Dear Governor Youngkin:

Section 56-585.1:3 of the Code of Virginia (the "Community Solar Statute") establishes, among other things, the parameters for the development of community solar pilot programs. Appalachian Power Company, defined as a "participating utility" by the Community Solar Statute is required to "report on the status of its pilot program, including the number of subscribing customers, to the Governor, the Commission, and the Chairmen of the House Committee on Labor and Commerce and the Senate Committee on Commerce and Labor the earlier of (i) three years after the date a customer of the participating utility first subscribes to its pilot program or (ii) July 1, 2022."

As required by the Community Solar Statute, Appalachian issued a Request for Proposals (RFP) for a solar facility to dedicate to its pilot program. Unfortunately, the facility that Appalachian selected through the RFP in 2017, and dedicated as the source of the solar energy to be consumed by subscribing customers, only came online in the past month, due to myriad delays. Accordingly, Appalachian has not yet been able to implement a pilot program, but commits to do so over the coming months.

Please do not hesitate to reach out with any questions.

Sincerely,

A handwritten signature in black ink, appearing to read "Noelle J. Coates".
