|                                                                    | Central<br>Virginia<br>CU | Fluvanna<br>CC | State<br>Farm<br>WC | Virginia<br>CC for<br>Women |
|--------------------------------------------------------------------|---------------------------|----------------|---------------------|-----------------------------|
| Number of inmates known to be pregnant in the facility             | 0                         | 3              | 0                   | 0                           |
| Number of inmates in postpartum recovery in the facility           | 0                         | 2              | 0                   | 0                           |
| Number of women inmates in the facility during the month*          | 211                       | 1,068          | 132                 | 440                         |
| Total number of inmates in the facility during the month**         | 211                       | 1,068          | 132                 | 440                         |
| Number of deaths of inmates in the facility**                      | 0                         | 0              | 0                   | 0                           |
| Number of deaths of inmates known to be pregnant in the facility   | 0                         | 0              | 0                   | 0                           |
| Number of deaths of inmates in postpartum recovery in the facility | 0                         | 0              | 0                   | 0                           |

\*Total number of inmates who spent any amount of time in the facility indicated during the month indicated.

^VADOC facilities are gender-specific so the numbers in this row will always equal the numbers in the row above.

\*\*Includes deaths of inmates that occurred in these facilities and deaths of inmates assigned to these facilities who passed away in a hospital.

All information was current as of September 14, 2026.
