Mental Illness in Jails Report

Compensation Board

November 1, 2019

Compensation Board Mental Illness in Jails Report (2019)

Authority:

Virginia Acts of Assembly, 2019, Chapter 854

Item 67 J.1. "The Compensation Board shall provide an annual report on the number and diagnoses of inmates with mental illnesses in local and regional jails, the treatment services provided, and expenditures on jail mental health programs. The report shall be prepared in cooperation with the Virginia Sheriffs Association, the Virginia Association of Regional Jails, the Virginia Association of Community Services Boards, and the Department of Behavioral Health and Developmental Services and shall be coordinated with the data submissions required for the annual jail cost report. Copies of this report shall be provided by November 1 of each year to the Governor, Director, Department of Planning and Budget, and the Chairmen of the Senate Finance and House Appropriations Committees."

Executive Summary:

In the month of June, 2019 the Commonwealth of Virginia supported 59 local and regional jails and jail farms. Of this number, there are 24 county jails, 12 city jails, 22 regional jails and 1 jail farm. City and county jails are operated under the authority of the sheriff in that locality. An appointed superintendent operates the jail farm under the authority of the locality it serves. Regional jails are operated under the authority of a regional jail board or authority consisting of at least the sheriff and one other representative from each participating jurisdiction.

A survey to identify mental illness in Virginia jails was initially developed by staff of the Department of Behavioral Health and Developmental Services (DBHDS), staff of the Senate Finance Committee, and staff of the Compensation Board. The Compensation Board distributed a mental health survey in June 2019 for completion by local and regional jails. With the support of the Virginia Sheriffs' Association and the Virginia Association of Regional Jails, the Compensation Board received surveys from 57 out of 59 local and regional jails, excluding Charlotte County Jail and Sussex County Jail. The data in this report is as provided to the Compensation Board by local and regional jails in their 2019 mental health surveys, submitted as of August 5, 2019

The goal of the survey is to provide information regarding the incidence of mental illness among individuals incarcerated in Virginia jails, characteristics of this population and methods by which jails seek to manage mental illness within their facility. Survey questions directed jail personnel to report data for the month of June 2019, with the exception of treatment expenditures which were reported for the entire fiscal year (July 1, 2018 – June 30, 2019).

There were no significant changes to the survey instrument this year. Although the report includes statistics on the average daily population of federal and out of state inmates housed in jail this year, the data regarding inmates with mental illness is reflective only of local and state responsible inmates housed in local and regional jails.

Acknowledgement:

The Compensation Board would like to express its appreciation to the Sheriffs, Regional Jail Superintendents, and all jail staff involved in the collection and reporting of the data requested in the 2019 Mental Health Survey. The Board and Staff are thankful for the cooperation and efforts of jail leadership and staff in this reporting process.

Note: Charlotte County Jail did not respond to the survey; their average daily population in June, 2019 was 63. Sussex County Jail did not respond to the survey; their average daily population in June, 2019 was 53.

Survey Background

The Compensation Board developed a mental illness survey for completion by all local and regional jails, requesting statistical information for the month of June, 2019. Information relating to screening and assessment, diagnoses, housing, and most serious offense type of mentally ill inmates was collected by the survey instrument. The survey also collected data regarding inmates' access to mental health programs and assistance in the facility, including medication and treatment services. Additionally, the survey is used to identify the providers of screening/assessment and treatment in each facility, whether they are private mental health professionals, Community Services Board (CSB) staff, or jail staff. Jails also reported how inmate mental health data is collected and stored, as well as the amount of mental health and/or Crisis Intervention Team training provided to the jail staff, if any. Finally, jails were asked to provide the fiscal year cost of all mental health services and medications.

Data gleaned from surveys of 57 out of 59 local and regional jails is included in this report. A copy of the survey instrument is included in Appendix A.

Population & Demographics in Jails

Based upon data contained within the Compensation Board's Local Inmate Data System (LIDS) for the month of June, 2019 there was an average daily inmate population (ADP) of 27,964 in jails in the Commonwealth of Virginia (2 jails are excluded from this report, and their inmate populations are excluded from this number). Of these, 6,241 were state responsible (SR) inmates. A state responsible (SR) inmate is any person convicted of one or more felony offenses and (a) the sum of consecutive effective sentences for felonies, committed on or after January 1, 1995, is (i) more than twelve months or (ii) one year or more, or (b) the sum of consecutive effective sentences for felonies, committed before January 1, 1995, is more than two years. An additional 20,027 were local responsible (LR) inmates. A local responsible (LR) inmate is any person arrested on a state warrant and incarcerated in a local correctional facility prior to trial, any person convicted of a misdemeanor offense and sentenced to a term in a local correctional facility, any person convicted of a felony offense on or after January 1, 1995 and given an effective sentence of (i) twelve months or less or (ii) less than one year, or any person convicted of one or more felony offenses committed before January 1, 1995, and sentenced to less than two years. A further 157 inmates were local ordinance violators. Unlike SR and LR offenders, who have been arrested on a state warrant, offenders held for ordinance violations have been arrested on a local warrant, having been charged with an offense specific to that locality which may or may not also appear in the Code of Virginia. The remaining 1,539 of the ADP were federal and out of state inmates; however, these inmates are not included in the jails' reporting or in the analysis of any statistics in this report. Therefore, the average daily population included for analysis in this report is 26,425.

Of these 26,425 inmates, 44.89% were pre-trial and 55.11% were post-conviction. Pre-trial refers to inmates held in a local or regional jail awaiting trial. Post-conviction refers to inmates who have been found guilty of one or more criminal charges, with or without additional pending charges, and are serving sentence in the jail or awaiting transfer to a Department of Corrections (DOC) facility. Of the 26,425 ADP, 16.78% were female, 83.22% were male and less than one percent were an unspecified gender.

Table 1: Jail Population Percentages-Average Daily Population

| Year | Pretrial | Post-Con | Female | Male |
|------|----------|----------|--------|------|
| 2019 | 45% | 55% | 17% | 83% |
| 2018 | 43% | 57% | 16% | 84% |
| 2017 | 42% | 58% | 17% | 83% |
| 2016 | 40% | 60% | 16% | 84% |
| 2015 | 40% | 60% | 15% | 85% |
| 2014 | 39% | 61% | 14% | 86% |
| 2013 | 34% | 66% | 13% | 87% |
| 2012 | 32% | 68% | 14% | 86% |

From this point forward in the report, statistics will be noted that refer to the percentages of certain populations that are mentally ill. Where these statistics are cited, staff has calculated percentages using individual inmate counts, not the average daily inmate population. The annual survey submitted by jails requires them to indicate the number of individual inmates mentally ill within their facility for a specific month. To most accurately make comparisons between this population and the general population, individual inmate counts within the jails for the same time period are required. The following are the counts of the general population used to calculate mental illness percentages in the following section: Total, 36,014; Female, 6,324; Male, 29,663; and Unspecified, 27.

Note: The population count used to calculate mental illness percentages is the number of inmates confined long enough to have received a comprehensive mental health assessment by a qualified mental health professional, should a screening indicate that an assessment was necessary. The determination of whether or not an inmate was confined long enough to have been assessed is made based upon each jail's answer to question 14 of the survey, which asks the average length of time to conduct a comprehensive mental health assessment once one is determined by screening to be needed.

Note: Total General Population Inmate Count = 47,659; Projected General Population Inmate Count Incarcerated long enough to be assessed = 36,014

Note: The total inmate count includes inmates counted one time for each jail in which they were held during the month of June, 2019.

Note: Total General Population Inmate Count does not include the individuals incarcerated in the Charlotte County Jail or Sussex County Jail

Mental Illness Statistics

Mental illness is defined as an individual who has been diagnosed with schizophrenia or a delusional disorder, bi-polar or major depressive, mild depression, an anxiety disorder, post-traumatic stress disorder (PTSD), or any other mental illness as set out by the Diagnostic & Statistical Manual of Mental Disorders (DSM-V), published by the American Psychiatric Association, or those inmates who are suspected of being mentally ill but have received no formal diagnosis.

Of the female population count, 2,738 (43.30%) were reported to be mentally ill. Of the male population count, 5,735 (19.33%) were reported as having a mental illness. Of the total general population count, 8,473 (23.53%) were known or suspected to be mentally ill.

Table 2 includes the percentage of the female/male general population diagnosed as mentally ill for the current as well as previous 7 years.

Table 2: Percentage of Female/Male and Total General Population with Mental Illness Using Inmate Counts

| Year | Female | Male | Total |
|------|--------|--------|--------|
| 2019 | 43.30% | 19.33% | 23.53% |
| 2018 | 34.48% | 16.74% | 19.84% |
| 2017 | 28.03% | 15.13% | 18.63% |
| 2016 | 25.79% | 14.35% | 16.43% |
| 2015 | 25.29% | 13.63% | 16.81% |
| 2014 | 20.87% | 12.43% | 13.95% |
| 2013 | 16.13% | 12.64% | 13.45% |
| 2012 | 14.40% | 10.35% | 11.07% |
| | | | |

There were a total of 8,473 inmates known or suspected to be mentally ill in jails during the month of June, 2019. Of these mentally ill inmates, 32.31% were female and 67.69% were male, and 52.31% were pre-trial and 47.69% were post-conviction.

Table 3: Number of Inmates with Mental Illness

| Year | Num Inmates with MI | Female % | Male % | Pre-Trial % | Post-Con % |
|------|---------------------|----------|--------|-------------|------------|
| 2019 | 8,473 | 32.31% | 67.69% | 52.31% | 47.69% |
| 2018 | 7,852 | 30.50% | 69.50% | 52.67% | 47.33% |
| 2017 | 7,451 | 31.14% | 68.86% | 52.01% | 47.99% |
| 2016 | 6,554 | 28.75% | 71.25% | 48.95% | 51.05% |
| 2015 | 7,054 | 29.43% | 70.57% | 45.92% | 54.08% |
| 2014 | 6,787 | 27.04% | 72.96% | 49.90% | 50.10% |
| 2013 | 6,346 | 27.80% | 72.20% | 48.12% | 51.88% |
| 2012 | 6,322 | 23.16% | 76.84% | 47.33% | 52.67% |
| 2011 | 6,481 | 28.30% | 71.70% | 45.55% | 57.66% |
| 2010 | 4,867 | 26.81% | 73.19% | n/a | n/a |
| 2009 | 4,278 | 27.07% | 72.93% | n/a | n/a |
| 2008 | 4,879 | n/a | n/a | n/a | n/a |

Note: Beginning with the 2014 Mental Illness in Jails Survey, mental illness percentages were calculated using inmate counts, and not average daily populations. In Table 2, 2013 and 2012 have been recalculated using counts instead of ADP.

While an inmate may have multiple diagnoses each inmate is counted only once, in the category of the most serious illness for which they have been diagnosed. Figure 1 reflects the number of mentally ill inmates housed in June, 2019 and the type of disorder.

Figure 1: Number & Diagnoses of Inmates with Mental Illness

Figure 2 shows the number and percentage that each mental illness represents in both the Female and Male mentally ill populations.

Figure 2: Number & Percentage of M/F Mentally III Population Diagnoses

| | Schizo/ Delusional | Bi- Polar/Major Depressive | Mild Depression | Anxiety Disorders | PTSD | Other Mental Illness | Mentally Ill w/no Diag |
|--------|-----------------------|----------------------------------|--------------------|----------------------|--------|----------------------------|------------------------------|
| Female | 205 | 857 | 380 | 351 | 291 | 459 | 195 |
| Male | 813 | 1523 | 674 | 684 | 417 | 1032 | 592 |
| Female | 7.49% | 31.30% | 13.88% | 12.82% | 10.63% | 16.76% | 7.12% |
| Male | 14.18% | 26.56% | 11.75% | 11.93% | 7.27% | 17.99% | 10.32% |

 A diagnosis of bi-polar/major depressive continues to be the most prevalent for both males and females. In this year's survey, a diagnosis of bi-polar/major depressive accounted for 28.09% of all reported mental illness. A serious mental illness includes diagnoses of schizophrenia/delusional, bi-polar/major depressive or post-traumatic stress disorder. Survey responses indicate that 48.46% of the mentally ill population and 11.40% of the general population have been diagnosed as having a <u>serious</u> mental illness.

Table 4: Percentage of the General Population with Mental Illness/Serious Mental Illness

| Year | Mental Illness | Serious Mental Illness |
|------|----------------|------------------------|
| 2019 | 23.53% | 11.40% |
| 2018 | 19.84% | 10.42% |
| 2017 | 18.63% | 9.55% |
| 2016 | 16.43% | 8.41% |
| 2015 | 16.81% | 7.87% |
| 2014 | 13.95% | 7.50% |
| 2013 | 13.45% | 7.53% |
| 2012 | 11.07% | 5.33% |
| 2011 | 12.08% | 5.99% |

Figure 3: Percentage and Number of Mentally III Populations by Region

| | Central Region | Western Region | Eastern Region |
|---|-------------------|-------------------|-------------------|
| Number of Mentally Ill inmates in Region | 3,122 | 3,040 | 2,311 |
| Percentage of Total MI Pop by Region | 36.85% | 35.88% | 27.27% |
| Percentage of Mentally Ill inmates in Region w/ Serious MI | 52.79% | 36.94% | 57.77% |
| Percentage of Mentally Ill inmates in Region Pretrial | 52.85% | 47.76% | 57.79% |
| Percentage of Mentally Ill inmates in Region Post-Conviction | 41.99% | 34.24% | 42.41% |

Note: Regional percentages of the total ADP: Central, 38.09%; Western, 31.94%; Eastern, 29.97%.

Note: The percentage of mentally ill inmates in the total general population without excluding inmates which the jails indicated would typically not have been assessed due to release prior to having received a comprehensive mental health assessment, would have been 17.78%. The percentage of seriously mentally ill inmates in the total general population without excluding inmates which the jails indicated would typically not have been assessed due to release prior to having received a comprehensive mental health assessment, would have been 8.62%

Screenings & Assessments

Mental Health Professionals

A Qualified Mental Health Professional (QMHP) is a person in the human services field trained and experienced in providing mental health services to individuals with mental illness. Within the scope of providers, a QMHP is one whose completed education curriculum allows them to assess and provide treatment but who is not licensed to diagnose or prescribe medications. For clarification purposes, in this report this unlicensed group of mental health professionals are referred to as QMHP.

A Licensed Mental Health Professionals (LMHP) is a mental health provider who is able to provide diagnostic as well as other mental health services, and these providers fall into two groups: LMHP's able to diagnose, treat and prescribe medication include psychiatrists, licensed medical doctors and nurse practitioners; LMHP's who may diagnose and provide treatment but are unable to prescribe medication include clinical psychologists, licensed clinical social workers (LCSW), and licensed professional counselors (LPC).

Mental health treatment in jails may include collaboration amongst several provider types in order to ensure that all mental health needs of an individual are met.

Screening

The purpose of a mental health screening is to make an initial determination of an individual's mental health status, using a standardized, validated instrument. Language included in paragraph J.2., of Item 67, Chapter 854 (2019 Appropriation Act) requires that all local and regional jails to screen each individual booked into jail for mental illness using a scientifically validated instrument, provided that jail staff performing booking are trained in the administration of the validated instrument. The Commissioner of the Department of Behavioral Health and Developmental Services is charged with designating the instrument to be used for the screenings, and the instrument must be capable of being administered by a jail employee (that does not have to be a health care or mental health care provider). The Commissioner has designated the use of either the Brief Jail Mental Health Screen (BJMHS) or the Correctional Mental Health Screen (CMHS, for Women or for Men) as meeting the requirement of the language.

Questions are included in the survey to gather information regarding current screenings and results using the designated instruments. Fifty-six (56) jails specifically reported using the BJMHS, or CMHS to screen 20,352 and 2,501 inmates, respectively. One jail reported screening 549 inmates with the JSAT screening tool. Of these 23,405 screened inmates, jails report that 4,351 (22.80%) were referred for a comprehensive mental health assessment, however referral percentages varied widely with an average referral percentage of 19%.

Although jails confirm they are complying with the new standard it was noted that there are times when an inmate might not be screened. Jails noted that in June 2019, 952 inmates were not screened upon booking. Reasons most often given for an inmate not being screened are: intoxication, aggression toward intake officers, swift bonds, overnight court returnees and weekenders who were previously screened on their initial confinement.

Note: A copy of the Brief Jail Mental Health Screen and the Correctional Mental Health Screen (for Men and for Women) may be found in Appendices N and O.

Figure 4 shows the percentage of screenings conducted by each provider.

Figure 4: Provider of Jail Mental Health Screenings.

 $Note: "Other \ Health \ Professionals" \ includes \ psychiatrists, \ medical \ doctors, \ nursing \ staff, \ etc.$

Assessment

Dependent upon the results of an initial mental health screening, a comprehensive mental health assessment may also be conducted. A comprehensive mental health assessment is a review of a client's clinical condition conducted by a trained mental health or medical professional which provides an in depth determination of a person's mental health status and treatment needs.

- 56 jails, or 98.25%, reported conducting comprehensive mental health assessments on all inmates who receive a positive screening for mental illness.
- 1 jail, or 1.75%, reported conducting comprehensive mental health assessments only on inmates with acute symptoms of mental illness.
- 16 jails reported that their procedures are adjusted over the weekends or on holidays. Most of these jails reported that they do continue to screen during booking, but assessments are not conducted during the weekend unless jail staff deems it to be an acute case.
- All jails report that inmates displaying acute mental health crisis at initial screening are seen by a mental health or medical professional within 72 hours

As with initial screenings, the type of individual conducting comprehensive mental health assessments, as well as the method of assessment, differs between facilities. Jails identify that comprehensive mental health assessments are performed in their jail by either community services boards, by jail mental health staff (which include jail employees that are licensed medical or mental health professionals), or by other mental health professionals (which include private or contracted medical or mental health professionals such as psychiatrists, medical doctors, nursing staff, etc.), as shown in Figure 5.

Figure 5: Provider of Jail Comprehensive Mental Health Assessment.

The average number of hours an inmate is confined in jail before receiving a comprehensive mental health assessment, if needed, varies from jail to jail. Figure 6 reflects the percentage of jails that reported they typically conduct comprehensive mental health assessments within specific time periods from the initial mental health screening performed at the time of commitment.

It is reasonable to assume, based upon survey responses, that a certain percentage of the population, based upon their brief length of stay, would not be confined long enough to receive a comprehensive mental health assessment, even if a screening indicated assessment would be appropriate. To include these inmates in the general population count for the purpose of calculating percentages of the population that are mentally ill, could lead to understated statistics. To more accurately reflect the mental illness percentages of the general population, Compensation Board staff has removed from its calculations the general population count of all inmates from each jail for which that jail's response regarding average hours of confinement prior to assessment indicated that the inmate would not typically be incarcerated long enough to be assessed.

A comprehensive mental health assessment may be conducted by a Licensed Mental Health Professional (LMHP) or a non-licensed Qualified Mental Health Professional (QMHP). Although assessment by an LMHP following a positive screening would be preferable, many jails do not have the resources for a licensed professional to conduct each assessment. In such cases, a nonlicensed QMHP would measure the acuity of an inmate's symptoms and their additional needs, as well as determining priority of referral for diagnosis and/or psychotropic medication.

In addition to measuring the average time an inmate is confined before receiving a comprehensive mental health assessment, the survey also measures the average amount of time an inmate may wait between a comprehensive mental health assessment and an evaluation by a psychiatrist, doctor or nurse practitioner to determine further diagnosis and/or prescription needs. The time an inmate may have to wait between a comprehensive assessment and a clinical assessment, should one be needed, varies. These times may vary based upon jail mental health/medical staff resources as well as other factors such as breaks in confinement, court appearances (some of which may require overnight transfers to other jails), bond etc. Figure 7 reflects the percentage of

jails that reported they typically conduct clinical assessments within specific time periods from the time of comprehensive assessment.

Figure 7: Average Hours of Confinement between Mental Health Assessment and Clinical Mental Health Assessment

The path an inmate with mental health needs may take from screening to clinical diagnosis may be different depending on the acuity of their needs as determined by mental health staff, staff resources and offense specific circumstances (bond, court appearances, violence risk assessment).

Note: Responses for figure 6 and 7 are based upon the typical assessment time reported by jails in the survey. These assessment times do not take into account inmates who are in acute crisis.

Note: Roanoke City Jail and Virginia Beach City Jail did not respond to the question regarding typical confinement time until mental health assessment.

Veterans and Homeless

Relatively recent additions to the survey are questions regarding inmates' veteran and homelessness status. Collection of this data is a step toward quantifying a connection between mental illness and certain outside factors. The data regarding veteran and homelessness status is as reported to the jail by the inmates and not all jails currently collect this data. Therefore, these figures are likely an incomplete representation of the numbers of veterans and homeless individuals incarcerated in jails.

- Out of 847 inmates identifying themselves as veterans, 259, or 30.58%, were identified by the jail as having a mental illness. Of the veteran group, 181, or 21.37%, were identified by the jail as having a mental illness as well as a co-occurring substance abuse disorder.
- Out of 975 inmates identifying themselves as being homeless, 422, or 49.82%, were
 identified by the jail as having a mental illness. Of the homeless group, 275, or 32.47%,
 were identified by the jail as having a mental illness as well as a co-occurring substance
 abuse disorder.

Housing

The housing of mentally ill inmates differs from jail to jail.

- Twenty-three out of 57 reporting jails have mental health units or bed areas separate from the General Population. In these 23 jails, there are 160 beds for Females and 532 beds for Males.
- Jails reported that a total of 3,359 beds would be needed to house all inmates with non-acute mental illness in mental health beds or units, which would currently require 2,267 additional beds.
- Of the 7,611 identified mentally ill inmates, 821 were housed in isolation. 25 of the 44 jails that housed mentally ill inmates in isolated or segregated cells did not operate a Mental Health Unit (278 inmates). If a mental health unit existed in the facility, it is possible that these inmates may not have had to be housed in isolation.
- Twenty-one jails have noted that they would consider hosting a state-funded Mental Health Residential Treatment Program.

There is no state funded Mental Health Residential Treatment Program operating within jail facilities at this time.

A temporary detention order (TDO) may be issued by a court or magistrate if an individual meets the criteria as set out by § 19.2-169.6. and/or § 37.2-809. Prior to the issuance of a TDO an evaluation must be conducted by the local Community Services Board or their designee. Within 72 hours from the issuance of a TDO a hearing must be held to determine whether there is justification for a psychiatric commitment.

• A total of 10 inmates were housed in jails more than 72 hours following the issuance of a TDO during the month of June, 2019.

Mental Health Treatment Services Provided

Mental health treatment services offered, as well as providers of those services, differ from jail to jail. Some jails may have a full time psychiatrist or general practice physician (MD) to attend to mental health needs and dispense psychotropic medications; other jails may contract with an outside psychiatrist/general practice physician (MD) to provide services on certain days of each month, etc. Nursing staff may also provide mental health treatment.

Treatment Hours & Providers

In 2019, Community Service Boards (CSBs) were again reported to provide the most significant portion of mental health treatment in jails. Community Services Boards have a statutory requirement to evaluate inmates for whom a temporary detention order is being sought (§37.2-809), however they have no statutory obligation to provide treatment in the jail.

Although on average the CSB is the most often used provider of mental health treatment, use of the local CSB as the primary treatment provider is most prevalent in jails in the Central and Western Regions (see Appendix C for a list of jails). In the Eastern Region the largest overall provider of treatment is still private contractors. This may also be due to the budget and/or resource constraints of the local CSBs in those regions, or may be by preference of the local or regional jail. Community Services Boards are both state and locally funded so their ability to provide services may vary greatly.

Figure 8: Average Number of Treatment Hours per Type of Provider in June, 2019

| Provider | Average # of MH Trtmt Hrs Provided |
|-----------------------------|---------------------------------------|
| Psychiatrists | 29.42 |
| Medical Doctors | 5.63 |
| Jail Mental Health Staff | 12.27 |
| Community Services Board | 160.14 |
| Private Contractors | 57.12 |

| Provider | Central Region | Western Region | Eastern Region |
|----------------|-------------------|-------------------|-------------------|
| Psychiatrists | 35.22 | 27.12 | 27.25 |
| Medical | 33.22 | _,,, | |
| Doctors | 8.42 | 7.16 | .82 |
| Jail Mental | | | |
| Health Staff | 18.28 | .58 | 19.12 |
| Community | | | |
| Services Board | 361.06 | 97.53 | 14.94 |
| Private | | | |
| Contractors | 58.05 | 43.47 | 74.62 |

The information provided below is for the month of June, 2019.

- A total of 14,817 treatment hours were provided, including treatment by any provider included in Figure 7. This is significantly less than what was reported in 2018 (22,026).
- All data reflected in Figures 7, 8 and 9 and Tables 6 and 7 are for a mentally ill population of 8,473 plus a population of 3,907 inmates reported to have a substance abuse disorder without co-occurring mental illness.
- In addition to in-jail treatment, 33 jails reported providing follow-up case management for mentally ill inmates after their release from the jail. Hours related to follow-up case

management are not included in any figures in this section. Specific information regarding type of post-release assistance provided is not currently collected by the survey.

Figure 9 reflects the total hours of treatment given by provider types in all jails.

Figure 9: Treatment Provider

The 2019 five jails with the highest numbers of hours of treatment provided per mentally ill inmate for the month reported in the survey were: Loudoun County Jail (39:1; 1,225 hours), Alexandria City Jail (19:1; 2,869 hours), Newport News City Jail (6:1; 395 hours), Chesapeake City Jail (6:1; 747 hours), Middle Peninsula Regional jail (5:1, (231 hours).

The 2019 five jails with the highest number of hours of treatment provided for the month reported in the survey were: Alexandria City Jail (2,869), Fairfax County Jail (1,651), Loudoun County Jail (1,225), Southwest Va Regional Jail (904), and Arlington County jail (848).

Table 5: Historical Treatment Hours

| Year | Psychiatrist | MD | Jail MH Staff | CSB | Private Contractor |
|------|--------------|-----|---------------|--------|--------------------|
| 2019 | 1,648 | 315 | 687 | 8,968 | 3,199 |
| 2018 | 1,776 | 302 | 2,480 | 13,788 | 3,681 |
| 2017 | 1,663 | 468 | 1,467 | 12,353 | 4,635 |
| 2016 | 1,529 | 290 | 3,307 | 9,903 | 4,998 |
| 2015 | 1,411 | 235 | 1,246 | 4,810 | 6,061 |
| 2014 | 1,125 | 309 | 1,715 | 5,649 | 3,700 |
| 2013 | 1,235 | 212 | 2,667 | 5,935 | 6,744 |
| 2012 | 1,316 | 406 | 1,436 | 7,204 | 7,013 |
| 2011 | 1,160 | 260 | 4,286 | 6,681 | 5,351 |
| 2010 | 1,309 | 202 | 2,666 | 4,760 | 2,484 |
| 2009 | 1,008 | 229 | 2,673 | 9,336 | 2,163 |
| 2008 | 251 | 100 | 520 | 1,872 | 935 |

Figure 10 shows the percentage that each provider comprises of the total treatment hours reported.

Figure 10: Providers of Treatment

Table 6: Historical Percentage of Treatment by Provider

| Year | Psychiatrists | MD | Mental Health Staff | Private Contractors | CSB |
|------|---------------|----|---------------------|---------------------|-----|
| 2019 | 11% | 2% | 5% | 22% | 61% |
| 2018 | 8% | 1% | 11% | 63% | 17% |
| 2017 | 8% | 2% | 7% | 23% | 60% |
| 2016 | 8% | 1% | 18% | 25% | 49% |
| 2015 | 10% | 2% | 9% | 44% | 35% |
| 2014 | 7% | 2% | 10% | 23% | 58% |
| 2013 | 7% | 2% | 16% | 40% | 35% |
| 2012 | 8% | 2% | 8% | 40% | 42% |
| 2011 | 7% | 1% | 24% | 30% | 38% |
| 2010 | 11% | 2% | 23% | 22% | 42% |
| 2009 | 7% | 1% | 18% | 14% | 61% |

Note: Western Virginia Regional Jail notes that their decrease in reported mental health treatment hours is primarily due to an increase in programs that are open to the general population or specific subsections of the population, not just the mentally ill. Such as programs that teach general life skills, anger management, behavioral modification and religious studies.

Note: Prince William-Manassas City Jail data was excluded from this section. The jail feels that there was an error in reporting this year,

but was unable to provide corrected numbers at this

Treatment Services

An inmate may receive multiple types of treatment. Treatment may be given by any of the providers referenced previously in Figure 7 (psychiatrists, medical doctors, jail mental health staff, community services board, private contractors). Treatment includes any individual/group counseling or substance abuse services, but does not include dispensing of medication.

Fifty five (55) of the 57 reporting jails provided data on the number of inmates receiving treatment services in the categories shown below in their facilities. All inmate numbers reflected in Figures 10, 11, and 12 are from a general population of 34,691, a mentally ill population of 8,313 and a population of inmates with substance abuse without mental illness of 3,878

 7,490 inmates were reported to receive a type of mental health or substance abuse treatment during the month of June, 2019 (indicating some inmates received multiple types of treatment).

Figure 11: Type of Treatment Provided

Not all facilities provide all of the above services.

Figure 12: Hours of Treatment Provided by Region

| | Central Region | Western Region | Eastern Region |
|-----------------------|-------------------|-------------------|-------------------|
| Individual Counseling | 2407 | 383 | 1279 |
| Group Counseling | 2913 | 389 | 30 |
| Group Substance Abuse | | | |
| Treatment | 2351 | 416 | 1274 |
| Other MH Treatment | 945 | 40 | 118 |

Figure 13: Type of Service Percentage by Number of Inmates Treated

Note: Piedmont Regional Jail and Meherrin River Regional Jail did not respond to the question regarding types of treatment

Medication

Some inmates with mental illness require the assistance of psychotropic medications. Psychotropic refers to mood altering drugs which affect mental activity, behavior, or perception. Often these medications are provided and dispensed by the jail. However, as noted in the survey, there are certain medications that some jails do not provide. In certain cases an inmate's medication may be delivered to the jail by a 3rd party, such as a physician treating the offender pre-incarceration, or a family member authorized by the jail to bring the necessary prescribed medication.

Psychotropic medications are broken down into 4 categories: antipsychotic, mood stabilizer/anticonvulsant, anti-depressant and anti-anxiety.

- Antipsychotic medications include drugs such as: Haldol, Zyprexa, Risperdal, Seroquel, Triliafon, Prolixin, Thorazine, Abilify, Geodon, Clozaril
- <u>Mood Stabilizer/Anticonvulsant</u> medications include drugs such as: Depakote, Lithium, Tegretal, Topamax, and Trileptal
- Anti-depressant medications include drugs such as: Prozac, Zoloft, Lexapro, Wellbutrin, Paxil, Elavil, Pamelor, and Desyrel
- Anti-anxiety medications include drugs such as: Ativan, Xanax, Librium and Valium

During June, 2019 there were 11,050 prescriptions for psychotropic medications being dispensed in local and regional jails. The number of medications administered may exceed the number of inmates receiving treatment, as an inmate may be taking more than one medication. There were 375 less distributed medications reported in 2019 than in 2018 (10,675). It has been noted by several jails that it is less expensive to provide mentally ill inmates medication than it is to provide treatment services.

7,794 total <u>inmates</u> were dispensed psychotropic medications This number will not equal the number of medications dispensed as an inmate may be prescribed more than one. 56 out of 57 jails responded to this question.

A total of 1,553 jail inmates with mental illness refused psychotropic medication. This is 23.70% of the mentally ill population. In the 2019 survey, jails were asked to report their procedure when an inmate refuses medications. Responses varied, but the most commonly reported actions taken were: require the inmate to sign a refusal form; refer the inmate to the psychiatrist or other qualified mental health professional for counseling; and monitor inmate for changes in behavior.

Jails have historically had no legal authority to administer medications over an inmate's objections, however, HB1933 of the 2019 legislative session was approved effective July 1, 2019, establishing a process for the sheriff or jail administrator to petition a court to authorize medical or mental health treatment for an inmate who is incapable of giving informed consent for treatment. The approved process parallels the existing process for the Director of the Department of Corrections to seek authorization to provide involuntary treatment to prisoners in state correctional facilities.

Table 7: Historical Trend of Medications Dispensed

| Year | Number of Medications Dispensed |
|------|---------------------------------|
| 2019 | 11,050 |
| 2018 | 10,675 |
| 2017 | 11,547 |
| 2016 | 10,723 |
| 2015 | 11,052 |
| 2014 | 8,894 |
| 2013 | 9,316 |
| 2012 | 6,576 |
| 2011 | 6,490 |
| 2010 | 6,274 |
| 2009 | 5,746 |
| 2008 | 4,965 |

Figure 14: Number and Type of Psychotropic Medications Dispensed

Figure 15: Percentage of Psychotropic Medication Dispensed by Type

The 2019 top five distributors of psychotropic medications for the month reported in the survey were: Hampton Roads Regional Jail (1380) Virginia Beach City Jail (1,280) Norfolk City Jail (537), and Southwest Va Reg Jail (488) Northwestern Va Reg Jail (428).

The 2019 five distributors of the highest ratio of psychotropic medications per mentally ill inmate for the month reported in the survey were: Albemarle-Charlottesville Regional Jail (3.9:1); New River Valley Regional Jail (2.8:1); Hampton Roads Regional Jail (2.7:1); Western Tidewater Regional Jail (2.6:1); and Loudoun CountyJail (2.4:1)

Note: Fauquier County Jail reported the number of medications dispensed, but did not report the number of inmates receiving medications.

Substance Abuse/Special Education

- Of the 8,473 inmates with mental illness, 3,558 had a co-occurring substance use/abuse disorder, or about 42% of the mentally ill jail population.
- Those inmates with co-occurring mental illness and substance use/abuse disorder comprised 9.88% of the general jail population.
- 3,907 inmates <u>without</u> mental illness were reported to have substance use/abuse disorders, representing about 10.85% of the general population.
- As illustrated earlier in Figure 13, 35% of all inmates receiving jail provided treatment services are receiving group substance abuse treatment.

The general population inmate count used to calculate the percentages of mental illness and substance abuse in this section is 36.014.

Federal regulations mandate that all correctional facilities provide access to special education for inmates. During the month of June, 2019, 106 inmates were receiving special education.

Note: The population counts used to calculate mental illness percentages are the number of inmates confined long enough to have received a comprehensive mental health assessment by a qualified mental health professional, should a screening indicate that an assessment was necessary. The determination of whether or not an inmate was confined long enough to have been assessed is made based upon the jails answer to question 25 of the survey.

Mental Illness & Offense Type

For each inmate identified as mentally ill, jails were asked to note the most serious offense type on which the offender was held. The following are the offense types, listed in order of severity: violent felony, drug felony, non-violent felony, violent misdemeanor, drug misdemeanor, and non-violent misdemeanor. Most serious offense classification is based on the most serious offense with which an inmate is currently charged, and not necessarily of which the inmate is ultimately convicted.

Of the 8,473 inmates with mental illness, jails reported the most serious offense type for 89.17%, or 7,555 of them. Of the inmates for whom the most serious offense type was reported, 78.17% had felony offenses, 19.34% were held on misdemeanor offenses and 2.49% were held on ordinance offenses.

Table 8: Percentage of Mental Illness by Offense Type-Crime Type

| Year | Felony | Misdemeanor | Ordinance | |
|------|--------|-------------|-----------|--|
| 2019 | 78.17% | 19.34% | 2.49% | |
| 2018 | 74.59% | 21.22% | 4.19% | |
| 2017 | 76.93% | 20.52% | 2.54% | |
| 2016 | 80.58% | 16.85% | 2.57% | |
| 2015 | 75.85% | 22.04% | 2.12% | |
| 2014 | 76.96% | 20.68% | 2.36% | |
| 2013 | 69.70% | 26.93% | 3.38% | |
| 2012 | 73.39% | 24.02% | 2.60% | |
| 2011 | 76.95% | 20.96% | 2.09% | |

Table 9: Percentage of Most Serious Offense-Crime Type of the General Population

| | Felony | Misdemeanor | Ordinance |
|------------------------------|--------|-------------|-----------|
| 2019 2018 2017 2016 | 71% | 26% | 3% |
| 2018 | 70% | 27% | 3% |
| 2017 | 70% | 27% | 3% |
| 2016 | 67% | 29% | 4% |

Figure 16 illustrates the percentage each offense type comprises of the total mentally ill population reported in question 8 of the survey, which references Most Serious Offense. The count of mentally ill inmates used for this graph does not include 195 inmates held for ordinance violations.

Figure 16: Percentage of Mental Illness by Most Serious Offense Type (Crime Severity)

| Diagnosis | 0.53% | -0.75% | -1.23% | 3.73% | 2.48% | -4.20% | 0.07% |

Note: The percentages in Figures 18, 19 and 20 are from a total mentally ill population of 7,555.

Inmate Aggression

There were 503 documented incidents of inmate aggression (to include physical or sexual assault and/or threats of violence) toward other inmates and 313 documented incidents of inmate aggression toward jail staff in the month of June, 2019. 159 inmate perpetrators had been diagnosed as mentally ill, and 76 victims of inmate aggression had been diagnosed as mentally ill.

Table 10: Inmate Aggression

| Year | Toward Inmates | Toward Jail Staff | Perpetrators MI | Victims MI |
|------|----------------|-------------------|-----------------|------------|
| 2019 | 503 | 313 | 159 | 76 |
| 2018 | 337 | 132 | 117 | 46 |
| 2017 | 318 | 137 | 92 | 36 |
| 2016 | 321 | 108 | 134 | 53 |
| 2015 | 288 | 104 | 133 | 56 |
| 2014 | 353 | 132 | 97 | 74 |
| 2013 | 287 | 90 | 91 | 33 |
| 2012 | 297 | 208 | 90 | 35 |

During FY2019, there were 43 inmates who died while in the custody of a local or regional jail. Twelve of these inmates were reported by jails to have died due to an unnatural cause. Of the twelve unnatural deaths in custody, ten were confirmed as suicide. Whether or not these inmates were suffering from a mental illness is unknown.

Table 11: Deaths in Jails

| Year | Death by | Death by |
|---------|---------------|-----------------|
| | Natural Cause | Unnatural Cause |
| FY2019 | 43 | 12 |
| FY2018 | 42 | 15 |
| FY2017 | 20 | 10 |
| FY2016 | 25 | 6 |
| FY2015 | 0 | 15 |
| FY2014 | 33 | 11 |
| FY2013 | 5 | 6 |
| FY 2012 | 27 | 13 |
| FY 2011 | 29 | 6 |

Note: Figures do not include potential deaths of individuals on Home Electronic Monitoring

Treatment Expenditures

The following reflects the cost of all mental health treatment, including medications, as reported by the jails for FY19. Some jails provided estimated or pro-rated annual costs; total figures have not been audited. Seven jails did not report cost information for medications; seven jails did not report the cost of mental health services, excluding medications.

- The total reported cost of all psychotropic medications administered was \$3.8 million.
- The total reported cost of mental health services, excluding medication but including medical doctors and nursing, was \$16.8 million. This was \$1.5 million less than reported for FY18.
- Total cost of mental health treatment was estimated at approximately \$20.7 million in FY19.
 Not all jails reporting mental health treatment costs reported their funding source, there it is reported that 66.92% of the total costs were funded by the locality, 6.66% funded by the state, 2.37% funded by the federal government, 8.92% by other funding sources, and the breakdown of fund source for the remaining 15.14% of total costs is unknown.

Table 12: Treatment Expenditures

| Year | Medication | MH Services | Total Cost |
|------|---------------|----------------|----------------|
| 2019 | \$3.8 million | \$16.9 million | \$20.7 million |
| 2018 | \$3.8 million | \$17.8 million | \$21.6 million |
| 2017 | \$3.8 million | \$10.5 million | \$14.3 million |
| 2016 | \$3.7 million | \$10.3 million | \$14 million |
| 2015 | \$5.1 million | \$9.1 million | \$14.2 million |
| 2014 | \$3.6 million | \$9.1 million | \$12.7 million |
| 2013 | \$2.7 million | \$8 million | \$10.7 million |
| 2012 | \$3.7 million | \$9.6 million | \$13.3 million |

Note: Culpeper County Jail, Henry County Jail, Riverside Regional Jail, and New River Valley Regional Jail reported that mental health services were provided but did not report the cost of such services.

Note: Albemarle-Charlottesville Regional Jail, Hampton Roads Regional Jail, Pittsylvania County Jail, Portsmouth City Jail Southampton County Jail and Riverside Regional Jail reported mental health service but did not report the funding source.

Jail Staff & Maintenance of Mental Health Data

Depending on the operational capacity of the jail, the number of staff members, including jail officer/sworn deputies and civilian personnel, ranges from 11 to 555.

- 46 of 57 reporting jails provide mental health training to each new jail officer/deputy prior to his/her initial assignment to the jail. Of these jails, there is an average of 7.9 hours of mental health training provided per jail officer/deputy. Four jails provide 20 hours or greater of mental health training per jail officer/deputy prior to initial assignment.
- 40 of 57 reporting jails require jail officers/deputies to complete additional training in mental health topics annually. Of these jails, jail officers/deputies are required to complete an average of 3 hours of training in mental health topics each year.

Forty-six(46) jails indicated that their jail's electronic inmate management system includes mental health screening items, while 9 jails indicated that their electronic inmate management system includes inmate psychiatric diagnoses.

Areas of Greatest Need for Funding

Jails frequently report that housing mentally ill offenders creates unique challenges, and that the needs of this population would be better served outside of local and regional jails. However, the jails have made it clear that if they must continue housing this special population, additional funding is needed to assist with these challenges. In the 2019 survey, jails were asked to report the areas in which they felt additional funding would be most beneficial, if additional funding were made available. Fifty three (53) responded to the question regarding additional funding needs, and the top responses were: additional staff (particularly discharge planning and case management), medication, jail expansion/mental health beds and mental health training.

Figure 19 illustrates the percentage of responding jails reporting each type of funding that would be most beneficial. Each jail may have reported more than one type of funding that would be of greatest benefit.

Crisis Intervention Teams

The Department of Criminal Justice Services (DCJS) and the Department of Behavioral Health and Developmental Services (DBHDS) collaborate to support and administer Crisis Intervention Team (CIT) programs across the Commonwealth. At its core, CIT provides 1) law enforcement crisis intervention training to enhance response to individuals exhibiting signs of a mental illness; 2) a forum to promote effective systems change and problem solving regarding interaction between the criminal justice and mental health care systems; and 3) improved community-based solutions to enhance access to services for individuals with mental illness. Successful CIT programs improve officer and consumer safety, reduce inappropriate incarceration and redirect individuals with mental illness from the criminal justice system to the health care system when to do so is consistent with the needs of public safety.

Although CIT training is primarily for law enforcement, it is also offered to other first responders such as Fire and EMS, mental health staff, correctional officers, and others. In local and regional jails, the primary purpose of the CIT training is to help jail officers recognize when a person may be suffering from a mental illness, to give them a better awareness of the needs of individuals with mental illness and to give them the tools and strategies needed for de-escalation in a situation where a mentally ill offender appears to be in crisis.

Fifty five (55) of 57 reporting jails have jail officers/deputies who have completed Crisis Intervention Team (CIT) training. Of these jails, an average of 45 jail officers/deputies in each jail has completed CIT training. Sixteen jails reported that at least half of their total staff has completed CIT training.

CIT Programs are comprised of three components: a community engagement component, a training component, and an access to services component. The access to services component is typically achieved though Crisis Assessment Sites. Assessment Sites are designed to enable police officers or sheriffs' deputies to take a person experiencing a mental health crisis for quick and appropriate mental health assessment and linkage to treatment in lieu of arrest or jail.

Forty-two Crisis Assessment Sites currently operate, under the authority of 38 Community Services Boards. Due to geographical challenges there are several localities with more than one site. In addition to the established 42 CIT assessment sites, DBHDS received funding in FY19 to establish five new sites. The new sites are located in Abingdon (Highlands CSB), Lebanon (Cumberland Mountain CSB), Norton (Planning District 1 CSB), Winchester (Northwestern CSB), and Farmville (Crossroads CSB). They have begun accepting consumers but data from these sites is limited as they are still in the first year of operation. Additional information about CIT Programs may be gleaned from DBHDS FY20 Crisis Intervention Team Report, currently in progress. This report is due for completion and posting to the DBHDS website by the end of CY20.

Current Initiatives, Final Remarks & Future Measures

Sheriffs and Jail Superintendents were notified in June, 2019 of survey deadlines and instructions, and were forwarded an advanced copy of the mental health survey. With the addition of questions in 2018 regarding assessment and diagnosis, no updates to the survey were deemed necessary this year.

In 2018, DBHDS created a workgroup comprised of a variety of criminal justice and mental health stakeholders, including licensed mental health professionals and advocates, CSB staff, and jail administration. The goal of the workgroup was to develop recommended minimum standards for behavioral healthcare in local and regional jails. This Mental Health Standards Committee presented their recommendations in August, 2018.

2019 legislation authorized the Board of Corrections (BOC) to establish minimum standards for medical as well as behavioral health care services in local and regional jails. To that end, the 2018 Mental Health Standards Committee was reconvened to assist the BOC in fulfilling their charge. Expanding upon its 2018 recommendations, the Mental Health Standards Committee provided the BOC with its updated recommended standards as well as a brief review of potential funding needs to implement the recommendations. The final report will be published by the BOC on November 1st, 2019.

The 2016 Appropriation Act, Chapter 780, Item 398, paragraph J. directed the Department of Criminal Justice Services (DCJS) to establish mental health pilot programs at six local and regional jails to provide behavioral health services to inmates while incarcerated, and a continuum of care when they are released back into communities. The Act appropriated \$1 million in FY17 and \$2.5 million in FY18 for the establishment of the pilot programs. DCJS has continued to track the development and progress of the six sites who received grant funding: Chesterfield County Sheriff's Office (\$416,281 awarded); Hampton Roads Regional Jail (\$939,435 awarded); Middle River Regional Jail (\$536,384 awarded); Prince William Adult Detention Center (\$9410,898 awarded); Richmond City Sheriff's Office (\$670,813 awarded); and Western Virginia Regional Jail (awarded \$526,185). Updates on the last twelve months of operations are still outstanding.

Virginia's Department of Behavioral Health and Developmental Services (DBHDS) currently funds 12 diversion sites across the Commonwealth. These programs are diverse in their approaches to jail diversion, but all twelve programs target individuals with serious mental illness and/or co-occurring serious mental illness and substance use disorders. In July, 2018 DBHDS was allocated \$708,663 per year in FY19 and FY20 for the creation of three rural, Intercept 2 diversion sites (booking/initial court hearing diversions). These three new sites were awarded funding and began implementation in FY19. In addition, DBHDS was allocated \$1.6 million per year in FY19 and FY20 for jail discharge planning for inmates with serious mental illness. DBHDS selected two regions for funding. Within the regions chosen, funds have been allocated to multiple CSB's and one regional jail (Hampton Roads Regional Jail and Southwest Virginia Regional Jail).

The Compensation Board, with input and assistance from DBHDS and other appropriate executive agencies, the Virginia Sheriffs' Association and the Virginia Association of Regional Jails, and staff of appropriate legislative committees, will continue to review the survey instrument on an annual basis and make improvements and updates as needed.

Data in this report continues to be utilized by executive and legislative agencies and committees for research, as well as to assist in the development of funding needs analysis for jail mental health

treatment, jail diversion programs, expansion of Crisis Intervention Teams and post-confinement follow-up care.

Further details of data gleaned from the 2019 mental health survey and summarized in this report, including the survey instrument and organization of jail regions, are available in the appendices of this document.

Appendix A: 2019 Mental Illness in Jails Survey

Virginia Local and Regional Jails Survey: Assessment and Treatment of Inmates with Mental Illness **Please do not attempt to complete this survey before July 1, 2019.**

The Virginia Sheriffs' Association and the Virginia Association of Regional Jails have reviewed this survey, and encourage their members to respond. Our goal is to provide information to the Compensation Board, the Virginia General Assembly, and the Dept. of Behavioral Health and Developmental Services (DBHDS), regarding jail resource needs for appropriately identifying and managing inmates with mental illness.

Below are a list of definitions that may be helpful in completion of this survey.

ADP: Average Daily Population of the jail. This information may be obtained from the LIDS Technician.

BHA: Behavioral Health Authority

Co-occurring Disorder (dual diagnosis): A comorbid condition in which an individual is suffering from a mental illness and substance abuse problem.

Clinical Diagnosis: A Diagnostic and Statistical Manual of Mental Disorder – Fifth Edition (DSMV) Axis I or Axis II disorder/condition. In general, clinical diagnosis are determined by psychiatrists, licensed clinical psychologists, licensed clinical social workers, or licensed professional counselors.

CSB: Community Services Board

DBHDS: Department of Behavioral Health and Developmental Services

Group Mental Health Counseling: Meeting of a group of individuals with a mental health clinician for the purpose of providing psycho-education about various mental health topics and/or to provide group feedback and support with regard to mental health issues. Examples could include stress management, anger management, coping with depression, or NAMI meeting.

Group Substance Abuse Treatment: Meeting of a group of individuals with a substance abuse clinician for the purpose of providing psycho education about various substance abuse topics and/or to provide group feedback and support with regard to substance abuse issues. Examples could include AA meeting, NA meeting, or relapse prevention groups.

Individual Counseling: One on one session with licensed professional with the expressed purpose of improving the individual's understanding of their issues, enhancing their ability to cope with issues, and aiding them in the development of healthy coping skills.

MH: Mental Health

Mental Health Screening: A brief process conducted at time of intake by staff in order to identify potential mental health conditions/disorders and a need for further assessment. A validated screening tool must be used by staff. A screening is generally brief and narrow in scope and does not provide a diagnosis. Screenings do not need to be completed by a mental health professional.

Mental Health Screening Instrument: An instrument utilized to make an initial determination of an individual's mental health status, using standardized, validated instrument.

Approved screening instruments are the Brief Jail Mental Health Screen (BJMHS) and the Correctional Mental Health Screen (CMHS). Use of any other screening instrument must first be approved by DBHDS. The standard booking questions related to mental health issues are not considered a screening instrument.

Mental Health Services: Any type of service that helps treat or manage an individual's mental health disorder(s). These can include but are not limited to individual mental health counseling, group mental health counseling, case management, or other types of individual or group mental health treatments, therapies or supports. Many mental health services also address co-occurring substance-related disorders (see definition).

Mental Illness: Conditions that disrupt a person's thinking, perceptions, feeling, mood, ability to relate to others and/or daily functioning.

Most Serious Offense: Question 8 asks that you report an inmates' offense type using their most serious offense. Offense severity should be ranked as follows: Felony-Violent, Felony-Drug, Felony-Nonviolent, Misdemeanor-Violent, Misdemeanor-Drug, Misdemeanor-Nonviolent, Ordinance

Professional Mental Health Assessment: A mental health assessment is a comprehensive evaluation of a person's functioning and it includes history as well as current symptoms. It can assist in diagnosis, treatment planning, and need for further treatment. Assessments must be completed by a qualified mental health professional.

Professional Diagnosis: A review of a client's clinical condition conducted by a licensed mental health professional (Clinical Psychologist, Clinical Social Worker, Psychiatrist, Licensed Professional Counselor) or a licensed medical professional (Doctor, Nurse Practitioner) resulting in a diagnosis.

A QMHP is not qualified to make a diagnosis.

Psychiatrist: A psychiatrist is a medical doctor who specializes and is certified in treating mental health disorders.

Psychotropic Medications: Psychotropic medications are commonly used to treat mental health disorders and are those which are capable of affecting the mind, emotions and behavior of an individual.

Qualified Mental Health Professional (QMHP): This definition may be reviewed from the website of DBHDS. http://23.29.59.140/library/quality%20risk%20management/qmhp.pdf

Special Education Inmates: The Federal Government requires jails to provide Special Education to inmates in need of it.

Substance Abuse: A maladaptive pattern of substance use leading to clinically significant impairment or distress.

Validated Instrument: Questionnaire which has undergone a validation procedure to show that it accurately measures what it aims to do, regardless of who responds, when they respond, and to whom they

respond. The Brief Jail Mental Health Screen and the Correctional Mental Health Screen are examples of validated instruments.

| | ease provide the data for your jail by July 16, 2019. nank you for completing this survey. (Please be sure not to use commas in any numeric field) | | |

| | |

18. Please indicate the number of inmates with mental illness in each of the categories below. Please count each inmate only once for this item (unduplicated counts), counting only the most serious or prominent diagnosis for that inmate. (Do not include federal or out-of-state contract inmates.) Be sure to indicate the total number of inmate days for each category.

The LIDS June Payment Details Report can provide a pretrial jail roster to assist in separating pretrial from post conviction inmates, as well as data on the number of inmate days. (May financials must be certified/approved before June may be generated).

Please be sure to only include inmate days in the 'Total Inmate Days' **not** inmate counts. The final column is **not** a sum of the counts in the first four columns.

| Mental Illness Category | Females (Pretrial) in jail in June 2019 | Females (PostConviction) in jail in June 2019 | Males (Pretrial) in jail in June 2019 | Males (PostConviction) in jail in June 2019 | Total Inmate Days |
|---|--|--|--|--|-------------------------|
| Inmates with Schizophrenia, Schizoaffective Disorder or Delusional Disorder | | | | | |
| Inmates with Bipolar Disorder or Major Depressive Disorder | | | | | |
| Inmates with Dysthymic Disorder (mild depression) | | | | | |
| Inmates with Anxiety Disorder | | | | | |
| Post Traumatic Stress Disorder (PTSD) | | | | | |
| Inmates with other mental illness diagnosis | | | | | |
| Inmates believed by history, behavior or other indicators to be mentally ill, for whom no clinical diagnosis is available | | | | | |
| Total number of inmates diagnosed with or suspected to have a mental illness in this jail during the month of June 2019 | | | | | |

| 19. | Please indicate the offense type of the mentally ill inmates in each category. Report the inmates' offense type |
|-----|---|
| | using their most serious offense, for current confinement. (Do not include federal or out-of-state |
| | contract inmates.) |

In order to accurately complete this question the mental health staff must either provide the LIDS Technician with a list of mentally ill inmates (this list does not need to include diagnoses) so that they may provide the mental health staff with a most serious offense for each offender, or access LIDS themselves to determine the most serious offense.

- 28. Jail Medication Formulary: Section 53.1-126 of the *Code of Virginia* requires that sheriffs and regional jail superintendents "...purchase at prices as low as reasonably possible all foodstuffs... and medicine as may be necessary" for the care of the inmates in their jails. Is your jail's purchase of psychotropic medication limited by Section 53.1-126?
 - o Yes
 - o No
- 29. The jail's formulary is set by:

| a. | Contract general medical services provider (Name of contractor providing medication) |
|----|---|
| | |
| b. | . Special contract with local or national pharmacy (Name of local or national pharmacy) |
| | |

c. Other

Question <u>30a</u> asks that you report on the number of medications dispensed, so <u>one inmate could be counted multiple times</u> if they are taking more than one psychotropic medication.

Question **30b** asks for the <u>unduplicated</u> count of inmates prescribed psychotropic medication, so **each inmate will be counted only once** regardless of the number of medications they are taking.

30a. List the numbers of inmates who received each type of psychotropic medication treatment at your jail during the month of June 2019:

If an inmate received medication from more than one category, please count that inmate in each relevant category. Some inmates receive treatment with more than one type of medication; the number of medications administered in June may exceed the number of inmates receiving treatment.

Please count an inmate for each type of antipsychotic or mood stabilizer medication he or she receives, and count only once for all types of antidepressant or antianxiety medication, even if the inmate received more than one type of antidepressant or antianxiety medication.

| Medication Categories | | Total number of Jail Inmates receiving each medication for treatment of mental illness | | |
|------------------------------|---|--|--|--|
| I. Antipsychotic medications | Total number of inmates treated with each brand or type of medication | Please place an X in this column if the jail does not provide this medication | | |
| Haldol/haloperidol | | | | |

| Zyprexa/olanzapine | | |
|---|--|--|
| Risperdal/risperidone | | |
| Seroquel/quetiapine | | |
| Triliafon/perphenazine | | , |
| Prolixin/fluphenazine | | |
| Thorazine/chlorpromazine | | |
| Abilify/aripiprazole | | |
| Geodon/ziprasidone | | |
| Clozaril/clozapine | | |
| Other antipsychotic medication(s) | | |
| II. Mood Stabilizer/Anticonvulsant medications for major Mood Disorder | Total number of inmates treated with earmedication brand/type | ch Please place an X in this column if the jail does not provide this medication |
| Depakote/Depakene/valproic acid | | |
| Lithobid/lithium carbonate | | |
| Tegretal/carbamazepine | | |
| Topamax/topiramate | | |

Appendix D: Inmates Screened

| Jail Num | Jail Name | Inmates screened with BJMHS | Inmates screened with CMHS | Inmates Screened with JSAT | Inmates Recommended for MH Assessment | Inmates Not Screened | Explanation of unscreened inmates |
|-------------|--|--------------------------------------|-------------------------------------|-------------------------------------|---------------------------------------|----------------------------|---|
| 001 | Accomack County Jail | 208 | 0 | 0 | 30 | 0 | |
| 000 | Albemarle-Charlottesville Regional Jail | 740 | | | 5 0 | | If inmates are not screened, it is due to quick releases or transfers to another facilty or hospital; active mh symptoms and/or intoxication that prevents completion of the |
| 003 | Alleghany Reg Jail | 746 | 0 | 0 | 58 | 0 | screening. |
| 005 | Arlington County Detention Facility | 191 | 0 | 0 | 77 | 209 | Some of these barriers include inmates who are committed that are under the influence of alcohol/drugs, inmates who are acutely psychotic, and inmates who present with suicidal/homicial ideation. However in those instances, jail based csb mh staff will receive a call from booking to screen the inmate. Also, at this time the jail rms system is unable to pull data on why 209 inmates were not screened but this number does include weekenders and court and returns that may have been booked in multiple times and therefore the screening was not done again. |
| 023 | Botetourt County Jail | 0 | 259 | 0 | 31 | 0 | |
| 041 | Chesterfield County Jail | 452 | 148 | 0 | 98 | 11 | 4-bonded, 4-intoxicated (could not answer), 1- transferred, 2-served sentence |

INSTRUCTIONS FOR COMPLETING THE BRIEF JAIL MENTAL HEALTH SCREEN

GENERAL INFORMATION:

This Brief Jail Mental Health Screen (BJMHS) was developed by Policy Research Associates, Inc., with a grant from the National Institute of Justice. The BJMHS is an efficient mental health screen that will aid in the early identification of severe mental illnesses and other acute psychiatric problems during the intake process.

This screen should be administered by Correctional Officers during the jail's intake/booking process.

INSTRUCTIONS FOR SECTION 1:

NAME: Enter detainees name — first, middle initial, and last

DETAINEE#: Enter detainee number.

DATE: Enter today's month, day, and year.

TIME: Enter the current time and circle AM or PM.

INSTRUCTIONS FOR SECTION 2:

ITEMS 1-6:

Place a check mark in the appropriate column (for "NO" or "YES" response).

If the detainee REFUSES to answer the question or says that he/she DOES NOT KNOW the answer to the question, do not check "NO" or "YES." Instead, in the General Comments section, indicate REFUSED or DON'T KNOW and include information explaining why the detainee did not answer the question.

<u>ITEMS 7-8:</u>

ITEM 7: This refers to any prescribed medication for any emotional or mental health problems.

ITEM 8: Include any stay of one night or longer. Do NOT include contact with an Emergency Room if it did not lead to an admission to the hospital

If the detainee REFUSES to answer the question or says that he/she DOES NOT KNOW the answer to the question, do not check "NO" or "YES." Instead, in the General Comments section, indicate REFUSED or DON'T KNOW and include information explaining why the detainee did not answer the question.

General Comments Column:

As indicated above, if the detainee REFUSES to answer the question or says that he/she DOES NOT KNOW the answer to the question, do not check "NO" or "YES." Instead, in the General Comments section, indicate REFUSED or DON'T KNOW and include information explaining why the detainee did not answer the question.

All "YES" responses require a note in the General Comments section to document:

- (1) Information about the detainee that the officer feels relevant and important
- (2) Information specifically requested in question

If at any point during administration of the BJMHS the detainee experiences distress, he/she should follow the jails procedure for referral services.

INSTRUCTIONS FOR SECTION 3:

OFFICER'S COMMENTS: Check any one or more of the four problems listed if applicable to this screening. If any other problem(s) occurred, please check OTHER, and note what it was.

REFERRAL INSTRUCTIONS:

Any detainee answering YES to Item 7 or YES to Item 8 or YES to at least two of Items 1-6 should be referred for further mental health evaluation. If there is any other information or reason why the officer feels it is necessary for the detainee to have a mental health evaluation, the detainee should be referred. Please indicate whether or not the detainee was referred.

Correctional Mental Health Screen for Men (CMHS-M)

| | | | | | | / / | : |
|------|-------|--------|----|------------|------|------------|------|
| Name | Last, | First, | MI | Detainee # | Date | mm/dd/year | Time |

| | 1 | • | |
|--|----|-----|----------|
| QUESTIONS | NO | YES | COMMENTS |
| 1. Have you ever had worries that you just can't get rid of? | | | |
| 2. Some people find their mood changes frequently – as if they | | | |
| spend everyday on an emotional roller coaster. Does this sound | | | |
| like you? | | | |
| 3. Do you get annoyed when friends or family complain about their | | | |
| problems? Or do people complain that you're not sympathetic to | | | |
| their problems? | | | |
| 4. Have you ever felt like you didn't have any feelings, or felt | | | |
| distant or cut off from other people or from your surroundings? | | | |
| 5. Has there ever been a time when you felt so irritable that you | | | |
| found yourself shouting at people or starting fights or | | | |
| arguments? | | | |
| 6. Do you often get in trouble at work or with friends because you | | | |
| act excited at first but then lose interest in projects and don't | | | |
| follow through? | | | |
| 7. Do you tend to hold grudges or give people the silent treatment | | | |
| for days at a time? | | | |
| 8. Have you ever tried to avoid reminders, or to not think about, | | | |
| something terrible that you experienced or witnessed? | | | |
| 9. Has there ever been a time when you felt depressed most of the | | | |
| day for at least 2 weeks? | | | |
| 10. Have you ever been troubled by repeated thoughts, feelings, | | | |
| or nightmares about something you experienced or witnessed? | | | |
| 11. Have you ever been in a hospital for non-medical reasons such | | | |
| as in a psychiatric hospital? (Do NOT include going to an | | | |
| Emergency Room if you were not hospitalized.) | | | |
| 12. Have you ever felt constantly on guard or watchful even when | | | |
| you didn't need to, or felt jumpy and easily startled? | | | |

INSTRUCTIONS FOR COMPLETING THE CMHS-M

General Information:

The CMHS is a tool designed to assist in the early detection of psychiatric illness during the jail intake process. The Research Team under the direction of Drs. Julian D. Ford and Robert L. Trestman at the University of Connecticut Health Center developed this Correctional Mental Health Screen for Men (CMHS-M) with a grant funded by the National Institute of Justice.

Instructions for administration of the CMHS-M:

Correctional Officers may administer this mental health screen during intake.

Name: Detainee's name- Last, first and middle initial Detainee#: Detainee's facility identification number

Date: Today's month, date, year
Time: Current time (24hr or AM/PM)

Questions #1-12 may be administered as best suits the facility's policies and procedures and the reading level, language abilities, and motivation of the detainee who is completing the screen. The method chosen should be used consistently. Two recommended methods:

- Staff reads the questions out loud and fills in the detainee's answers to the questions on the form
- Staff reads the questions out loud, while the detainee reads them on a separate sheet and fills in his answers

Each question should be carefully read, and a check mark placed in the appropriate column (for "NO" or "YES" response).

The staff person should add a note in the **Comments** Section to document any information that is relevant and significant for any question that the detainee has answered "YES."

If the detainee declines to answer a question or says he does not know the answer to a question, do NOT check "YES" or "NO." Instead, record DECLINED or DON'T KNOW in the **Comments** box.

Total # YES: total number of YES responses

General Comments: Staff may include information here to describe overall concerns about the responses (for example: intoxicated, impaired, or uncooperative)

Referral Instructions:

<u>Urgent Referral</u>: A referral for **urgent** mental health evaluation may be made by the staff person if there is any behavioral or other evidence that a detainee is unable to cope emotionally or mentally or is a suicide risk.

<u>Routine Referral</u>: A detainee answering "YES" to 6 or more items should be referred for routine mental health evaluation. A referral also may be made if the staff person has any concerns about the detainee's mental state or ability to cope emotionally or behaviorally.

** If at any point during administration of the CMHS-M the detainee experiences more than mild and temporary emotional distress (such as severe anxiety, grief, anger or disorientation) he should be referred for immediate mental health evaluation.

Referral: Check the appropriate box for whether a detainee was referred. If referred, check URGENT or ROUTINE, enter the date of the referral and the mental health staff person or mental health clinic to whom the referral was given.

Person completing screen: Enter the staff member's name
