### 1. Purpose

The purpose of this document is to satisfy the requirement to provide the following to the Virginia General Assembly.

"Quarterly written assessment of the progress made by the Health Care Reform program office to implement new information technology systems to address the American Recovery and Reinvestment Act (ARRA), the Patient Protection and Patient Affordability Act (PPACA), and the Medicaid Information Technology Architecture (MITA). The report shall provide a programlevel assessment, including a description of the expenditures that have been made and the activities to which any State or contract staff are assigned. The report shall also include a program-level description of steps taken to ensure that (i) individual projects and the use of project resources are prioritized across the program, (ii) a coordinated approach to program management across all projects is undertaken through the use of formal structures and processes, (iii) program governance and communication activities are sufficient to achieve benefit and stakeholder management objectives, and (iv) any changes in program and projectlevel objectives and resource needs are identified."

More information about this requirement can be found at the website:

http://leg2.state.va.us/DLS/H&SDocs.NSF/fdf07f46b7d7328285256ee400700119/89a16f058e16 918c85257a17007113b5?OpenDocument

This document describes the progress made by the eHHR Program to implement new information technology systems to address requirements in the ARRA, the PPACA, and MITA. It provides a summary update to reports submitted each quarter, starting with the fourth quarter of 2012, without repeating the bulk of the information from previous reports. If the reader wants more detail, the previous reports are posted on Virginia's Legislative Information System.

### 2. Progress and Expenditures

Due to the aggressive implementation timeline mandated under the PPACA and the late delivery of finalized federal regulations there have been some changes to scope and budget. Updates are being made to the federal funds requested to account for this. The federal agencies anticipated this and are being very cooperative.

•	То	tal number of projects:	18
	0	Number of projects in the Initiation phase:	00
	0	Number of projects in the Planning phase:	00
	0	Number of projects in the Execution phase:	05
	0	Number of projects in the Closeout phase:	00
	0	Number of projects Complete:	13

More detailed information about progress and expenditures can be found in section 3. This includes:

- Specific content for each initiative, ARRA, PPACA and MITA;
- A table listing the related projects, along with
  - Project Description
  - Resource Utilization Breakdown: and
  - o Status
- A table listing budget information as well as planned and actual expenditure for each project.

### 2.1. Statewide HIE – ConnectVirginia

ConnectVirginia HIE, Inc. continued its Encounter Alerts pilot with the Inova Health System and with Health Connect, a 6-practice IPA. The pilot will be expanding to include Virginia Hospital System as a supplier of data and additional practices will be subscribing to receive alerts based on hospital admissions.

Public Health Reporting via ConnectVirginia's Public Health Reporting Pathway continues to onboard additional providers and hospitals for submission of Immunizations, Syndromic Surveillance and Electronic Lab Reporting to VDH. Submissions to the Cancer Registry are now in production as an additional data set utilizing the Public Health Reporting Pathway.

Two health systems, Inova and UVA, successfully on-boarded to the eHealth Exchange as ConnectVirginia participants. This enables access those health systems to participate in queryretrieve of patient care summaries with over 100 other eHealth Exchange Participants including the Veteran's Health Administration, Department of Defense and Social Security Administration.

### 2.2. Regional Extension Center – Virginia Health Information Technology Regional Extension Center

Virginia HIT Regional Extension Center (REC) has cumulatively recruited 3,283 Virginia primary care providers for assistance in implementing electronic health records (EHRs) and achieving Meaningful Use of their systems. As of August 10, 2015, 2,498 of these providers have fully achieved Stage 1 Meaningful Use and received either Medicare or Medicaid payment incentives.

Virginia HIT Regional Extension Center also has a contract with Virginia Department of Medical Assistance Services to assist up to 2,000 non-REC eligible Medicaid providers statewide to achieve their EHR incentives for Adopting, Implementing or Upgrading (AIU) their EHR and achieving Meaningful Use (MU).

As of August 10, 2015 Virginia HIT Regional Extension Center has:

- recruited 1466 Medicaid enrolled Eligible Professionals (EPs) into its program;
- brought 1,010 Medicaid-enrolled EPs to Adopt, Implement, or Upgrade status as defined under the CMS EHR Incentive Program; and
- provided 491 Medicaid enrolled EPs with technical assistance in achieving Meaningful Use.

### **2.3.** Health Benefits Exchange

There are no updates to the information previously reported.

### 2.4. Eligibility Modernization

The Migration project is progressing as planned, with implementation of Phase 1 over the 2015 Labor Day weekend. Phase 1 will primarily automate eligibility and enrollment for:

- 1. Medicaid Aged, Blind and Disabled (ABD); and
- 2. Medicaid Long Term Care (LTC).

The Phase 1 release also includes a Document Management Information System (DMIS) to significantly reduce the dependence on maintaining paper-based documentation.

Migration Phase 2 will implement in November of 2016, automating eligibility and enrollment for:

- 1. Supplemental Nutrition Assistance Program (SNAP);
- 2. Temporary Assistance for Needy Families (TANF); and
- 3. Low Income Home Energy Assistance Program (LIHEAP).

The eHHR Integrated Analytics effort is also progressing as planned. The charter is being finalized and funding options are being explored.

### 2.5. Prioritizing Project Resources Across the Program

There are no updates to the information previously reported.

# 2.6. Coordinated Approach to the Program Management Across All Projects

There are no updates to the information previously reported.

### 2.7. Program Governance and Communication

There are no updates to the information previously reported.

### 2.8. Program Change Management

There are no updates to the information previously reported.

# **3.** Summary Quarterly written assessment of the progress and expenditures

### **3.1.** American Recovery and Reinvestment Act (ARRA)

Several funding opportunities were made available to states and territories through ARRA to improve the delivery of healthcare through improvements in health information technology. These two funding opportunities included the creation of Regional Extension Centers (REC) to assist providers in garnering electronic health record capabilities and the creation of a statewide Health Information Exchange capability that allows providers that opportunities concluded in February 2014. Both organizations continue to be self-sustaining through support from the provider community.

### **3.1.1. Statewide HIE**

There are no updates to the information previously reported.

### **3.1.2.** Regional Extension Center

There are no updates to the information previously reported.

### **3.1.3. Provider Incentive Program**

The Virginia Provider Incentive Program sunsets in 2021. The Virginia Provider Incentive Program continued normal operations during this reporting period.

### 3.2. Patient Protection and Patient Affordability Act (PPACA)

Satisfying PPACA mandates required the modernization and/or replacement of many of the Eligibility and Enrollment (E&E) applications and data services supporting Medicaid and Children's Health Insurance Program (CHIP). PPACA makes significant federal funding available to upgrade these Information Technology (IT) Systems. HHR already started initiatives to modernize IT systems to comply with MITA and saw an opportunity to leverage increased federal funding under PPACA to address PPACA and MITA compliance requirements. Following the MITA Framework methodology of separating the Technical Architecture, the Information Architecture and the Business Architecture, HHR and VITA have defined several projects. They have also determined the inter-dependencies and schedules for these projects, which are being managed across the enterprise by the eHHR Program Office. The following is a summary description of the progress being made on those projects, as well as the state versus contractor resource plans and the expenditures.

### **3.2.1. Project Resource Use and Status**

The following table lists the projects, along with a description, plans for state versus contractor resource use and the current status. Generally speaking, projects are progressing on schedule and within budget.

Project Description		State vs. Contractor Resource Use	Status		
ARRA HITECH HIT Foundational Projects	tools that support the Business Architecture, but are not specific	Foundational projects are those supporting the enterprise level Technical and Information Architecture layers within MITA. There are also foundational tools that support the Business Architecture, but are not specific to the business application software. This includes the Business Rules Engine as well Business Process Management and Business Process Execution tools.			
Service-Oriented Architecture Environment (SOAE)	Architectureapplications to new services, support sharing and reuse of WebEnvironmentservices across agencies, facilitate the automation of business		Project Phase: Previously Completed		
Management			Project Phase: Previously Completed		
Commonwealth Authentication Service (CAS)	Offered by the Department of Motor Vehicles (DMV) in collaboration with VITA, CAS will provide improved verification of identity, expediting citizens' access to services while protecting against identity theft and fraudulent activities.	No change to what was previously reported.	Project Phase: Previously Completed		

#### Table 1 - Project List Resource Use and Status

Project Description		State vs. Contractor Resource Use	Status
Other ARRA HITECH HIT Projects			
Health Information Exchange (HIE)	Health information exchange is the electronic movement of health-related information among organizations according to nationally recognized privacy and security standards. In addition, the ability to exchange clinical information with other providers is a key component of achieving <u>Meaningful</u> <u>Use of EHRs</u> and <u>CMS financial incentives</u> .	No change to what was previously reported.	Project Phase: Previously Completed The HIE is now in an operational mode, planning for and onboarding new organizations.
Regional Extension Center (REC) A Regional Extension Center (REC) is an organization that has received funding under the Health Information Technology for Economic and Clinical Health Act (HITECH Act) to assist health care providers with the selection and implementation of electronic health record (EHR) technology.		No change to what was previously reported.	Project Phase: Previously Completed
Provider Incentive Payments (PIP)	(EPs) and eligible hospitals (EHs) as they adopt implement		Project Phase: Previously Completed. The Virginia Provider Incentive Program sunsets in 2021. The Virginia Provider Incentive Program continued normal operations during this reporting period.

Project	Description	State vs. Contractor Resource Use	Status		
MMIS Projects	CMS in a final rule issued in early 2012 considers the eligibility and enrollment systems as part of the MMIS. This enables MMIS enhanced fund be obtained for these systems. In addition, a tri-agency federal waiver for OMB circular A-87 was issued for these systems in order to expedite th Medicaid/CHIP efforts needed to support the HBE. CMS accounts for this using two categories: Eligibility and Enrollment (E&E) systems and th MMIS. For example, DSS activities fall under E&E and MMIS systems changes supporting E&E come under enhanced MMIS funding. For E&E systems, 90% federal match is available for implementation through CY2015 (payments must be made by then); after that 75% federal n is available for ongoing systems maintenance (same as MMIS).				
Department of Social Services (DSS) Enterprise Delivery System Program (EDSP) Eligibility Modernization (EM)	This project will create and enhance a customer portal, known as CommonHelp (CH) in support of the replacement of legacy eligibility systems. Another initiative will be to interface existing HHR systems via the state wide ESB using standards- compliant interfaces to share information and to automate cross-agency workflows. Additional projects include Modernization of VaCMS and implementation of a Document Management and Imaging System (DMIS).	No change to what was previously reported.	<ul> <li>The EM initiatives are broken into three projects</li> <li>1) MAGI Project Phase: Previously Completed More information is available in section 2.4 of this document.</li> <li>2) Conversion Project Phase: Previously Completed More information is available in section 2.4 of this document.</li> <li>3) Migration Project Phase: Execution and Control Progressing on the current schedule and within the revised and approved budget. More information is available in section 2.4 of this document.</li> </ul>		
Birth Registry Interface (BRI)	This project will establish a birth reporting service/interface between the birth registry and the ESB.	No change to what was previously reported.	Project Phase: Previously Completed		

Project	Project Description		Status
Death Registry Interface (DRI)			Project Phase: Previously Completed
Immunization Registry Interface (IRI)	This project will address the interface between the Immunization Registry and providers	No change to what was previously reported.	Project Phase: Execution and Control The project will deploy to production in mid- September 2015 and will be closed out in Commonwealth Technology Portfolio (CTP) by the end of September 2015.
Rhapsody Connectivity (RC)	This project will address the Rhapsody connectivity. The Orion Rhapsody data integration engine is used by the VDH to facilitate the accurate and secure exchange of electronic data using with the ESB.	No change to what was previously reported.	Project Phase Previously Completed
DMAS Eligibility System Support (DESS)	This funds the DMAS support for the EM effort being done by DSS to support PPACA mandates for Medicaid/CHIP		Project Phase: Execution and Control DMAS activities are part of the Department of Social Services (DSS) Enterprise Delivery Service Program (EDSP) Eligibility Modernization (EM) project planning. These activities support all three EDSP projects.

Project Description		State vs. Contractor Resource Use	Status
The eHHR Program Office was formed under Secretary of Health and Human Resources William A. Hazel Jr., M.D. to promote and manage eHHR enterprise IT projects in close coordination with our federal and state government partners. 		No change to what was previously reported.	Project Phase: Execution and Control
PPACA Projects			
Health Benefits Exchange (HBE) Planning Grant The Department of Medical Assistance Services was awarded a State Planning and Establishment Grant for the Affordable Care Act's Exchanges (Funding Opportunity Number: IE- HBE-10-001, CFDA: 93.525) for the period of September 30, 2010, through September 29, 2011 and subsequently extended through September 29, 2012.		No change to what was previously reported.	Project Phase: Previously Completed

HBE Level 1 Establishment GrantThe Patient Protection and Affordable Care Act (PPACA) requires each state (or the federal government acting on behalf of each state) to support HBE business services to facilitate the individual market in the state and to provide for the establishment of a Small Business Health Dpains" (OHPS) in the individual market in the state and to provide for the establishment of a Small group market.To be determined by the Bureau of Insurance to coordinate with insures and evaluate their applications for QHPS that are offered in the small group market.Project Phase: Previously CompletedHBE Level 1 Establishment GrantVirginia deferred to the federal government establishment for and transfer applications for QHPS that are offered through the HM. The eHHR program interfaces with the HIM went live on 10/1/2013, to coordinate eligibility determination and transfer application information between the HIM and the Virginia eligibility and enrollment systemPartmerships with other state- based organizations.HBE Level 1 Establishment GrantThe Department of Medical Assistance Services was awarded a groportunity Number: IE-HBE-12-001, CFDA: 93.525 of approximately 94.3 million in February 2013 to continue planing and development for a state-based Health Benefits Exchange. As the Exchange was not authorized by the marketing and OutreachPartmerships with other state- based organizations.Project Phase: Execution and Control	Project Description		State vs. Contractor Resource Use	Status
ABEa Level One Exchange Establishment Grant (Funding Opportunity Number: IE-HBE-12-001, CFDA: 93.525) of approximately \$4.3 million in February 2013 to continue planning and development for a state-based Health Benefits 	<ul> <li>requires each state (or the federal government acting on behalf of each state) to support HBE business services to facilitate the purchase and sale of "qualified health plans" (QHPs) in the individual market in the state and to provide for the establishment of a Small Business Health Options Program (SHOP Exchange) to assist qualified small employers in the state in facilitating the enrollment of their employees in QHPs offered in the small group market.</li> <li>Level 1</li> <li>Level 1</li> <li>Virginia deferred to the federal government to operate and administer the HBE. To do this, the federal government established the Health Information Marketplace (HIM), working with Virginia's Bureau of Insurance to coordinate with insurers and evaluate their applications for QHPs that are offered through the HIM. The eHHR program interfaces with the HIM went live on 10/1/2013, to coordinate eligibility determination and transfer application information between the HIM and the Virginia eligibility and enrollment system</li> </ul>		2	Project Phase: Previously Completed
	Level 1 Establishment Grant Marketing and	a Level One Exchange Establishment Grant (Funding Opportunity Number: IE-HBE-12-001, CFDA: 93.525) of approximately \$4.3 million in February 2013 to continue planning and development for a state-based Health Benefits Exchange. As the Exchange was not authorized by the General Assembly, this funding has been repurposed and extended through 2015 to enable outreach and marketing activities to inform uninsured Virginia residents of the health insurance opportunities available through the Federal Health	•	Project Phase: Execution and Control

	Total Baseline Funding			\$654,406,199.26		
	(1) The BEC line only represents the Federal share of project expenses. The BEC must also match 10% of total costs					

#### **Table 2 - Project Expenditures**

(1) The REC line only represents the Federal share of project expenses. The REC must also match 10% of total costs.

(2) This is a budget item that accounts for the DMAS required work to support the E&E projects and related MMIS enhancements.

(3) Planned expenditures are based on the amounts projected in the CMS approved HIT and E&E I-APD-U.

(4) Funding Approved and Planned Expenditures are based on the projections through sunset of the program in 2020.

### **3.3.** Medicaid Information Technology Architecture (MITA)

The Department of Medicaid Assistance Services completed a MITA state self-assessment effort as required by CMS to continue enhance funding. This process ensures strategic alignment is maintained between Virginia and federal direction.
