Richmond, VA 23219

RE: Annual report on the information and communications technology per § 2.2-3504

Members of the General Assembly:

Pursuant to § 2.2-3504 of the Code of Virginia, the Virginia Economic Development Partnership (VEDP) submits this report regarding information and communications technology (ICT) that may not conform to applicable digital accessibility requirements and is not otherwise excluded under applicable federal exceptions.

VEDP recently launched a new public website and continues to evaluate and improve accessibility as part of ongoing website enhancements, content updates, and routine maintenance. Accessibility testing and monitoring are performed using tools provided through the Virginia Information Technologies Agency (VITA), together with internal review and remediation activities. Testing indicates that VEDP's public-facing websites are generally accessible while continuing to identify areas for improvement. Identified issues are prioritized and addressed as part of ongoing website operations, content publishing, and future development efforts. Accessibility considerations are also incorporated into website development and technology procurement activities.

Based on current information, VEDP does not anticipate a material fiscal impact beyond the normal operational costs associated with maintaining and improving its public websites.

VEDP remains committed to improving digital accessibility and providing accessible digital services in accordance with applicable state and federal requirements.

Sincerely,

Jason El Koubi
President and Chief Executive Officer
