The Honorable Terence R. McAuliffe
Governor of Virginia
Office of the Governor

Dear Governor McAuliffe:

As required by§ 3.2-309 of the Code of Virginia, enclosed is the biannual report for the Governor's Agriculture and Forestry Industries Development (AFID) fund covering January 1, 2017 through June 30, 2017. The report includes details on all new projects awarded AFID Facility and Planning grants and updates on previously awarded Facility grant projects.

Should you have any questions regarding this submission, please do not hesitate to contact me.

Sincerely,

A handwritten signature in black ink that reads "Basil Gooden". The signature is written in a cursive style with a long horizontal flourish extending to the right.

The General Assembly created the AFID incentive program during the 2012 legislative session, funding it at \$1 million per year beginning in fiscal year (FY) 2013, with \$750,000 of each year's amount dedicated to AFID Facility Grants and \$250,000 to AFID Planning Grants. In FY 2015, amendments to the AFID program were approved by the General Assembly through Item 89 of the 2015 Appropriation Act (Chapter 665, 2015 Acts of Assembly). The amendments removed the budget language which specified a portion of the funding to be used for Planning Grants, so that both AFID Facility and Planning Grant programs draw upon the fund without restriction. For FY 2017, \$2,000,000 was appropriated to the AFID fund (Chapter 780, 2016 Acts of Assembly). In October 2016, the Governor approved a budget reduction plan that reduced the general fund amount deposited to the AFID fund by \$220,000, resulting in a total deposit of \$1,780,000 for FY 2017.

AFID Facility Grant Program

As of June 30, 2017, fifty (50) AFID Facility Grants have been awarded since the inception of the program, supporting a variety of agriculture and forestry based economic development projects. Of these, forty-six (46) have executed Performance Agreements between the localities and the companies and funds have been disbursed. Progress is being made in completing the Performance Agreements for the other awardees. Total AFID Facility Grant awards for these 50 projects amount to \$4,389,200. Of this amount, \$3,592,200 has been expended, with the balance of \$797,000 expected to be expended to projects already committed in the next six months. These 50 projects represent 1,546 new jobs and 218.4 Full-Time Equivalents (FTEs) across 35 localities, \$395,229,897 in new capital investments, and \$378,313,219 in new Virginia-grown purchases. These agribusinesses have, on average, committed to purchase from Virginia approximately 81% of all the additional agricultural and forest products they will use to meet their new value-added processing needs.

Since January, two projects were removed from the active list. In January, Relay Foods closed its Virginia location and made a full repayment of the AFID grant funds awarded. Also in January, VDACS was notified that Appalachian Mountain Spirits would not move forward with the project in Smyth County; no AFID grant funds were disbursed for this project.

Within the reporting period, two projects - Montague Farms and Shenandoah Processing - have successfully completed their performance period and met all targets. A total of three projects have successfully completed their award, resulting in \$11,806,623 in new capital investment, 429 new jobs, and \$152,143,719 in new Virginia-grown purchases.

The Secretary of Agriculture and Forestry and Virginia Department of Agriculture and Consumer Services (VDACS) continues to receive a great number of inquiries and expressions of interest into the program. In addition to the 50 announced projects, there are more than 40 in various stages of development and consideration by the Secretariat with the opportunity for multiple announcements to be made during the next six months.

For the second half of FY 2017, a total of \$848,000 was committed in AFID Facility Grant funds to assist nine (9) new and expanding projects in the Commonwealth, which represents the commitment of \$63,822,475 in new capital investment, 170 new jobs and 13 FTEs, and \$24,911,916 in new Virginia-grown purchases. These companies have, on average, committed to purchase from Virginia

approximately 77% of all the new agricultural and forest products they will use to meet their new value-added processing needs. Summaries of these projects organized by announcement date are listed below:

AFID Planning Grant Program

The AFID Planning Grant program was established to encourage localities to think strategically about how they can better support and integrate agriculture and forestry into their community’s overall economic development efforts. AFID Planning Grant applications are accepted on a rolling basis, allowing for applicants to work with the AFID Fund Coordinator to refine their project and submit stronger applications.

Since the inception of the AFID Planning Grant, \$750,597 has been awarded to 38 projects, directly impacting 58 unique localities. Of these funded projects, twenty-seven (27) have successfully completed activities.
