Dear Delegate Torian and Senator Howell:

I am pleased to submit the enclosed plan that summarizes the Virtual Virginia Program 2020-2021 model changes.

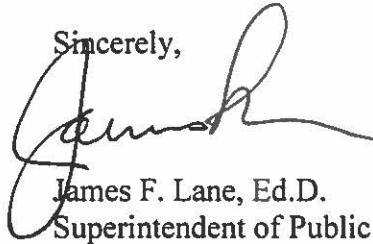

Item 136.C.23.e in the 2019 Appropriation Act directed the Department of Education (DOE) to develop a plan to establish a per-student, per-course fee schedule for local school divisions to participate in Virtual Virginia (VVA) courses. VVA offers access to blended learning resources, digital courses, and professional learning offerings to Virginia public school students and educators.

The DOE worked in partnership with VVA to create an updated plan that better supports the evolving needs and expectations of Virginia public school divisions. The plan will allocate 15 enrollment slots (per-student, per-course) to each Virginia public school division free of charge during the regular school year. If a school division requires additional enrollments, they may request more through the Expanded Enrollment Program. VVA course offerings will assist school divisions in meeting class needs, increase access during periods of fluctuating enrollment, and provide access to a wide online course selection.

## INTRODUCTION

The Virginia Department of Education's Virtual Virginia Program ("VVA") offers online courses, digital content, and professional learning opportunities to Virginia's students and educators. VVA promotes equitable access to rigorous courses, high-quality instruction, and blended learning resources for schools in the Commonwealth as well as across the nation. VVA also provides educational options to all learners, including underserved populations, as a complement to local public school offerings.

VVA works in partnership with Virginia public school divisions to facilitate access to courses, content, and professional learning opportunities that may otherwise be unavailable due to a variety of circumstances, including but not limited to low enrollment, scheduling conflicts, or a lack of highly qualified instructors in specific subject areas. One of VVA's core commitments is to provide academic flexibility while preserving the autonomy of Virginia public school divisions in meeting the varied schedules, needs, and expectations of learners. All learners enrolled in VVA courses remain affiliated with their local schools and remain part of their schools' membership.

During its 2019 session, the General Assembly directed the Department to develop the **2020-2021 Virtual Virginia Program Plan**.

Item 136.C.23.e in the 2019 Appropriation Act:

The Department of Education shall develop a plan to establish a per-student, per-course fee schedule for local school divisions to participate in Virtual Virginia (VVA) coursework for elementary, middle, and high school students. Such fee schedule plan shall provide (i) an allotment of slots, determined by the Department, per course to a school division free of charge, and (ii) for any slots a school division wishes to use beyond the free slots, a per-course, per-student fee that may include discounts for school divisions based upon the composite index of local ability to pay. The department shall also include in its plan the current student participation enrollment by grade level in each VVA course, the number of students enrolled in VVA courses that a fee of any kind is charged and how such fee is currently paid for in each participating school division.

In addition to responding to the requirements set forth in the 2019 Appropriation Act, the 2020-2021 Virtual Program Virginia Plan was an opportunity to evaluate the existing program model. The Department worked in partnership with Virtual Virginia to create an updated plan that better supports the evolving needs and expectations of Virginia public

school divisions. Among some of the central concerns were: securing access to VVA courses and content for schools and school divisions most in need of instructional and professional support; easing the fiscal and administrative costs of limited enrollment for school divisions that need to fill specific vacancies; and, ensuring course selection and availability continues to expand to meet the demand of participating school divisions. As such, revisions to the plan took into account equitable access to VVA courses, meeting targeted needs, and cost-cutting solutions, as well as VVA's fiscal and programmatic capacity. The Department will implement the new per-student, per-course fee schedule in the 2020-2021 school year.

## CURRENT 2019-2020 VVA PROGRAM PARTICIPATION MODEL

In the 2019-2020 VVA configuration, access to blended learning resources, digital content, and professional learning offerings are provided to Virginia public school students and educators at no cost to the school or the division, based on a free enrollment allotment schedule. Each Virginia public school may enroll up to 15 students per-course in 83 online courses (per-student, per-course) with no enrollment fee during the regular school year. The VVA free allotment of course enrollments are provided on a first-come, first-served basis pending available openings in each course. If a public school requires additional enrollments beyond the 15 per-course allotment or beyond the number of free enrollments supported by the current appropriation, they may request more through the Expanded Enrollment Program (see **Appendix C** for current enrollment). The school is charged a per-student, per-course enrollment fee, based on the school division's Local Composite Index (LCI) band, and schools pay this fee using their state and local appropriation. The 2019-2020 Expanded Enrollment fee schedule:

	BAND I	BAND II	BAND III	BAND IV**
LCI*	.2000– 2999	.3000– 5999	.6000– 8000	N/A
ENROLLMENT FEE	\$250	\$300	\$350	\$375

\* Local Composite Index

\*\* Virginia private school, homeschooled, out-of-state, and international enrollments

Virginia private school, homeschooled, out-of-state, and international students are charged a \$375 per enrollment fee (per-student, per-course) for all regular school year courses (see **Appendix B** for current 2019-2020 fee-based private school, homeschooled, and out-of-state enrollment data). Summer Session 2020 course enrollment fees are \$375 per enrollment (per-student, per-course) for all enrollments, and Summer Session enrollment fees are covered by the student.

## CHANGES TO THE VVA COURSE ENROLLMENT PROCESS PER ITEM (i) AND ITEM (ii) IN THE 2019 APPROPRIATION ACT

### Change A - item (i)

The **2020-2021 Virtual Virginia Program Plan** provides that each Virginia public high, middle, and elementary school may enroll up to 15 students per course with no enrollment fees during the regular school year. Each division will have local discretion to enroll high, middle, and elementary school students. The per course, per division allotment will vary as the number of elementary, middle and high schools vary as the number of schools is different in each division. All Virtual Virginia free enrollments will be provided on a first-come, first-served basis pending available openings in each course. If a public school requires additional enrollments beyond the 15 per-course allotment or beyond the number of free enrollments supported by the current appropriation, they may request more through the Expanded Enrollment Program.

### Change B - item (ii)

The **2020-2021 Virtual Virginia Program Plan** will implement a new per-student, per-course fee schedule for any slots a school division requests beyond the 15 students per course allotment and any enrollment requests beyond the number of free enrollments supported by the current appropriation through the Expanded Enrollment Program. The Expanded Enrollment Program will further support Virginia public school divisions by helping to fulfill open staffing needs, complementing local course offerings, expanding and diversifying local course offerings, and meeting fluctuating annual enrollment needs. The school division Expanded Enrollment fee, per-course, per-student, is based upon the school division's LCI, as indicated in the 2020-2021 Expanded Enrollment fee schedule below.

	BAND I	BAND II	BAND III**

## **IMPACT OF THE 2020-2021 PROPOSED MODEL ON LOCAL SCHOOL DIVISIONS**

VVA is exemplary among its state virtual course counterparts in that it provides a free enrollment allotment to public school divisions. Many of the other state virtual programs charge enrollment and other fees for every registrant. While VVA remains committed to promoting access to high-quality content and instruction through free enrollment allotments for each school division, in order to create a sustainable and equitable model inclusive of elementary, middle and high schools, more schools and divisions may be required to participate in the Expanded Enrollment plan to guarantee the same number of enrollment seats. However, the Expanded Enrollment program may ultimately serve as a cost-saving solution for those school divisions adapting to fluctuating student enrollment or unable to staff certain courses. Additionally, in those areas where high-quality instructors are unavailable, these divisions can still provide access to a wide course selection for its students.

## APPENDIX A

Appendix A includes data reflecting current student participation enrollment by grade level for the current 2019-2020 school year. This table lists course enrollment by grade level for the 2019-2020 school year as of November 11, 2019. Enrollment for Spring 2020 was still open at the time of reporting. Current locally instructed blended learning and digital content enrollment is provided in aggregate in the last row of the table.
