism is implemented to collect or import data from local systems on the source and amount of revenue for every service delivered. The Department is working to identify the most effective and efficient mechanism to accomplish this task.

#### III. Total Expenses for all Part C Services

The figures below show the amount of funds spent on each Part C early intervention service in FY2014, as reported by the 40 local lead agencies and including data from private providers with whom the local lead agencies contract.

	1	
Assessment for Service Planning	\$	2,834,718
Assistive Technology	\$	16,921
Audiology	\$	5,284
Counseling	\$	81,467
Developmental Services	\$	3,281,199
Evaluation for Eligibility Determination	\$	1,078,638
Health	\$	57,864
Nursing	\$	6,419
Nutrition	\$	20,679
Occupational Therapy	\$	1,817,646
Physical Therapy	\$	2,712,323
Service Coordination	\$	12,352,135
Social Work	\$	68,355

#### **Expenditures for Part C Early Intervention Services**

Total-Direct Services	\$63,136,565*
EI Services by private providers** \$29,62	
Other Entitled Part C Services	\$ 580,862
Vision	\$ 68,494
Transportation	\$ 99,962
Speech language pathology	\$ 8,424,425

\*The local lead agencies reported an additional \$7,495,903 of expenses related to the system components (administration, system management, data collection and training) that are critical to implementation of direct services. **Therefore, total expenses are \$70,632,468**.

\*\*The local expenditure reporting forms were revised in FY2013 to eliminate duplicate reporting of expenses paid with Part C funds. It was not possible to eliminate the duplication by service category, so private provider expenses for all early intervention services are reported as a lump sum.

In FY2014, reported expenses exceeded reported revenue in the Part C early intervention system. This discrepancy is due to the following factors:

- Because of budget shortfalls in FY2013, some local systems paid bills from late FY2013 in FY2014.
- In response to additional state funds allocated for Part C early intervention for the end of FY2013 and for FY2014, local systems that had established waiting lists or reduced services due to budget shortfalls brought those waiting children into the system and resumed full service levels. In addition, all local systems increased child find efforts, resulting in a 4.8% increase in the number of children served in FY2014. With full service levels resumed and the increased number of children served, expenses increased.
- The current Early Intervention Targeted Case Management reimbursement rate of \$132 per month does not cover the expenses of providing this service.
- Concerns about the completeness and accuracy of expense and revenue data and possible duplication of reporting remain since local lead agencies and private providers collect their data separately and there is no central mechanism to ensure reporting by all private providers or to ensure non-duplication.

**Limitations**: Although the Department continues to refine the instructions and technical assistance related to the reporting forms used by local lead agencies and private providers to report expenditures, there remain limitations with this process for collection of expense data. Because the local lead agencies and private providers each maintain separate billing and accounting systems, there is no method to reliably ensure non-duplication of reporting of expenses associated with each service. The local expenditure reporting forms were revised in FY2013 to eliminate duplicate reporting of expenses paid with Part C funds. It was not possible to eliminate the duplication by service category, so private provider expenses for all early intervention services can only be reported as a lump sum.

**Future Actions to Address Limitations**: Non-duplication of expense reporting can only be fully ensured once a reliable statewide mechanism is implemented to collect or import expenditure data from local systems. The Department is working to identify the most effective and efficient mechanism to accomplish this task.

#### IV. Total Number of Infants and Toddlers and Families Served

Local lead agencies are required to enter into the early intervention data system, ITOTS, every child who enters the local Part C early intervention system. Local lead agencies must use quarterly ITOTS verification reports to confirm the accuracy of the data entered. The following table provides the total number of children served for each year, as reported from ITOTS. Please note that not all children who were served during that one-year period were served for the full year.

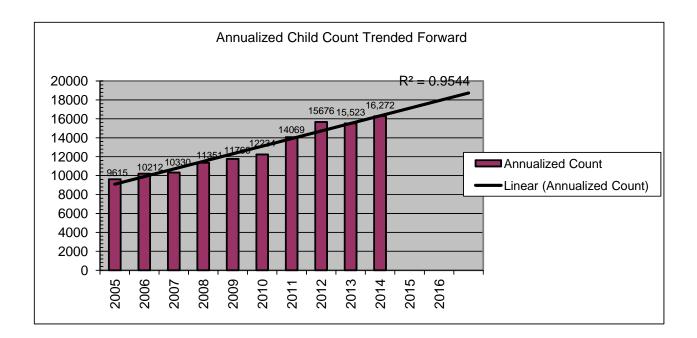

There was an increase of 4.8% from FY2013 to FY2014 in the number of children served. As a result of statewide efforts to identify and enroll all eligible children per federal child find requirements, Virginia had experienced significant growth from FY2007 to FY2012, with an almost 52% increase over that period in the number of children served. Virginia had also added prematurity as an automatic eligibility criterion for service in December 2010, which may have contributed to the especially sharp increases in children enrolled in FY2011 and FY2012. As anticipated, Virginia's Part C early intervention system experienced significant budget shortfalls in FY2013 that resulted in several local systems establishing waiting lists for services and a decrease of just under 1% in the number of children served in FY2013. With the increase in state funds allocated by the General Assembly for Part C early intervention for the last quarter of FY2013 and for FY2014, local systems were able to begin serving children who had been waiting for services and to resume child find efforts to identify all eligible children in FY2014.

Year	Total Number Served – Eligible and Entered Services	Total Number Evaluated Who Did Not Enter Services*
Dec. 2, 2003 – Dec.1, 2004	8,540	
Dec. 2, 2004 – Dec. 1, 2005	9,209	
July 1, 2006 – June 30, 2007	10,330	
July 1, 2007 – June 30, 2008	11,351	1,760
July 1, 2008 –June 30, 2009	11,766	1,671
July 1, 2009 – June 30, 2010	12,234	1,494
July 1, 2010 – June 30, 2011	14,069	1,829
July 1, 2011 – June 30, 2012	15,676	1,797
July 1, 2012 – June 30, 2013	15,523	1,745
July 1, 2013 – June 30, 2104	16,272	1,720

Total Number of Infants and Toddlers Served in Each Year

\* These children received a multidisciplinary team evaluation to determine eligibility and, in some cases, an assessment for service planning, but did not enter services because they were either found ineligible for Part C, declined Part C early intervention services, or were lost to contact. Since evaluation and assessment, by federal law, must be provided at no cost to families, neither private insurance nor families can be billed for these services. Unless the child has Medicaid or Tricare, federal and state Part C funds are generally used to pay for evaluation and assessment.

Using the total number of children served each year (annualized child count), the chart below trends the projected number of eligible children served through 2016.

## V. Services Provided to Eligible Infants and Toddlers

Efforts to include delivered service data on the expenditure reports from local lead agencies and private providers have resulted in inconsistent and duplicative counts. Until there is an electronic mechanism to collect reliable delivered service data from local systems, the Department will report estimates based on planned services data. The ITOTS data system provides a report of the number of children active on December 1 of a given year for whom the initial IFSP listed each type of early intervention service. The table below estimates the total number of children served between July 1, 2013 and June 30, 2014 who have each service listed on their initial IFSP. This is based on the percentage of children with initial IFSPs having those services listed on December 1, 2013.

Type of Early Intervention Service	% of Children with an Initial IFSP Listing that Service on 12/1/13	Estimated # of Children with an Initial IFSP Listing that Service in FY2014 (% multiplied by Total Served)
Assistive Technology	0.08%	13
Audiology	0.5%	74
Counseling	0.03%	4
Developmental Services	15.2%	2,471
Health Services	0%	0
Nursing Services	0.03%	4
Nutrition Services	0.04%	6
Occupational Therapy	15.5%	2,526
Physical Therapy	25.0%	4,061
Psychological Services	0.03%	4
Service Coordination	N/A*	16,272

Estimates of Total Number of Children Receiving Each Service: July 1, 2013 – June 30, 2014

Sign Language and Cued Language Services	0.04%	6
Social Work Services	0.2%	38
Speech-Language Pathology	33.0%	5,387
Transportation	0.01%	2
Vision Services	0.6%	98
Other Entitled EI Services	1.2%	201

\*All eligible children receive service coordination.

In addition to the services listed on IFSPs, a total of 10,137 children received an evaluation to determine eligibility and/or an initial assessment for service planning in FY2014.

**Limitations:** The numbers provided above are only estimates and almost certainly underestimate the number of children receiving each service, since some children whose initial IFSP does not list a service (e.g., physical therapy) may have that service added at a subsequent IFSP review during the 1-year period. The ITOTS data system captures only those planned services identified on a child's <u>initial</u> IFSP, with no updates of services added on subsequent IFSPs and no data on services actually delivered.

**Future Actions to Address Limitations:** Accurate reporting of the number of children actually receiving each early intervention service can only be fully ensured once a reliable statewide mechanism is implemented to collect or import delivered service data from local systems.

#### VI. Overall Fiscal Climate for Part C for FY2014 and Beyond

Revenue generated through the Medicaid Early Intervention Services Program continues to fully fund services (other than service coordination) for children with Medicaid. However, there was not sufficient funding available in FY2014 to fully support the costs of providing service coordination to Medicaid eligible children or to support the costs of providing all appropriate services to children who do not have Medicaid. Specifically, the funding challenges in FY2014 included the following:

- The Medicaid Early Intervention Targeted Case Management program that began in October 2011ensures eligible children and families receive service coordination that is appropriate to the needs of infants, toddlers and their families. However, the original Early Intervention Targeted Case Management reimbursement rate of \$120 per month did not cover the expenses of providing this service, which are estimated at \$175 per month, based on a recent cost study. During the 2012 session, the General Assembly passed a budget amendment that appropriated the state funds necessary to increase the Medicaid reimbursement rate for early intervention targeted case management to \$132 per month beginning July 1, 2012. These additional funds have helped to shrink, but not eliminate, the gap between revenue and the \$175 per month expenses associated with service coordination for children with Medicaid.
- There was a \$424,650 reduction in federal funding for Virginia's early intervention system in FY2014 due to federal sequestration.
- In general, insurance companies pay lower rates for early intervention services than Medicaid does and do not reimburse at all for service coordination or developmental services. Federal and state Part C funds must be used to make up the difference between the insurance rate and the Medicaid rate and to pay for services that are not covered.

• The number of eligible children identified and receiving Part C early intervention services continued to increase.

Looking ahead, the system is still growing and remains stressed. Meeting federal early intervention requirements will necessitate aggressive outreach for public awareness and child find to identify all eligible children, meeting rigorous standards for timely and effective services, and ensuring no waiting lists. With the additional state funds allocated for early intervention in FY2013 and FY2014, local systems resumed child find efforts and the number of children served in early intervention rose 4.8% from FY2013 to FY2014. Unless funding stays apace with growth, Virginia runs the risk of falling back into noncompliance, which puts federal Part C funding at risk and results in children and families not getting the supports and services they need in a timely and effective manner.

Only three months into FY2015, six (6) local systems have already identified the need for additional funds totaling at least \$500,000 in order to maintain services for all eligible children through June 30, 2015.

Achieving a stable and sustainable fiscal structure for Virginia's early intervention system remains a top priority, as this is essential to ensuring an effective service system that leads to positive outcomes for infants and toddlers with disabilities and their families. Towards this end, the Department continues to:

- Closely monitor the fiscal situation across local systems;
- Provide additional support to local system managers and local fiscal staff to ensure effective oversight of local budgets and spending as well as accurate reporting of revenues and expenditures; and
- Work with local systems and the Bureau of Insurance, the Virginia Association of Health Plans, and the Virginia Interagency Coordinating Council on ways to maximize and possibly improve private insurance reimbursement for early intervention services.

## VII. Conclusion

As demonstrated by the data reported above, the funding provided by the General Assembly permitted local Part C early intervention systems to provide a wide variety of needed supports and services to more than 16,000 eligible infants, toddlers and their families during fiscal year 2014. These funds also touched the lives of over 1,700 additional infants, toddlers and families who received evaluations for eligibility determination and assessments upon referral to the Part C early intervention system even though they did not proceed on to receiving other early intervention supports and services. As the number of eligible infants and toddlers identified continues to increase and federal Part C funding levels remain static or fall, state Part C funding is critical to ensure all eligible children and families receive timely and appropriate early intervention supports and services. The department, local service providers and families are appreciative of the continued financial support for Part C early intervention provided by the General Assembly.

Local System	Localities Included	
Alexandria	City of Alexandria	
Alleghany-Highland	Alleghany County; Cities of Clifton Forge and Covington	
Arlington County	Arlington County	
Central Virginia	Counties of Amherst, Appomattox, Bedford and Campbell; Cities of Bedford and Lynchburg	
Chesapeake	City of Chesapeake	
Chesterfield	Chesterfield County	
Williamsburg, James City, York	Counties of James City and York; Cities of Poquoson and Williamsburg	
Heartland	Counties of Amelia, Buckingham, Charlotte, Cumberland, Lunenburg, Nottoway, and Prince Edward	
Cumberland Mountain	Counties of Buchanan, Russell, and Tazewell	
Danville-Pittsylvania	Pittsylvania County; City of Danville	
Eastern Shore	Counties of Accomack and Northampton	
Fairfax-Falls Church	Fairfax County; Cities of Fairfax & Falls Church	
Goochland-Powhatan	Counties of Goochland and Powhatan	
Hampton-Newport News	Cities of Hampton and Newport News	
Hanover County	Hanover County	
Harrisonburg-Rockingham	Rockingham County; City of Harrisonburg	
Henrico, Charles City, New Kent	Counties of Henrico, Charles City, and New Kent	
Highlands	Washington County; City of Bristol, Abingdon	
Loudoun County	Loudoun County	
Middle Peninsula-Northern Neck	Counties of Essex, Gloucester, King & Queen, King William, Lancaster, Mathews, Middlesex, Northumberland, Richmond, and Westmoreland; Cities of Colonial Beach and West Point	
Mount Rogers	Counties of Bland, Carroll, Grayson, Smyth, and Wythe; City of Galax and Marion	
New River Valley	Counties of Floyd, Giles, Montgomery and Pulaski; City of Radford	
Norfolk	City of Norfolk	
Shenandoah Valley	Counties of Clark, Frederick, Page, Shenandoah, and Warren; City of Winchester	
Piedmont	Counties of Henry, Franklin, and Patrick; City of Martinsville	
DILENOWISCO	Counties of Dickenson, Lee, Scott and Wise; City of Norton	
Crater District	Counties of Dinwiddie, Greensville, Prince George, Surry, and Sussex; Cities of Colonial Heights, Emporia, Hopewell, and Petersburg	
Portsmouth	City of Portsmouth	
Prince William, Manassas, Manassas Park	Prince William County; Cities of Manassas, Manassas Park	

## Appendix A Local System Names and Included Localities

	Counties of Caroline, King George, Spotsylvania, and
Rappahannock Area	Stafford; City of Fredericksburg
	Counties of Culpepper, Fauquier, Madison, Orange, and
Rappahannock-Rapid an	Rappahannock
	Counties of Albemarle, Fluvanna, Greene, Louisa, and
Roanoke Valley	Nelson; City of Charlottesville
Richmond	City of Richmond
	Counties of Botetourt, Roanoke and Craig; Cities of
Blue Ridge	Roanoke and Salem
	Counties of Bath and Rockbridge; Cities of Buena Vista
Rockbridge Area	and Lexington
	Counties of Brunswick, Mecklenburg, and Halifax; Cities of
Southside	South Boston and South Hill
Augusta-Highland	Counties of Augusta and Highland
Virginia Beach	City of Virginia Beach
	Counties of Isle of Wight and Southampton; Cities of
Western Tidewater	Franklin and Suffolk
Staunton-Waynesboro	Cities of Staunton and Waynesboro
