of Emergency Management

November 23, 2021

Dear Reader,

On behalf of the Virginia Department of Emergency Management, thank you for your patience with the additional time needed for the submission of our annual reports. Since January 2020, our small team of around 150 teammates has been working 24/7/365 serving our citizens and visitors across the Commonwealth through dozens of natural and humanmade disasters and large-scale events. This includes several significant rallies, flooding events, civil unrest, COVID-19 testing and vaccinations, inauguration, the Capitol riot, a cyber attack on critical infrastructure, hundreds of protests, repatriation, winter weather, hurricane season, and numerous other high-profile and impactful incidents. My agency is ready to help, and here to serve. Thank you.

Respectfully,

A handwritten signature in black ink, appearing to read "Curtis C. Brown".

Curtis Brown, State Coordinator

November 23, 2021

MEMORANDUM & COVER LETTER

TO: The Honorable Ralph S. Northam, Governor
The Honorable Janet D. Howell, Chairperson of the Senate Finance and
Appropriations Committee
The Honorable Luke E. Torian, Chairperson of the House Appropriations
Committee
Daniel Timberlake, Director of the Department of Planning and
Budget

VIA: Brian J. Moran, Secretary of Public Safety and Homeland Security
Shawn Talmadge, Deputy Secretary of Public Safety and Homeland Security

FROM: Curtis Brown, State Coordinator

SUBJECT: Sum Sufficient Executive Order Report

The attached report addresses the requirements Budget Bill – HB30 (Chapter 1289) (G) the Sum Sufficient Executive Order.

Sincerely,

A handwritten signature in black ink, appearing to read "Curtis Brown".

Curtis Brown, State Coordinator

Virginia Department of
Emergency Management

Sum Sufficient Executive Order Report

November 23, 2021

Introduction

The Sum Sufficient Executive Order (S2EO) was developed as a result of Budget Bill – HB30 (Chapter 1289) (G) which requires VDEM to:

- (1) review disasters over the previous six years for which sum sufficient funding was authorized under Item 55 of this act, and categorize disasters into general types, such as tornadoes, hurricanes of various categories, flooding, etc;*
- (2) for local financial assistance authorized under § 44-146.28 of the Code of Virginia, the report shall also detail the state and local share of spending on those events; and*
- (3) propose model executive orders to authorize funding from the sum sufficient authority provided in Item 55 of this act for each respective type of disaster event, based on reasonable state share, in consideration of the data collected pursuant to this paragraph.*

Costs and disaster data associated with Governor’s Executive Orders for Emergency Declarations from March 2015 – June 2020 were provided from VDEM’s grants management system, vdem.emgrants.com. These disasters were broken down into disaster types to include flooding, tropical storms, civil unrest, winter storms, and windstorms. The disasters were further categorized into localized or widespread events, as no two disaster events have the same impact. It should be noted that a storm of hurricane strength when it passed over Virginia, has not occurred since 1933.

For these disasters identified, state and local costs were included. For disasters that ended up being declared major disasters by the President, the state share of sum sufficient required under § 44-146.28 of the Code of Virginia was included. For costs to support the Virginia Emergency Operations Center and the Department of Military Affairs, the full costs were included regardless of federal assistance to represent the requirement of the state to expend these costs first and then seek reimbursement. This report does not include sum-sufficient amounts associated with COVID-19, as this is an ongoing disaster and numbers are not finalized.

The Sum Sufficient Executive Order Model (S2EOM) was developed Old Dominion University’s Virginia Modeling, Analysis, and Simulation Center to assess the Commonwealth of Virginia’s historical disaster data from March 2015 – June 2020. S2EOM provides an analytic budget rationale for future disaster executive orders (EO). It should be noted that six years is a limited sample size for disaster costs, and is not a representation of what future disaster costs may be. For example, during this period, Virginia has not experienced a Category 1 Hurricane or higher. The estimates for future events are based on historical disaster data from 2015-2020. S2EOM is comprised of a compounding inflation calculator, disaster database, model views, and visuals. Each disaster is tied to a Governor’s Executive Order for a Declaration of Emergency.

Sum Sufficient Summary

Tables 1-3 show the Sum Sufficient Balances Summary Expenditures through June 2020. It is organized by disaster types catastrophic, large, medium and small EO declarations. Based upon previous disasters, the New EO authorization are shown in the columns for VDEM and DMA. Authorized amounts will be reassessed on a quarterly basis and excess authorization will be relinquished as more accurate disaster estimates become available.

Table 1 Total State Expenditures for VDEM, DMA, Other State Agencies and Total

LARGE	2,750,000 - 11,999,999
MEDIUM	1,000,000 - 2,750,000
SMALL	350,000 - 999,999

VIRGINIA DEPARTMENT OF EMERGENCY MANAGEMENT

Hurricanes/Tropical Storms: ranged from small to Catastrophic (\$265,817 - \$35,323,068). Costs for this disaster type corresponds with the overall threat that the Commonwealth is facing at the time, with Hurricane Florence forecasted to be a Category 4 storm with two-thirds of the state receiving 15 inches of rain. Storms like Dorian were near misses on the Eastern Shore. Had Florence continued on the forecast, the costs would have increased exponentially.

Civil Unrest: ranged from small to medium (\$450,117 - \$2,634,788) depending on the size and scope of the event.

Winter Storms: ranged from small to large (\$100,391 - \$4,455,732) depending of how widespread the storm was. Also of significance, is that if historic snowfalls occurred – federal assistance was made available, which is why Jonas in 2016 was a large event.

Tornado: both events were small (\$352,189 - \$623,217), however costs were low to do the isolated nature of the tornados and the fact that they impacted mostly private structures (not public infrastructure).

Inland Flooding: all events were small (\$80,224 - \$408,815), and just as with tornados the impacts were mostly to private property, however future events could be much higher.
