# **Completed Capital Projects Report** For Fiscal Year 2023

December 1, 2023

### I. Introduction

The Director of the Department of General Services (DGS) is required by Section 2.2-4383.B to receive and consolidate public body-reported data on completed capital projects for submission to the Governor and the Chairmen of the House Appropriations and Senate Finance Committees no later than December 1 of each year. This requirement became effective on July 1, 2017 and directs public bodies to include completed capital projects in excess of \$2M and to include, at a minimum, the following data elements:

- Procurement Method
- Project Budget
- Actual (completed) Project Costs
- Expected Timeline
- Actual Completion Time
- Post-Project Issues

## II. Reporting Methodology

DGS utilized eVA to receive and compile data reported by the public bodies. Public bodies were directed to a survey in eVA to report the required data by the statutory deadline of November 1<sup>st</sup>. The instructions included the nature of the data to be reported for projects meeting the following criteria:

- The project was completed in the previous fiscal year.
- Total construction cost was greater than \$2 million.
- The initial solicitation (RFQ/IFB) was issued after July 1, 2017.

Public bodies were notified of the requirement to report data for projects meeting the criteria; however, confirmation that no projects met the criteria was not required from the public bodies other than for the public body to avoid reminders of the reporting requirements. As such, there is the possibility that projects were completed but not reported.

### III. Reported Data

The consolidated public body-reported data is included in Table 1. Projects that were reported, but were outside the scope of the reporting requirement per the legislation, were removed.

# Completed Capital Projects Report
