201 North 9th Street, General Assembly Building, Suite 1100
Richmond, Virginia 23219*

(804) 786-1258

December 19, 2014

The Honorable John C. Watkins, Chair
Joint Legislative Audit and Review Commission
General Assembly Building
Richmond, Virginia 23219

Dear Senator Watkins:

The Code of Virginia requires JLARC to produce an annual report on the state funding provided to each locality for an educational program meeting the K-12 Standards of Quality (§ 22.1-97). The report for 2014 was briefed to the Commission on December 8, 2014 and will be submitted to the House Committees on Education and Appropriations and the Senate Committees on Finance and Education and Health.

On behalf of the Commission staff, I would like to express our appreciation for the assistance provided by staff of the Virginia Department of Education.

Sincerely,

A handwritten signature in cursive script that reads "Hal E. Greer".

Hal E. Greer
Director

Report summary

State Spending on the K-12 Standards of Quality: FY 2014

WHAT WE FOUND

- The state spent about \$5.27 billion on the Standards of Quality (SOQ) in FY 2014. This equated to about \$4,290, on average, for each of the 1.2 million elementary and secondary school students in Virginia.
- Total state SOQ spending in FY 2014 was 0.2 percent more than in FY 2013. This was the smallest annual spending change in the past 10 years, representing more stability compared to years prior to, during, and after the most recent recession.
- State SOQ spending per student in FY 2014 was 0.4 less than in FY 2013. This marginal decline is because the increase in the number of students was greater than the increase in spending.
- Fairfax County has by far the most students and received the most state SOQ funds, about \$535 million in FY 2014.
- Lee County, which has the lowest local ability to pay in the state, received the highest amount of state SOQ funds per student, at \$6,827.
- Falls Church, one of 10 localities with the highest local ability to pay, received the lowest amount of state SOQ funds per student, at \$2,149.

WHY WE DID THIS STUDY

The Code of Virginia requires JLARC to "report annually to the House Committees on Education and Appropriations and the Senate Committees on Finance and Education and Health the state expenditure provided each locality for an educational program meeting the Standards of Quality" (§ 22.1-97).

ABOUT THE STANDARDS OF QUALITY

Since 1971, the Constitution of Virginia has required the Virginia Board of Education to prescribe standards governing the quality of education that school divisions must provide. These standards of quality apply to various aspects of K-12 education, including the type and number of staff resources in each school division. The state and its localities share the responsibility to provide school divisions with funds to meet the standards.

State Spending on the K-12 Standards of Quality: FY 2014

The Code of Virginia requires the Joint Legislative Audit and Review Commission (JLARC) to “report annually to the House Committees on Education and Appropriations and the Senate Committees on Finance and Education and Health the state expenditure provided each locality for an educational program meeting the Standards of Quality” (§ 22.1-97). The Virginia Department of Education (VDOE) is required to produce a similar report each year detailing local expenditures. (See Appendix A, report mandate.)

State and localities both provide funds for school divisions to meet the Standards of Quality

Since 1971, the Constitution of Virginia has required the Virginia Board of Education to set standards governing the quality of education that school divisions must provide. These standards of quality (SOQ) apply to various aspects of K-12 education, including the type and number of staff resources in each school division. The Constitution stipulates:

Standards of quality for the several school divisions shall be determined and prescribed from time to time by the Board of Education, subject to revision only by the General Assembly. The General Assembly shall determine the manner in which funds are to be provided for the cost of maintaining an educational program meeting the prescribed standards of quality, and shall provide for the apportionment of the cost of such program between the Commonwealth and the local units of government comprising such school divisions (Constitution of Virginia, Article XIII, Section 2).

There are two key steps in the process of funding K-12 education. First, the state determines the costs that localities incur by meeting the standards of quality. These costs have several primary components, including the number of staff to meet the standards and the costs of employing these staff. Various methodologies are used to calculate instructional and support staffing levels and costs, which may change over time as directed through the Appropriation Act.

The second step is calculating the state’s share of the costs that were determined in the first step. The state’s share consists of (1) sales tax revenue that is generated and appropriated by the state for public education purposes, and (2) payment of a share of remaining SOQ costs after the sales tax funds and any other applicable deductions are made. (Since FY 1993, the state’s aggregate share has been 55 percent.) The

Local Composite Index

The composite index is calculated every two years to measure a locality's ability to pay relative to other localities. The index considers property value, adjusted gross income, taxable retail sales, and the student and total population in each division.

state's actual share varies by locality based on each locality's ability to pay as measured through the "local composite index." The index compares the size of a locality's tax base (relative to its population and number of students in public school) to the collective statewide size of local tax bases (relative to statewide population and number of public school students).

Localities are responsible for providing the remaining funds, beyond the state share, necessary to fund education sufficiently to meet their required SOQ expenditures (§ 22.1-97). Appropriation Act language over the years has addressed specifically how this amount should be calculated. All localities typically provide additional funds beyond this required minimum amount.

State spent \$5.27 billion on the SOQ in FY 2014

School divisions collectively spent about \$5.27 billion in state funds on providing an educational program to meet the SOQ in FY 2014. This total state SOQ spending amount equated to about \$4,290 for each of the 1,229,334 million elementary and secondary school students in Virginia during FY 2014. (See Appendix B for state SOQ spending in each Virginia school division and per student.)

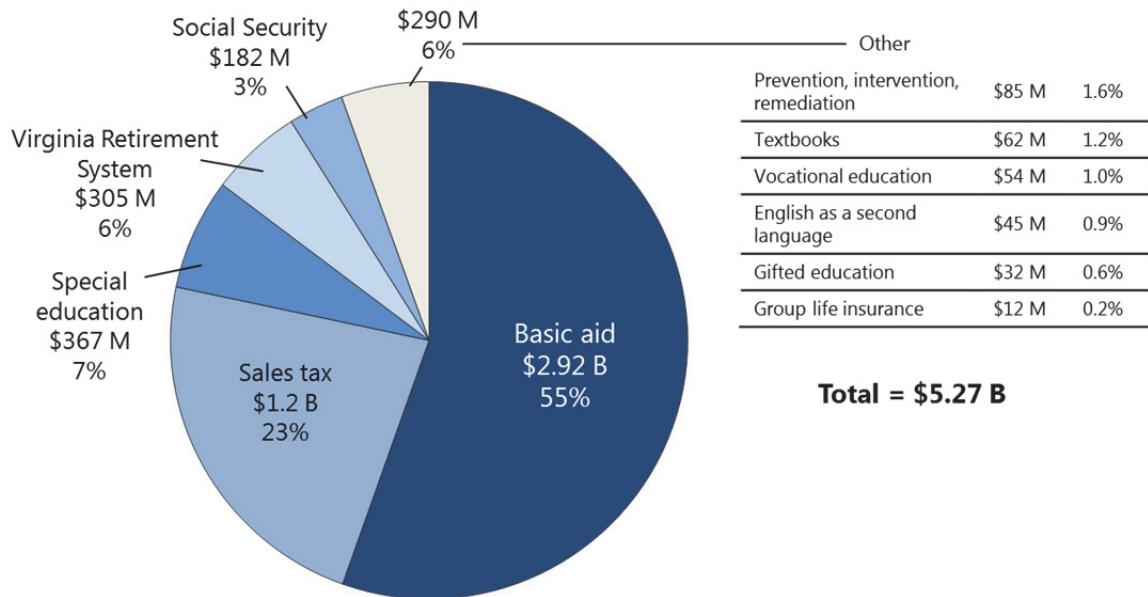

Two SOQ accounts made up more than three-fourths of total state SOQ spending: basic aid and sales tax (Figure 1). More than half of total state spending on the SOQ was through the basic aid account, which can be used for a variety of purposes (in particular, school division employee compensation) to provide a basic education program. Nearly one-fourth of total state SOQ spending was state sales tax revenue collected for educational purposes. About seven percent was used to fund special education, while about nine percent funded contributions to Social Security and the Virginia Retirement System.

State SOQ spending is stabilizing following recession; spending per student marginally declined

The annual change in state SOQ spending between FY 2013 and FY 2014 was the smallest of any two fiscal years during the past 10 years. The \$5.27 billion in state SOQ spending in FY 2014 reflects an increase of about 0.2 percent over the \$5.26 billion spent in FY 2013. This year's relatively minimal change represents a rare degree of stability of state SOQ spending (Figure 2). Prior to the most recent recession, spending grew steadily and substantially. Spending dropped considerably in FY 2010 and again in FY 2011, before increasing moderately in FY 2012 and FY 2013.

State SOQ spending per student, statewide, dropped by about 0.4 percent from \$4,307 in FY 2013 to \$4,290 in FY 2014. Spending per student declined because the number of students increased more than spending. There were 0.62 percent (7,547) more students in FY 2014, yet spending increased by about 0.24 percent (\$12.5 million).

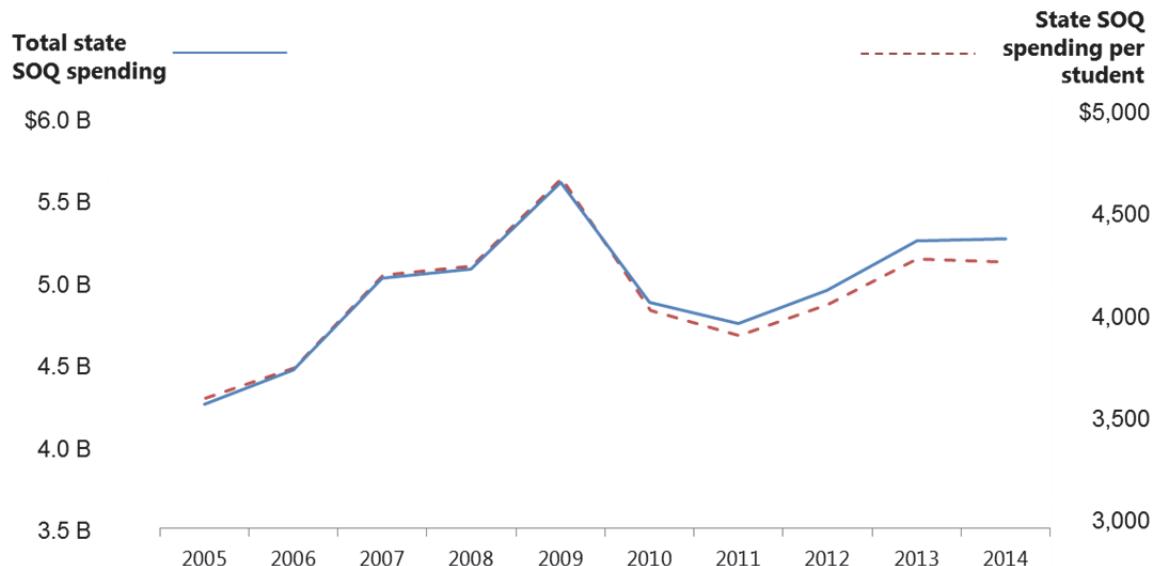

FIGURE 1
Basic aid accounted for about 55 percent of total state SOQ spending (FY 2014)

Source: VDOE data on state SOQ payments to school divisions, FY 2014.

Note: State SOQ spending only. Excludes local required minimum effort spending and additional local spending.

FIGURE 2
Spending was relatively stable from FY 2013 to FY 2014

Source: VDOE data on state SOQ payments to school divisions and calculation of adjusted average daily membership as of March 31, 2014. JLARC state SOQ spending reports, 2005-2014.

Note: State SOQ spending only. Excludes local required minimum effort spending and additional local spending.

State SOQ spending in school divisions is driven by number of students and local ability to pay

State SOQ spending in each school division is partially driven by the number of students included in the average daily membership of each division. About 48 percent of all state SOQ spending was by 10 school divisions. These 10 divisions had about 51 percent of the state's total average daily membership of elementary and secondary students. Fairfax County had by far the most students at 176,185 and the county spent about \$535 million in state SOQ funds in FY 2014 (Table 1).

State SOQ spending in each school division is also partially driven by each locality's composite index score. The local composite index is used to determine local ability to pay, and state funding is provided accordingly. Localities with a lower score on the local composite index—indicating a lower ability to pay—receive more state funding. Localities with a higher score receive less. For localities with the highest possible score, currently 0.8000, the state funds 20 percent of total SOQ spending. For the locality with the lowest local composite index score, currently 0.1826, the state funds more than 80 percent of total SOQ spending.

TABLE 1
Top 10 divisions account for about half of total state SOQ spending

Rank by state SOQ spending	Division	Total state SOQ spending	Number of students	State SOQ spending per student
1	Fairfax (Co.)	\$534,973,951	176,185	\$3,036
2	Prince William	382,452,622	82,657	4,627
3	Virginia Beach	292,804,666	68,569	4,270
4	Chesterfield	263,906,025	58,559	4,507
5	Loudoun	249,764,475	70,064	3,565

10	Stafford	126,336,268	26,901	4,696
Top 10 totals		\$2,538,731,367	628,390	
Top 10 as % of total		48%	51%	

Source: VDOE data on state payments to school divisions and calculation of adjusted average daily membership as of March 31, 2014.

In 2014, Lee County had the lowest local composite index score, and its school division received the most state SOQ funds per student at \$6,827. By contrast, 10 divisions had the highest possible local composite index. These included Falls Church, Williamsburg, Arlington, Fairfax (City), Northumberland, Alexandria, and Lancaster, each of which received less than \$2,300 in state SOQ funds per student in FY 2014 (Table 2). (See Appendix B for SOQ spending per student and local composite index for each division.)

TABLE 2
State SOQ spending per student ranged from \$6,827 to \$2,149

Division (Top 10)	Total SOQ spending per student	Local composite index	Division (Bottom 10)	Total SOQ spending per student	Local composite index

Appendix A: Study Mandate

§ 22.1-97. Calculation and reporting of required local expenditures; procedure if locality fails to appropriate sufficient educational funds.

A. The Department of Education shall collect annually the data necessary to make calculations and reports required by this subsection.

At the beginning of each school year, the Department shall make calculations to ensure that each school division has appropriated sufficient funds to support its estimated required local expenditure for providing an educational program meeting the prescribed Standards of Quality, required by Article VIII of the Constitution of Virginia and Chapter 13.2 (§ 22.1-253.13:1 et seq.) of this title. At the conclusion of the school year, the Department shall make calculations to verify whether the locality has provided the required expenditure, based on average daily membership as of March 31 of the relevant school year.

The Department shall report annually to the House Committees on Education and Appropriations and the Senate Committees on Finance and Education and Health the results of such calculations and the degree to which each school division has met, failed to meet, or surpassed its required expenditure.

The Joint Legislative Audit and Review Commission shall report annually to the House Committees on Education and Appropriations and the Senate Committees on Finance and Education and Health the state expenditure provided each locality for an educational program meeting the Standards of Quality.

The Department and the Joint Legislative Audit and Review Commission shall coordinate to ensure that their respective reports are based upon comparable data and are delivered together, or as closely following one another as practicable, to the appropriate standing committees.

Appendix B: State SOQ Spending, By Division
