December 1, 2025

To: The Honorable L. Louise Lucas, Chair, Senate Finance & Appropriations Committee  
The Honorable Luke E. Torian, Chair, House Appropriations Committee  
The Honorable Patrick A. Hope, Chair, House Courts of Justice Committee  
The Honorable Scott A. Surovell, Chair, Senate Courts of Justice Committee  
The Honorable Janet V. Kelly, Secretary, Health and Human Resources  
Kristen J. Howard, Executive Director, Virginia State Crime Commission

From: Nelson Smith, Commissioner, Department of Behavioral Health and Developmental Services

RE: § 37.2-903 of the Code of Virginia

§ 37.2-903 of the Code of Virginia directs the Department of Behavioral Health and Developmental Services (DBHDS) to submit an annual report on the Sexually Violent Predator (SVP) screening protocol. Specifically, the language states:

*The Commissioner shall report annually by December 1 to the Chairmen of the House Committees on Appropriations and Courts of Justice, the Senate Committees on Courts of Justice and Finance, and the Crime Commission on (i) the assessment protocol approved by the Director and Commissioner to identify prisoners and defendants who appear to meet the definition of a sexually violent predator pursuant to subsections B and C, including the specific screening instrument adopted and the criteria used to determine whether a prisoner or defendant meets the definition of a sexually violent predator and (ii) the number of prisoners screened pursuant to subsection B and the number of prisoners identified as meeting the definition of a sexually violent predator and referred to the CRC for assessment pursuant to subsection D. Such report shall also include a comparison of the number of defendants identified as appearing to meet the definition of a sexually violent predator and referred to the CRC pursuant to subsection C in the previous year and five years immediately prior thereto.*

On July 1, 2018, an updated screening protocol went into effect to identify Virginia Department of Corrections (DOC) inmates who may be found by the court to meet sexually violent predator (SVP) criteria. The screening protocol utilizes both the Static 99R evidence based actuarial instrument and the application of mitigating and/or aggravating risk factors supported by research as being related to an

inmate's risk of re-offense.

An SVP-eligible inmate is an individual who is presently serving a sentence in DOC on conviction for one of the SVP qualifying crimes listed in Virginia Code §37.2-900, who is approaching their release date or being considered for parole. The Commitment Review Committee (CRC) is established in Virginia Code §37.2-902 to evaluate and make recommendations regarding inmates and defendants relating to SVP civil commitment. The CRC is chaired by the DOC with members drawn from DOC, DBHDS, and the Office of the Attorney General (OAG).

The data below uses the inmate's release date to define the calendar year in which their case and disposition are counted. For example, in Table 1 below, 34 of 454 inmates with release dates in 2020 that were screened for SVP were subsequently referred to the CRC for full evaluation. Of those same 34 inmates referred for full evaluation, 21 were eventually found to meet the criteria as an SVP by the court. Data regarding the SVP screening, assessment, and adjudication rates for 2025 and the past five calendar years is found in Table 1.

**Table 1. Annual SVP Screening Data Summary**

Calendar Year	2020	2021	2022	2023	2024	2025
# of Inmates Screened	454	464	453	444	411	418
# of inmates referred to CRC for full evaluation	34	49	31	37	27	32
% of those screened who were referred to CRC	7%	11%	7%	8%	7%	8%
# of Inmates referred to the CRC who were Adjudicated SVP	21	34	22	26	17 (9+8)*	23 (2+21)*
% of Inmates Evaluated who were Adjudicated SVP	62%	69%	71%	70%	63%	72%

*\* SVP cases may take years from the date an individual is screened to adjudication as an SVP by the court. Data for these years includes estimates (number of cases adjudicated + estimated number from those still in court) as not all cases have reached final disposition at this time. Result figures are estimates based on yearly averages for OAG filings and related adjudications (90% adjudication rate).*

Overall, there has been a reduction in the percentage of inmates screened when compared with the pre-2018 protocol and increase in the percentage of inmates eventually adjudicated SVP. This suggests that the current protocol continues to identify the high-risk sex offenders who may eventually be found by the court to meet SVP criteria more accurately than the previous protocol.

DBHDS and DOC will continue to collaborate to ensure Virginia is using the best practices and identifying the inmates at highest risk for sexually reoffending in the most efficient manner possible. Further, DBHDS, DOC, and OAG will continue to routinely discuss the SVP process, monitor the impact of the current protocol, and recommend adjustments as needed.
